1 UNITED STATES OF AMERICA,
Eastern Division of the Eastern Judicial District of Missouri, ss:

In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA, COMPLAINANT,

vs.

THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS; The St. Louis Merchants Bridge Terminal Railway Company; The Wiggins Ferry Company; The St. Louis Bridge Company; The St. Louis Merchants Bridge Company; The Missouri, Kansas & Texas Railway Company; The St. Louis & San Francisco Railway Company; The Chicago & Alton Railway Company; The Baltimore & Ohio Southwestern Railroad Company; The Illinois Central Railroad Company; The St. Louis, Iron Mountain & Southern Railway Company; The Chicago, Burlington & Quincy Railway Company; The St. Louis, Vandalia & Terre Haute Railroad Company; The Wabash Railroad Company; The Cleveland, Cincinnati, Chicago & St. Louis Railway Company; The Louisville & Nashville Railroad Company; The Southern Railway Company; The Chicago, Rock Island & Pacific Railway Company; The Missouri Pacific Railway Company; The Central Trust Company of New York; A. A. Allen, S. M. Felton, A. J. Davidson, W. M. Green, J. T. Harahan, C. S. Clarke, H. Miller, Benjamin McKean, Joseph Ramsey, George E. Evans, C. E. Schaff, T. C. Powell, J. F. Stevens, A. G. Cochran, W. S. McChesney, Julius Walsh, V. W. Fisher, and S. D. Webster, defendants.

Pleadings, orders, etc.

2 UNITED STATES OF AMERICA,
Eastern Division of the Eastern Judicial District of Missouri, ss:

In the Circuit Court of the United States in and for the division and district aforesaid.

Be it remembered, that heretofore, to wit, on the 21st day of May, A. D. 1909, the following, among other, proceedings were had in

the case wherein United States of America is complainant and Terminal Railroad Association of St. Louis et al. are defendants, cause No. 5250, to wit:

(Order certifying cause to U. S. Supreme Court.)

In the Circuit Court of the United States for the Eastern Division of the Eastern District of Missouri.

THE UNITED STATES OF AMERICA, COMPLAINANT,
vs.
TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al., defendants. | No. 5250.

This to certify that on the 1st day of April, 1909, the above-mentioned cause, which, by a certificate duly filed with the clerk of said court pursuant to the provisions of the act of Congress of February 11, 1903, had been assigned for a hearing before the circuit judges of the Eighth Judicial Circuit, came on for a final hearing on the merits before them and that after submission and full consideration thereof they find themselves equally divided in opinion:

3 Two thereof being in favor of granting some relief to complainant and two thereof being in favor of dismissing the bill.

Wherefore, pursuant to the provisions of the said act of Congress, the above-mentioned cause is hereby certified to the Supreme Court of the United States for review, and the clerk of the Circuit Court of the United States for the Eastern Division of the Eastern District of Missouri will, with all convenient speed, certify and transmit to the Supreme Court of the United States a full, true, and complete transcript of the record and proceedings with all things concerning the same in this cause.

In witness whereof the said judges before whom said cause was heard have hereunto set their hands this the 21st day of May, A. D. 1909.

WALTER H. SANBORN,
WILLIS VAN DEVANTER,
WILLIAM C. HOOK,
ELMER B. ADAMS,
Circuit Judges.

Received, filed, and entered May 24, 1909.

JAMES R. GRAY, *Clerk.*

(Order to use printed record in transcript.)

In the Circuit Court of the United States for the Eastern Division of the Eastern District of Missouri.

THE UNITED STATES OF AMERICA, COMPLAINANT,
vs.
TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al., defendants. | No. 5250.

Whereas in the above-entitled cause a certificate of division
4 has been filed directing the transfer of said cause to the Supreme Court of the United States for review as upon an appeal and further directing that a full, true, and complete transcript of the record and proceedings, with all things concerning the same, be certified and transmitted to the Supreme Court.

And whereas the pleadings, proceedings, testimony, and exhibits herein have been printed and such printed record has been considered by the court as the record in this cause, now, therefore, if the parties hereto, by a written stipulation filed with the clerk, shall waive a comparison of such printed record with the originals of the matter contained therein, then and in that event, for preparing and certifying the transcript consisting of the printed volumes containing the record and proceedings herein, the clerk of this court shall not charge or receive any fee therefor, except his fee for preparing and adding any additional matter that may not be contained in the printed volumes and the fee for the necessary certificate or certificates to properly identify and authenticate said printed volumes as the transcript of the record in this cause.

May 21, 1909.

WALTER H. SANBORN,
WILLIS VAN DEVANTER,
WILLIAM C. HOOK,
ELMER B. ADAMS,
Circuit Judges.

Received, filed, and entered May 24, 1909.

JAMES R. GRAY, *Clerk.*

And afterwards, to wit, on the 16th day of June, A. D. 1909, there was filed in said cause a stipulation as to transcript, which is in words and figures as follows, to wit:

(Stipulation as to transcript.)

5 In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

UNITED STATES OF AMERICA, COMPLAINANT,
vs.
TERMINAL RAILROAD ASSOCIATION ET AL., DEFENDANTS. } No. 5250.

Stipulation.

It appearing from an order made herein on May 21st, 1909, that the court directed the clerk not to charge or receive any fee for preparing and certifying the transcript of the record and proceedings in this cause, except his fees for preparing any additional matter that may not be contained in the printed volumes constituting the record upon which the cause was submitted, provided the parties hereto by a written stipulation filed with the clerk shall waive a comparison of such printed record with the originals of the matter contained therein:

Now, therefore, the said parties by their solicitors hereby expressly waive comparison by the clerk of the printed volumes of the record and proceedings in this cause with the originals of the matter therein contained, and it is further stipulated and agreed by and between the parties hereto that the clerk shall embrace in said transcript, in addition to the said printed volumes, only the following, to-wit: The bill of complaint, the answers, the replications, order of dismissal as to defendant Central Trust Company of New York, and the orders of May 21st, 1909, and any other exhibits not embraced in printed volumes.

EDWARD C. CROW,
CHESTER H. KRUM,
Solicitors for Complainant.
M. F. WATTS,
Solicitor for Defendants.

6 Which said bill of complaint and other papers referred to in said stipulation and not embraced in said printed volumes are respectively in words and figures following, to wit:

(Bill of complaint.)

7 UNITED STATES OF AMERICA,
Eastern Division of the Eastern Judicial District of Missouri, ss:

In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA, COMPLAINANT,
vs.
THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS; The St. Louis Merchants Bridge Terminal Railway Company; The Wiggins Ferry Company; The St. Louis Bridge Company; The St. Louis Merchants Bridge Company; The Missouri, Kansas & Texas Railway Company; The St. Louis & San Francisco Railway Company; The Chicago & Alton Railway Company; The Baltimore & Ohio Southwestern Railroad Company; The Illinois Central Railroad Company; The St. Louis, Iron Mountain & Southern Railway Company; The Chicago, Burlington & Quincy Railway Company; The St. Louis, Vandalia & Terre Haute Railroad Company; The Wabash Railroad Company; The Cleveland, Cincinnati, Chicago & St. Louis Railway Company; The Louisville & Nashville Railroad Company; The Southern Railway Company; The Chicago, Rock Island & Pacific Railway Company; The Missouri Pacific Railway Company; The Central Trust Company of New York; A. Cochran; W. S. McChesney; Julius Walsh; V. W. Fisher; and S. D. Webster, defendants.

8 PETITION.

To the judges of the Circuit Court of the United States for the Eastern Judicial District of Missouri:

Now comes the United States of America, by David P. Dyer, the United States attorney for the Eastern District of Missouri, acting

under direction of the Attorney General of the United States, and brings this its proceeding, by way of petition against the Terminal Railroad Association of St. Louis, a corporation organized and existing under the laws of the State of Missouri; the St. Louis Merchants Bridge Terminal Railway Company, a corporation organized and existing under the laws of the State of Missouri; the Wiggins Ferry Company, a corporation organized and existing under the laws of the State of Illinois; the St. Louis Bridge Company, a corporation organized and existing under the laws of the State of Missouri; the St. Louis Merchants Bridge Company, a corporation organized and existing under the laws of the State of Illinois; the Missouri, Kansas & Texas Railway Company, a corporation organized and existing under the laws of the State of Kansas; the Chicago & Alton Railway Company, a corporation organized and existing under the laws of the State of Illinois; the St. Louis & San Francisco Railway Company, a corporation organized and existing under the laws of the State of Missouri; the Baltimore & Ohio Southwestern Railway Company, a corporation organized and existing under the laws of the States of Ohio, Indiana, and Illinois; the Illinois Central Railroad Company, a corporation organized and existing under the laws of the State of Illinois; the St. Louis, Iron Mountain & Southern Railway Company, a corporation organized and existing under the laws of the State of Missouri; the Chicago, Burlington & Quincy Railway Company, a corporation organized and existing under the laws of the State of Iowa; the St. Louis, Vandalia and Terre Haute Railroad Company, a corporation organized and existing under the laws of the State of Indiana; the Wabash Railroad Company, a corporation which is a consolidation of the Toledo Western Railroad Company, a corporation of Ohio, the Detroit & State Line Wabash Railroad Company, of Michigan, the Wabash Eastern Railway Company of Illinois, the Wabash Western Railway Company of Missouri; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, a corporation organized and existing under the laws of the State of Indiana; the Louisville & Nashville Railroad Company, a corporation organized and existing under the laws of the State of Kentucky; the Southern Railway Company, a corporation organized and existing under the laws of the State of Ohio; the Chicago, Rock Island & Pacific Railway Company, a corporation organized and existing under the laws of the States of Iowa and Illinois; the Missouri Pacific Railway Company, a corporation organized and existing under the laws of the State of Missouri; the Central Trust Company of New York, a corporation organized and existing under the laws of the State of New Jersey, and A. A. Allen, S. M. Felton, A. J. Davidson, W. M. Green, J. T. Harahan, C. S. Clarke, H. Miller, Benjamin McKean, Joseph Ramsey, George E. Evans, C. E. Schaff, T. C. Powell, J. F. Stevens, A. G. Cochran, W. S. McChesney, Julius Walsh, V. W. Fisher,

and S. D. Webster, and on information and belief complains and says:

The defendants and each of them (with the exception of the defendant, the Central Trust Company of New York, and the several individuals above named) at the times hereinafter mentioned were, and now are, common carriers employed in the transportation of freight and passengers among the several States of the United States, and between such States and foreign nations, and as such carriers so employed, were and are engaged in trade and commerce among the several States and with foreign nations.

That the St. Louis Merchants Bridge and the St. Louis Bridge (owned by the respective companies above named) are now and have been since 1889, the only two bridges across the Mississippi River, between the States of Illinois and Missouri, at St. Louis; that one of said bridges was erected by the Illinois and St. Louis Bridge Company, and is now owned by the St. Louis Bridge Company, and was opened for business in the year 1874, and that this bridge is known as, and hereafter will be designated herein as the "Eads Bridge;" that it has its western approach at the foot of Washington Avenue, in the city of St. Louis, Missouri, its eastern terminus in East St. Louis, Illinois; that it has a double track, standard gauge railroad on its lower or first part, and immediately over the said railroad tracks is a wagon way, sidewalk for pedestrians, and a double track electric street railway line. The wagon way, pedestrian walks and street railway at said western approach
11 are reached by the street surface of Washington Avenue, the railroad tracks on the bridge are reached from the west by a tunnel, extending under the surface of Washington Avenue, and the business district of the city of St. Louis, Missouri.

That the St. Louis Merchants Bridge, hereinafter designated as the "Merchants Bridge," has its western approach at the foot of Hall Street, in the city of St. Louis, Missouri, and has its eastern terminus in the village of Venice, in the State of Illinois; that said bridge was erected and opened for business on the first day of June, 1890.

II.

The defendants, the Terminal Railroad Association of St. Louis, and the Merchants Bridge Terminal Railway Company on and prior to August 17, 1893, owned and controlled and operated two separate, parallel, independent and competing lines of railroad (hereinafter more particularly described) running east and west in the States of Missouri and Illinois, and across the Mississippi River, by means of two bridges, the Eads Bridge and the Merchants Bridge, theretofore constructed over said river (opposite the city of St. Louis, Missouri) and into the States of Missouri and Illinois.

III.

The defendants, the Terminal Railroad Association of St. Louis, the Merchants Bridge Terminal Railway Company, and the Wiggins Ferry Company, at all of the times hereinafter stated, and at the present time control and operate all of the lines of railway, and particularly control all of the lines of railway and means of
12 transportation for passengers and freight among the several States of the United States and foreign nations, at St. Louis, Missouri, East St. Louis, East Carondelet, Madison and Granite City, Illinois.

IV.

That on July 3, 1889, the Terminal Railroad Association of St. Louis was organized under the laws of the State of Missouri, with a capital stock of seven millions of dollars, which was owned by the following-named railroad companies, to wit: The Wabash Railroad Company, the Missouri Pacific Railway Company, the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, the Louisville & Nashville Railway Company, the Ohio & Mississippi Railroad Company, and the St. Louis, Iron Mountain & Southern Railway Company.

That, subsequently, the capital stock of said Terminal Railroad Association was increased to fifty millions of dollars, and that 28,820 shares of stock, at one hundred dollars par value each, have been issued and are now outstanding.

That by the terms, arrangements, and contracts made subsequent to the 17th day of August, 1893, other railroad companies purchased shares of stock in the Terminal Railroad Association of St. Louis, and at this time the capital stock of the said Terminal Railroad Association is owned and held by the following-named corporations and persons, to wit:

	Shares.
Missouri, Kansas & Texas Railway Company	2,056
Chicago & Alton Railway Company	2,056
St. Louis & San Francisco Railway Company	2,056
13 Baltimore & Ohio Southwestern Railway Company	2,056
Illinois Central Railroad Company	2,056
St. Louis, Iron Mountain & Southern Railway Co.	2,056
Chicago, Burlington & Quincy Railway Company	2,056
St. Louis, Vandalia & Terre Haute Railroad Company	2,056
Wabash Railroad Company	2,056
Cleveland, Cincinnati, Chicago & St. Louis Ry. Co.	2,056
Louisville & Nashville Railroad Company	2,056
Southern Railway Company	2,056
Chicago, Rock Island & Pacific Railway Company	2,056
Missouri Pacific Railway Company	2,056
Mr. A. A. Allen, for M., K. & T. Ry. Co.	2
Mr. S. M. Felton, for C. & A. Ry. Co.	2
Mr. A. J. Davidson, for St. L. & S. F. Ry. Co.	2
Mr. W. M. Green, for B. & O. S. W. R. R. Co.	2
Mr. J. T. Harahan, for Ill. Cent. Ry. Co.	2
Mr. C. S. Clarke, for St. L., I. M. & S. Ry. Co.	2
Mr. H. Miller, for C., B. & Q. R. R. Co.	2
Mr. Benjamin McKean, for St. L., V. & T. H. R. R. Co.	2

	Shares.
Mr. Joseph Ramsey, for Wabash R. R. Co	2
Mr. George E. Evans, for L. & N. R. R. Co	2
Mr. C. E. Schaff, for C., C., C. & St. L. Ry. Co	2
Mr. T. C. Powell, for Southern Ry. Co	2
Mr. J. F. Stevens, for C., R. I. & P. Ry. Co	2
Mr. A. G. Cochran, for Missouri Pacific Ry. Co	2
Mr. W. S. McChesney, for T. R. R. Assn. of St. Louis	2
Mr. Julius Walsh, for T. R. R. Assn. of St Louis	2
Mr. V. W. Fisher, inspector of election	2
Mr. S. D. Webster, inspector of election	2
	28,820

That the persons above named as holding two shares of stock each hold the same as representatives of the respective railroads of which they are officers, agents, and representatives, and that each of the said fourteen railroad companies owning the capital stock of the Terminal Railroad Association is represented by a director in the board of directors of the Terminal Railroad Association.

That W. S. McChesney, Julius S. Walsh, V. W. Fisher, and S. D. Webster each hold two shares of stock in trust for the Terminal Railroad Association of St. Louis, and that the said McChesney and Walsh are officials of the Terminal Railroad Association, and said Fisher and Webster inspectors of election.

That the said fourteen lines of railroad above named constitute the principal trunk lines of railroad entering the city of St. Louis, Missouri, and the city of East St. Louis, Illinois, from either side of the Mississippi River, and from all portions of the continent, and control and conduct the interstate commerce of the States of the United States, which centers upon and is required to be conducted across the said river at the city of St. Louis.

That the Terminal Railroad Association was created by the consolidation of and succeeded to the rights, privileges, franchises, and property of the Union Railway & Transit Company and the Terminal Railroad of St. Louis; that there was issued to the shareholders of the Union Railway & Transit Company and the Terminal Railroad of St. Louis, for each share that they owned in the primary companies, one share of the capital stock of the Terminal Railroad Association of St. Louis, Missouri.

That, at the time the said consolidation occurred, each of the said primary companies, to wit, the Union Railway & Transit Company and the Terminal Railroad Company of St. Louis, each owned a complete railroad with equipments thereto, and that said roads were so connected at to form one continuous line of railroad, running in the same general direction, through and into the States of Missouri and Illinois, and across the Mississippi River on the Eads Bridge.

That by this consolidation aforesaid, there was brought under the control of the Terminal Railroad Association of St. Louis, the properties of the St. Louis Bridge Company (Eads Bridge), the Tunnel Railroad Company of St. Louis, the Union Railway & Transit Company, the Terminal Railroad of St. Louis, Missouri, and the Terminal Railroad of East St. Louis, Illinois, all of which were engaged in trade or commerce among the several

States, and between said States and foreign countries, and of all of which said properties belonging to the said last above-named railroad and bridge companies, the said Terminal Railroad Association took possession, and which it began to operate, and still continues to operate, in the carrying on of interstate trade and commerce.

That the said railroad companies last enumerated were so consolidated under the name of the Terminal Railroad Association of St. Louis; that their lines of railroad so consolidated were owned and operated in the States of Illinois and Missouri, and were connected with all the main lines of railway entering the cities of St. Louis, Missouri; East St. Louis, Madison, Granite City, and East Carondelet, Illinois.

That on the 3rd day of July, 1889, and prior thereto, and at all times thereafter and now, the Terminal Railroad Association of St. Louis, Missouri, had tracks and lines of railroad, and operated the same as follows: Beginning at the west end of the Eads Bridge, in St. Louis, Missouri; thence running southwesterly with a double track, standard gauge railroad, through the tunnel controlled by said corporation, to Spruce Street and Eighth Street; thence westwardly to the Union Station, at Eighteenth and Twenty-first, Clark Avenue and Market Street, in said city, to a point where connections were then, and are now, made with the tracks, lines, and termini of the lines of railroad entering St. Louis, Missouri, from the north, from the south, from the west, and from the southwest; also, from the place of beginning at the west end of the Eads Bridge;
17 thence eastwardly and across the Mississippi River, over and upon said bridge with a double track, standard gauge railroad into the city of East St. Louis, and into East Carondelet, and into the State of Illinois, where the tracks of said Terminal Railroad Association then, and theretofore, and now, connect with the tracks of the lines of railway and termini of the main lines of railways, extending from East St. Louis, Illinois, northwardly to the Great Lakes, and eastwardly to the towns, cities, and ports situated on the Atlantic seacoast; that in addition to the main lines of track of said Terminal Railroad Association on said date, theretofore and now, said Terminal Railroad Association operated and operates and controlled and controls, switches, tracks, spurs and branches, crossovers and depots, running to and from various public and private warehouses, depots, storage houses, factories, and business establishments in the cities of St. Louis, Missouri; East St. Louis, East Carondelet, Madison, and Granite City, Illinois, and which said sidetracks, spurs and switches were then, and theretofore had been, and now are, so connected with the lines of track of the said Terminal Railroad Association as to enable said association, as a common carrier of interstate trade and commerce for hire, to haul, carry, transfer, and switch the products so manufactured and stored, or shipped, or to be shipped, into and from said warehouses, factories, and business establishments, depots, and other places, to and upon the tracks and lines of road and termini of the various railroads entering the

cities of St. Louis, Missouri; East St. Louis, Madison, East Carondelet, Granite City, and Madison, Illinois; and so as to enable
18 said Terminal Railroad Association as a common carrier employed in interstate trade and commerce to haul, switch, and convey to and from the factories, warehouses, depots, and other places in said cities, all freight and articles of trade and commerce coming into or going out of said cities, upon all of the tracks and lines of road and termini of the various railroads entering St. Louis, Missouri; East St. Louis, Madison, Granite City, and East Carondelet, Illinois.

V.

That the St. Louis Merchants Bridge Terminal Railway Company was organized in August, 1887, under the laws of the State of Missouri, and its charter amended in 1893, and that it was created for the purpose of and did build and construct a standard gauge railroad from the Illinois shore, over the Merchants Bridge, to the Union Station in St. Louis, Missouri, and owned and operated said road on the 17th day of August, 1893.

That the Madison, Illinois and St. Louis Railroad Company was organized under the laws of the State of Illinois for the purpose of building and operating, and did build and operate, a railroad from the east end of the Merchants Bridge to Granite City, Illinois, a distance of four and one-half miles, and that said road was organized for the purpose of being operated and controlled by the St. Louis Merchants Bridge Terminal Railroad Company, and that on the 17th day of August, 1893, said Madison, Illinois & St. Louis Railway was controlled and operated by the said St. Louis Merchants Bridge Terminal Railway Company.

19 That the St. Louis Terminal Railway Company was organized under the laws of the State of Missouri to construct and operate a railroad from a point upon the line of the St. Louis Merchants Bridge Terminal Railway Company, near the western approach of said Merchants Bridge, in the State of Missouri, north and westerly through the city and county of St. Louis, Missouri; that said St. Louis Terminal Railway Company built about twenty miles of road in the said city and county of St. Louis, and leased the same to the said St. Louis Merchants Bridge Terminal Railway Company, which said latter corporation controlled and operated the said St. Louis Terminal Railway Company on the 17th day of August, 1893, and prior thereto.

That the East St. Louis Terminal Railway Company was organized under the laws of the State of Illinois in 1887 to build and did build and operate a railroad from the eastern end of the Merchants Bridge for connection with other lines of railroad in the State of Illinois, and said East St. Louis Terminal Railway Company on the 17th day of August, 1893, was and had been theretofore controlled and operated by the St. Louis Merchants Bridge Terminal Railway Company.

That the St. Louis Transfer Railway Company was a corporation organized under the laws of the State of Missouri, and built and operated a railway from Grand Avenue to Arsenal Street in the city of St. Louis, Missouri, having a main and side tracks of about forty miles; that said corporation was on the 17th day of August, 1893, and prior thereto had been controlled and operated by the Wiggins Ferry Company.

20 That the Illinois Transfer Railway Company was, and is a corporation organized under the laws of the State of Illinois, for the purpose of making connection with the Merchants Bridge and the tracks of the Merchants Bridge Terminal Railway Company in the State of Illinois.

That the Granite City and Madison Belt Railway Company was and is likewise a railway corporation, organized under the laws of the State of Illinois, for the purpose of making connection with the Merchants Bridge and the various lines of railway entering into Granite City, Madison, and East St. Louis, Illinois, and that both of said railways were on the 17th day of August, 1893, and prior thereto had been controlled and operated by the St. Louis Merchants Bridge Terminal Railway Company.

That the St. Louis Belt & *and* Terminal Railway Company was a railroad corporation organized to build a railroad in the State of Missouri, and that it did build and construct lines of railway in the city and county of St. Louis, Missouri; that said lines of railway on the 17th day August, 1893, and prior thereto had been and were controlled and operated by the St. Louis Merchants Terminal Railway Company.

That the stock of the Merchants Bridge had been from a time previous to the building of said bridge, and was on the 17th day of August, 1893, owned by the St. Louis Merchants Bridge Terminal Railway Company.

That in 1889 the St. Louis Merchants Bridge Company made a lease of its bridge for forty years to the St. Louis Merchants Bridge Terminal Railway Company, but afterwards this lease was

21 cancelled and a similar lease for forty years made to the Madison, Illinois & St. Louis Railroad Company, which corporation is controlled by the St. Louis Merchants Bridge Terminal Railway Company.

That on the 17th day of August, 1893, and prior thereto, and at the time of the commission of the acts hereinafter complained of, the St. Louis Merchants Bridge Terminal Railway Company was the owner of and operated a standard gauge railroad, located in part as follows:

Beginning at the Union Station, in the city of St. Louis, Missouri; thence running easterly with a double track standard gauge railroad across and over Eighth, Seventh, and Sixth Streets and Broadway through and across Plum and Poplar Streets; and thence by an elevated road and track to the wharf on the west bank of the Mississippi River; and thence on said elevated railway and track north-

easterly along said wharf through and across First Street; and thence in a northerly and easterly direction to Hall Street; and thence easterly across the Mississippi River over and upon the Merchants Bridge into the State of Illinois to the village of Venice and to the city of East St. Louis, Madison, and Granite City, in the State of Illinois, at which point in Illinois its line of road then connected and now connects with the Illinois Transfer Railroad Company, East St. Louis Connecting Railway Company, East St. Louis Belt Railway Company, East St. Louis and Carondelet Railway Company, and all the main lines of railway leading from East St. Louis, Illinois, Granite City, Illinois, and Madison, Illinois, and other points in said State opposite St. Louis, Missouri, to the
22 towns and cities and ports on the Great Lakes and the Atlantic coast; also beginning at the west end of the Merchants Bridge in St. Louis, Missouri; thence westerly and southerly, the tracks of the said Merchants Bridge Terminal Railway Company extend with a standard gauge road through the city of St. Louis, Missouri, for a distance of 25 miles, intersecting and connecting with the tracks and termini of all the lines of railroad extending from St. Louis, Missouri, westward, northwestward, and southwestward to the Pacific coast, and the Rio Grande River and the Republic of Mexico on the south; that in addition to the above named railroad properties the said Merchants Bridge Terminal Railroad Company, on the 17th day of August, 1893, and prior thereto, owned and controlled and operated the sidetracks, branches, and spurs extending to freight depots, private and public warehouses, manufacturing establishments, and other places, where articles of trade and commerce were stored, or to be stored and manufactured, and which said branches and sidetracks, switches, and spurs were all properly connected with the main lines of road and tracks of the said company so as to enable it as a common carrier of interstate trade (among the several States and foreign countries) for hire to carry and haul, transfer and convey all goods and articles of trade and commerce of all kinds to and from said freight depots and warehouses, factories, storehouses, and other places upon its own tracks and termini in Missouri and Illinois, and to places on the tracks and termini of all roads entering the cities of St. Louis, Missouri, and East St. Louis, Venice, Madison, and Granite City, Illinois.

23 VI.

That the Wiggins Ferry Company is an Illinois corporation, organized by special act of the General Assembly of the State of Illinois in 1853; that it had constructed, and on the 17th day of August, 1893, and prior thereto, and at the time of the commission of the acts hereinafter complained of, owned and operated steam ferryboats and transfer boats on and across the Mississippi River between the city of St. Louis, Missouri, and the city of East St. Louis, Illinois; that these transfer and ferry boats were so constructed as to transfer

trains of cars across the Mississippi River between the cities of Illinois and Missouri aforesaid; that said boats were used for said purpose; that said Wiggins Ferry Company did, on the 17th day of August, 1893, and theretofore, operate, and has since said time operated, the East St. Louis Connecting Railroad in Illinois, which connected with various railroad lines entering East St. Louis, Illinois, East Carondelet, Madison, and Venice, Illinois, with its ferry privileges; and it also operates and controls a railroad in St. Louis, Missouri, and, by means of the two railroads and its ferryboats, cars to the number of 1,200 daily are now and have been transferred, and were on the 17th day of August, 1893, transferred, from the railroads entering East St. Louis, Illinois, and other points in Illinois from the east to railroads entering St. Louis from the west and to the Union Station, and vice versa.

That the lines of railroad auxiliary to the Wiggins Ferry Company and controlled by it are as follows, to wit: The East St. Louis Connecting Railway, a corporation organized under the laws of
24 the State of Illinois, and operating a line of railroad in East St. Louis, connecting with the ferry and transfer boats of said Wiggins Ferry Company; the St. Louis Transfer Railway Company, a corporation organized under the laws of the State of Missouri, and operating (under the control of the Wiggins Ferry Company) 12.83 miles of main track and about 30 miles of sidetrack in the city of St. Louis, Missouri.

That in so operating said railroads and steam ferry and transfer boats the said Wiggins Ferry Company was, on the 17th day of August, 1893, and had been prior thereto, and has been at all of the times since, a common carrier, engaged in interstate commerce among the several States of the United States and with foreign countries.

VII.

That in 1881 the defendant, the Missouri Pacific Railway Company, and the Wabash, St. Louis & Pacific Railway Company (now the Wabash Railroad) and other corporations and persons whose names are unknown to the complainant entered into a combination to consolidate, under the control of the Missouri Pacific and the Wabash, St. Louis & Pacific Railway Company, the properties of the St. Louis Bridge Company, the Union Railway & Transit Company, the Tunnel Railroad Company of St. Louis, the Terminal Railroad of East St. Louis, comprising and including the Eads Bridge and all of the railroads used in connection therewith, with the intention thereby to place restraint upon all competitive interstate or foreign trade or commerce carried on by said above named railroad corporations and all other railroad corporations at St. Louis, Missouri,
25 and East St. Louis, Illinois, and other points in Illinois opposite the city of St. Louis, Missouri, and intending by said combination to monopolize the interstate commerce and trade and to suppress competition therein between the railway systems; and to that

end the Missouri Pacific Railway Company and the Wabash, St. Louis & Pacific Railway Company entered into an agreement with the St. Louis Bridge Company and the Tunnel Railroad Company by which there was leased all of the property of the bridge and tunnel companies, including that held under the lease or contract to the said Wabash, St. Louis & Pacific Railway Company and the Missouri Pacific Railway Company.

That in pursuance of said lease the said Missouri Pacific Railway Company and the Wabash, St. Louis & Pacific Railway Company took possession of all the property of the St. Louis Bridge Company and Tunnel Railroad Company and began and continued to operate said Eads Bridge, Tunnel Railroad Company, and the Terminal Railroad Company of East St. Louis, and the Union Railway & Transit Company.

That by means of the control of said property last above mentioned by said lessees the said Missouri Pacific Railway Company and the Wabash, St. Louis & Pacific Railway Company were enabled to arbitrarily fix and maintain whatsoever price they wished for transportation of passengers and freight between the States of Illinois and Missouri, and over the Eads Bridge, and between said States and the several States of the United States and foreign countries;

26 that by reason of said control of the aforesaid instrumentalities of interstate commerce by said two railroad corporations there were exacted and charged unreasonable and extortionate bridge tolls and charges for transporting passengers and freight among the several States and from foreign countries and the public was subjected to ruinous and unnecessary delays in carrying on said interstate trade and commerce.

That in order to secure competition and obtain relief from the existing conditions and to enable the trade and commerce in passengers and freight between Missouri and Illinois and between said States and other States and foreign countries to be carried on at reasonable rates and without unnecessary delay, and to rid themselves of the pernicious effects of monopoly, certain citizens of the city of St. Louis, Missouri, applied to Congress for authority to erect a competing railway bridge across the Mississippi River at St. Louis, Missouri; that on February 3, 1887, the Congress of the United States granted a charter for that purpose, and in order to maintain and keep said bridge an independent and competitive instrument of interstate commerce the citizens of St. Louis, Missouri, asked Congress to insert in the said charter of the Merchants Bridge the following section, which was so inserted, to wit:

"SECTION 11. That whereas a principal reason for giving authority to build a bridge herein contemplated is to secure reasonable rates and tolls for corporations and individuals for passing over the same, the St. Louis Merchants Bridge Company, or its successors or assigns, shall not agree or consent to the consolidation of this bridge with any other bridge across the Mississippi River or to the

POOR COPY

27 pooling of the earnings of this bridge company with the earnings of any other bridge company on said river. Nor shall any person who is or may be a stockholder or director or manager of any other bridge over said river be a stockholder or director or manager of the bridge herein provided for; provided, that if this provision of this act shall at any time be violated in any of these particulars, such violation shall, without legal proceedings, at once forfeit the privilege hereby granted and such bridge shall become the property of the United States, and the Secretary of War shall take possession of the same in the name and for the use of the United States."

That by the terms of said section 11 no person who was a stockholder, director, or manager in any other bridge over the Mississippi River could be a stockholder or manager or director of said Merchants Bridge; that afterwards, to wit, on September 1, 1888, some person or persons, corporation or corporations, whose names are unknown to the complainant, intending and contriving to defeat the object for which said bridge was built, and intending and designing to remove the legal obstacles to the consolidation of said Merchants Bridge with the Eads Bridge, and with the design of depriving the citizens of Missouri and Illinois and the several other States of the United States of the benefits of competition in interstate trade or commerce, and with the purpose of placing the control of the Merchants Bridge and the railroads in Illinois and Missouri used in connection therewith under the control of the same persons and corporations as the Eads Bridge and the railroad corporations used in connection therewith, so as to maintain a monopoly and destroy compe-
28 tition in the business of transporting passengers and freight between the States of Missouri and Illinois, and the several other States and foreign countries, did procure the said act of February 3, 1887, to be amended by striking out the word "stockholder" in said section 11 wherever the same occurred therein, and that said amendment was so procured for the purpose of, and with the design of, having the said owners of the Eads Bridge and the railroads used in connection therewith purchase and acquire the control of the Merchants Bridge and the railroads used in connection therewith.

VIII.

In pursuance of the combination so formed as aforesaid to control and restrain interstate trade and commerce in the States of Missouri and Illinois, and said other States and foreign countries, on October 3, 1889, an agreement was entered into between the Terminal Railroad Association, the St. Louis Bridge Company, the Tunnel Railroad Company, the Missouri Pacific Railway Company, the Wabash Railroad Company, in which the lease of July 1, 1881, above mentioned, was cancelled and a new agreement entered into by which the Terminal Railroad Association succeeded as lessee to the entire prop-

erty of the Eads Bridge and Tunnel Railroad, cars, engines, stations, etc., owned and controlled by the corporations hereinbefore named as parties to the agreement of July 1, 1881.

That afterwards, to wit, on the 17th day of August, 1893, the defendants, the Missouri Pacific Railway Company, the Louis-
29 ville & Nashville Railroad Company, the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, the Ohio & Mississippi Railway Company, the Wabash Railroad Company, the St. Louis Bridge Company, the Tunnel Railroad Company of St. Louis, the Terminal Railroad Company of St. Louis, the Union Railway & Transit Company, the Terminal Railroad of East St. Louis, the St. Louis Merchants Bridge Terminal Railway Company, the St. Louis Merchants Bridge Company, the East St. Louis & Carondelet Railway Company, the Illinois Transfer Railway Company, the Granite City & Madison Belt Railroad Company, the St. Louis Belt & Terminal Railroad Company, the St. Louis Terminal Railway Company, and the officers and directors of each, contriving and intending unlawfully and unreasonably to restrain the trade and commerce among the several States, and between said States and foreign countries, as carried on by the above-named corporations, and contriving and intending unlawfully to monopolize said trade or commerce, and contriving and intending unlawfully and unreasonably to restrain and prevent competition among said railroads and bridges and contriving and intending to prevent and unreasonably restrain competition and interstate commerce at St. Louis, Missouri, and at East St. Louis, Illinois, between all railway systems and all bridges and ferries entering East St. Louis, Granite City, Madison, and East Carondelet, Illinois, and the city of St. Louis, Missouri, from all directions, and contriving and intending unlawfully to deprive the public of the facilities and advantages produced by free and open competition between railroad systems, bridges, ferry and ferry transfer com-
30 panies, and other instruments of interstate commerce, did then and there enter into an unlawful combination and conspiracy to effect a consolidation and control of the properties of the St. Louis Bridge Company, the Tunnel Railroad Company of St. Louis, the Union Railway & Transit Company, the Terminal Railroad of St. Louis, the St. Louis Merchants Bridge Terminal Railway Company, the St. Louis Merchants Bridge, the East St. Louis & Carondelet Railway Company, the Illinois Transfer Railway Company, the Granite City & Madison Belt Railroad Company, the St. Louis Belt & Terminal Railroad Company, the Missouri Pacific Railway Company, the Louisville & Nashville Railroad Company, the Cleveland, Cincinnati, Chicago & St. Louis Railroad Company, St. Louis, Iron Mountain & Southern Railway Company, Ohio & Mississippi River Railway Company, and the Wabash Railroad Company, under the control of the Terminal Railroad Association of St. Louis, Missouri, and solely as an instrumentality to effect the purpose to unlawfully and unreasonably restrain the interstate trade and commerce as

POOR COPY

aforesaid, did proceed to consolidate the last above-named competing railroads and bridges in the following manner, to wit:

That on the 17th day of August, 1893, the St. Louis Merchants Bridge Terminal Company, hereinafter referred to as the Merchants Company, and the Terminal Railroad Association of St. Louis, hereinafter referred to as the Terminal Association, made and entered into an agreement wherein it was recited that the Merchants Company owned and operated a railroad in the city of St. Louis,
81 Missouri; that said Terminal Association owned and operated a railroad in St. Louis connected with the railroad of said Merchants Company, and that as said Terminal Association desired to aid said Merchants Company in the completion and construction of its railroad and the payment of its liabilities incurred in said construction, it was therefore agreed between said corporations:

1. That said Merchants Company agreed to grant to said Terminal Association the right to the perpetual use of all tracks, side tracks, switches, turn-outs and turn-tables, yards, depots, and all other terminal facilities then owned or that might thereafter be owned, possessed, controlled, or acquired by said Merchants Company in the city of St. Louis, Missouri; that said Terminal Association accepted the said grant of right of perpetual use of said terminal facilities and in payment and compensation therefor guaranteed the payment of all liabilities of said Merchants Company, and further agreed to endorse on or before September 1, 1893, its guarantee of payment of $3,500,000 of 5 per cent first mortgage bonds of said Merchants Company, and in consideration of the agreements hereinbefore set out said Terminal Association subscribed for 4,384 shares of the capital stock of said Merchants Company, and the said Merchants Company sold and transferred to said Terminal Association said number of shares of its capital stock, full paid and nonassessable; that said contract above set out was duly executed by the officers of the respective railroad companies authorized to act in their behalf and properly acknowledged.

82 That on said date there was also an agreement executed between said Terminal Association and the Merchants Bridge Company and the St. Louis Terminal Railway Company by which the Terminal Association became the assignee of a contract theretofore made between said St. Louis Terminal Railway Company and the Merchants Company, and by means whereof said Terminal Association came into control of the said St. Louis Terminal Railway Company and its property, and has continued to control and does now control and operate the same.

That in the year 1893 there was in force and effect an agreement and pooling arrangement between the Wiggins Ferry Company and the St. Louis Terminal Railroad Association and the St. Louis Merchants Bridge Terminal Railway Company establishing rates for passengers and freight carried by them between the States of Illinois and Missouri, and between said States and other States and foreign countries; that this agreement, or a similar one, was in effect in the years

1894 and 1895, 1896 and 1897, and thereafter continued in force between the Terminal Association and the Wiggins Ferry Company.

That afterwards, in pursuance of the unlawful combination and conspiracy aforesaid to control and unlawfully restrain the interstate commerce between the States of Missouri and Illinois and between said several States and foreign countries, and solely as an instrumentality to effect the purpose thereof, the Missouri Pacific Railway Company, the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, the Louisville & Nashville Railroad Company, the Ohio & Mississippi River Railway Company, and the St.
33 Louis, Iron Mountain & Southern Railway Company, through their control of the Terminal Association, proceeded to unlawfully and illegally acquire the absolute ownership and control of the St. Louis Merchants Bridge Terminal Railway Company and the bridge and railway corporations controlled by the St. Louis Merchants Bridge Terminal Railway Company in the following manner, to wit:

That on or about the 1st day of May, 1897, the St. Louis Merchants Bridge Terminal Railway Company sold to said Terminal Association 13,416 additional shares of stock of the St. Louis Merchants Bridge Terminal Railway Company, and that this gave said company control of the majority of the said St. Louis Merchants Bridge Terminal Railway Company stock, and that from said date said Terminal Association owned and now owns and controls and operates the St. Louis Merchants Bridge Terminal Railway Company and fixes rates to be charged for the transportation of passengers and freight over the lines of the St. Louis Merchants Bridge Terminal Railway Company, and all lines and instruments of interstate commerce, so as aforesaid controlled by said St. Louis Merchants Bridge Terminal Railway Company; and that said Terminal Association, in purchasing a majority of the shares of the stock of the St. Louis Merchants Bridge Terminal Railway Company, acquired the ownership and control of the St. Louis Merchants Bridge, and that said Terminal Association now owns and controls and operates the St. Louis Merchants Bridge Company and the Eads Bridge, and without competition fixes unreasonable rates and tolls to be
34 charged upon both of said bridges alike, thereby operating the same as a single instrument of interstate commerce, and therein enjoying and maintaining a monopoly, and thereby depriving the people of the benefits of competition between instruments of such commerce.

That after the 17th day of August, 1893, the Missouri, Kansas & Texas Railway Company, the Chicago & Alton Railway Company, the St. Louis & San Francisco Railway Company, the Baltimore & Ohio Southwestern Railway Company, the Illinois Central Railway Company, the Southern Railway Company, the Chicago, Burlington & Quincy Railroad Company, the St. Louis, Vandalia & Terre Haute Railroad Company, the Chicago, Rock Island & Pacific Railway Company became stockholders in the Terminal Association, and

each is now the owner of the several amounts of the capital stock of said Terminal Association, as hereinbefore set forth.

That said fourteen railroad companies above named, as the owners of the capital stock of the Terminal Association, were on the 15th day of July, 1902, operating under one control and management the St. Louis Terminal Railroad Association and the lines of railway it controls, the St. Louis Merchants Bridge Terminal Railway Company and the lines of railway it owns and controls, and the Eads Bridge and Merchants Bridge, and that said fourteen railroads fixed the charges and tolls to be paid by the public upon said railroads and bridges, and that a common, uniform, and unreasonable price was charged as toll for transporting passengers and freight upon each of said bridges, and that a common, uniform, and unreasonable price for the same service was charged for transporting passengers and freight over the respective lines of railway of the St. Louis Merchants Bridge Terminal Railway Company, and the Terminal Railroad Association of St. Louis, and that there was no competition whatever between said railroads or said bridges, or the companies operating the same, and that the same condition exists now, and the said Terminal Association and St. Louis Merchants Bridge Terminal Railway Company and the Eads and Merchants Bridges are controlled and unreasonable charges fixed as aforesaid, through the means and instrumentality of the said St. Louis Terminal Railroad Association, and which said last named corporation is in truth and in fact but a holding company for said fourteen railroad companies.

That by reason of the control of said instruments of interstate commerce, as aforesaid, all competition in the transportation of freight and passengers between the States of Illinois and Missouri and the several States of the United States and foreign countries has become and now is stifled and destroyed, and that unreasonable charges are established and fixed and collected by the said Terminal Railroad Association of St. Louis for the transportation of passengers and freight between said States of Illinois and Missouri and the several States of the United States and foreign countries, and that the profit and benefit thereof inures to the said fourteen railroad companies owning the capital stock of said Terminal Association.

IX.

That in the year 1902 an arrangement, agreement, or contract, the exact terms of which are unknown to the complainant, was entered into between the Terminal Association and the Wiggins Ferry Company, whereby the former company obtained control of the latter company, together with all of its property, consisting of boats, cars, and railroad tracks in the States of Missouri and Illinois, and that by reason of said arrangement, contract, or agreement 9,500 shares of the total issue of 10,000 shares of the capital stock of the Wiggins

Ferry Company have been deposited with the Mercantile Trust Company of New York City, as trustee, to be held and voted by it for the fourteen railroad companies owning the capital stock of the Terminal Association; that the Terminal Association had pledged as security for an issue of fifty million dollars of bonds, made by said association, said 9,500 shares of the capital stock of the Wiggins Ferry Company.

That from the year 1902, and at this time, said Terminal Association controls the Wiggins Ferry Company and all of its railroads and boats, and fixes the rate and toll to be charged for passengers and freight upon the railroads and boats of the said Wiggins Ferry Company.

That by reason of the control of the Wiggins Ferry Company by the Terminal Railroad Association of St. Louis all competition between said companies in interstate business of transporting passengers and freight between the States of Illinois and Missouri,
37 and the several other States of the United States and foreign countries has become and is now stifled and destroyed.

X.

Wherefore complainant says, by reason of the foregoing facts, the fourteen above-named railroad companies which own and control the capital stock of the Terminal Association, acting through said Terminal Association, controls and owns and operates the Eads and Merchants Bridges, crossing the Mississippi River at St. Louis, Missouri; the Wiggins Ferry Company, with its ferryboats and railroad tracks on either side of the Mississippi River, the Terminal Railway Company of St. Louis, the Terminal Railroad Association of St. Louis, the St. Louis Merchants Bridge Terminal Railway Company, as well as all of the issued and outstanding stock of the Terminal Railroad Company of East St. Louis, Illinois, and all of the issued and outstanding capital stock of the Union Railway & Transit Company of Illinois, and all of the authorized and issued stock of the East St. Louis Belt Railway Company, and also owns and operates and controls the East St. Louis & Carondelet Railroad Company, the Granite City and Madison Belt Railroad Company, the Tunnel Railroad Company of St. Louis, the Madison, Illinois & St. Louis Railway, the St. Louis Transfer Railway Company, the Wiggins Car Transfer Company, the East St. Louis Terminal Railroad Company, the East St. Louis Connecting Railway Company, the Illinois Transfer Railway Company, and the St. Louis Belt & Terminal Railway Company, comprising in all about one hundred and fifty miles of railroad.

38 That by reason of the facts hereinbefore set out, said fourteen railroad companies above named, through their agent and representative (the Terminal Railroad Association of St. Louis), all use the property of said Terminal Railroad Association for inter-

state business between Illinois and Missouri, and compel all other railroad companies which are not owners of stock in said Terminal Association to use the said property of the Terminal Association for interstates commerce business between Illinois and Missouri and between said two States and the other States of the United States and foreign countries, and that said fourteen railroads, acting through the Terminal Association as aforesaid, jointly and arbitrarily fix unreasonable charges and tolls to be paid for freight and passengers to be hauled and transferred in the interstate business between Illinois and Missouri and between said States and the several States of the United States and foreign countries, and by means of said joint control by the said fourteen railroad companies all competition is stifled and destroyed.

That unless the complainant prevents the continued existence and carrying out of the combination and conspiracy to unreasonably and unlawfully restrain commerce among the several States and foreign countries, as aforesaid, the monopoly of the interstate and foreign commerce as carried on as aforesaid by said defendants between the said States of Missouri and Illinois and said several States of the United States and of foreign countries, will be perpetuated and the public greatly injured and damaged, and the act of Congress of July 2, 1890, to protect trade and commerce, will be circumvented
39 and set at naught, and the public be left at the mercy of a monopoly thus created through the combination of the fourteen railroad corporations jointly owning and operating the Terminal Railroad Association of St. Louis.

That the properties hereinbefore enumerated as instruments of interstate commerce are so operated by the said Terminal Railroad Association of St. Louis (owned and controlled as aforesaid by the said fourteen railroad companies owning and controlling the stock of said Terminal Association), as to constitute a monopoly in their employment and conduct as aforesaid of all interstate commerce between the States of Illinois and Missouri and the various States of the United States and foreign countries, and so as to exclude from participation therein in all interstate commerce on the part of carriers of freight and passengers, all others than those named herein as parties to the unlawful combination and conspiracy hereinbefore set forth.

PRAYER.

In consideration whereof and inasmuch as adequate relief in the premises can only be obtained in this court, the United States of America prays your honors to order, adjudge, and decree that the combination and conspiracy hereinbefore described is unlawful, and that all acts done, or to be done, in carrying it out are in derogation of the common rights of the people of the United States and in violation of the act of Congres of July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopoly," and

that the defendants, and each of them, and every one of them, and their officers, directors, stockholders, agents, and servants, and
40 each of them, be perpetually enjoined from doing any act in pursuance of or for the purpose of carrying out the same in the future; that all agreements made between the said defendants looking to the operation of the St. Louis Bridge, known herein as the Eads Bridge, and railroad tracks crossing the same and terminals connecting therewith, in a common or noncompeting interest with the St. Louis Merchants Bridge, known herein as the Merchants Bridge, and railroad tracks crossing the same and terminals connecting therewith, be declared void, and the defendants, parties to such agreements, be enjoined and forbidden from the further carrying out of such agreements or the operation of such bridges, railroad tracks, and terminals in such common or noncompetitive interest; that the said defendants, and each of them, their agents, servants, and representatives, be enjoined and forbidden from operating, controlling, and maintaining the properties herebefore described as a common instrument or agency of interstate commerce, under the common control of the fourteen railroad companies owning the capital stock of the Terminal Railroad Association; and in addition, that the several defendants be respectively enjoined as follows:

1st. That the said fourteen railroad companies, the Missouri, Kansas & Texas Railway Company, the Chicago & Alton Railway Company, the St. Louis & San Francisco Railway Company, the Baltimore & Ohio Southwestern Railway Company, the Illinois Central Railroad Company, the St. Louis, Iron Mountain & Southern Railway Company, the Chicago, Burlington & Quincy Railway
41 Company, the St. Louis, Vandalia & Terre Haute Railroad Company, the Wabash Railroad Company, the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, the Louisville & Nashville Railroad Company, the Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Company, their stockholders, officers, directors, executive committees, agents, and servants, each and every one of them, be perpetually enjoined from voting or in any manner acting as owner of any of the shares of the capital stock of the Terminal Railroad Association of St. Louis, or of the Wiggins Ferry Company, or of the Merchants Bridge Terminal Railway Company.

2d. That the defendant, the Terminal Railroad Association of St. Louis, its stockholders, directors, officers, agents, and servants, and each and every one of them, be perpetually enjoined from in any manner recognizing or accepting the said fourteen railroad companies, to wit, the Missouri, Kansas & Texas Railway Company, the Chicago & Alton Railway Company, the St. Louis & San Francisco Railway Company, the Baltimore & Ohio Southwestern Railway Company, the Illinois Central Railway Company, the St. Louis, Iron Mountain & Southern Railway Company, the Chicago, Burlington & Quincy Railway Company, the St. Louis, Vandalia & Terre Haute Railroad Company, the Wabash Railroad Company, the Cleveland,

Cincinnati, Chicago & St. Louis Railway Company, the Louisville & Nashville Railroad Company, the Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Company, as the owners or holders of any
42 share or shares of its capital stock, and from permitting said companies to vote such stock, whether by proxy or otherwise, and from paying any dividends upon such stock to said companies or their assigns (except as ordered by this court) and from recognizing as valid any transfer or mortgage, pledge, or assignment by such company of such stock unless authorized by this court.

3d. That the defendant, the Terminal Railroad Association of St. Louis, and the owners of its capital stock, to wit, the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company; and the Missouri Pacific Railway Company, their stockholders, officers, directors, agents, or servants, and each and every one of them, be perpetually enjoined from in any manner voting, controlling, or acting as the owner of any of the shares of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, or the shares of the capital stock of the St. Louis Merchants Bridge, or the Wiggins Ferry Company, or the Madison, Illinois & St. Louis Railway Company, or the
43 St. Louis Transfer Railway Company, or the Wiggins Car Transfer Company, or the St. Louis Terminal Railway Company, or the Granite City & Madison Belt Railway Company, or the East St. Louis Connecting Railway Company.

4th. That the St. Louis Merchants Bridge Terminal Railway Company and the St. Louis Merchants Bridge; the Wiggins Ferry Company; the Madison, Illinois & St. Louis Railway Company; the Wiggins Car Transfer Company; the St. Louis Transfer Railway Company; the St. Louis Terminal Railway Company; the Granite City & Madison Belt Railway Company; the East St. Louis Belt and Terminal Railway Company; the East St. Louis & Carondelet Railway Company; the Terminal Railroad Company of St. Louis; the East St. Louis Terminal Railroad Company; the East St. Louis Connecting Railway Company; and the Illinois Transfer Railway Company, their stockholders, officers, directors, agents, and servants, and each and every one of them, be perpetually enjoined from in any manner recognizing or accepting the Terminal Railroad Association of St. Louis, or the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Fran-

cisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railway Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company;
44 the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company; and the Missouri Pacific Railway Company, as the owners or holders of any of the shares of their respective capital stocks, and from permitting said Terminal Railroad Association of St. Louis, or any of said railroad companies, to wit, the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railway Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company, the Missouri Pacific Railway company, their directors, stockholders, officers, agents, or servants, from voting such stock, in either of said companies, whether by proxy or otherwise, and from paying any dividends upon the stock of the St. Louis Merchants Bridge Terminal Railway Company; St. Louis Merchants Bridge; Wiggins Ferry Company; Madison, Illinois & St. Louis Railway Company; St. Louis Transfer Railway Company; Wiggins Car Transfer Company; St. Louis Terminal Railway Company; Granite City & Madison Belt Railway Company,
45 or the East St. Louis Belt Railway Company, to said Terminal Railroad Association, or to its assigns, or to either one of said fourteen railroad companies, to wit, the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio Southwestern Railway Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company; and the Missouri Pacific Railway Company, unless authorized by this court, and from recognizing as valid any transfer, mortgage, pledge, or assignment by said Terminal Railroad Association of St. Louis, or the Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; the St. Louis & San Francisco Railway Company; the Baltimore & Ohio South-

western Railway Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company; and the Missouri Pacific Railway Company, or the stock of said St. Louis Merchants Bridge Terminal Railway Com-
46 pany; the St. Louis Merchants Bridge; the Wiggins Ferry Company; the Madison, Illinois & St. Louis Railway Company; St. Louis Transfer Railway Company; the Wiggins Car Transfer Company; the St. Louis Terminal Railway Company; the Granite City & Madison Belt Railway Company; or the East St. Louis Belt Railway Company, unless authorized by this court.

5th. That the individuals above named, and each of them, and each and every person combining or conspiring with them, as hereinbefore charged, and their trustees, agents, and assigns, present or future, and each and every one of them be perpetually enjoined from doing any and every act or thing hereinbefore complained of, or in furtherance of the combination or conspiracy described herein, or intended or tending to place the capital stock of the Terminal Railroad Association of St. Louis, in any of the corporations controlled by it, or the St. Louis Merchants Bridge Terminal Railway Company, or any of the corporations controlled by it, or the stock of either the Merchants or the Eads Bridge, or the said two bridges or the competing railway systems operated by the St. Louis Merchants Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis, or the competitive interstate or foreign trade or commerce carried on by them under the control legally or practically of the defendant, the Terminal Railroad Association of St. Louis, or either or all of the said fourteen railroad companies above named, who now own the capital stock of the Terminal Railroad Association, or of any person or persons, association or asso-
47 ciations, corporation or corporations, acting for or in lieu of said Terminal Railroad Association of St. Louis, or the said fourteen railroad companies above named, owning and controlling the stock thereof, in carrying out the unlawful combination or conspiracy hereinbefore complained of in this petition.

The United States prays for such other and further relief as the nature of the case may require and the court may deem proper in the premises, to the end, therefore, that the United States of America may obtain the relief to which it is justly entitled in the premises, may it please your honors to grant to it writs of subpœna directed to the said defendants, the Terminal Railroad Association of St. Louis, the St. Louis Merchants Bridge Terminal Railway Company, the Wiggins Ferry Company, the St. Louis Bridge Company, the St.

Louis Merchants Bridge Company, the Missouri, Kansas & Texas Railway Company, the Chicago & Alton Railway Company, the St. Louis & San Francisco Railway Company, the Baltimore & Ohio Southwestern Railway Company, the Illinois Central Railroad Company, the St. Louis, Iron Mountain & Southern Railway Company, the Chicago, Burlington & Quincy Railway Company, the St. Louis, Vandalia & Terre Haute Railroad Company, the Wabash Railroad Company, the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, the Louisville & Nashville Railroad Company, the Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Company, together with all the directors of the Terminal Railroad Association of St. Louis,
48 to wit, A. A. Allen, S. M. Felton, A. J. Davidson, W. M. Green, J. T. Harahan, C. S. Clarke, H. Miller, Benjamin McKean, Joseph Ramsey, jr., C. E. Schaff, George E. Evans, T. C. Powell, J. F. Stevens, A. G. Cochran, and W. S. McChesney, and to each and every one of them, commanding them, and each of them, to appear herein and answer (but not under oath) the allegations contained in the foregoing petition, and abide by and perform such order or decree as the court may make in the premises, and that, pending the final hearing of this case, a temporary restraining order may issue enjoining the defendants and their associates, and each of them, and their stockholders, directors, officers, agents and servants, as hereinbefore prayed.

DAVID P. DYER,
United States Attorney for Eastern District of Missouri.
WILLIAM H. MOODY,
Attorney General of United States.

STATE OF MISSOURI,
City of St. Louis, ss:

David P. Dyer, attorney of the United States for the Eastern District of Missouri, being duly sworn, upon his oath states that the matters and things set forth in the foregoing petition are true, to the best of his information and belief.

DAVID P. DYER.

Subscribed and sworn to before me this 25th day of November, 1905.

[SEAL.] JAMES R. GRAY,
Clerk of the United States Circuit Court,
Eastern Division Eastern Judicial District of Missouri.
By N. MCDONALD, *Deputy.*

49 UNITED STATES OF AMERICA,
Eastern Division of the Eastern Judicial District of Missouri.

No. 5250.

In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA, COMPLAINANT,
vs.
TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al., defendants.

Joint and several answer of the Terminal Railroad Association of St. Louis and others to the bill of complaint of the United States of America.

50 UNITED STATES OF AMERICA,
Eastern Division of the Eastern Judicial District of Missouri.

No. 5250.

In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA, COMPLAINANT,
vs.
TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al., defendants.

Joint and several answer of Terminal Railroad Association of St. Louis; St. Louis Merchants Bridge Terminal Railway Company; Wiggins Ferry Company; St. Louis Bridge Company; St. Louis Merchants Bridge Company; Missouri, Kansas and Texas Railway Company; St. Louis and San Francisco Railroad Company; The Chicago and Alton Railway Company; Baltimore and
51 Ohio Southwestern Railroad Company; Illinois Central Railroad Company; St. Louis, Iron Mountain and Southern Railway Company; Chicago, Burlington and Quincy Railway Company; Vandalia Railroad Company; Wabash Railroad Company; Cleveland, Cincinnati, Chicago and St. Louis Railway Company; Louisville and Nashville Railroad Company; Southern Railway Company; The Chicago, Rock Island and Pacific Railway Company; The Missouri Pacific Railway Company; A. A. Allen, S. M. Felton, A. J. Davidson, J. T. Harahan, C. S. Clarke, C. E. Schaff, T. C. Powell, A. G. Cochran, and W. S. McChesney, jr., to the petition of the United States of America.

The defendants, Terminal Railroad Association of St. Louis; St. Louis Merchants Bridge Terminal Railway Company; Wiggins

Ferry Company; St. Louis Bridge Company; St. Louis Merchants Bridge Company; Missouri, Kansas & Texas Railway Company; St. Louis & San Francisco Railroad Company; The Chicago & Alton Railway Company; Baltimore & Ohio Southwestern Railroad Company; Illinois Central Railroad Company; St. Louis, Iron Mountain & Southern Railway Company; Chicago, Burlington & Quincy Railway Company; Vandalia Railroad Company; Wabash Railroad Company; Cleveland, Cincinnati, Chicago & St. Louis Railway Company; Louisville & Nashville Railroad Company; Southern Railway
52 Company; The Chicago, Rock Island & Pacific Railway Company; The Missouri Pacific Railway Company; A. A. Allen, S. M. Felton, A. J. Davidson, J. T. Harahan, C. S. Clarke, C. E. Schaff, T. C. Powell, A. G. Cochran, and W. S. McChesney, jr., now and at all times saving to themselves all manner of benefit and advantage of exception which can and may be had or taken to the many errors, uncertainties, and other imperfections in the petition contained, for joint and several answer thereto, and to so much and to such part thereof as advised is material or necessary to make answer unto, answering, say:

I.

1. With respect to the averments of the first subdivision of the petition, admit and aver that Missouri, Kansas & Texas Railway Company; the Chicago & Alton Railway Company; St. Louis & San Francisco Railroad Company (sued herein as St. Louis & San Francisco Railway Company); Baltimore & Ohio Southwestern Railroad Company (a corporation existing under the laws of Ohio and Indiana and sued herein as the Baltimore & Ohio Southwestern Railway Company, a corporation organized and existing under the laws of Ohio, Indiana, and Illinois); Illinois Central Railroad Company; St. Louis, Iron Mountain & Southern Railway Company; Chicago, Burlington & Quincy Railway Company; Vandalia Railroad Company (sued herein as St. Louis, Vandalia & Terre Haute Railway Company); Wabash Railroad Company; Cleveland, Cin-
53 cinnati, Chicago & St. Louis Railway Company; Louisville & Nashville Railroad Company; Southern Railway Company (a corporation existing under the laws of Virginia, erroneously stated in the petition to be a corporation organized and existing under the laws of Ohio); the Chicago, Rock Island & Pacific Railway Company; and the Missouri Pacific Railway Company (which are hereinafter referred to as Proprietary Companies), were, at the times mentioned in the petition, and now are, common carriers employed in the transportation of freight and passengers among the several States of the United States and between such States, and as such carriers so employed were and are engaged in trade and commerce among the several States and foreign nations.

2. Deny the Terminal Railroad Association of St. Louis (herein referred to as Terminal Association), the St. Louis Merchants Bridge Terminal Railway Company (hereinafter referred to as Merchants Company), the Wiggins Ferry Company, St. Louis Bridge Company, and the St. Louis Merchants Bridge Company, or any of them, were or now are common carriers engaged in commerce among the several States or with foreign nations, except for the purpose of furnishing terminal facilities for common carriers, and only to the extent and in the manner hereinafter expressly and fully stated.

3. Admit the bridges referred to in the petition respectively as the Eads Bridge and the Merchants Bridge are owned respectively by the St. Louis Bridge Company and the St. Louis Merchants
54 Bridge Company, and are now, and have been since 1889, the only two bridges across the Mississippi River between the States of Illinois and Missouri at St. Louis; the Eads Bridge was erected by the Illinois & St. Louis Bridge Company, is now owned by the St. Louis Bridge Company, and was opened for business in the year 1874; its termini are as in the petition stated; on it are constructed railroad tracks, a wagon way, sidewalks for pedestrians, and an electric street railway line; the wagon way, sidewalks, and electric street railway line, at the western approach of the bridge, are reached by the street surface of Washington Avenue in St. Louis, and the railroad tracks on the bridge are reached from the west by a tunnel extending under the surface of Washington Avenue and the business district of the streets of St. Louis; the Merchants Bridge has its western approach at the foot of Ferry Street (not Hall, as in the petition stated), in St. Louis, Missouri, and its eastern terminus in the village of Venice, in Illinois, and the bridge was erected and opened for business on or about the first day of June, 1890.

II.

4. With respect to the averments of the second subdivision of the petition, deny the Terminal Association and the Merchants Company, on or prior to August 17, 1893, or at any time subsequent to said date, either owned, controlled, or operated parallel and competing lines of railroad in the States of Missouri and Illinois and across the Mississippi River by means of said bridges, or in any manner, into the States of Missouri and Illinois or elsewhere.

55

III.

5. With respect to the averments of the third subdivision of the petition, deny the Terminal Association, the Merchants Company, and the Wiggins Ferry Company have, at any time, or do now, control and operate all of the lines of railway or means of transportation for passengers and freight among the several States of the United States and foreign nations at any of the places in the petition mentioned, or elsewhere.

IV.

6. With respect to the averments of the fourth subdivision of the petition, admit and aver the Terminal Association was organized under the laws of the State of Missouri in July, 1889, but deny that its capital stock was then owned as in the petition stated; but aver the time and purpose of organization and the amount and ownership of its capital stock are as hereinafter fully stated.

7. Admit and aver the capital stock of the Terminal Association was increased to $50,000,000.00, and its issued and outstanding stock are now held and owned by the respective companies (herein designated Proprietary Companies) and parties in the manner and in the amounts in the petition stated save that H. C. Nutt is the holder of two shares in lieu of H. Miller; Henry Miller is the holder of two shares in lieu of Joseph Ramsey, and H. V. Mudge is the holder of two shares in lieu of J. F. Stevens.

8. Admit each of the Proprietary Companies is represented
56 by a director in the board of directors of the Terminal Association, and the defendants McChesney and Walsh are officials of that company, and defendants Fisher and Webster are, from time to time, as elections are held, inspectors of its elections.

9. Admit and aver the fourteen Proprietary Companies constitute the principal trunk lines of railroad entering the city of St. Louis, Missouri, and the city of East St. Louis, Illinois, on either side of the Mississippi River, from all portions of the continent, and conduct the greater portion of interstate commerce of the States of the United States which centers upon and is required to be conducted across the Mississippi River at the city of St. Louis.

10. Admit and aver the Terminal Association was created by the consolidation of the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis (the manner and details of which consolidation are hereinafter more fully set forth), and succeeded to the rights, privileges, franchises, and property of these companies, and by the terms of such consolidation there was issued for each share, respectively, in such constituent companies owned one share of the capital stock of the Terminal Association, and aver the purpose of such consolidation and issue of stock are as hereinafter more fully set forth.

11. Deny at the time this consolidation was effected either of the constituent or primary companies owned a complete railroad,
57 with equipments thereto, or that any railroads or tracks owned or operated by either of them were connected so as to form one continuous line of railroad running in the same general direction and into the States of Illinois and Missouri, across the Mississippi River over the Eads Bridge or elsewhere, but aver the fact to be that at the time of such consolidation neither of said constituent or primary companies owned any line of railroad over or upon said bridge or in the State of Illinois, or operated any line of railroad at any

point; the status and condition of the properties of the said constituent companies, and the character and extent thereof and manner of operation were at the time of the consolidation as hereinafter fully stated.

12. Deny by the consolidation of the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis there was brought under the control of the Terminal Association any property of the St. Louis Bridge Company, of the Tunnel Railroad of St. Louis, or of the Terminal Railroad Company of East St. Louis; deny that at the time of such consolidation any of the said companies were engaged in trade or commerce in any manner or form among the several States or between such States and foreign countries; on the contrary, aver the fact to be that by the consolidation the Terminal Association became the owner of the properties of the constituent companies, the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis, but of no other property; but aver the Terminal Association secured and now has control of and operates the properties of the companies to the
58 extent in the manner, and for the purposes hereinafter full stated.

13. Deny any of the companies named in the petition were, at or about the time in the petition referred to, or at any time, consolidated under the name of the Terminal Association, except the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis, and deny any line of railway of either of said constituent companies was operated in the State of Illinois or elsewhere than in the State of Missouri, at the time of, or prior to, such consolidation, or was connected with any lines of railway entering East St. Louis, Madison, Granite City, or East Carondelet, Illinois; but aver the conditions, connections, and operations of the properties of the constituent companies were at the time of the consolidation as hereinafter fully stated.

14. Deny on the 3d day of July, 1889, or at any time prior thereto, the Terminal Association had tracks and lines of railroad or operated the same in the manner or at the place, or substantially in the manner or at the place, in the petition stated; but aver that on the 3d day of July, 1889, and prior thereto, the Terminal Association had no corporate life or existence; it became an incorporated company under an agreement of consolidation between the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis, dated July 26, 1889, upon the filing of such agreement in the office of the secretary of state of Missouri on July 30, 1889,
59 to which agreement reference is hereinafter fully made; at the time of such consolidation the two constituent companies so consolidated and forming the Terminal Association did not own or operate any railroad tracks or lines of railroad in the State of Illinois, but the only properties then owned by the two constituent companies were certain railroad tracks connecting with the tracks of the tunnel at or near Clark Avenue and Eighth Street, in the city of St. Louis,

and with each other, and extending westward to a point or points at or near Eighteenth Street in said city, and the freight yards and sidetracks adjacent and appurtenant thereto, all of which were at the time of the consolidation leased to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, as hereinafter fully stated.

15. Aver at the time of such consolidation the Union Station at Eighteenth, Twenty-first, Clark Avenue, and Market Streets, in the city of St. Louis, was not constructed, and said station was not constructed until five years thereafter; the time and purpose of such construction are as hereinafter fully stated; at the time of such consolidation the Missouri Pacific Railway and the Wabash, St. Louis & Pacific Railway Companies were lessees of the properties of the St. Louis Bridge Company and of the Tunnel Railroad of St. Louis, and sublessees of the properties of the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis, and as such lessees, operated the properties of the lessors, which properties then consisted of the Eads Bridge, the tunnel, the tracks of the Union Railway & Transit Company of St. Louis
60 and Terminal Railroad of St. Louis, extending from Eighth and Clark Avenue westward to about Eighteenth Street, in the city of St. Louis, the relation and connection of which properties and the maner of operation by the lessees at the time of the formation of the Terminal Association were as hereinafter fully stated.

16. Deny the Terminal Association operates tracks or lines of railroad of, or substantially of, the location, character, or extent, or at the points, or that any tracks or lines of railroad operated by it connect at the points and in the manner in the petition stated; but aver the lines of railway controlled, owned, and operated by the Terminal Association, the connections and termini thereof, and the manner and purpose of operation are as hereinafter fully stated.

17. Deny the Terminal Association now operates or controls, or at any time heretofore operated or controlled, any switches, tracks, spurs, branches, crossovers, or depots connecting with public or private warehouses, depots, storage houses, factories, or business establishments in the cities of East Carondelet, Madison, or Granite City, Illinois; but admit and aver the Terminal Association does operate and control, and has for many years operated and controlled switches, tracks, spurs, crossovers connecting with various public and private warehouses, depots, storage houses, factories, and business establishments in the cities of St. Louis and East St. Louis, and now owns and operates, and for a number of years has controlled and operated, freight depots and extensive terminals in the cities of St. Louis
61 and East St. Louis; the character, nature, and extent of which terminals and the business conducted by means thereof and the uses to which the same are subjected, as well as the purposes for which the same are constructed and operated, are as hereinafter fully set forth.

18. Deny any terminal facilities and railway properties operated and controlled by the Terminal Association are so connected with its lines of track as to enable it to handle over tracks owned or controlled by it any traffic into or out of the cities of Madison, East Carondelet, or Granite City; but aver the Terminal Association now reaches, and for some years prior hereto has reached, all of the cities and towns adjacent to East St. Louis enumerated in the petition, and many of the establishments, industries, and manufacturing plants therein located, and is now able, and for some years past has been able, through trackage contracts, leases, stock ownership, and control, to provide methods and facilities whereby traffic, reaching any point in the city of St. Louis on any line of railway, may be transported to a connection with any of the railway lines entering the cities of Madison, Granite City, Venice, East St. Louis, and East Carondelet, in the State of Illinois; the facilities, trackage contracts, leases, and stock ownership through which such traffic is handled are as hereinafter fully set forth.

19. Except as herein admitted, deny each and every allegation in the fourth subdivision of the petition.

62 V.

20. With respect to the averments of the fifth subdivision of the petition, admit the Merchants Company was organized in August, 1887, under the laws of the State of Missouri, and its charter amended in 1893, but deny it was created for the purpose of building, or did build, or construct a railroad of any character from the Illinois shore over the Merchants Bridge to the Union Station in St. Louis, Missouri, or owned or operated such a railroad on the 17th day of August, 1893, or at any time; but aver the purposes of the incorporation of the Merchants Company are fully set forth in its articles of association, to which reference now is and will hereafter be more fully made, and the railroad constructed, and at any time owned and operated by it, is as hereinafter fully described.

21. Admit the Madison, Illinois & St. Louis Railway Company was organized under the laws of the State of Illinois for the purpose of building, and did build, a railroad from the east end of the Merchants Bridge to Granite City, Illinois, a distance of about four and one-half miles, and its road was built for the purpose of being operated by the Merchants Company, and on the 17th day of August, 1893, it was and is now operated and controlled by that company through the ownership of all of the stock of the Madison, Illinois & St. Louis Railway Company.

22. Aver and admit the St. Louis Terminal Railway Company was organized under the laws of the State of Missouri for the purpose of constructing and operating a railroad from a point
63 upon the line of the Merchants Company near the western approach of the Merchants Bridge in the State of Missouri, north and westwardly through the city and county of St. Louis,

Missouri; but aver the purposes for which said St. Louis Terminal Railway Company was organized are fully set forth in its articles of association, to which reference is now made, and will hereinafter be fully made; a portion of the line of railway of St. Louis Terminal Railway Company was built, but not to the extent or within the time in the petition stated; the time within which the road was built and the extent thereof are as hereinafter fully stated.

23. Deny the railway of the St. Louis Terminal Railway Company was ever at any time leased to or operated or controlled by the Merchants Company.

24. Deny any such company as the East St. Louis Terminal Railway Company ever existed, or any railroad of the character or extent alleged in the petition to have been built by the East St. Louis Terminal Railway Company and operated and controlled by the Merchants Company, was ever built or operated.

25. Aver and admit the St. Louis Transfer Railway Company was organized under the laws of the State of Missouri, and built and operated a railway from Grand Avenue to Arsenal Street in the city of St. Louis, Missouri, but deny that on the 17th day of August, 1893, or prior thereto, the St. Louis Transfer Railway Com-
64 pany was operated by the Wiggins Ferry Company; deny the main and side tracks of the St. Louis Transfer Railway Company have an aggregate length of forty miles, but, on the contrary, aver the length of the road of the St. Louis Transfer Railway Company does not exceed six miles; and the ownership by the Wiggins Ferry Company of the stock, and the manner of operation of the St. Louis Transfer Railway Company, are as hereinafter stated.

26. Aver and admit the Illinois Transfer Railway Company and the Granite City and Madison Belt Line Railway Company are corporations organized under the laws of the State of Illinois; deny either of said companies was organized for the purposes in the petition stated, or that either of said railways were, on the 17th day of August, 1893, or at any time, controlled or operated by the Merchants Company; on the contrary, aver the Illinois Transfer Railway Company was not incorporated until October, 1899, and the Granite City and Madison Belt Line Railway Company was not incorporated until December, 1892, on which said respective dates said companies were respectively incorporated; the purpose of the incorporation of said respective companies are as stated in their respective articles of incorporation, to which reference is hereby made, and will hereinafter be fully made; and the control and operation of the tracks of said two last-named companies are as hereinafter fully stated.

27. Deny the St. Louis Belt & Terminal Railway Company
65 was a railroad corporation organized or had built or constructed any line of railway in the city or county of St. Louis, or elsewhere, at or prior to August 17, 1893, or at any time was controlled or operated by the Merchants Company; on the contrary, aver the St. Louis Belt & Terminal Railway Company was not organized until March 11, 1902, and its line of railway is now in the course of

construction and not yet completed; the ownership and control of the St. Louis Belt & Terminal Railway Company are as hereinafter stated.

28. Admit the capital stock of the St. Louis Merchants Bridge Company, previous to the 17th day of August, 1893, was owned by the Merchants Company, and aver the stock of the St. Louis Merchants Bridge Company is still so owned.

29. Admit in 1889 the St. Louis Merchants Bridge Company made a lease of its bridge for forty years to the Merchants Company; afterwards this lease was cancelled and a lease made to the Madison, Illinois & St. Louis Railway Company, the stock of which company is owned by the Merchants Company; the lease of the Merchants Bridge to the Madison, Illinois & St. Louis Railway Company is substantially similar to the cancelled lease of the bridge to the Merchants Company.

30. Deny on the 17th day of August, 1893, or at any time, the Merchants Company was the owner of or operated a railroad of any char-
acter located or connecting with other railways, as in the pe-
66 tition stated; or the termini thereof are, or were, as in the petition stated; on the contrary, aver that on the 17th day of August, 1893, and prior thereto, the line of railway owned by the Merchants Company was as follows: Beginning at Eighth and Gratiot Streets in the city of St. Louis, thence eastwardly across and over Seventh, Sixth, Broadway, Fourth, Third, Second, and First Streets, to the levee or wharf, thence northwardly to Ferry Street, to a connection with the western approach of the Merchants Bridge; and subsequently the line was extended to Carrie Avenue.

31. Aver the Merchants Company has at no time owned, operated, or controlled any railway tracks in the city of St. Louis other than as just stated; deny any portion of the tracks of the Merchants Company connected with all lines of railroad extending from St. Louis as alleged; but aver the connections are as hereinafter stated.

32. Deny on the 17th day of August, 1893, or at any time prior thereto, the Merchants Company owned, controlled, or operated the terminal facilities of, or substantially of, the character or to the extent or having the connections with other railroad lines or reaching the States as in the petition alleged; but aver the tracks and terminal facilities of the Merchants Company at any time owned or controlled in the city of St. Louis or elsewhere are as hereinafter fully stated.

33. Except as hereinabove and hereinafter stated, deny each and every other allegation in the fifth subdivision of the petition.

67

VI.

34. With respect to the averments of the sixth subdivision of the petition; admit and aver the Wiggins Ferry Company is an Illinois corporation organized by special act of the general assembly of the State of Illinois in 1853, and on August 17, 1893, and prior thereto

and at the times in the petition stated, owned and operated steam ferryboats and transfer boats on and across the Mississippi River between the city of St. Louis, Missouri, and the city of East St. Louis, Illinois, which boats were so constructed as to transfer trains of cars across the Mississippi River between the said States of Missouri and Illinois and were used for the purposes in the petition stated; the East St. Louis Connecting Railway is a corporation organized under the laws of the State of Illinois and operates a line of railroad in East St. Louis connecting with the transfer boats of the Wiggins Ferry Company; the St. Louis Transfer Railway Company is a corporation organized under the laws of the State of Missouri and operates railway tracks in the city of St. Louis, Missouri; and, except as just stated, deny each and every allegation in the sixth subdivision of the petition; but aver the East St. Louis Connecting Railway and the St. Louis Transfer Railway Company are separately operated, each having its own board of directors and servants and employes; the Wiggins Ferry Company is the owner of all of the capital stock of the East St. Louis Connecting Railway and the St. Louis Transfer Railway Companies; the tracks of the East St. Louis Connecting Railway connect with many of the rail-
68 road lines entering East St. Louis, but do not connect with the railway lines entering Madison or Venice; the tracks of the St. Louis Transfer Railway Company connect with the ferry inclines of the Wiggins Ferry Company in St. Louis, and the tracks of the East St. Louis Connecting Railway Company connect with the ferry inclines of the Wiggins Ferry Company in East St. Louis; the Wiggins Ferry Company, the East St. Louis Connecting Railway Company, and the St. Louis Transfer Railway Company are operated in connection, and through facilities owned and operated by these three companies, a great number of cars are and were at the times in the petition stated, daily transferred between railroads entering East St. Louis and railroads entering St. Louis.

VII.

35. With respect to the averments in the seventh subdivision of the petition, admit and aver the Missouri Pacific Railway Company and the Wabash, St. Louis & Pacific Railway Company in 1881 entered into an agreement with the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, by which all of the properties of the bridge and tunnel companies, including the properties of the Union Railway and Transit Company of St. Louis, and the Terminal Railroad of St. Louis, which had been theretofore leased to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, were leased to the Missouri Pacific Railway Company and the Wabash, St. Louis & Pacific Railway Company, and in pursuance of such lease, the Missouri Pacific Railway Company and the Wabash
69 & St. Louis Railway Company took possession of and operated the properties of the St. Louis Bridge Company and the

Tunnel Railroad of St. Louis, the Terminal Railroad of St. Louis and the Union Railway & Transit Company of St. Louis, but deny the purpose, effect, or object of such leases was to place any restraint upon any interstate or foreign trade or commerce of any character or in any manner, or to monopolize interstate commerce or trade, or to suppress competition therein between any railway systems, or by means of said lease, or of any agreement, combination, or understanding, the Missouri Pacific Railway Company and the Wabash, St. Louis & Pacific Railway Company, or either of them, were enabled to arbitrarily or in any manner fix and maintain whatsoever prices they wished for the transportation of freight and passengers between the States of Illinois and Missouri, or over the Eads Bridge, or between said States and the several States of the United States or foreign countries; or by reason of the control of the facilities secured to said railway companies, by vitrue of said leases, or in any other manner, there were charged unreasonable or exorbitant bridge tolls or charges for transporting passengers or freight among any of the States of the United States or from any foreign country, or the public was in any manner or to any extent subjected thereby to numerous and unnecessary delays, or any delays in carrying on interstate trade and commerce.

36. Admit on February 3, 1887, the Congress of the United States granted a charter to the St. Louis Merchants Bridge Company, and to its successors and assigns, to build a bridge across the Mississippi River at the city of St. Louis; admit the said act of Congress contained section 11, as set forth in the petition, and afterwards, on September 10, 1888, the Congress of the United States amended said section 11 in the manner and form in the petition stated; but deny that in so amending said act the Congress of the United States acted improperly or was unmindful of the public welfare.

37. Except as above and hereinafter stated, deny each and every allegation in the seventh subdivision of the petition, and with respect to the matters and things set forth in said subdivision aver the facts to be as hereinafter fully stated.

VIII.

38. With respect to the averments of the eighth subdivision of the petition and in the first paragraph thereof, admit on October 1, 1889, an agreement was entered into between the Terminal Association, the St. Louis Bridge Company, the Tunnel Railroad of St. Louis, the Missouri Pacific Railway Company, and the Wabash Railroad Company (successor of the Wabash, St. Louis & Pacific Railway Company), whereby the lease referred to in the seventh subdivision of the petition was cancelled, and an agreement was entered into by which the Terminal Association became lessee of the properties of the St. Louis Bridge Company and of the Tunnel Railroad of St.

Louis; deny said agreement was entered into in pursuance of any combination to control or restrain interstate trade or commerce
71 at any place or in any manner or form, but aver the purpose of such agreement was to promote such trade and commerce, and the effect was to prevent monopoly thereof, and the agreement is as hereinafter stated; deny that on the 17th day of August, 1893, or at any time, any of the companies in the petition, or any of the officers or directors of any of such companies, so charged, formed, or entered into any combination, agreement, or understanding of any character for the purpose in any manner or to any extent to restrain trade or commerce among the several States, or any of them, or between said States and any of them and any foreign countries, or to monopolize in any manner or to any extent any trade or commerce, or prevent competition with respect thereto, or to deprive the public in any manner or to any extent of any facilities or advantage with respect to any trade or commerce of any character.

39. Deny any of the companies named in the petition, or any of the officers or directors of such companies so charged, have at any time entered into any combination, agreement, understanding, or conspiracy to effect a consolidation or control of any of the properties of any of the companies in the petition named for the purpose of unlawfully or unreasonably or in any manner restraining interstate trade or commerce, or for any unlawful purpose whatsoever.

40. Admit on the 17th day of August, 1893, the Merchants Company and the Terminal Association entered into an agreement containing substantially the conditions and terms in the petition
72 set forth; and aver that on said date there was also an agreement entered into between the Terminal Association and the Merchants Company whereby the Terminal Association became the assignee of the contract which had theretofore been made between the St. Louis Terminal Railway Company and the Merchants Company, and the Terminal Association thus came into control of the St. Louis Terminal Railway Company and its property, and has continued to control, and does now control, and operate the same, but avers these agreements are as hereinafter stated.

41. Deny in the year 1893 there was, or at any time there has been, or is now in force or effect, any agreement and pooling arrangement between the *the* Wiggins Ferry Company, the Terminal Association, and the Merchants Company, establishing rates for passengers and freight carried by them or either of them between the States of Illinois and Missouri, or between said States and any other States or foreign countries, or any such agreement does now, or at any time ever has existed between any of the said companies.

42. Deny any combination, conspiracy, understanding or agreement of any kind or character has ever at any time been entered into between any of the companies in the petition named with respect to any of the terminal properties therein described, the purpose and object of which was in any manner to control or restrain interstate commerce between the States of Missouri and Illinois, or between any States of the United States or any foreign countries.

POOR COPY

73 43. Deny on the 1st day of May, 1897, or at any time, the Merchants Company sold to the Terminal Association any shares of stock of the Merchants Company other than the shares of stock specifically mentioned in the agreement of August 17, 1893, just referred to; aver the Terminal Association did, in the year 1893, purchase such additional shares of stock of the Merchants Company as to give the Terminal Association a majority of the stock of that company, but deny the Terminal Association owns or operates the Merchants Company, fixes the rates to be charged for the transportation of passengers and freight over the lines of that company, or any properties controlled by that company, or fixes unreasonable rates or toll to be charged upon both or either of said bridges, or operates the same as a single instrument of interstate commerce, or in any manner enjoys and maintains a monopoly of any interstate commerce or trade, or deprives the people of benefit of competition between instruments of such commerce; on the contrary, aver that the relations between these two companies are as hereinafter set forth, and of necessity promote competition in and prevent a monopoly of interstate commerce.

44. Admit subsequent to the 17th day of August, 1893, the Missouri, Kansas and Texas Railway Company, Chicago & Alton Railway Company, St. Louis & San Francisco Railroad Company, Illinois Central Railroad Company, Southern Railway Company, Chicago, Burlington & Quincy Railway Company, St. Louis, Vandalia & Terre Haute Railroad Company (now Vandalia Railroad 74 Company) and the Chicago, Rock Island & Pacific Railway Company became stockholders in the Terminal Association, and each of said companies is now the owner of the amount of the capital stock of the Terminal Association as in the petition set forth; aver the Baltimore & Ohio Southwestern Railroad Company is likewise an owner of the amount of capital stock stated in the petition to be owned by it, but said railway company is such owner by virtue of being the successor of the Ohio & Mississippi Railway Company, which became an owner of stock of the Terminal Association in 1889.

45. Deny the proprietary companies operate under one control or management, or at any time have operated under one control or management, the Terminal Association and the Merchants Company, or the railways owned or controlled by either of these companies, or fix their charges and tolls, or that an unreasonable price was, or is, charged as toll for transporting passengers or freight upon or over either of said bridges, or that an unreasonable price was, or is, charged for transporting passengers or freight over the respective lines of railway of the Terminal Association and the Merchants Company; deny that unreasonable charges are made by either the Merchants Company or the Terminal Association for any service of any character, or that the Terminal Association is, in truth or in fact, a holding company for the proprietary companies; but aver the facts to be, with reference to all of the matters and

things set forth in the eighth subdivision of the petition, the Terminal Association is an active operating terminal company, own-
75 ing railway tracks and motive power, and, under an agreement between it and the proprietary companies, regulates its own charges and tolls in such manner that the revenue derived therefrom shall be sufficient only to meet its fixed charges and operating expenses; by reason of the fact that the system of the Merchants Company, though separate and distinct, complements the system of the Terminal Association, trackage arrangements are necessary to be made, and have been made, between these companies whereby practically all interstate traffic passing over the system of the Merchants Company passes likewise over the system of the Terminal Association, and for the use of the facilities of the two systems a single charge is made; the result of this arrangement is efficiency in service, economy in operation, and reduction in rates; with respect to all these matters and things, the facts are as hereinafter fully stated.

46. Deny competition in the transportation of freight and passengers between the States of Illinois and Missouri and the several States or any States of the United States and any foreign country, has become and is now, or ever was, in any manner stifled, destroyed, or restrained by reason of any act or thing in the petition complained of, or otherwise; deny unreasonable charges are now, or at any time ever have been, established, taxed, or collected for the transportation of passengers or freight between the States of Illinois and Missouri and any States of the United States or any foreign countries, by reason of any matters or things in the petition stated, or otherwise, on the contrary, aver by reason of those facts and things in
76 the petition set forth, which are herein admitted to be true, competition in the transportation of passengers and freight between the States of Illinois and Missouri and the several States of the United States and foreign countries is promoted and encouraged.

47. Deny, except as hereinabove and hereinafter stated, each and every allegation in the eighth subdivision of the petition.

IX.

48. With respect to the averments of the ninth subdivision of the petition, deny in the year 1902, or at any time, any arrangement, agreement, or contract was entered into between the Terminal Association and the Wiggins Ferry Company, whereby the Terminal Association obtained control of the Wiggins Ferry Company, or any of its property of any character whatsoever; deny by reason of any arrangement, agreement, or contract at any time entered into between these companies, any shares of the capital stock of the Wiggins Ferry Company have been deposited with the Mercantile Trust Company of New York as trustee, or with any other company or person as trustee, for any purpose whatsoever; deny the Terminal Association has pledged as security for any issue of any bonds made by it any of the stock of the Wiggins Ferry Company; deny since the year 1902, or at

POOR COPY

this time, the Terminal Association controls the Wiggins Ferry Company or any of its property, or fixes any of the rates or tolls to be charged by that company for any purpose; but aver all the
77 capital stock of the Wiggins Ferry Company is pledged and deposited with a trustee to secure the payment of bonds issued by the Terminal Association, the circumstances, nature, and character of which pledge are as hereinafter fully set forth.

49. Deny by reason of any matter or thing in the petition complained of, competition with respect to interstate commerce or trade is in any manner or to any extent stifled, destroyed, restrained, or monopolized.

50. Deny the motives, intentions, purposes, or objects of any of the defendants, in respect to any of the matters or things in the petition complained of, are as stated in the petition, but were and are as herein stated.

X.

And for further full and complete answer to the petition say;

51. The organization of the terminal, bridge, and ferry companies named in the petition, the purposes of such organization, the properties at any time owned or controlled by any of them, the relations of these properties to each other and the agreements with respect to the use thereof, the growth and development of terminal facilities in the cities of St. Louis and East St. Louis and the uses to which they are put, as well as the terms and conditions upon, and the purposes for which the same are operated and controlled, and the effect thereof, are as follows:

78 52. With respect to the Eads Bridge and the tracks connecting therewith upon each side of the Mississippi River: Prior to the year 1874 there were few industries located in or in the neighborhood of St. Louis or East St. Louis which had railway connections, and the freight and passenger traffic between the various lines then entering the city of St. Louis and the city of East St. Louis, and between such railway lines and industries located in these cities, was handled by means of wagons and ferries. For the purpose of facilitating public convenience and safety in the handling of freight and passenger traffic between and in these cities there was constructed, in 1874, the railway bridge herein referred to as the Eads Bridge across the Mississippi River between these cities, and terminal facilities were constructed connecting with the bridge. The construction of this bridge and of these terminals came about in the following manner:

53. On February 5, 1864, the St. Louis & Illinois Bridge Company was incorporated by special act of the Legislature of the State of Missouri, entitled "An act to incorporate the St. Louis & Illinois Bridge Company," and authorized to construct a bridge over the Mississippi River at St. Louis. This act was amended February 26, 1865, by an act entitled "An act to amend an act entitled 'An act to incorporate the St. Louis & Illinois Bridge Company,' approved

February 5, 1864." February 16, 1865, the Legislature of the State of Illinois, by special act entitled "An act to empower the persons mentioned in an act passed by the General Assembly of the State of
79 Missouri, entitled 'An act to incorporate the St. Louis & Illinois Bridge Company,' approved February 5, 1864, to form a corporation and build a bridge across the Mississippi River at St. Louis," authorized the construction of this bridge over that portion of the river within the jurisdiction of the State of Illinois, and on July 25, 1866, was approved an act of the Congress of the United States empowering the St. Louis & Illinois Bridge Company to erect a bridge at St. Louis.

54. February 21, 1867, by special act of the Legislature of the State of Illinois, entitled "An act to incorporate the Illinois & St. Louis Bridge Company," the Illinois & St. Louis Bridge Company was incorporated, with power to construct a bridge over the Mississippi River at St. Louis, and authorized to consolidate with any bridge company incorporated under the laws of Missouri having like power.

55. March 19, 1868, the Missouri Legislature passed a special act entitled "An act to authorize the consolidation of the St. Louis & Illinois Bridge Company with the Illinois & St. Louis Bridge Company," authorizing the consolidation of the St. Louis & Illinois Bridge Company and the Illinois & St. Louis Bridge Company, and on July 9, 1868, these corporations were consolidated under the name of Illinois & St. Louis Bridge Company. By an act approved July 20, 1868, Congress recognized the consolidation and granted the consolidated company authority to construct a bridge, as authorized by the act of Congress of July 25, 1866.

80 56. The Illinois & St. Louis Bridge Company (the consolidated company) began the construction of the Eads Bridge and completed the same on July 1, 1874; pending the construction of this bridge a mortgage was executed by the Bridge Company under date of March 15, 1870, securing $4,000,000.00 of bonds; a second mortgage was executed May 15, 1871, securing $2,000,000.00 of bonds, and a third mortgage March 2, 1874, securing $3,000,000.00 of bonds. All of these bonds were issued and the proceeds used in the construction of the bridge. November 8, 1872, and while work on the Eads Bridge was in progress, the St. Louis Tunnel Railroad Company was incorporated under the laws of Missouri for the purpose of constructing a railroad from the terminus of the bridge near Third Street, in the city of St. Louis, to a point between Poplar and Cerre Streets, and between Eighth and Tayon Avenue (now Eighteenth Street) so as to make connection with the track of the Missouri Pacific Railway Company and the track of any other railroad company and provide necessary sidetracks in the city of St. Louis. Shortly after the incorporation of this company work was begun upon its railway, commonly known and herein referred to as the tunnel, and on November 29, 1872, the city of St. Louis, by ordinance No. 8101, transferred to and vested in the St. Louis Tunnel Railroad Company the rights and privileges with respect to the building of

the tunnel, which it had theretofore conferred upon the consolidated bridge company. This tunnel was completed on July 4, 1874, concurrent with the completion of the bridge. Pending the construction of the tunnel, the Tunnel Company executed its mortgage
81 under date of January 1, 1873, securing 250,000 pounds sterling bonds, which were issued and the proceeds used in the construction of the tunnel.

57. Default was made in payment of the interest on the bonds secured by these mortgages of the Bridge and Tunnel Companies, receivers were appointed and the mortgages foreclosed by proceedings in the Circuit Court of the United States in and for the Eastern District of Missouri, and a decree was entered April 24, 1878, ordering the sale of the properties of the Bridge and Tunnel Companies.

58. For the purpose of purchasing the bridge and tunnel properties at the sale to be made under this decree the St. Louis Bridge Company was incorporated under the laws of the State of Missouri, December 18, 1878, and the Tunnel Railroad of St. Louis was incorporated under the laws of the same State on the same day. Shortly thereafter the St. Louis Bridge Company became the purchaser under this foreclosure proceeding and now is the owner of the Eads Bridge, and the Tunnel Railroad of St. Louis became the purchaser under the same foreclosure proceeding and now is the owner of the tunnel. The St. Louis Bridge Company has an outstanding capital stock of $7,990,000, of which $2,490,000 are first preferred, $3,000,000 second preferred, and $2,500,000 common; it has also issued $5,000,000 of bonds, secured by mortgages to J. C. Rogers and E. C. Tracy, trustees, dated April 1 1879. The Tunnel Railroad of St. Louis has an outstanding capital stock of $1,250,000; the proceeds of
82 the bridge company stock and bonds and of the tunnel company stock were used in payment for the bridge and tunnel properties, and these bonds and stocks are now principally held and owned in Europe.

59. While the Eads Bridge and the tunnel were in course of construction it was the intention and purpose of the Bridge and Tunnel Companies that the bridge and tunnel would be used by all railroad companies desiring such use, with their own motive power, and that such railway companies would furnish their own respective terminal facilities in the way of switches, sidetracks, freight houses, and passenger depots, for the handling of freight and passenger traffic, which would be separately and independently transported through the tunnel and over the bridge by the various railroad companies; for this reason up to within a short time before the completion of the bridge and tunnel no provision had been made for the acquisition of locomotives, acquisition of land for or construction of sidetracks, warehouses, passenger stations or terminals of any character, or for the operation, by the Bridge and Tunnel Companies, of trains of any character through the tunnel or over the bridge. The Bridge and Tunnel Companies, however, discovering within a few months before the completion of their respective properties, that

none of the railroads then entering the city of St. Louis or East St. Louis had made, or intended to make, any provision for making any connection with the bridge or tunnel in either city, found it necessary to cause to be constructed terminal tracks in each
83 city connecting, in the city of East St. Louis, with the eastern approach of the bridge, and, in the city of St. Louis, with the tunnel, and also to make provision for transferring, through the tunnel and over the bridge, such cars as might be tendered for that purpose by such railway companies as might connect with the terminals and tracks so to be constructed; and to this end the Bridge and Tunnel Companies caused to be incorporated under the laws of the State of Missouri, the Union Railway & Transit Company of St. Louis, on April 13, 1874, and, under the laws of the State of Illinois, the Union Railway & Transit Company of Illinois, on April 14, 1874. The articles of incorporation of the Missouri company declared the purpose of its incorporation was to construct tracks from the western end of the tunnel for railway connection between the bridge and tunnel and any railroads then and thereafter to be constructed in the city of St. Louis, and approaching the tunnel; to provide switches, sidetracks and other necessary appurtenances, and to operate trains through the tunnel and over the bridge; while the articles of association of the Illinois company declared the object of its incorporation to be the construction of tracks and yards in the city of East St. Louis, Illinois, to connect the railroads then entering, or that might thereafter enter, East St. Louis, with the east approach of the bridge, and for the operation of the railroad tracks over the bridge and through the tunnel. In pursuance of this purpose the Union Railway & Transit Company of St. Louis acquired a small tract of land near the western end of the tunnel, and extending westwardly a short distance, on which were constructed railway tracks, switches and sidetracks connecting with the tunnel,
84 and the Union Railway & Transit Company of Illinois acquired a small tract of land in East St. Louis, near the bridge approach, on which railway tracks and switches were constructed. Neither of the transit companies had any passenger stations, either in the city of St. Louis or East St. Louis, or undertook to transport, as common carriers, passengers or freight; the business conducted by the transit companies consisted solely of transporting, with their locomotives, the cars, and trains of cars, which were received by them from the various railway companies connecting with them in the cities of St. Louis and East St. Louis.

60. As the bridge and tunnel properties had been constructed simply for the purpose of furnishing railway tracks for the operation thereover, by the railway companies, of their freight and passenger trains, no provision was made by either the Bridge or Tunnel Company for the accommodation or handling of passenger traffic, and on April 10th, 1874, there was incorporatied under the laws of Missouri the Union Depot Company of St. Louis for the purpose of constructing and maintaining union stations for passengers and freight in the

city of St. Louis, and constructing and maintaining railway tracks to connect such freight and passenger stations with the terminals, and such railroads as might desire such connections. This company was formed in pursuance of an agreement theretofore entered into between the Atlantic & Pacific Railroad Company, Terre Haute & Indianapolis Railroad Company, Indianapolis & St. Louis
85 Railroad Company, St. Louis & Southeastern Railway Company, the Ohio & Mississippi Railway Company, and certain individuals who were willing to furnish the necessary capital for the purchase of the ground and construction of the Union Depot in the city of St. Louis, from and to which passenger trains of all railroad companies terminating in St. Louis, or entering the city over the bridge and tunnel tracks, might run, and for the rental of the depot, so to be constructed, to all the railway lines in common, and the operation and management of the depot by such railway lines, with the right on the part of the lessees to purchase the depot properties at any time after fifteen years. In pursuance of this agreement, and of the articles of association of the Union Depot Company, a Union passenger station was constructed, and tracks connecting it with the tracks of the Union Railway & Transit Company of St. Louis (the tracks of which connected with the tunnel as stated) were laid, and thereafter the Union Station, so built between Eleventh and Twelfth Streets, on Poplar Street, was operated by the railroad companies entering the cities of St. Louis and East St. Louis, until 1894. This station was opened in 1875.

61. The Union Depot Company of St. Louis was incorporated in pursuance of an act of the legislature of the State of Missouri, which provided for the formation of companies in order to facilitate the public convenience and safety in the transmission of goods and passengers in large cities from one railroad to another, and to prevent the unnecessary expense, inconvenience and loss attending the
86 accumulation of a number of stations. The act further provided that any railroad company or companies might incorporate such company and become stockholders thereof.

62. In 1875, the bridge and tunnel having been completed, and the terminals established in connection therewith by the Union Railway & Transit Company of St. Louis and the Union Railway & Transit Company of Illinois, as hereinbefore stated, the Union Railway & Transit Company of St. Louis undertook to provide, and did provide, locomotives and train crews for the handling of freight and passenger trains over the bridge and through the tunnel, and delivering the same to and for the various railway lines in St. Louis and East St. Louis; and when the Union Station was completed, in 1875, the Union Railway & Transit Company also, for the railway companies terminating in the city of East St. Louis, brought their passenger trains into St. Louis and into and out of the Union Station in St. Louis, through the tunnel and over the bridge. This method of operating the bridge and tunnel, and the terminals connected therewith, continued until 1879, when, on the first day of January, of that

year, the Union Railway & Transit Company of St. Louis and the Union Railway & Transit Company of Illinois leased all their properties, including their locomotives, to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis, at an annual rental, with the right, upon the part of the lessees, to purchase the properties.

87 63. The terminal facilities provided, as stated, by the Union Railway & Transit Company of St. Louis, in the city of St. Louis, and by the Union Railway & Transit Company of Illinois, in the city of East St. Louis, proving inadequate for the demands of traffic, there was incorporated, under the laws of the State of Missouri, on February 25, 1880, the Terminal Railroad of St. Louis, for the purpose of constructing railroad tracks in the city of St. Louis connecting the tracks of the Union Railway & Transit Company of St. Louis, the Union Depot Company of St. Louis, the Tunnel Railroad of St. Louis, and all railroads entering, or to enter, the city of St. Louis, so as to provide the most ample and convenient connections, accommodations, and terminal facilities in St. Louis for all railroads then, or therafter, to enter St. Louis, and all parties doing business with such railroads. This company acquired small tracts of land between Twelfth and Eighteenth Streets, and, on the land so acquired, tracks were laid and connections made with the Union Depot, Union Railway & Transit Company and the various railway lines connecting with those companies. On February 23, 1880, there was incorporated, under the laws of the State of Illinois, the Terminal Railroad of East St. Louis (referred to herein at times as Terminal Railroad of Illinois), for the purpose of connecting, in that city, the bridge approach and the tracks of the Union Railway & Transit Company of Illinois with the tracks of other railroads entering, or that might thereafter enter, the city of East St. Louis, the general object and purpose being to provide

88 ample and convenient connections, accommodations, and terminal facilities in and near the city of East St. Louis for all railroads then or thereafter entering that city; this company acquired lands in East St. Louis adjacent to the lands of the Union Railway and Transit Company of Illinois.

64. On March 3, 1880, the Terminal Railroad of St. Louis and the Terminal Railroad of East St. Louis, owning no motive power, but simply small parcels of land on which tracks had been constructed, leased their properties to the St. Louis Bridge Company and the Tunnel Railroad of St. Louis at an annual rental based upon the cost of the properties and with the right on the part of the lessees to purchase the properties.

65. By virtue of the control of the properties of the two Union Railway & Transit Companies and of the two Terminal Railroads acquired through these leases the St. Louis Bridge Company and the Tunnel Railroad of St. Louis assumed the operation, through the tunnel and over the bridge, of the cars and trains of the various railroad companies entering the cities of St. Louis and East St. Louis and connecting with the leased and operated terminals. This

method of handling trains and cars of the various railroad companies principal of the $5,000,000 of bonds of the St. Louis Bridge Company, and Tunnel Railroad of St. Louis jointly leased their properties and assigned their leases of the properties of the two Union Railway and Transit Companies and of the two Terminal Railroads to the Wabash, St. Louis & Pacific Railway Company and the Mis-
89 souri Pacific Railway Company for and during the term of the corporate existences of the lessor companies, and of each of them, and of any and all renewals and extensions of such corporate existences; the lessees agreed to pay by way of rental the interest and principal of the $5,000,000 of bonds of the St. Louis Bridge Company, dividends at the rate of $5.00 per share for three years, and thereafter at the rate of $6.00 per share, on $2,490,000 of the first preferred capital stock of the Bridge Company, dividends at the rate of $3.00 per share yearly on $3,000,000 on the second preferred capital stock of the Bridge Company, dividends at the rate of $6.00 per share annually on $1,250,000 of the capital stock of the Tunnel Railroad of St. Louis, and all taxes and assessments upon the properties leased. By this lease the Wabash, St. Louis & Pacific and Missouri Pacific Railway Companies secured control of the bridge and tunnel and of the grounds and tracks of the two Union Railway & Transit Companies and the two Terminal Railroads, and operated these properties thereafter until 1889. During this period the bridge and tunnel and terminal properties were operated by the Wabash, St. Louis & Pacific and Missouri Pacific Railway Companies separately from their other properties. The operation of the bridge and tunnel and terminal properties consisted in the switching of trains and cars through the tunnel and over the bridge for all railway companies in the cities of St. Louis and East St. Louis connecting with terminals on either side of the river and desiring such service. The operation of the bridge and tunnel properties by these railway com-
90 panies, as lessees, was not a source of revenue or profit, as the charges were at all times so regulated as to produce only revenue sufficient to pay the fixed charges, payment of which had been assumed under the leases, and the cost of operation. In 1889 Mr. Jay Gould, who was then in control through stock ownership of the Missouri Pacific Railway Company and of the Wabash Railroad Company (the successor of the Wabash, St. Louis & Pacific Railway Company), both of which companies had termini in the city of St. Louis, and were largely interested in the development and growth of the city, entered into an agreement, under date of October 1, 1889, with the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, Wabash Railroad Company, Ohio & Mississippi Railway Company (now the Baltimore & Ohio Southwestern Railroad Company), St. Louis, Iron Mountain & Southern Railway Company, Louisville & Nashville Railroad Company, and the Missouri Pacific Railway Company for the purpose of securing an efficient and economical system of handling freight and passenger traffic at St. Louis and East St. Louis, and enlarging and perfecting the system

for handling such traffic. By the terms of this agreement Mr. Gould, who had by individual purchase personally acquired the capital stock of the two Union Railway & Transit Companies, the two Terminal Railroads, and the Union Depot Company, agreed with the railroad companies just named, parties to the agreement, to cause the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis to be consolidated as the Terminal Railroad Association of St. Louis (herein referred to as Terminal Association),
91 and to cause to be conveyed to this consolidated company the property of the Union Depot Company and the capital stock of the Union Railway & Transit Company of Illinois and the Terminal Railroad of Illinois, and to further cause a portion of the capital stock of the Terminal Railroad Association of St. Louis to be issued, in equal parts, to the six railway companies named, the remainder of the stock to be retained and to be issued to such other railroad companies as might thereafter desire to become parties to the agreement. The agreement further provided that Mr. Gould would cause to be transferred to the Terminal Association the leasehold interests of the Missouri Pacific Railway Company and Wabash Railroad Company in the bridge and tunnel above described. It was also provided that the Terminal Association should issue its bonds to the extent of $7,000,000, of which $5,000,000 should be used in payment for the purchase of the properties to be conveyed to and vested in the Terminal Association, and the remaining $2,000,000.00 should be used to purchase additional real estate and construct additional passenger and freight terminal facilities in St. Louis and East St. Louis. The railroad companies, parties to this agreement, were by a concurrent agreement granted the right in perpetuity of joint use with each other, and such other companies as might from time to time be admitted as proprietary lines of the Terminal Association, of all its properties, the use so granted to be appurtenant to each railroad company. The railroad companies, parties to this agreement, on their part accepted in perpetuity the joint use of the property of the Terminal Association, and agreed that the
92 charges for the use so granted should be sufficient to pay the fixed charges provided for in the leases of the bridge and tunnel properties, the interest on the bonds given for the purchase price of the terminal properties, interest on such future sums as might be expended in the acquisition of additional properties, and to pay taxes and operating expenses. The agreement also provided for the subsequent admission, at any time thereafter, of any other railroad company desiring such admission. The fixed charges on the bridge and tunnel properties thus assumed by the Terminal Association were and are interest at seven per centum on $5,000,000 of bridge bonds, annual dividends of $6.00 per share on $2,490,000 of first preferred bridge stock, $3.00 per share on $3,000,000 of second preferred bridge stock, $6.00 per share on $1,250,000 of tunnel stock, and all taxes on these properties.

66. In pursuance of these agreements the Union Railway & Transit Company of St. Louis and the Terminal Railroad of St. Louis were consolidated on July 30, 1889, as the Terminal Railroad Association of St. Louis (herein referred to as Terminal Association). The lease of the bridge and tunnel properties was assigned (with the consent of the Bridge Company and Tunnel Railroad) by the Missouri Pacific and Wabash Railroad Companies to the Terminal Association, and in this way the Terminal Association, in 1889, became the owner of the properties of the Union Railway & Transit Company of St. Louis, the Union Depot Company, the Terminal Railroad of St. Louis, the owner of the stock of the Union Railway &
93 Transit Company of Illinois, and the Terminal Railroad of Illinois, and the lessee of the Eads Bridge and the tunnel, and thereafter operated and does now operate the same in pursuance of the agreement just mentioned. The object and purpose of this agreement were to provide terminal facilities in the cities of St. Louis and East St. Louis, and for the switching of cars and trains between the cities, such use and service to be open not only to the six railway companies parties to the agreement, but also, and upon like terms and conditions, to any and all other railroad companies desiring such use and service; the operation of the properties to be without profit to the stockholders of the Terminal Association, but for the purpose of furnishing convenient and ample facilities for the railway lines entering the cities of St. Louis and East St. Louis; and, in conformity with this object and purpose, the properties of the Terminal Association have been, since the formation of the Association in 1889, so operated, and have at all times been and now are open to the use of all railway lines not members of the Terminal Association upon the same terms and conditions accorded the proprietary companies. No dividends have been declared or paid on any of the stock of the Terminal Association, and its charges have at all times been so regulated as to produce revenue sufficient only to meet its fixed charges and operating expenses and make necessary alterations, improvements, and repairs.

67. The properties, the control of which the Terminal Association acquired in 1889, consist of the bridge and tunnel, a small
94 tract of land in the city of East St. Louis, near the east approach of the bridge, and a right of way some hundred feet in width extending from Eighth and Poplar Streets, in the city of St. Louis, westward to about Twentieth Street, and, adjoining this right of way, various parcels of land on which are located switches and sidetracks. With these terminals at that time were connected, in St. Louis, the tracks of railways entering the city from the south and southwest, while the terminals in East St. Louis were connected with some of the railways entering the city, so that, by virtue of this control of the properties named, the Terminal Association in 1889 was able to switch, for all railways connecting, trains and cars between Twentieth Street, in the city of St. Louis, and a point near the Relay Station, in the city of East St. Louis. Under

date October 1, 1889, the Terminal Association executed its mortgage to the Central Trust Company of New York, trustee, securing $7,000,000 of four and one-half per cent bonds, payable October 1, 1939; and, under date August 1, 1893, to the same trustee, a second mortgage securing $5,000,000 of five per cent bonds, payable August 1, 1943. All of the first-mortgage bonds were issued and are now outstanding; $3,500,000 of the second-mortgage bonds were exchanged for bonds issued by the Terminal Association under a consolidated mortgage dated November 10, 1894, to the Central Trust Company of New York, trustee, securing $12,000,000 of five per cent bonds; of the authorized issue of $12,000,000 of these consolidated bonds, $5,000,000 have been issued and are now outstanding, $3,500,000 taking the place of a like amount of second-mortgage bonds. The
95 proceeds of these bond issues were used in part for the purchase of the properties acquired from Mr. Gould in the manner and at the time hereinbefore stated, and the remainder in the acquisition of properties, the construction of terminal tracks and facilities thereon, and in the construction of the new Union passenger station in the city of St. Louis, fronting on Market Street, between Eighteenth and Twentieth Streets, the construction of which was completed in 1894. This passenger station is now, and since its completion has been, used by every railway line entering the city of St. Louis for receiving and discharging their passengers in the city of St. Louis. For such use of this station all railway lines are charged, without discrimination or preference, like compensation, and without regard to membership in the Terminal Association, on a wheelage basis. Through such use of this station a passenger reaching the city of St. Louis on any railway line, and desiring to leave the city on any other railway line, effects the change for himself and baggage without leaving the station, and in this manner passenger traffic is promoted and encouraged.

XI.

68. The St. Louis Merchants Bridge Company was incorporated under the laws of the State of Illinois on April 4th, 1886, for the purpose of constructing a bridge over the Mississippi River at St. Louis, and on February 3, 1887, the Congress of the United States authorized this company and any incorporated railroad companies associated with it to build a bridge across the Mississippi River at some suitable point between the Eads Bridge and the mouth
96 of the Missouri River. This act of Congress provided that all railroad companies desiring to use this bridge should have equal rights and privileges for the passage of railway trains upon the payment of reasonable compensation, and in the event of disagreement as to the compensation and terms of use the matter should be determined by the Secretary of War. The bridge was completed and opened for operation in May of 1890 and is the structure referred to in the petition as the Merchants Bridge.

69. The St. Louis Merchants Bridge Terminal Railway Company (herein referred to as Merchants Company) was incorporated August 17, 1887, under the laws of Missouri, for the purpose of operating a railroad within the corporate limits of the city of St. Louis, from Eighth and Gratiot Streets to the western approach of the Merchants Bridge, and, by ordinance of the city of St. Louis, approved in 1887, was authorized to construct its railway tracks over the route designated, and to receive from and deliver to any railroad company connecting with it all cars tendered, and to permit all railroads connecting with it to operate their trains, locomotives, engines, and cars over its tracks, upon such terms and conditions as might be agreed upon; this ordinance also provided for arbitration in the event the parties could not agree, and, in default of arbitration, the railroad commissioners of the State of Missouri should determine the matter in controversy.

70. The tracks authorized by this ordinance were con-
97 structed, and, on February 1, 1889, the Merchants Company leased the Merchants Bridge, which was then under course of construction. This lease provided that all railroad companies desiring the use of the property should be entitled to the equal rights and privileges relative to the passage of trains thereon as were enjoyed by the lessee. As payment for rental, the lessee agreed to pay interest on $2,000,000.00 of the bonds of the Bridge Company, taxes on the bridge property, and three-fourths of the net income accruing from the operation and use of the bridge. On March 4, 1889, there was incorporated under the laws of the State of Illinois the Electric City & Illinois Railway Company, for the purpose of constructing a railway from the east approach of the Merchants Bridge, through Madison County, Illinois, to the city of East St. Louis. The name of this company was changed to Madison, Illinois & St. Louis Railway Company. This company constructed a line from the east approach of the Merchants Bridge to Granite City, Illinois, but never constructed a line into the city of East St. Louis. This company was incorporated in the interest of the Merchants Company, and all of its stock is owned by that company. In 1893 the lease of the Merchants Bridge to the Merchants Company was cancelled and the bridge was leased to the Madison, Illinois & St. Louis Railway Company. Through this lease of the Merchants Bridge, and its ownership of the stock of the Madison, Illinois & St. Louis Railway Company, the Merchants Company switches cars and trains of cars from Seventh and Gratiot Streets, in the city of St. Louis, to the levee or wharf, thence northwardly to Ferry Street, in the city of St. Louis,
98 and over the Merchants Bridge to Granite City, Illinois.

71. In order to secure funds for the erection of the Merchants Bridge and constructing the tracks of the Merchants Company and of the Madison, Illinois & St. Louis Railway, bonds were issued as follows: $3,500,000 of bonds of the St. Louis Merchants Bridge Terminal Railway Company, secured by mortgage dated October 1, 1890, to the St. Louis Trust Company, bearing five per

cent interest, payable semiannually; $2,000,000 of bonds of the St. Louis Merchants Bridge Company, secured by mortgage dated February 1, 1890, to Farmers Loan & Trust Company of New York, bearing six per cent interest, payable semiannually; and $500,000.00 of bonds of the Madison, Illinois & St. Louis Railway Company, secured by mortgage dated October 1, 1891, to the St. Louis Trust Company, bearing six per cent interest, payable annually.

72. The operation of the Merchants Bridge, the Merchants Company, and the Madison, Illinois & St. Louis Railway Company proved unprofitable, and in 1893 the Merchants Company was insolvent, having a large floating indebtedness, and was unable to meet its obligations at maturity or pay interest maturing upon its own bonded indebtedness, that of the Madison, Illinois & St. Louis Railway Company, or upon the bonded indebtedness of the Merchants Bridge. The facilities so owned and controlled by the Merchants Company were separate and distinct from the system of termi-
99 nals owned and controlled by the Terminal Association. The tracks controlled and operated by the Merchants Company were at right angles with the tracks operated by the Terminal Association—the tracks of the Merchants Company beginning at Eighth and Gratiot Streets, in the city of St. Louis, and running to the river front northwardly and diverging to Hall Street about four miles to Ferry Street, there crossing the Merchants Bridge and continuing northwardly to Granite City in Illinois; while the tracks operated by the Terminal Association began at Twentieth Street and Clark Avenue, in the city of St. Louis, and extended eastwardly, through the tunnel and over the Eads Bridge, to a point near the Relay Station, in the city of East St. Louis, Illinois. There was no industry located at any point on the tracks of either company which was reached by the tracks of the other. The Merchants Company had no passenger station in the city of St. Louis, and did not connect in any manner with the Union Station or with any of the railway lines entering the city of St. Louis from the south or west, or with any of the railway lines entering the city of East St. Louis from the south or east.

73. In 1893 several of the railway lines entering, or about to enter, the city of St. Louis from the north, were desirous of reaching the new Union passenger station of the Terminal Association, which was in course of construction, while some of the railway companies entering the city of East St. Louis could more advantageously reach the Union Station, in the city of St. Louis, if connections could be formed between the tracks of the Terminal Associa-
100 tion and the Merchants Company, in such a way that trains and cars could, by continuous movement, pass between the cities of St. Louis and East St. Louis over the tracks of these two systems. Much of the freight traffic coming into the cities of St. Louis and East St. Louis was through traffic, destined to cross the Mississippi River at St. Louis. The facilities of the Terminal Association had become inadequate for the proper handling of the in-

creased traffic, and it was manifest it would be greatly to the interest of all the railroads then entering the city of St. Louis or the cities of East St. Louis, Madison, Granite City, Venice and East Carondelet, as well as of the public, if some arrangement could be effected whereby the two systems of terminals could be so connected and operated that freight traffic, through or local, between and in the cities of St. Louis and East St. Louis, or destined to cross the Mississippi River, or destined from one railway to another, or to any industry located on the tracks of either of the terminal systems, or the tracks of any one of the railway companies, could be moved without change of motive power, and with a single charge for the service so performed, so that all industries in the cities of St. Louis and East St. Louis, and located on the tracks of either system, could have equally efficient switching service, and without discrimination, preference, or advantage with respect to such service or the charges therefor. To this end and for this purpose, and to prevent the disintegration of the properties operated by the Merchants Company, and to secure the use in common without discrimination for all railway lines of these properties, an agreement was en-
101 tered into on the 13th day of August, 1893, between the Merchants Company and the Terminal Association, whereby the Terminal Association agreed to guarantee payment of the $3,500,000.00 of bonds of the Merchants Company, and to purchase from the Merchants Company 4,384 shares of its stock, and advance to the Merchants Company a sufficient amount to enable it to meet its current and pressing obligations. At the same time that this agreement was entered into the Terminal Association acquired other shares of the stock of the Merchants Company, so that the aggregate of the shares of stock thus acquired by it constitutes a majority of the stock of the Merchants Company. On its part the Merchants Company granted to the Terminal Association the right to operate its trains over all the terminal properties owned or controlled by the Merchants Company. The Terminal Association agreed to construct a line of railway connecting the Union passenger station with the Merchants Company, so that passenger trains might pass over the Merchants Bridge and into and out of the Union Station, and freight trains and cars passing over the Merchants Bridge and Merchants Company system might connect with the tracks of the Terminal Association.

74. This agreement of August 13, 1893, between the Merchants Company and the Terminal Association was recorded in the office of the secretary of state of Missouri at the time of its execution, and has continually been a matter of public record and general knowledge. In 1908 the State of Missouri, at the relation of
102 the attorney general, filed an information in the Supreme Court of the State of Missouri alleging the illegality of this agreement, and of the ownership by the Terminal Association of the stock of the Merchants Company; upon the hearing of this proceeding the Supreme Court of Missouri held that the acquisition and

ownership by the Terminal Association of the stock of the Merchants Company was authorized by the laws of the State of Missouri, and was in harmony with the statutes of the State of Missouri, which made special provision for such ownership of stock and control and operation by one terminal company of the tracks and facilities of other terminal companies.

XII.

75. The Wiggins Ferry Company is a corporation organized in 1853 under special act of the Legislature of the State of Illinois, entitled "An act to incorporate the Wiggins Ferry Company," for the purpose of operating ferries across the Mississippi River at St. Louis. It is the owner of large tracts of land in the city of East St. Louis available for terminal uses, and is the owner of all the capital stock of the East St. Louis Connecting Railway Company, a corporation organized under the laws of the State of Illinois, in 1878, and which owns railway tracks along the river front in East St. Louis connecting with some of the railways entering that city. The Wiggins Ferry Company also owns all the stock of the St. Louis Transfer Railway Company, a corporation organized under the laws of the State of Missouri in 1884, and which owns railway tracks about six miles in length, between Arsenal Street on
103 the south, and Calvary Avenue on the north. The tracks of the St. Louis Transfer Railway Company and of the East St. Louis Connecting Railway Company connect with the inclines of the Wiggins Ferry Company. The Wiggins Ferry Company owns almost the entire river front north of the Eads Bridge opposite the city of St. Louis and operates a number of ferry boats for transportation across the river of wagon traffic and freight cars. The lands of the Wiggins Ferry Company in East St. Louis are very extensive and are so located as to be readily utilized for terminal facilties used in connection with the properties owned and operated by the Terminal Association in the cities of St. Louis and East St. Louis.

76. In 1902 the Chicago, Rock Island & Pacific Railway Company, Missouri Pacific Railway Company, Louisville & Nashville Railway Company, St. Louis, Iron Mountain & Southern Railway Company, Wabash Railroad Company, Cleveland, Cincinnati, Chicago & St. Louis Railway Company, Baltimore & Ohio Southwestern Railroad Company, St. Louis & San Francisco Railway Company, then proprietary companies of the Terminal Association, and Pennsylvania Company (controlling the St. Louis, Vandalia & Terre Haute Railway Company, now Vandalia Railroad Company), with the object and purpose of causing the terminals of the Wiggins Ferry Company to be opened to the joint and equal use, upon like terms and conditions with themselves, of all railway lines then entering, or that thereafter might enter, St. Louis or East St. Louis, and which might desire such use, either for intrastate or interstate traffic,

104 purchased the capital stock of the Wiggins Ferry Company; and negotiations were opened with the Southern Railway Company, Missouri, Kansas & Texas Railway Company, Chicago & Alton Railway Company, Illinois Central Railroad Company, and Chicago, Burlington & Quincy Railway Company with a view of uniting all railway companies entering St. Louis or East St. Louis in the ownership and control in common of all of the stock of the Wiggins Ferry Company, and for the admission of all nonproprietary lines into membership in the Terminal Association on the same terms and conditions upon which all the other lines had theretofore been admitted. These negotiations resulted in the execution of agreements whereby the title to all the stock of the Wiggins Ferry Company was vested in the proprietary companies—other than the Vandalia Railroad Company—and in the Pennsylvania Company, as equal owners, and all the railway companies named, not then members of the Terminal Association, were admitted into membership upon the same terms and conditions as the other railway companies had heretofore been admitted, and were accorded, in common with such companies, equal joint use and benefit of all the terminals of the Terminal Association. At the time this agreement was entered into, the Terminal Association was contemplating the acquisition of a large amount of land in the city of St. Louis, making additions to and changes in its terminal facilities in St. Louis and the building of a belt line in the county of St. Louis for the purpose of connecting its facilities with the various railway lines entering St. Louis, to the end that traffic between such lines,
105 as well as through traffic crossing the river at St. Louis, might be handled more expeditiously and thus avoid the delays incident to passing through the city. For this purpose the Terminal Association contemplated the issue of a large amount of bonds, to be secured by a general mortgage. The properties then owned by it being all incumbered and the properties to be acquired being not of sufficient value in themselves to form satisfactory security for the contemplated loan, it was necessary that such loan should be guaranteed, as to payment of interest thereon, by all the proprietary companies, and the payment of the principal by the pledge of all the stock of the Wiggins Ferry Company in such manner that the general mortgage would constitute a first lien upon such stock; and accordingly this general mortgage was issued, under date of December 16, 1902, and $18,000,000 of bonds have been issued thereunder and are now outstanding. The main security for these bonds is the agreement of each of the proprietary lines to use, in perpetuity, the facilities owned and controlled by the Terminal Association, and the pledge of the Wiggins Ferry Stock. The Terminal Association is under obligation to the proprietary lines to provide, from time to time, such additional terminal facilities as may be requisite for handling the traffic of these lines in the cities of St. Louis and East St. Louis. To enable the Terminal Association to carry out this obligation, and provide these facilities, the general mortgage just

referred to provides for an issue thereunder of an aggregate amount of $14,000,000 of bonds, these bonds to be issued to the extent
106 of $1,000,000 annually, beginning with the year 1906. It is the purpose of the Terminal Association to so issue these bonds and, with the proceeds thereof, increase its terminal facilities and rearrange track connections and crossovers between all of the terminal properties, to the end that, so far as possible, such terminals may be operated as an entirety, traffic moved between all points for a single charge and without change of motive power, and all railway lines served equally and without discrimination with respect to promptness of service, charges and extent of facilities afforded. To this end, agreements were entered into between the nonproprietary railway companies named and the Terminal Association, which provided, among other things, that in consideration of the use granted thereby to the railway companies of all of the terminal properties of the Terminal Association, the railway companies accepted such use and agreed forever to employ these facilities for all railroad traffic controlled by them crossing the river at the city of St. Louis, and guaranteed, each to the extent of its interest in the Terminal Association, payment of interest on the bonds which the Terminal Association had theretofore issued and which it was then about to issue. These agreements further provided that the tolls or charges of the Terminal Association derived from the operation of its terminals should be so regulated as to meet the fixed charges, taxes, maintenance and operation of its facilities, to the end that the properties of the Terminal Association might be operated at cost, and in the event of a deficit at any time in the revenue sufficient to meet such charges, each proprietary company would advance one-four-
107 teenth of such deficit. As further security for the bonds of the Terminal Association, and as a guarantee of their agreement to make use of the properties of that company, the railway companies, owners of all the stock of the Wiggins Ferry Company, pledged that stock with the trustee in the general mortgage of the Terminal Association, and all of the stock of the Wiggins Ferry Company is now so pledged.

XIII.

77. The necessity for the joint ownership and control of common terminals in all large cities, for the joint and common use of all railway lines entering such cities, has been recognized, and the development of such systems of terminals, fostered and encouraged by legislation in many States. The Congress of the United States has likewise recognized such necessity and has enacted laws, applicable to the District of Columbia, whereby the railway lines entering the city of Washington and engaged in interstate trade and commerce, are authorized to unite in the ownership, management, and control of terminals in Washington City, for the joint use of all railway lines entering that city. In no other way can the through and local

traffic in large cities be expeditiously or economically handled, or the imposing of unnecessary charges upon such traffic be avoided.

78. The Terminal Association and the Merchants Company are each incorporated, as hereinbefore fully stated, under the laws of the State of Missouri, for the specific purpose of providing terminal facilities for railroad companies. For the incorpora-
108 tion and conduct of the business of such companies, the State of Missouri has by legislative enactment made special provision, giving to such companies power to build, maintain and operate terminal railroads and terminal facilities for the use of all railroad companies, to own and operate ferries and bridges, to construct tunnels, and to hold the stock and bonds of any company operated in connection with or forming a part of such terminal facilities.

79. As shown by the articles of association of the constituent companies forming the Terminal Association, and of the terminal companies whose stock the Terminal Association acquired at the time of the consolidation, and of the Union Depot Company, as hereinbefore fully stated, the purpose and object of the organization of these companies were to meet these well recognized requirements of railway traffic. In pursuance of this purpose and object, and to increase terminal facilities from time to time, as the demands of railway traffic have required, the Terminal Association has caused to be incorporated, and has acquired control of other terminal companies. Among the companies so incorporated are the East St. Louis Belt Railroad Company, which was incorporated under the laws of the State of Illinois in 1898, and which has constructed tracks connecting the tracks of the Madison, Illinois & St. Louis Railway Company with the tracks of the East St. Louis & Carondelet Railroad Company; the Illinois Transfer Railroad Company, incorporated under the laws of the State of Illinois in 1889, which has constructed a connec-
109 tion between the tracks of the East St. Louis Belt Railroad Company on the north with the tracks of the Illinois Central Railroad Company on the south. In 1893 the Terminal Association acquired the stock of the St. Louis Terminal Railway Company and has since then caused the tracks of that company to be built from a connection with the tracks of the Merchants Company in North St. Louis to a connection with the Wabash Railroad Company in the county of St. Louis; in 1902 the Terminal Association acquired the stock of the St. Louis Belt & Terminal Railway Company incorporated under the laws of the State of Missouri, and is now causing to be constructed the tracks of that company, forming a connection between the St. Louis Terminal Railway Company and the St. Louis & San Francisco Railroad Company on the south and the Chicago, Burlington & Quincy Railway Company on the north, and with all intermediate railway companies; in 1900 the Terminal Association acquired the capital stock of the Granite City & Madison Belt Line Railroad Company, a company incorporated under the laws of the State of Illinois, for the purpose of constructing a belt line around Granite City; about seven-tenths of a mile of track has been built by

this company; in 1903 the Terminal Association acquired all the stock of the East St. Louis & Carondelet Railway Company, which owns tracks connecting with the East St. Louis Belt Railroad Company and extending southwardly to East Carondelet; in 1903 the Terminal Association acquired all the capital stock of the Interstate Car Transfer Company, a corporation organized in 1896 under the laws of the State of Missouri, and which operates a ferry transfer
110 between an incline of the Chicago, Burlington & Quincy Railroad Company in the northern part of the city of St. Louis, and inclines of the Southern Railway Company.

XIV.

80. The capital required for the construction and acquisition of the bridges, tunnel, and the various terminal properties, operated and controlled as hereinbefore stated, has been largely secured, from time to time, by the issuing of bonds, and there are now outstanding a number of bond issues, secured by mortgages, affecting these terminal properties, as follows:

81. Mortgage of the St. Louis Bridge Company of April 1, 1879, to J. C. Rogers and C. E. Tracy, trustees, securing $5,000,000 of bonds maturing April 1, 1929, all issued and outstanding; first mortgage of the Terminal Railroad Association of St. Louis, dated October 1, 1889, to Central Trust Company of New York, trustee (which has been succeeded as trustee by Standard Trust Company of New York, trustee), securing $7,000,000 of bonds payable October 1, 1939, all issued and outstanding; first consolidated mortgage, dated November 10, 1894, to Central Trust Company of New York, trustee, securing $12,000,000 of bonds payable August 1, 1944, of which $5,000,000 are issued and outstanding; general mortgage, dated December 16, 1902, to Central Trust Company of New York, and William Taussig, trustees, securing $50,000,000 of bonds maturing January 1, 1953, of which $18,000,000 are issued and outstanding.

111 82. Mortgage of the St. Louis Merchants Bridge Terminal Railway Company, dated October 1, 1890, to the St. Louis Trust Company, trustee, securing $3,500,000.00 of bonds, payable October 1, 1930, all issued and outstanding and guaranteed, as to payment of principal and interest, by the Terminal Association; mortgage of the St. Louis Merchants Bridge Company, dated February 1, 1889, to the Farmers' Loan & Trust Company of New York, trustee, securing $2,000,000.00 of bonds, payable February 1, 1929, all of which are issued and outstanding and payment of interest thereon, guaranteed by the Terminal Association; mortgage of the Madison, Illinois & St. Louis Railway Company, dated October 1, 1891, securing $500,000.00 of bonds, payable October 1, 1911, all issued and outstanding and pledged as security for notes of the Merchants Company, held by the Terminal Association.

83. Mortgage of St. Louis Terminal Railway Company to the St. Louis Trust Company, trustee, dated January 2, 1893, securing

$1,500,000 of bonds, maturing January 2, 1943, all issued and outstanding.

84. As security for loans, all the stock of the Union Railway & Transit Company of Illinois, Terminal Railroad of East St. Louis (Illinois), East St. Louis Belt Railroad Company, St. Louis Terminal Railroad Company, Illinois Transfer Railroad Company, Granite City, Madison & Belt Line Railroad Company, St. Louis Belt & Terminal Railway Company and East St. Louis & Carondelet Railway Company, and 17,800 shares of the capital stock of
112 the St. Louis Merchants Bridge Terminal Railway Company have been pledged, under the various above-mentioned mortgages of the Terminal Railroad Association of St. Louis, and the entire issue of the capital stock of the Wiggins Ferry Company, 10,000 shares, is also pledged to the Central Trust Company of New York, trustee, by the proprietary lines, other than the Vandalia Railroad Company, and Pennsylvania Company, to secure the bonds of the Terminal Association, and as a guaranty of the contract, upon the part of the proprietary lines, to make use of the properties of the Terminal Association.

XV.

85. While the properties of the Terminal Association and its subsidiary companies, of the Merchants Company and its subsidiary companies, and of the Wiggins Ferry Company and its subsidiary companies are now and have at all times been separately operated, no one of the systems is complete or adequate in itself, and for the purpose of making a more complete and perfect system of terminals, and especially for the more rapid and safe handling of trains, various track connections have from time to time, since 1893, been made between the tracks of these different companies, and agreements have been entered into between them whereby in some instances the tracks of one company may be operated for all traffic passing in one direction, while the tracks of the other company may be used for traffic passing in the opposite direction, thus facilitating the handling of trains and the avoidance of accidents and delays. The op-
113 eration of passenger trains through the tunnel is at certain times of the year attended with much complaint and some discomfort. If all the passenger trains of all the various railway lines crossing the river were required to pass over the Eads Bridge and through the tunnel, this passenger traffic, together with the large volume of freight traffic which must of necessity take this channel, would produce congestion and materially interfere with and restrain the traffic across the river. To avoid this physical discomfort to passengers and the congestion of and delays to traffic, arrangements have been made between the Merchants Company and the Terminal Association for the operation over the Merchants Bridge of a considerable portion of the freight and passenger traffic which, in the absence of such arrangement, would pass over the Eads Bridge. These arrangements have been made possible only by reason of the

control which the Terminal Association exercises by virtue of its ownership of the majority of the stock of the Merchants Company in the conduct of the business of that company. Under like agreements between these companies each is permitted the use of the facilities of the other, and such use of the facilities of each company by the other must, of necessity, be under one control and management. The effect of these arrangements and this method of operation not only largely increase the facilities of each company, but reduce the cost of operation, and, by reason of the economy so resulting from such operation, there has been a continued and steady decrease in all freight charges on interstate traffic; so that the tolls and charges for such traffic today across the river have been reduced from forty to sixty per cent.

114 86. In addition to the fourteen proprietary lines now using, and being required to use in perpetuity, under the contract hereinbefore mentioned, the facilities owned or controlled by the Terminal Association, there are other railway lines entering the cities of St. Louis and East St. Louis which are engaged in interstate commerce. Between these lines and the proprietary lines there is an interchange of a large volume of traffic, a portion of which is interstate. Few of these railway lines connect directly with each other. All of the railway lines not members of the Terminal Association have been and now are granted the same use of all the facilities of the Terminal Association on the same terms and conditions that such use is granted to the proprietary lines; no distinction is made between a proprietary line and a nonproprietary line in the handling of traffic with respect to charges or services. All lines are upon an exact equality with respect to the use of all terminals. The purpose of so handling freight and passenger traffic is to bring about economy in operation and expeditious interchange between all railway lines entering St. Louis and East St. Louis. The effect of this method of operation is to prevent any one line from securing an advantage or monopoly in the handling of freight or passenger traffic. No one of the terminal companies has any freight cars of its own or handles freight traffic on its own account. They receive freight only for some line with which they connect and simply serve as a conduit through which the traffic of the various lines may pass in interchange.

115 The Terminal Association is the only one of the terminal companies which has a passenger station in the city of St. Louis. In the passenger station of the Terminal Association every railway line entering the city of St. Louis receives and discharges its passengers; and for such use of this station all railway lines, without regard to membership in the Terminal Association and without discrimination or preference, are charged like compensation upon a wheelage basis. Freight depots are maintained by each of the terminal companies where freight consigned to or from each railway line is received and delivered. Through the method of operation prevailing, freight destined for any line of railway may be received and delivered at any station of any one of the terminal companies,

each terminal company acting as the agent of and serving equally all railway lines. Traffic between all large cities of the United States and the city of St. Louis is competitive. The method in which the terminals of St. Louis and East St. Louis are conducted, as herein stated, prevents any one railway line from obtaining any advantage over any other, with respect to facilities for the handling of its freight or passenger traffic in the city of St. Louis. The smaller railway lines have the same facilities that stronger competitors might alone secure, and thus competition between all railway lines is encouraged, trade promoted, and a monopoly avoided.

87. The method of operation of the terminal companies was never intended to result in profit to the owners, and there has never been at any time any profit in the operation. No dividends have ever been declared or paid on any of the stocks of any of the terminal
116 companies or of their subsidiary companies. Now, and at all times tolls and charges are, and have been, so fixed as to cover only fixed charges, expenses of operation and maintenance, alterations, betterments, and repairs.

88. None of the acts or matters complained of in the petition, which are herein admitted to be true, and none of the acts herein averred to have been done, has been in pursuance of any combination, conspiracy, contract, or agreement to restrain or monopolize in any manner, or to any extent, interstate trade or commerce. On the contrary, all of the acts complained of in the petition which are herein admitted to be true, and all of the acts averred in this answer to have been done, have been in pursuance of the object and purpose to create and develop in the cities of St. Louis and East St. Louis, and adjoining villages, a complete system of railway terminals, to be operated economically and without profit, for the joint and equal use, upon like terms and conditions, of all railway lines at any time entering either of the two cities, and thus foster and promote interstate commerce. In the carrying out of this purpose the effect has been, and must of necessity be, to avoid the creation of a monopoly in such commerce by any one railway company, or any number of railways companies.

89. The bonds of the terminal companies and the stocks of the St. Louis Bridge Company and Tunnel Railroad of St. Louis are held by many owners throughout the United States and Europe. The proceeds of these bonds have been used in the acquisition
117 and development of the terminal properties mentioned in the petition. The main security for these bonds is the obligation of the proprietary lines to forever use these terminals for all traffic crossing the river at St. Louis, pay for this use such tolls and charges as will enable the Terminal Association to meet its operating expenses and interest on these bonds, and make good any deficit in revenue required to be made good for this purpose. This obligation of the proprietary lines has made possible the issue of these bonds and at a lower rate of interest than could have been otherwise secured, and has thus lessened the rates the Terminal Associa-

tion charges for the use afforded and the service rendered, and diminished the traffic charge to the public. A large percentage of all charges made by the Terminal Association is paid and absorbed by the proprietary lines, and as there is no discrimination between the charges to the proprietary lines and outside companies, it is to the interest of the proprietary lines, through their control of the Terminal Association, to make these charges at all times as low as possible.

90. When the Terminal Association was formed, the Eads Bridge and the tunnel were under lease to two railway companies, and all the terminals in the city of St. Louis and East St. Louis, connecting with the bridge and tunnel, were owned by a single individual who controlled the corporate action of the lessees of the bridge and tunnel. With the organization of the Terminal Association the control of these facilities passed to it, and, by the admission from time to
118 time of the various proprietary lines, to-day all of the main lines of railway in the United States have joint control and use of these facilities, which would otherwise be under the control of one individual or interest.

91. For the interchange between the various railway lines and continuous movement of interstate traffic in St. Louis and East St. Louis there must of necessity be maintained a system of tracks connecting the different railways. Some of these railways have their termini in East St. Louis and others in St. Louis. The maintenance of this essential adjunct of railway commerce makes the cooperation of all railway lines indispensable. Of necessity the connecting links must be operated for the use and benefit of all. The practical operation of such a system requires a continuous movement; such continuous movement can only be effected under a single control and direction. The entrance by railway lines into the cities of St. Louis and East St. Louis has been effected with a view to the use of the terminals as now constituted and operated, and the operation of these terminals as an entirety is essential to the proper and expeditious interchange of traffic between the various railway lines. In this manner each line has a direct connection with the others, and traffic from one to the others necessarily passes in many instances over the tracks of each one of the terminal companies. Tracks have been laid and track connections made with the special view of facilitating this interchange of traffic. Many manufacturing and indus-
trial plants have been located and established upon the tracks
119 of the several terminal companies, and large amounts of money expended in the construction thereof since 1893 because of the great advantage afforded shippers by reason of the railway facilities furnished for switching to and from such establishments over all of the terminal systems for a single charge. Every industry or shipper located on any line of either terminal company is thus enabled to receive from and ship to any point on any line of railway in the United States freight subject only to a single switching charge, and at the same time is given the benefit of competitive rates between all

railway lines out of St. Louis or East St. Louis and the cities adjacent both on shipments coming to and going from said respective points.

92. While all the stock of the Wiggins Ferry Company is owned, in equal proportions, by the Pennsylvania Company and the fourteen proprietary lines (other than the Vandalia Railroad Company), the owners of this stock, who are, with the exception of the Pennsylvania Company, likewise owners of all the stock of the Terminal Association, have pledged the stock with the trustees in the general mortgage of the Terminal Association to secure its issue of $50,000,000 of bonds as a guaranty of their contract to forever make use of the terminal facilities of the Terminal Association, and to pay for this use such charges as will enable that company to meet its operating expenses and interest on these bonds. Out of the proceeds of these bonds the Terminal Association has reimbursed the owners the amount expended in the purchase of the Wiggins Ferry stock
120 and the Terminal Association is, in consideration of this reimbursement, granted, until the maturity of its general mortgage, the right to operate and receive the revenue therefrom all the properties of the Wiggins Ferry Company. The ownership of the stock of the Wiggins Ferry Company by each of the proprietary lines is incident to its membership in the Terminal Association. If any one of the proprietary lines abandons the use of the properties of the Terminal Association, or defaults in its guaranty of the obligations of that company, its interest in the Wiggins Ferry Company passes to the other proprietary lines; so that at all times, and until the maturity of the general mortgage bonds of the Terminal Association, all the properties of the Wiggins Ferry Company are open to the use of all the proprietary lines, thus making it impossible for any one railway company to secure the use of these properties to the exclusion of other companies.

93. At the time the Eads Bridge was completed in 1874, every railroad terminating on the east bank of the Mississippi River opposite St. Louis was owned by a company incorporated for the purpose of constructing and operating a railroad terminating on said east bank of the river, and every railroad entering St. Louis from the west was owned by a company incorporated for the purpose of constructing and operating a railroad terminating in the city of St. Louis. Prior to the opening of the Eads Bridge for traffic, no interchange of freight or passengers between the railroads thus terminating on opposite sides of the river could be made except by the use of teams and wagons transported on ferry boats across the river,
121 and no freight or passengers coming from the east over the railroads terminating on the east bank of the river and destined for the city of St. Louis could reach that city except by means of teams and wagons transported across the river on ferry boats. Every line of railroad on either side of the river had comparatively a short mileage, and the companies owning them were each and all without financial ability to defray the great cost of connecting their

roads by means of a bridge across the river. The delays in handling freight and passengers, necessarily incident to the use of teams, wagons, and ferry boats were frequent and costly, and served in a great measure to retard the growth and development of the city of St. Louis, and to keep at a low ebb the traffic between the States lying east and west of the river that would otherwise naturally have passed through the St. Louis gateway.

94. The construction of the Eads Bridge alone could not and did not in the slightest degree relieve the situation. The west bank of the river is high, the east bank very low. The termini of all the western roads were some distance from the river; the height of the bridge made necessary a long and expensive approach on the east bank if connections were to be made with the railroads terminating on the east bank of the river. The scheme of a railroad through a tunnel was adopted to connect the western railroads with the bridge. But when all this had been done, terminal yards on either side of the river were absolutely essential to make possible the interchange of cars between the railroads, and there were needed freight sta-
122 tions in St. Louis for the handling of freight coming to that city from the east over the railroads terminating on the east bank of the river, or intended for shipment over those roads, and a passenger station in St. Louis for the accommodation of passengers that had been or were to be handled by the last mentioned railroads. The financial resources of the company which constructed the Eads Bridge were wholly exhausted in the building of the bridge; those of the tunnel company in constructing the tunnel and its railroad, and additional capital had to be obtained to do the other things which have been mentioned as necessary to make the bridge and tunnel available for use in the handling of freight and passengers. The formation of the several terminal companies, before mentioned in this answer as having been incorporated in connection with the Eads Bridge, and the existence of numerous separate and diverse interests was the inevitable result. The use of the Eads Bridge did not have the effect of driving the ferry companies out of business; on the contrary, as the years passed more railroads came to the east bank of the river opposite St. Louis, more came into St. Louis from the west, and those already in St. Louis were greatly extended through the south, southwest, west, and northwest. St. Louis traffic proper and traffic passing through the St. Louis gateway increased, and the ferry companies, as well as the terminal railroad companies, were compelled to expend large sums in increasing their facilities.

95. The organization and operations of the Terminal Association made it possible to increase greatly the facilities for handling
123 both freight and passengers. Large additions were made to the terminals and business tracks on both sides of the river. Numerous industrial establishments were erected and operated on these tracks, and access to all these establishments was given on equal terms to all of the railroads on either side of the river. The bringing together of all the disjointed and diverse interests under the single

management of the Terminal Association resulted in the better handling of traffic, both freight and passenger, and, instead of restraining traffic, did much to stimulate it and to facilitate the expeditious handling of it at a low charge.

96. The builders of the Merchants Bridge were confronted with difficulties of exactly the same character as those which confronted the builders of the Eads Bridge. The bridge alone was useless. The incorporation of companies to construct and operate connecting railroads on either side of the river was absolutely essential. The financial resources of both bridge and connecting railroad companies became wholly exhausted. The bridge and its connecting railroads reached and accommodated territory and industrial establishments on both sides of the river which were not reached by the tracks of the Terminal Association, and a number of the railroads terminating on the east bank of the river could not reach the territory of the Merchants Bridge and its connecting railroads except over the tracks of the Terminal Association. The contract between the Merchants Company and the Terminal Association opened all the territory and industrial establishments reached exclusively by the Merchants
124 Bridge and its connecting railroads to all the railroads on both sides of the river on equal terms and gave all those industrial establishments unrestricted access to each and all of the railroads on either side of the river and reduced the charges for handling freight to and from those establishments.

97. The acts and doings of the said railroad companies forming the Terminal Association, as fully set forth and explained in this answer, have been and are in all respects lawful, and have not and do not tend in any way whatsoever to the restraint of trade or commerce among the several States or with foreign nations, and have not and do not monopolize, nor constitute an attempt to monopolize, any part of the trade or commerce among the several States or with foreign nations; on the contrary, each and all of the things done by the said railroad companies, as in this answer set forth, have been done for the sole purpose of furnishing those railroad companies with equal facilities for handling expeditiously, and at the least possible charge, all traffic, both freight and passenger, in which the city of St. Louis alone is concerned, and also all traffic passing through the St. Louis gateway, and the sole result of all the things done as aforesaid, has been to enable all of the railroad companies whose railroads terminated on the east bank of the Mississippi River and in St. Louis, to interchange business across the river with greater promptness and economy, and to deliver and receive passengers at a union station in St. Louis, and to deliver and receive freight at numerous points and industrial establishments in St. Louis and on the east bank of the river, which otherwise they could not do.

125 98. The railroad companies in thus providing terminal facilities to be used by all on equal terms, have in no wise stifled competition as between themselves in the handling of either passengers or freight, but have simply made it possible for each rail-

road company to compete without restriction for both freight and passengers in an enlarged territory, made common to all on equal terms, so far as terminal facilities and charges for the use thereof are concerned; and every passenger and shipper or consignee of freight is given equal access to all of the railroads, and the opportunity to freely make selection of the railroad he will use.

99. Transcontinental traffic passes through various gateways, of which the city of St. Louis is one. Other such gateways are Kansas City, Omaha, Chicago, Minneapolis and St. Paul, Duluth, Memphis and New Orleans. At these gateways, connections are made between eastern and western lines of railway, forming through lines. The transcontinental traffic handled by these through lines is competitive. The facilities afforded by the Terminal Association, and operated with the other terminal properties referred to in the petition, and in the manner herein fully set forth, enables the through lines using the city of St. Louis as their gateway, to compete with other through lines using other gateways. The necessity of the use, in common, by railway lines converging at a river point of bridges at such points has been repeatedly recognized in acts of Congress authorizing the construction and operation of bridges by any number of rail-
126 way companies in common, as the Eads Bridge and Merchants Bridge at St. Louis are operated in the manner stated herein. This use in common of the river crossings at St. Louis, and terminal facilities connected therewith, creates a competitive gateway for a number of lines of railway, and thus inures directly to the benefit of all shippers, in that it increases the number of competing railway lines.

100. The individual defendants named in the petition as holding each two shares of stock in the Terminal Association became such holders for the purposes only, and at the times, as follows: A. A. Allen, representing Missouri, Kansas & Texas Railway Company, March 24, 1903; S. M. Felton, representing Chicago & Alton Railway Company, March 24, 1903; A. J. Davidson, representing St. Louis & San Francisco Railroad Company, April 27, 1904; W. M. Greene, representing Baltimore & Ohio Southwestern Railroad Company, May 14, 1903; T. J. Harahan, representing Illinois Central Railroad Company, March 24, 1903; C. S. Clarke, representing St. Louis, Iron Mountain & Southern Railway Company, January 4, 1905; Benjamin McKeen, representing Vandalia Railroad Company, December 10, 1903; George E. Evans, representing Louisville & Nashville Railroad Company, January 4, 1905; C. E. Schaff, representing Cleveland, Cincinnati, Chicago & St. Louis Railway Company, May 4, 1903; T. C. Powell, representing Southern Railway Company, April 26, 1905; A. G. Cochran, representing Missouri Pacific Railway Company, June 22, 1904; the defendants W. S. McChesney, jr., and Julius S. Walsh became the holders each of
127 two shares of stock in the Terminal Association, respectively, March, 1903, and June, 1894, to qualify them as officials of the Terminal Association, and defendants V. W. Fisher and S. D. Webster are holders each of two shares of stock in the Terminal

Association to qualify them as inspectors of its elections; H. C. Nutt, not named in the petition, became the holder of two shares of stock in the Terminal Association in October, 1905, as representing the Chicago, Burlington & Quincy Railroad Company; Henry Miller, not named in the petition, became the holder of two shares of stock in the Terminal Association in October, 1905, as representing the Wabash Railroad Company, and H. V. Mudge, not named in the petition, became the holder of two shares of stock in the Terminal Association in October, 1905, as representing the Chicago, Rock Island & Pacific Railway Company. The individuals named have no interest in any of the defendant companies named other than as just stated.

101. Deny all and all manner of unlawful combination and confederacy in the petition charged, without this: That there is any other matter, cause, or thing in the petition contained, material or necessary to make answer unto and not herein and hereby well and sufficiently answered, confessed, traversed, and avoided or denied, is true to the knowledge or belief of defendants.

102. All of which matters and things defendants are ready and willing to aver, maintain, and prove, as this honorable court
128 shall direct; and pray to be hence dismissed, with their reasonable costs and charges in this behalf most wrongfully sustained.

Terminal Railroad Association of St. Louis, by M. F. Watts, general counsel; St. Louis Merchants Bridge Terminal Railway Company, by M. F. Watts, its solicitor; Wiggins Ferry Company, by M. F. Watts, its solicitor; St. Louis Bridge Company, by J. Clarence Taussig, its solicitor; St. Louis Merchants Bridge Company, by M. F. Watts, its solicitor; Missouri, Kansas and Texas Railway Company, by Geo. P. B. Jackson, its solicitor; St. Louis and San Francisco Railroad Company, by L. F. Parker, gen-
129 eral solicitor; The Chicago and Alton Railway Company, by F. S. Winston, general solicitor; Baltimore and Ohio Southwestern Railroad Company, by Edward Barton, general attorney; Illinois Central Railroad Company, by J. M. Dickinson; St. Louis, Iron Mountain and Southern Railway Company, by Martin L. Clardy, its general attorney; Chicago, Burlington and Quincy Railway Company, by J. W. Blythe, gen. counsel; Vandalia Railroad Company, by John S. Williams, general counsel; Wabash Railroad Company, by Wells H. Blodgett,
130 general counsel; Cleveland, Cincinnati, Chicago and St. Louis Railway Company, by L. J. Hockney, general attorney; Louisville and Nashville Railroad Company, by Henry L. Stone; Southern Railway Company, by Alex P. Humphrey; The Chicago, Rock Island and Pacific Railway Company, by

R. A. Jackson & W. F. Evans; The Missouri Pacific Railway Company, by Martin L. Clardy, its general attorney; A. A. Allen, by Geo. P. B. Jackson, his solicitor; S. M. Felton, by F. S. Winston, his solicitor; A. J. Davidson, by L. F. Parker, his so-
131 licitor; J. T. Harahan, by J. M. Dickinson; C. S. Clarke, by Martin L. Clardy; C. E. Schaff, by L. J. Hackney; T. C. Powell, by Alex P. Humphrey; A. G. Cochran, by Martin L. Cardy; W. S. McChesney, jr., by M. F. Watts, his atty.

M. F. WATTS,
Solicitor for all Above-named Defendants.

132 (Joint answer of defendants S. D. Webster, V. W. Fisher, and Julius S. Walsh.)

No. 5250.

In the Circuit Court of the United States in and for the Eastern Division of the Eastern District of Missouri.

THE UNITED STATES OF AMERICA, COMPLAINANT,
vs.
THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al., defendants.

Come now the defendants, S. D. Webster, V. W. Fisher, and Julius S. Walsh, and by consent of complainant adopt as and for their joint and several answer, the joint and several answer heretofore, to wit, on February 5th, 1906, filed in this cause by the Terminal Railroad Association of St. Louis and others.

M. F. WATTS,
Solicitor for Defendants S. D. Webster, V. W. Fisher, and Julius S. Walsh.

Agreed to.

DAVID P. DYER, *U. S. Atty.*

(Replication to answer of certain defendants.)

In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA, COMPLAINANT,
vs.
THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al., defendants.
No. 5250.

133 The replication of complainant to the answer of certain defendants.

This repliant saving and reserving to itself all and all manner of advantage and exception, which may be had and taken to the mani-

fold errors, uncertainties and insufficiencies of the answer of such of the defendants as have heretofore answered herein, for replication thereunto says, that it does and will aver, maintain, and prove its said petition to be true, certain, and sufficient in the law to be answered unto by the said defendants, and that the answer of the said defendants is very uncertain, evasive, and insufficient in law to be replied unto by this repliant, without that with any other matter or thing in the said answer contained, material or effectual in the law to be replied unto, and not herein and hereby well and sufficiently replied unto, confessed or avoided, traversed or denied, is true; all which matters and things this repliant is ready to aver, maintain, and prove, as this honorable court shall direct, and humbly prays as in and by its said petition it has already prayed.

DAVID P. DYER,
Attorney for U. S. States, Eastern District of Missouri.

(Order of dismissal as to certain defendants of date, April 6th, 1909.)

In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

UNITED STATES OF AMERICA, PLAINTIFF,
vs.
TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS et al., defendants.
} In Equity. No. 5250.

134 Now at this day comes the plaintiff and voluntarily dismisses as to the Central Trust Company of New York, W. M. Green, Benjamin McKean, George E. Evans, J. Ramsey, and J. N. Stevens, named as defendants in the original petition herein.

DAVID P, DYER,
United States Attorney.
CHESTER H. KRUM,
EDWARD C. CROW,
CHARLES NAGEL,
Special Assts. to Attorney General.

135 Exhibits not bound in volumes and inserted here under stipulation.

COMPLAINANT'S EXHIBIT No. 175.

Record of proceedings, regular meeting of the St. Louis Association of General Passenger and Ticket Agents, held in Room 1317, Missouri Trust Building, St. Louis, Mo., March 24, 1905.

Meeting called to order with Mr. A. Hilton, president, in the chair. The following lines were represented:

B. & O. S. W., by O. P. McCarty, F. D. Gildersleeve; Big Four, by C. L. Hilleary, G. W. Ingels; Burlington, by W. A. Lalor; C. &

A., by D. Bowes; C. & E. I., by A. Hilton; C., P. & St. L., by E. A. Williams; Frisco System, by A. Hilton; Illinois Central, by J. R. Garrison; Henderson Route, by W. C. Lindsay, Jno. Gallagher; L. & N., by J. E. Davenport; Missouri Pacific, by W. H. Bissland; M., K. & T., by George Morton; Rock Island, by F. C. Francis; St. L., I. M. & S., by W. H. Bissland; Southern, by Geo. B. Allen, W. H. Tamms; Terminal Assn., by V. W. Fisher; T., St. L. & W., by R. J. McKay; Vandalia, by J. H. Chesbrough, J. C. Millspough; Wabash, by H. V. P. Taylor.

J. E. Hannegan, chairman Southwestern Excursion Bureau, and J. H. Norton, validating agent St. Louis lines, were also present.

136 I. Facilities for depot passenger agents at Union Station.

Resolution: Adopted; that a committee, Messrs. D. Bowes and F. D. Gildersleeve, be appointed to see the St. Louis Terminal Association authorities with a view of working out an improved condition of affairs and to report at the next regular meeting or any special meeting held in the meantime.

II. Insertion in St. Louis rate sheet, rates to local points on the Henderson Route.

Resolution: Adopted; that the question in controversy between the Henderson Route and Southern Ry. be left to the compiler of the St. Louis rate sheet as arbitrator.

III. Elimination of superfluous routings eastbound in the St. Louis rate sheet.

Resolution: Adopted; that a committee consisting of the Wabash, Vandalia and T., St. L. & W. Rys. representatives be appointed to act with the compiler to eliminate superfluous eastbound routings in the St. Louis rate sheet. Any appeal from the committee to be referred to the general association.

IV. Continuance of St. Louis Validating Agency.

Resolution: Offered; that the St. Louis Validating Agency be continued until December 31, 1905, the expenses to be provided for in the same manner as provided for the maintenance of the office during the months of January, February, and March, 1905.

(The votes of the Rock Island, Vandalia Line and Clover Leaf withheld. Vote of Big Four subject to approval. The votes of the Rock Island and Clover Leaf have since been cast in the negative.)

Resolution: Adopted; that the chairman of this association be authorized and requested to conduct and conclude arrangements with the various passenger associations which will enable the validating agent to act as joint agent for all association meetings which may be

held in St. Louis during the current year, accepting from the different associations whatever they are willing to contribute toward the expenses of the validating agency.

(Vote of Rock Island withheld. Vote of the Henderson Route subject to approval. The vote of the Rock Island has since been cast in the negative.)

137 V. Securing larger meeting room for this association.

Resolution: Adopted; that the executive committee of this association, with the chairman and secretary, be authorized to provide quarters in case it is found necessary to move.

VI. Rates into St. Louis for Forepaugh-Sells Show, May 1–6.

Resolution: Adopted; that the application for reduced rates be declined.

A. HILTON, *President.*
GEORGE MORTON, *Secretary.*

138 COMPLAINANT'S EXHIBIT No. 174.

Record of proceedings, regular meeting of the St. Louis Association of General Passenger and Ticket Agents, held in room 1317, Missouri Trust Building, St. Louis, January 20, 1905.

Meeting called to order at 10.30 a. m., with Mr. A. Hilton, president, in the chair. The following lines represented:

B. & O. S. W., by O. P. McCarty, F. D. Gildersleeve; Burlington Route, by J. D. McNamara; Chicago & Alton, by D. Bowes; C. & E. I., by A. Hilton; C., P. & St. L., by A. L. Jefferis; Frisco System, by A. Hilton; Illinois Central, by J. R. Garrison; Louisville & Nashville, by C. L. Stone, J. E. Davenport; Missouri Pacific, by W. H. Bissland; Mobile & Ohio, by J. M. Beall; M., K. & T., by George Morton; Rock Island, W. J. Leahy; St. L., I. M. & S., by W. H. Bissland; St. L. S.-W., by E. W. LaBeaume; Southern, by Geo. B. Allen; T., St. L. & W., by R. J. McKay; Vandalia, by J. M. Chesbrough; Wabash, by H. V. P. Taylor.

J. H. Norton, joint validating agent, and J. E. Hannegan, chairman Southwestern Excursion Bureau, were also present.

139 I. Report of joint validating agency.

A detailed report from J. H. Norton, joint validating agent, showing the work accomplished by the agency, was submitted by the executive committee; also a report showing the receipts and expenditures of the validating agency as certified by the auditing committee.

Resolution: Adopted; that the reports of the executive committee be accepted as rendered.

Resolution: Adopted; that the statement be accepted and the division of the original $5,000.00 be adjusted on basis agreed upon; that is, on the number of tickets actually handled for the different lines.

Resolution: Adopted; that the report be printed, each member of the association to be furnished the number of copies as desired, copies to be furnished also the chairmen of the various territorial passenger associations, and copies also furnished to the general passenger agent of any line upon request.

II. Continuance of the validating agency.

Resolution: Adopted; that the joint validating agency be continued until March 31, 1905, under the direction of the executive committee. That in order to carry on the work this association provide a working fund of $2,500.00 to take care of working expenses; that the joint validating agent be authorized to render statements against each company for its proportion of the fund on basis set forth as follows:

The percentage of the expense accruing to each line shall be based on the ticket sales of St. Louis Union Station for the months of October, November, and December, 1904, the basis to determine the percentage being the number of tickets sold and the revenue accruing to each line. For example, if a road's proportion of number of tickets sold be four per cent, and its proportion of revenue be six per cent, the percentage chargeable to that road would be one-half the total, or five per cent.

III. Permanent validating agency.

The question of establishing the permanent validating agency was considered, but action was deferred until a later date.

IV. Revision and rearrangement of the St. Louis rate sheet.

In compliance with provision of a resolution adopted at the meeting December 16th, the secretary presented figures showing the cost of revision and rearrangement of the St. Louis rate sheet.

Resolution: Adopted; that the compiler be authorized to arrange for the readjustment of the St. Louis rate sheet in accordance with previous legislation, the work of printing to be awarded to the lowest bidder.

140 V. Question of right of individual lines to issue supplement to the St. Louis rate sheet.

This question arose from the fact that a member had issued a circular quoting rates, designating the circular as a supplement to the St. Louis rate sheet. It was decided that such action was not proper and that only the compiler is authorized to issue supplements to the St. Louis rate sheet.

VI. Question of issuing supplements to St. Louis rate sheet.

The rules governing the issuance of the St. Louis rate sheet provide that supplements may not be issued except by unanimous consent of its members. After discussion which developed that it was the opinion of some lines that this worked a hardship, the following resolution was adopted:

Resolution: Adopted; that supplements shall be issued to the St. Louis rate sheet at the request of any individual line not oftener than every thirty days between the publication of the sheet, changes in rates to be subject to the rules governing the issuance of the St. Louis rate sheet.

VII. Question of working fund.

This question was presented for consideration through a misunderstanding of a member. On motion, it was cancelled.

VIII. World's Fair statistics.

It developed that all lines had not had sufficient time to supply the figures, and it was understood that report would be made at the next regular meeting.

IX. Appointment of an auditing committee.

Resolution: Adopted; that an auditing committee of one be appointed to certify the accounts of this association, and that the auditor of the Wabash Ry. be appointed to serve until December 31, 1905.

X. Withdrawal of steamship agencies from ticket brokers.

Resolution: Adopted; that further action on this subject be held in abeyance until the next regular meeting of this association.

On motion, meeting adjourned.

A. HILTON, *President.*
GEORGE MORTON, *Secretary.*

141 [From the Merchants' Exchange of St. Louis.]

(This is offered as Complainants' Exhibit 28, page 3104 of exhibits.)

Business of the St. Louis bridges, and the ferries, for 1905, and comparison with previous years.

150 COMPLAINANT'S EXHIBIT No. 205.

The Missouri Pacific Railway Company and others, railroad companies, and Central Trust Company of New York and William Taussig, trustees.

Trust agreement.

151 An agreement made the sixteenth day of December, in the year one thousand nine hundred and two, between the Missouri Pacific Railway Company; St. Louis, Iron Mountain and Southern Railway Company; Wabash Railroad Company; Pennsylvania Company; Baltimore & Ohio Southwestern Railroad Company; Cleveland, Cincinnati, Chicago and St. Louis Railway Company; Louisville and Nashville Railroad Company; St. Louis and San Francisco Railroad Company; the Chicago, Rock Island and Pacific Railway Company; Southern Railway Company; Illinois Central Railroad Company; the Chicago and Alton Railway Company; Chicago, Burlington and Quincy Railway Company; and Missouri, Kansas and Texas Railway Company, hereinafter termed collectively, for convenience, the railroad companies, of the first part; and Central Trust Company of New York and William Taussig, as trustees, under the general mortgage of Terminal Railroad Association of St. Louis, hereinafter described, of the second part, hereinafter termed the trustees:

Terminal Railroad Association of St. Louis, hereinafter termed the Terminal Association, is a corporation organized under the laws of the State of Missouri, by an agreement of consolidation made on the 26th day of July, 1889, between Union Railway and Transit Company of St. Louis and Terminal Railroad of St. Louis, and duly filed for record in the office of the secretary of state of the State of Missouri.

The Terminal Association was so organized for the purpose of acquiring title to and possession of various terminal railroad facilities in St. Louis and East St. Louis, and to secure to the various railroad companies owning or operating railroads entering said cities an efficient and economical method for interchanging passenger and freight traffic at the points named.

152 By an agreement, dated October 1, 1889, between the Terminal Association, of the first part, and the Missouri Pacific Railway Company; St. Louis, Iron Mountain and Southern Railway Company; Wabash Railroad Company; Ohio and Mississippi Railway Company; Cleveland, Cincinnati, Chicago and St. Louis Railway Company; and Louisville and Nashville Railroad Company, of the second part, the Terminal Association granted to each of said companies, and each of said companies accepted, a right, forever, of joint use with each other and with such other companies as might be admitted, as proprietary lines, to joint use thereof, of all terminal

properties of the Terminal Association then held or that might thereafter be acquired in said St. Louis and East St. Louis for passenger and freight, express and mail business, and for the interchange of the same between each other and with the public, the right granted to each proprietary company to remain as appurtenant to the railroad then owned by such proprietary company; and each of said proprietary companies, parties to said agreement, agreed forever to make use of the bridge and terminal properties of the Terminal Association for all passenger and freight traffic within its control through, to, and from St. Louis and destined to cross the Mississippi River at St. Louis.

By said agreement it was provided that the rates of toll or charges should be fixed, subject as therein provided, so as to produce a sum sufficient each year to pay the fixed charges of the Terminal Association, including rentals, taxes, and assessments, the expenses of maintaining the corporate organization of the Terminal Association, and interest and dividends on such bonds or prefered stock not then contemplated as might become necessary to be thereafter issued for the purpose of future extensions and betterments to the properties of the Terminal Association, and each of the proprietary companies, parties thereto, agreed by Article XIII thereof to pay its proportion of any deficiency, provided that the total gross sum which any
153 one of the proprietary companies, parties thereto, should be called on to pay in any one year towards making up any deficit in the net earnings to meet the fixed charges, should not in any one year exceed one-seventh of one million dollars, which was therein stated to be in excess of the entire fixed charges assumed under said agreement, and provided, further, that the tolls to be levied on traffic, as contemplated in said agreement, should at no time be so great as to place any proprietary company using said terminals at a disadvantage in respect to its traffic that may be in competition with that of other lines.

Since the execution of said agreement, Baltimore and Ohio Southwestern Railroad Company, as successor of said Ohio and Mississippi Railway Company, St. Louis and San Francisco Railroad Company, the St. Louis, Vandalia and Terre Haute Railroad Company, the Chicago, Rock Island and Pacific Railway Company, Southern Railway Company, Illinois Central Railroad Company, the Chicago and Alton Railway Company, hereinafter called the Alton Company, Chicago, Burlington and Quincy Railway Company, hereinafter called the Burlington Company, and Missouri, Kansas and Texas Railway Company, hereinafter called the Kansas Company, have severally become parties to said agreement. The railroad companies, parties to said agreement, to wit, the Missouri Pacific Railway Company, St. Louis, Iron Mountain and Southern Railway Company, Wabash Railroad Company, the St. Louis, Vandalia and Terre Haute Railroad Company (hereinafter called the Vandalia Company), Baltimore and Ohio Southwestern Railroad Company, Cleveland, Cincinnati, Chicago and St. Louis Railway Company, Louisville and

Nashville Railroad Company, St. Louis and San Francisco Railroad Company, the Chicago, Rock Island and Pacific Railway Company, Southern Railway Company, Illinois Central Railroad Company, the Alton Company, the Burlington Company, and the Kansas Company are hereinafter termed, collectively, Proprietary Com-
154 panies. The obligations of the Vandalia Company under said agreement have been duly guaranteed by the Pittsburg, Cincinnati, Chicago and St. Louis Railway Company and by Terre Haute and Indianapolis Railroad Company, the lessee, for account of itself and of said the Pittsburg, Cincinnati and St. Louis Railway Company, of the line of railroad of the Vandalia Company; the obligations of the Alton Company thereunder have been duly guaranteed by the Chicago and Alton Railroad Company, and the obligations of the Burlington Company thereunder have been duly guaranteed by Chicago, Burlington and Quincy Railroad Company. The Pennsylvania Company now owns a majority of the capital stock of the Vandalia Company.

The Terminal Association since said October 1, 1889, has from time to time acquired additional properties. The terminal facilities of the Terminal Association both at St. Louis and at East St. Louis are inadequate and must be extended in order to meet the requirements of the Proprietary Companies, and for efficiency and economy it is desired that such extension of terminal facilities be made by the Terminal Association.

For the purposes aforesaid, as well as to provide for funding its existing bonded indebtedness and for the improvement and betterment of its system, the Terminal Association has determined to issue its bonds limited to the aggregate principal amount of $50,000,000 at any one time outstanding, to be known as its general mortgage bonds and hereinafter called the general mortgage bonds, to be payable the first day of January, 1953, to bear interest from the first day of January, 1903, at the rate of four per cent per annum, payable semiannually on the first days of anuary and July in each year, and to be payable, both as to principal and interest, at the office or agency of the Terminal Association in the city of New York, N. Y., in gold coin of the United States, of or equal to the present standard of
155 weight and fineness, and, both as to principal and interest, without deduction for any tax or taxes which the Terminal Association may be required to pay thereon or retain therefrom under any present or future law of the United States, or of any State, county, or municipality thereof; and, to secure said bonds, has determined to execute and deliver to Central Trust Company of New York and William Taussig, the trustees, a mortgage and deed of trust, hereinafter called the general mortgage, of all its property and franchises therein particularly described, and of all its property and franchises at any time by it to be acquired.

The Proprietary Companies are the owners in severalty of all the capital stock of the Terminal Association, in equal shares, and said action on the part of the Terminal Association has been taken at the

instance and request of the Proprietary Companies, each of which has approved the general mortgage bonds and the general mortgage and, in respect of the stock of the Terminal Association owned by it, has authorized the execution and delivery thereof.

The Terminal Association has entered into an agreement to sell the general mortgage bonds, or some of them, and as a condition precedent to the purchase thereof, and as part of the consideration inducing such purchase, the Proprietary Companies, by an agreement with the Terminal Association and the trustees, bearing date the sixteenth day of December, 1902, hereinafter called the guaranty agreement, have agreed, among other things:

(a) That such rates of toll or charges for the use by the Proprietary Companies of the properties of the Terminal Association, granted under the agrement of October 1, 1889, hereinabove recited, shall be fixed from time to time by the Terminal Association as will produce a sum sufficient each year to pay the following charges, which are therein and hereinafter termed the fixed charges of the Terminal Association, to wit:

156 1. All rentals on any properties leased by the Terminal Association.

2. Interest on all bonds of the Terminal Association from time to time outstanding, theretofore issued or authorized.

3. Interest on all the general mortgage bonds of the Terminal Association, at any time issued under the general mortgage and outstanding, and such sums as may be required for the payment or satisfaction of installments of the sinking fund created under the general mortgage of the Terminal Association.

4. All taxes and assessments, premiums of insurance, payments, charges, and expenses of every nature incurred in the maintenance, operation, repair, and renewal of the system and properties of the Terminal Association, and every part thereof.

5. Whatever expenses may be legitimately incured in maintaining the corporate organization of the Terminal Association and of any other company or companies whose creation or organization may be necessary in order fully to accomplish the objects desired in the organization of the terminal system of the Terminal Association.

(b) That the proviso contained in Article XIII of the agreement of October 1, 1889, hereinabove recited, limiting the total gross sum which any one of the Proprietary Companies may be called upon to pay in any one year towards making up any deficit in the net earnings of the Terminal Association to meet the fixed charges of the Terminal Association, and limiting the amount of the tolls to be levied on traffic, be waived.

157 (c) That the Proprietary Companies will forever make use of the properties of the Terminal Association granted under said agreement of October 1, 1889, for all passenger and freight traffic within their control through, to, and from St. Louis and destined to cross the Mississippi River at St. Louis.

(d) That the Proprietary Companies will, at all times, pay for the use of the properties of the Terminal Association granted under said agreement of October 1, 1889, the tariff rates from time to time established by the Terminal Association for such use, and that such tariff rates shall be so fixed as to insure the production of sufficient revenue at all times to enable the Terminal Association punctually to meet and discharge the fixed charges of the Terminal Association as defined as aforesaid in the guaranty agreement.

(e) That to the end that the Terminal Association may at all times be able to pay and discharge promptly as and when due the interest on all of the general mortgage bonds issued by it, as well as any and all taxes, costs, charges, expenses, and obligations incurred by the Terminal Association, or for which it shall become liable in the operation and maintenance of its properties, as well as installments of sinking fund under the general mortgage and the other fixed charges of the Terminal Association as defined as aforesaid in the guaranty agreement, the Proprietary Companies, each to the extent of one-fourteenth thereof only, guarantee the prompt payment, as and when due, of all interest on all the general mortgage bonds of the Terminal Association at any time issued under the general mortgage, according to the tenor and effect of the general mortgage bonds and of the general mortgage, and the payment and satisfaction of the installments of the sinking fund under the general mortgage.

158 The Pittsburg, Cincinnati, Chicago and St. Louis Railway Company and Terre Haute and Indianapolis Railroad Company, the lessee, for account of itself and said the Pittsburg, Cincinnati, Chicago and St. Louis Railway Company, of the railroad of the Vandalia Company, joined in the guaranty agreement, and guaranteed the faithful and punctual performance by the Vandalia Company of the covenants thereof. The Burlington Company is the lessee of the railroad of Chicago, Burlington and Quincy Railroad Company, and the Alton Company is lessee of the railroad of the Chicago and Alton Railroad Company; said lessor companies joined in the guaranty agreement and respectively guaranteed the faithful and punctual performance by their respective lessees of the covenants thereof.

The railroad companies desire further to secure the general mortgage bonds of the Terminal Association by the assignment and transfer of the stocks hereinafter in the granting clause hereof specified.

For a valuable consideration it is therefore agreed as follows:

First. The railroad companies bargain, sell, assign, set over, transfer and deliver to the trustees nine thousand five hundred shares of one hundred dollars each, full paid and nonassessable, of the capital stock of Wiggins Ferry Company, and all additional shares of the stock of said Ferry Company which may be acquired by or for or on behalf of the railroad companies, or any of them, or in their interest, or be held in trust for them or for their benefit, or in trust for or for the benefit of any of them.

To have and to hold unto the trustees, their successors in the trust and their assigns, forever, on the trusts and for the uses and purposes, and subject to all the terms, provisions, and stipulations
159 in the general mortgage and in the general mortgage bonds contained, and for the uses and purposes, and upon and subject to all the terms, conditions, provisos, and agreements in the general mortgage expressed and declared, as additional security for the general mortgage bonds from time to time issued under the general mortgage of the Terminal Association, and outstanding.

Second. If the said sums of money in the general mortgage bonds mentioned, as well the principal as the interest thereof, shall be well and truly paid at the times and in the manner therein and in the general mortgage expressed, according to the tenor and effect thereof, then, and in such case, the estate, right, title, and interest of the trustees, their successors in the trust and their assigns shall cease determine and become void and upon proof being given to the reasonable satisfaction of the trustees that all the general mortgage bonds at any time issued and all accrued interest thereon have been paid off and satisfied, and upon payment of all costs, charges, and expenses incurred by the trustees in relation thereto, the trustees shall reassign or cause to be reassigned, transferred, and delivered to the railroad companies, or on their order, the stocks hereby assigned and transferred, and shall cancel and satisfy this agreement.

Third. The railroad companies, each for itself, expressly waive and release all right to have the stocks embraced in this agreement and hereby assigned and transferred, marshalled in any foreclosure of the general mortgage or other enforcement thereof; and the trustees in the general mortgage or any court in which the foreclosure of the general mortgage or the administration of the trusts by the general mortgage created is sought shall have the right to sell the stocks hereby assigned and transferred as part of the mortgaged premises therein embraced, and to determine whether such sale shall be made of the mortgaged premises as a whole, in a single lot or parcel, or in more than one parcel.

160 Fourth. The railroad companies will not, nor will any of them, at any time insist upon, or plead, or in any manner whatever claim or take the benefit or advantage of any stay or extension law wherever enacted, now or at any time hereafter in force, which may effect the terms, covenants, and performance of this agreement or of the general mortgage, nor will the railroad companies, nor will any of them, claim, take or insist upon any benefit or advantage from any law now or hereafter in force providing for the valuation or appraisement of the trust estate embraced in the general mortgage including the stocks hereby assigned and transferred, prior to any disposition thereof to be made pursuant to any provision of the general mortgage or herein contained or to the decree of any court of competent jurisdiction; nor will the railroad companies, nor will any of them, after such disposition claim or exercise any right under any law or statute wherever enacted and now or at any time in

force to redeem the trust estate embraced in the general mortgage, including the stocks hereby assigned and transferred, or any part thereof, and the railroad companies expressly waive any benefit and advantage under any such law or laws, and covenant that they will not hinder, delay, or impede the execution of any power in the general mortgage or herein or hereby granted and delegated to the trustees, but will suffer and permit the execution of every such power as though no such law or laws had been made or enacted.

Fifth. This agreement shall extend to the successors of the respective parties of the first part and to the successors in the trust under the general mortgage of the parties of the second part.

In witness whereof each of the parties of the first part has caused its corporate seal to be hereunto affixed and this agreement to be signed by its president or a vice president and its secretary or an assistant secretary, and Central Trust Company of New York has caused its corporate seal to be hereunto affixed and this agree-
161 ment to be signed by one of its vice presidents and by its secretary or an assistant secretary, and the said William Taussig has hereunto subscribed his name and affixed his seal, the day and year first above written.

Præcipe for transcript.

The clerk of said court, instead of preparing a full transcript of the record and proceedings for use in the United States Supreme Court in the above-entitled cause, as directed by the order entered

therein granting an appeal, will please copy and certify the following only, to wit:

1. Mandate of Supreme Court remanding cause.
2. Application for reargument.
3. Order denying reargument and dismissing bill.
4. Assignment of errors.
5. Petition for appeal.
6. Order allowing appeal.

CHAS. A. HOUTS,
United States Attorney.

The mandate, application for reargument, order denying reargument and dismissing bill, assignment of errors, petition for appeal, and order allowing appeal are respectively in words and figures as follows, to wit:

(*Mandate of Supreme Court remanding cause.*)

183 UNITED STATES OF AMERICA, *ss:*

The President of the United States of America, to the honorable the judges of the Circuit Court of the United States for the [SEAL.] *Eastern District of Missouri, greeting:*

Whereas lately in the Circuit Court of the United States for the Eastern District of Missouri before you or some of you, in a cause between The United States of America, complainant, and Terminal Railroad Association of St. Louis et al., defendant, No. 5250, wherein the judges of the said Circuit Court were divided in opinion, as by the inspection of the transcript of the record of the said Circuit Court, which was brought into the Supreme Court of the United States agreeably to the act of Congress in such case made and provided, fully at large appears;

And whereas in the present term of October, in the year of our Lord one thousand nine hundred and nine, the said cause came on to be heard before the said Supreme Court, on the said transcript of record, and on a motion to dismiss which was submitted by counsel for the United States:

On consideration whereof, it is now here ordered, adjudged, and decreed by this court that said certificate be, and the same is hereby, dismissed.

And it is further ordered that this cause be, and the same is hereby, remanded to the said Circuit Court with directions to proceed therein in conformity with law.

JANUARY 31, 1910.

You, therefore, are hereby commanded that such further proceedings be had in said cause, in conformity with the decree of this court

as according to right and justice, and the laws of the United States, ought to be had, the said certificate notwithstanding.

184 Witness the honorable Melville W. Fuller, Chief Justice of the United States, the 19th day of March, in the year of our Lord one thousand nine hundred and ten.

JAMES H. MCKENNEY,
Clerk of the Supreme Court of the United States.

(Endorsed:) Filed May 5, 1910. James R. Gray, clerk.

185 (*Application for reargument.*)

United States Circuit Court for the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA
vs.
TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS ET AL. } No. 5250.

Now comes the United States of America by Charles A. Houts, United States attorney for the Eastern District of Missouri, and shows to the court that on the 31st day of January, 1910, the above entitled cause, being then pending in the Supreme Court of the United States upon a certificate from this court, that the judges of this court were divided in opinion, and a motion to dismiss said cause having been filed in the Supreme Court of the United States by the complainant, United States of America, the Supreme Court by its order of record duly entered in said cause, did dismiss said certificate and remand said cause to this court, with directions to proceed therein in conformity with law; that said mandate of the Supreme Court was duly filed in said cause on the 5th day of May, 1910.

The complainant in said cause further shows that in the opinion of its counsel a reargument of said cause would promote and aid in the proper disposal thereof by this court, and to that end complainant asks that said cause be reset for reargument at such convenient time as the court may direct, and that notice of the time and place of such resetting and reargument be given by the clerk of this court to the parties to this cause.

CHARLES A. HOUTS,
United States Attorney for the Eastern District of Missouri, for Complainant.

(Endorsed:) Filed Jun. 6, 1910. James R. Gray, clerk.

186 (*Order denying reargument and dismissing bill.*)

United States Circuit Court of the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA
vs.
TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS ET AL. } No. 5250.

Before Sanborn, Van Devanter, Hook, and Adams, circuit judges.

Whereas upon full argument and careful consideration of this case two of the judges of this court were of the opinion that the complainant should prevail and two of the judges of this court were of the opinion that the defendants should prevail, and each of them is of the same opinion still, and the Supreme Court of the United States has dismissed the certificate of this division of opinion and has remanded this case to this court with direction to proceed in conformity with the laws of the United States;

Whereas honorable Charles A. Houts, United States attorney for the Eastern District of Missouri, has made a motion on behalf of the complainant that this court listen to a reargument of this case, and the judges are unanimously of the opinion that further argument thereof would be futile;

And whereas the complainant cannot prevail because only two of the judges are of the opinion that it is entitled to any relief, while two are of the opinion that it is entitled to no relief;

It is hereby ordered that the motion for a reargument of this case be, and the same is hereby, denied and that the bill of the complainant be, and it is hereby, dismissed.

WALTER H. SANBORN,
WILLIS VAN DEVANTER,
WILLIAM C. HOOK,
ELMER B. ADAMS,
Circuit Judges.

ST. PAUL, MINNESOTA, June 4, 1910.

(Endorsed:) Filed June 6, 1910. James R Gray, clerk.

187 (*Assignment of errors.*)

UNITED STATES OF AMERICA,
Eastern Division of the Eastern Judicial District of Missouri, ss:

In the Circuit Court of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri.

UNITED STATES OF AMERICA, COMPLAINANT,
vs.
THE TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS; the St. Louis Merchants Bridge Terminal Railway Company; the Wiggins Ferry Company; the St. Louis Bridge Company; the St. Louis Merchants Bridge Company; the Missouri, Kansas & Texas Railway Company; the St. Louis & San Francisco Railway Company; the Chicago & Alton Railway Company; the Baltimore & Ohio Southwestern Railroad Company; the Illinois Central Railroad Company; the St. Louis, Iron Mountain & Southern Railway Company; the Chicago, Burlington & Quincy Railway Company; the St. Louis, Vandalia & Terre Haute Railroad Company; the Wabash Railroad Company; the Cleveland, Cincinnati, Chicago, & St. Louis Railway Company; the Louisville & Nashville Railroad Company; the Southern Railway Company; the Chicago, Rock Island & Pacific Railway Company; the Missouri Pacific Railway Company; the Central Trust Company of New York; A. A. Allen; S. M. Felton; A. J. Davidson; W. M. Green; J. T. Harahan; C. S. Clark; H. Miller; Benjamin McKean; Joseph Ramsey; George E. Evans; C. E. Schaff; T. C. Powell; J. F. Stevens; A. G. Cochran; W. S. McChesney; Julius Walsh; V. W. Fisher; and S. D. Webster, defendants.

Assignment of errors.

Complainant, United States of America, by Charles A. Houts, United States attorney for the Eastern District of Missouri, acting in pursuance of the express instructions of the Attorney General in that behalf given, files the following several assignments of error upon which it will rely upon its appeal from the final judgment and decision made herein by this honorable court on the 4th day of June,

A. D. 1910, saying that in the record of proceedings herein and in said final judgment there is manifest error, and for error the
188 complainant assigns, on the appeal, the following:

I.

The complainant assigns as error the action of the Circuit Court in making and entering in this cause its order of June 4th, A. D. 1910, and adjudging and decreeing the dismissal out of court of complainant's bill of complaint herein.

II.

The complainant assigns as error the failure and refusal of the Circuit Court by its decree herein to adjudge and decree the complainant the relief prayed for in its bill of complaint.

III.

The complainant assigns as error the failure and refusal of the Circuit Court under the evidence in this cause to adjudge and decree that the defendants had entered into, prior to the institution of this cause, and at the time of the institution thereof were engaged in carrying out a combination and conspiracy in restraint of trade and commerce among the several States as described in the complaint herein, contrary to and in violation of the act of Congress of July 2nd, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopoly."

IV.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and decree that the several defendants (other than the Terminal Railroad Association of St. Louis, St. Louis Merchants Bridge Terminal Railway Company, Wiggins Ferry Company, and the St. Louis Bridge Company) owned and controlled the entire capital stock of the defendant Terminal Railroad Association of St. Louis, and that such ownership and control constitute a combination in restraint of trade and commerce among the several States and between said States and foreign countries contrary to the act of July 2nd, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopoly."

189 V.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and decree null and void the several agreements between the defendants herein, described in complainant's bill

of complaint, whereby the defendant, the Terminal Railroad Association of St. Louis, acquired the ownership and control of the St. Louis Bridge (designated in the complaint as the "Eads Bridge"), and the railroad tracks crossing the same, and terminals connecting therewith; and also the St. Louis Merchants Bridge (designated in the complaint as the "Merchants Bridge"), and the railroad tracks crossing the same, and terminals connecting therewith. And also the failure and refusal of the Circuit Court to enjoin the further carrying out of such agreements and the operation of such bridges, railroad tracks, and terminals upon a noncompetitive basis with each other.

VI.

The complainant assigns as error the failure and refusal of the Circuit Court to adjudge and declare null and void the several agreements between the defendants herein described in the complainant's bill of complaint looking to the operation of the St. Louis Bridge, known as the Eads Bridge, and railroad tracks crossing the same and terminals connecting therewith, in a common or noncompeting interest with the St. Louis Merchants Bridge, known herein as the Merchants Bridge, and railroad tracks crossing the same and terminals connecting therewith, and to enjoin and forbid the defendants, parties to such agreements, from the further carrying out of such agreements or the operation of such bridges, railroad tracks, and terminals in such common or noncompetitive interest, and to enjoin and forbid the defendants and each of them, their agents, servants, and employes, from operating, controlling, and maintaining the properties hereinbefore described as a common instrument or agency of interstate commerce under the common control of the fourteen railroad companies owning the capital stock of the Terminal Railroad Association.

VII.

The complainant assigns as error the failure and refusal of the Circuit Court to enjoin the defendants, the Missouri, Kansas &
190 Texas Railroad Company, the Chicago & Alton Railway Company, the St. Louis & San Francisco Railway Company, the Baltimore & Ohio Southwestern Railroad Company, the Illinois Central Railroad Company, the St. Louis, Iron Mountain & Southern Railway Company, the Chicago, Burlington & Quincy Railway Company, the St. Louis, Vandalia & Terre Haute Railroad Company, the Wabash Railroad Company, the Cleveland, Cincinnati, Chicago & St. Louis Railroad Company, the Louisville & Nashville Railroad Company, the Southern Railway Company, the Chicago, Rock Island & Pacific Railway Company, and the Missouri Pacific Railway Com-

pany, their stockholders, officers, directors, executive committees, agents, and servants, from voting or in any way acting as the owner of any of the shares of the capital stock of the Terminal Railroad Association of St. Louis, of the Wiggins Ferry Company, and of the St. Louis Merchants Bridge Terminal Railway Company; and to enjoin the Terminal Railroad Association of St. Louis, its stockholders, officers, agents, and servants, from in any manner recognizing or accepting the defendants hereinbefore in this assigment specified, as the owners or holders of any share or shares of its capital stock, and from allowing such specified defendants to vote such stock, and from paying any dividends upon such stock to said defendants.

VIII.

The complainant assigns as error the failure and refusal of the Circuit Court to enjoin the defendant, the Terminal Railroad Association of St. Louis, and the said named railroad companies who own its capital stock as set out in the bill of complaint, their stockholders, officers, directors, agents, and servants, from voting, controlling, or acting as the owner or owners of any of the shares of the capital stock of the St. Louis Merchants Bridge Terminal Railway Company, the shares of the capital stock of the St. Louis Merchants Bridge
191 Company, the shares of the capital stock of the Wiggins Ferry Company, the shares of capital stock of the Madison, Illinois & St. Louis Railway Company, the shares of capital stock of the St. Louis Transfer Railway Company, the shares of capital stock of the Wiggins Car Transfer Company, the shares of capital stock of the St. Louis Terminal Railway Company, the shares of capital stock of the Granite City & Madison Belt Railway Company, and the shares of capital stock of the East St. Louis Connecting Railway Company, and to enjoin said last named companies from recognizing or accepting the said Terminal Railroad Association of St. Louis, and the fourteen defendant railroad companies described in the bill of complaint as the owners of the capital stock of the Terminal Railroad Association of St. Louis, as the owners or holders of any of the shares of their respective capital stocks.

In order that the foregoing assignments of error may be and appear of record, the complainant presents the same to the court and respectfully prays that such disposition be made thereof as is in accordance with law and the statutes of the United States in such case made and provided.

IN THE

Circuit Court of the United States of America

For the Eastern Division of the Eastern Judicial District of Missouri.

THE UNITED STATES OF AMERICA,
Complainant,

vs.

TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS, ET AL.,
Respondents.

No. 5,250.

RECORD OF PROCEEDINGS
before Roderick R. Rombauer, Esq., Special Commissioner.

The following is a copy of the order entered in the case:

In the Circuit Court of the United States for the Eastern Division of the Eastern Judicial District of Missouri.

United States of America,
Complainant,

vs.

Terminal Railroad Association of St. Louis, et al.,
Defendants.

No. 5250.

Now at this day come Messrs. Chester H. Krum, Edward

C. Crow, and Charles Nagel and enter their appearance as solicitors for the complainant herein; and on motion of said complainant it is ordered that this cause be and the same is hereby dismissed as to defendants Central Trust Company of New York, W. M. Green, Benjamin McKean, George E. Evans, J. Ramsey and J. N. Stevens; and further on motion of said complainant pursuant to stipulation this day filed herein it is

Ordered, that Roderick E. Rombauer be and he is hereby appointed Special Commissioner to take and return to this Court the evidence in this cause.

April 6th, 1906.

G. A. Finkelnburg,
Judge.

The following is a copy of the notice to parties issued by the Special Commissioner:

St. Louis, Mo., May 31, 1906.

The United States of America,
Complainant,
vs.
Terminal Railroad Association of St. Louis, et al.,
Defendants.
No. 5250.

Circuit Court U. S., E. D. of E. J. D. of Missouri.

To Counsel for Defendants in the above entitled cause:

I have been advised by counsel for complainant that they intend to proceed with the taking of testimony before me in this case in Room 314, U. S. Custom House, on Monday, June 4th, 1906, at the hour of ten o'clock, a. m., when and where you are requested to attend.

Roderick E. Rombauer,
Commissioner.

St. Louis, June 4, 1906.

Be it Remembered that in the above entitled cause the following proceedings were had:

On Monday, June 4, 1906, the parties met in Room 314, Federal Building, in the City of St. Louis, Missouri, at ten o'clock a. m.

Appearances: There appeared on behalf of the complainant, Messrs. D. P. Dyer, Edward C. Crow, Chester H. Krum and Charles Nagel.

There appeared on behalf of the defendants, Messrs. Henry S. Priest and Frederick W. Lehmann.

Mr. Priest: I had supposed until yesterday afternoon that Mr. M. F. Watts, who is the regular counsel of the Terminal Railroad Association, would be present this morning to participate in the taking of this testimony, but I have been informed by his partner, Judge McKeighan, that several days ago Mr. Watts had departed on an urgent personal errand to Paris, France, where he would remain for a day or two only, and then return to St. Louis, arriving here between the 15th and 20th of June.

Mr. Watts is thoroughly familiar with the details and facts incident to this controversy, and I do not feel sufficiently advised to be able to properly conduct the cross-examination of witnesses in his absence. Mr. Lehmann, of course, is in the same position.

The Commissioner: Let me make this suggestion to all of you: As a matter of course, so far as I am concerned, under this order of court, I have merely the power to hear such proof as the parties may offer. I have not any power to rule upon the admissibility of the testimony offered—unless it is so palpably irrelevant that it so appears upon first sight. Under these circumstances, and as the testi-

mony is to be written out in full, so far as this examination in chief is concerned, why not let it proceed, and lay the cross-examination over, unless objections are raised on the part of the complainant, until Mr. Watts' return. What is your objection to that?

Mr. Priest: There is only this objection: it will be perfectly obvious to your Honor upon reflection; that I shall not be able to judge when the facts are fully developed and when they are partially developed.

The Commissioner: That can all appear by cross-examination after Mr. Watts' return; it can all be seen when he commences to cross-examine the witnesses. As I understand it the testimony is all to be written out immediately after being taken.

Mr. Priest: That is rather an unsatisfactory way to proceed, as it inconveniences the witnesses very greatly, and it puts their testimony into the record in a disconnected form.

Mr. Crow: I have some formal proof here which we could put in, but I do not know that it would hasten the matter any. Do I understand Judge Priest to say that Mr. Watts is away on personal business?

Mr. Priest: I made the announcement as it was made to me.

Mr. Crow: After consultation with my associates, they say that Mr. Watts went away on purely personal business and before he received this notice issued by the Commissioner.

The Commissioner: What time did Mr. Watts leave?

Mr. Priest: I cannot tell you the date, but it was before your notice was served. He is in Paris now, or on the ocean. I do not want to go on in this case in the absence of Mr. Watts, the senior counsel in the case, and the regular counsel for the Terminal Association.

Mr. Crow: We will consent to the adjournment, on

the condition that there will be no further application made for a continuance after the 15th of June.

Mr. Priest: Judge McKeighan said Mr. Watts would be a day or two in Paris, and then return immediately; and barring accidents in travel would be here between the 15th and 20th of June.

There is no disposition on the part of the defendants to delay the taking of the testimony in this case. I do not want counsel or the Commissioner to be under that impression.

Mr. Crow: With the understanding that there will be no further application for continuance, on account of the absence of Mr. Watts, we will consent to la the hearing over until the 20th of June.

Mr. Priest: I make the engagement as far as I can.

On account of the absence of Mr. Watts, who is expected to return to St. Louis from Paris, France, between the 15th and 20th of June, the further hearing of this case is postponed until Wednesday, June 20, 1906, at ten o'clock a. m., then to be proceeded with whether Mr. Watts has returned or not.

R. E. Rombauer,
Special Commissioner.

St. Louis, June 20, 1906.

On Wednesday, June 20, 1906, the parties met at Room 314 Federal Building:

Present, Messrs. D. P. Dyer, E. C. Crow, Chester Krum and Chas. Nagel, in behalf of the Complainant.

Mr. Frederick W. Lehmann in behalf of the defendants.

The Commissioner: The stenographer will read from her notes the minutes of the last meeting, to which counsel may make such objections as they see fit.

The stenographer thereupon read the minutes of the preceding meeting.

The Commissioner: The stenographer will write out in full the minutes of the preceding meeting, which counsel have just heard read and offer no objection to; and hereafter the minutes of each day's meeting will be written out in full, the original for the use of the Commissioner and to be filed in court, and two carbons, one for the complainant and one for the defendants.

The following is a copy of an order entered in the case:

In the Circuit Court of the United States for the Eastern Division of the Eastern Judicial District of Missouri.

The United States of America, *Complainant,* vs. Terminal Railroad Association of St. Louis, et al., *Defendants,*	No. 5250.

Now at this day come the parties hereto by their respective solicitors, and on motion of the Complainant, the defendants not objecting thereto, it is

Ordered that R. E. Rombauer, Esq., heretofore appointed Special Commissioner herein by consent of parties, be and he is hereby authorized:

First: To fix the time and place of taking testimony in this cause before him as such Commissioner, when the parties by their attorneys cannot agree upon the same;

Second: To compel the attendance of witnesses and the production of books and papers by either party.

June 18th, 1906.

(Signed) G. A. Finkelnburg,
Judge.

The Commissioner: Gentlemen, I desire to make this suggestion to you: heretofore the witnesses have been summoned by the Complainant in this case, and the Commissioner has not been advised either of their number or of the facts to which they are expected to testify; in consequence of which a large number of witnesses are continually in attendance here, whose testimony, I assume, could not under any circumstances be reached on the day for which they are summoned. Now you are perfectly well aware that that subjects the witnesses to great inconvenience in the premises, and it subjects the parties to considerable additional cost, which it is my care, as far as possible, to avoid; and, therefore, I will make an order that a list of the witnesses shall be furnished to the Commissioner, and the probable time that will be consumed in their examination, so that all these witnesses may not be in attendance here from day to day. Some of the witnesses have spoken to me concerning this matter; they are men of business, and in attending here from day to day when their testimony cannot be taken, are subjected to a great deal of inconvenience. Unless you gentlemen have some suggestion to make in the premises, I shall make that order, that a list of the witnesses be furnished to the Commissioner, so that we may know which ones will be needed here.

Mr. Crow: I do not think your statement is quite full enough to be exactly fair to counsel, for the reason that we could summon the witnesses on no other day than the one when the hearing was set. If we had not had our witnesses here we would be subject to criticism.

The Commissioner: You gentlemen must have been perfectly aware that it would be utterly impossible to get through with all these witnesses in one day.

Mr. Crow: Not at all, so far as I am concerned.

The Commissioner: At all events, counsel, of course,

are in a position to state in what order they intend to examine the witnesses, are you not?

Mr. Crow: We have no objection—at least I have none—to your making that order; but I simply wish to say that in all hearings of this character that I have had anything to do with, counsel have looked after the interests of the witnesses, and after they got started were able to tell how they would need them; but in this case we have not yet got started, and cannot tell in what order we shall proceed.

The Commissioner: But you know the practice is to furnish a list of the witnesses, and the Commissioner has not been furnished with that list.

Mr. Crow: I did not know any such practice existed. The practice has been to issue subpoenas out of the clerk's office. But we will be very glad to furnish you with the list.

The Commissioner: Well, gentlemen, are you ready to proceed?

Mr. Crow: We adjourned with the understanding that there would be no further adjournment on account of the absence of Mr. Watts. Mr. Watts has not returned. Now Mr. Lehmann says Judge Priest is sick.

We say that if counsel will agree to proceed on Monday without further delay, we will agree to have the matter laid over until that time.

We can go on with Mr. Pitzman to-day.

The Commissioner: Mr. Lehmann, what have you to say to that?

Mr. Lehmann: I am here to do the best I can. Mr. Watts has not returned. I have no desire for any delay.

So far as the map of Mr. Pitzman is concerned, my suggestion was, that I thought we ought to be able to agree and have one map here which would explain itself.

Mr. Crow: Let us determine the other question first. If just Mr. Pitzman is to wait it is a different proposition.

If we agree to lay it over until next Monday will you be ready to proceed at that time?

Mr. Lehmann: I do not like to make a suggestion about Mr. Watts' return.

Mr. Crow: I am leaving him out of the question, whether he returns or not.

Mr. Lehmann: I will have to submit myself to the orders of the Commissioner. I have stated the situation.

The Commissioner: Of course the complainant has a right to proceed, under the last order made in this case, if they wish so to do. I desire to state, in that connection, that I can very well see the propriety of the suggestion of Mr. Lehmann in this matter, that if the two engineers, the engineer of the Terminal Association and Mr. Pitzman, who has made a survey, as I understand it, for the complainant in this case, can agree as to that map, it will do away with a great deal of testimony in regard to the map. Therefore, it is advisable to determine whether or not those gentlemen can agree. They should be able to fully ascertain that before Monday next.

Mr. Lehmann: My idea was to do that this morning. I cannot imagine why they should not agree.

The Commissioner: They ought either be able to agree, or make up their minds to disagree, before Monday next.

Mr. Crow: As Mr. Lehmann suggests, that will save a great deal of time.

Mr. Pitzman: It is a large map, compiled from different surveys, and the engineer of the Terminal Association is perfectly familiar with every detail. If he tells me his objections, and I know what they are, I can then examine those special points and verify the statements.

Mr. Nagel: I understand, Mr. Lehmann, that the objections are quite numerous?

Mr. Lehmann: Yes, that there are a number of omissions.

Mr. Nagel: It seems to me the engineers of the two parties ought to be able to come to an agreement. They should be able to do it in a week, and save time and expense.

The Commissioner: I think they ought to be able to do it before next Monday.

Mr. Crow: All that is necessary is to look at the records here and in Illinois.

The Commissioner: If I am correctly informed, and as I understand it, your objections made to the plat of Mr. Pitzman, it is not the actual physical situation, but the designation of the various tracks?

Mr. Lehmann: I cannot imagine anything else.

The Commissioner: Of course, the actual physical situation, an engineer as capable as Mr. Pitzman would be able to determine after going over the ground.

Mr. Lehmann: I think there should be a map used here in the testimony that all can agree to. There is nothing so unsatisfactory as to use a plat and have a dozen different depositions.

The Commissioner: The counsel agree that the further hearing of this case may be postponed for one week, from this date, in order to enable the engineer of the Terminal Railroad Association and the engineer who prepared the map for the complainant in this case, to ascertain whether they can agree upon a map which can be offered in evidence as a joint map, on the part of the complainant and on the part of the defendants, and if they can agree to present such a map, and if they cannot agree, the case then to proceed without any further delay.

Are you gentlemen in a position to say how many of this large number of witnesses I see present, you will require at the next meeting?

Mr. Crow: No, sir, I am not. The parties on the other side, after we examine them, may say "That is all right,"

and so we can finish with them in a very short time. Some of these gentlemen are needed for only one or two facts.

Mr. Nagel: I get the impression that it will take us at least a day to agree on that map.

The Commissioner: That is the reason I make this suggestion, so as to avoid holding all these witnesses here unnecessarily.

Mr. Crow: If they furnish us with their telephone numbers, I will telephone them on the afternoon of that day which ones I will want to have come here.

The Commissioner: Let that be understood, that the witnesses will be discharged, to report here next Wednesday at ten o'clock, with the understanding that counsel for the complainant may by telephone messages to them select such as counsel think they may need, and the others need not attend.

Thereupon the further hearing of testimony is adjourned unto Wednesday, June 27, 1906, at ten o'clock a. m.

St. Louis, June 27th, 1906.

Met pursuant to adjournment as above, in the Court of Appeals Room in the Federal Building, in the City of St. Louis, Mo., on Wednesday, June 27th, 1906, at ten o'clock, a. m., when the following proceedings were had:

Present: Hon. R. E. Rombauer, Special Commissioner. Messrs. M. F. Watts, Henry S. Priest and Frederick W. Lehmann appeared in behalf of the defendants. And Messrs. E. C. Crow, Chester Krum, and Charles Nagel appeared in behalf of the complainant.

Counsel for complainant offer in evidence Articles of Association of the Union Railway and Transit Company of St. Louis, filed April 13, 1874.

The paper referred to is marked "Complainant's Exhibit 1."

Counsel for complainant offer in evidence Articles of Association of the St. Louis Bridge Company, filed December 18, 1878.

The paper referred to is marked "Complainant's Exhibit 2."

Counsel for complainant offer in evidence Articles of Association of the Tunnel Railroad of St. Louis, filed December 18, 1878.

The paper referred to is marked "Complainant's Exhibit 3."

Counsel for complainant offer in evidence Articles of Association of the Terminal Railroad of St. Louis, filed February 25, 1880, organized under the laws of the State of Missouri, certified to by the Secretary of State as an official copy.

The paper referred to is marked "Complainant's Exhibit 4."

Counsel for complainant offer in evidence Articles of Consolidation of the Terminal Railroad of St. Louis and the Union Railway and Transit Company of St. Louis under the name of the Terminal Railroad Association of St. Louis, filed July 30, 1889.

The paper referred to is marked "Complainant's Exhibit 5."

Counsel for complainant offer in evidence Articles of Incorporation of the St. Louis Merchants' Bridge Company, organized under the laws of the State of Illinois, issued on May 11, 1886.

The paper referred to is marked "Complainant's Exhibit 6."

Counsel for complainant offer in evidence Articles of Association of the East St. Louis Terminal Railway Company, filed August 16, 1887, organized under the laws of the State of Illinois.

The paper referred to is marked "Complainant's Exhibit 7."

Counsel for complainant offer in evidence Articles of Association of the St. Louis Merchants' Bridge Terminal Railway Company, filed August 18, 1887, organized under the laws of the State of Missouri.

The paper referred to is marked "Complainant's Exhibit 8."

Counsel for complainant offer in evidence duly certified copy of the Agreement between the St. Louis Merchants' Bridge Terminal Railway Company, the Terminal Railroad Association of St. Louis, and the St. Louis Terminal Railway Company, filed January 17, 1894.

The paper referred to is marked "Complainant's Exhibit 10."

Counsel for complainant offer in evidence Articles of Association of the Union Railway and Transit Company of St. Louis, filed April 13, 1874, and Resolution accepting the provisions of Article 2, Chapter 21, Revised Statutes of 1879, filed July 25, 1889, organized under the laws of the State of Missouri.

The paper referred to is marked "Complainant's Exhibit 11."

Counsel for complainant offer in evidence Aritcles of Consolidation of the Union Railway & Transit Company and the Terminal Railway Company of St. Louis, under the name of the Terminal Railroad Association of St. Louis; filed July 30, 1889.

The paper referred to is marked "Complainant's Exhibit 12."

Counsel for complainant offer in evidence Articles of Association of the St. Louis Terminal Railway Company, filed November 9, 1882, organized under the laws of the State of Missouri.

The paper referred to is marked "Complainant's Exhibit 13."

Counsel for complainant offer in evidence Amendment to Articles of Association of the St. Louis Merchants' Bridge Terminal Railway Company, filed July 14, 1893, organized under the laws of the State of Missouri.

The paper referred to is marked "Complainant's Exhibit 14."

Counsel for complainant offer in evidence certified copy of the agreement between the St. Louis Merchants' Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis, filed November 7, 1893.

The paper referred to is marked "Complainant's Exhibit 15."

Counsel for complainant offer in evidence certified copy of the lease of the St. Louis Terminal Railway Company to the St. Louis Merchants' Bridge Terminal Railway Company, filed July 14, 1893.

The paper referred to is marked "Complainant's Exhibit 16."

Counsel for complainant offer in evidence Articles of Association of the St. Louis Belt & Terminal Railway Company, filed March 14, 1902, organized under the laws of the State of Missouri.

The paper referred to is marked "Complainant's Exhibit 17."

Counsel for complainant offer in evidence Articles of Association of the Terminal Realty Company, filed November 13, 1902.

The paper referred to is marked "Complainant's Exhibit 18."

Mr. Priest: That is a paper to which there is no reference made in the bill, and no averment made in respect of it as the Commissioner will see. It appears to be Articles of Association of the Terminal Realty Company, signed by

Julius Walsh, Julius Walsh, Jr., and Felix E. Anderson. I do not see the relevancy of it.

The Commissioner: As a matter of course, all I can do is to note your objection to the admission of this paper.

Mr. Priest: We will not note any objection except that it is irrelevant.

Counsel for complainant offer in evidence certified copy of the Articles of Incorporation of the East St. Louis Connecting Railway Company, filed January 4, 1878.

The paper referred to is marked "Complainant's Exhibit 19."

Counsel for complainant offers in evidence certified copy Articles of Incorporation or Association of the St. Louis Transfer Railway Company, with the affidavits of the directors annexed, filed June 25, 1884; and a statement of increase of capital stock of the same company from $200,000 to $350,000, filed December 16, 1885.

The papers referred to are marked "Complainant's Exhibits 20 and 20a."

Counsel for complainant offers in evidence Articles of Incorporation of the Granite City and Madison Belt Line Railroad Company, filed December 27, 1892.

The paper referred to is marked "Complainant's Exhibit 21."

Counsel for complainant offer in evidence Articles of Incorporation of the Illinois Transfer Railroad Company, filed October 27, 1899, organized under the laws of the State of Illinois.

The paper referred to is marked "Complainant's Exhibit 22."

Counsel for complainant offer in evidence certified copy of the Act of Incorporation of the Wiggins Ferry Company, approved February 11, 1853.

The paper referred to is marked "Complainant's Exhibit 23."

JULIUS PITZMAN, a witness of lawful age, being duly produced, sworn and examined on the part of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW.

Q. Mr. Pitzman, please state your name, age, residence and occupation? A. Julius Pitzman; I am a citizen of St. Louis; I am a civil engineer.

Q. How long have you been a civil engineer? A. I have lived in the city of St. Louis since 1854, and have been in the surveying business about forty-eight years.

Q. What official positions in the civil engineering line have you occupied? A. I was County Surveyor of St. Louis County until the city and county were separated; and since that time, I have been the City Surveyor of St. Louis; I have done a very large amount of engineering work in the City of St. Louis, in St. Louis County, and in Madison and St. Clair Counties, being the two counties of Illinois opposite the City of St. Louis. I have made surveys of the harbor of St. Louis.

Q. You have a map on the table here (indicating). Will you please state to the Commissioner from what source you compiled that, and what it represents? A. This map represents, or is compiled from surveys made by myself from time to time, in part, and in part from maps as they appear on the public records in Illinois and in St. Louis; and in part it is taken from surveys made by Major Casey, the United States Engineer in charge of the river improvements at St. Louis; and part of the information is obtained from the chief engineer of the Terminal Railroad Association. The names of the railroads, so far as I have been able to ascertain them, are correctly shown on the map.

I have shown in separate colors all the railroads operated by the Terminal Railroad Association; but I have not divided them into the lines owned by the different railroads and

railways forming the Terminal Railroad Association of St. Louis.

Q. You have not yet stated definitely just what this map on the table here purports to represent? A. I thought I had. On this map I have shown all the railroads, the alignment of all railroads coming to St. Louis, and their connection with the railroad operated by the Terminal Railroad Association. I have also shown on the map the Eads Bridge, and the Merchants' Bridge, and the ferry lines operated across the river.

Q. And the physical location of these properties? A. Yes, sir.

The Commissioner: Mr. Pitzman intends to say, so far as the territory covered by the map indicated.

A. Yes, sir.

Mr. Priest: You used the words "all lines operated by the St. Louis Terminal Railroad Association": you mean all roads over which it may run its engines? A. Yes, sir.

I have compared the map I have prepared with the records in the office of the chief engineer of the Terminal Railroad Association of St. Louis, and find that it corresponds, practically, with his records. We simply added the method of operation. From some information filed in his office, and from the operating department, I received information at which point the Terminal Railroad Association makes connection with the railroads terminating at St. Louis, and have so entered a tabulated statement where the passenger connections are made, and where the freight deliveries are made. All that information was obtained altogether from the Terminal Railroad Association, because it is not a physical condition, and could not be ascertained by survey.

Mr. Priest: That information has been freely given you?

A. Yes, sir.

Mr. Crow: Q. Does this map indicate where the main lines of all railroads entering St. Louis come in?

A. Yes, sir, it shows the connection with all the lines.

Mr. Priest: We suggest that Mr. Pitzman prepare, for the use of the parties to this controversy, after conference with the chief engineer of the Terminal Railroad Association, and the operating department of the Terminal Railroad Association, a map which will show in different colors the lines constituting the Terminal Association, as they originally existed, and as they were extended from time to time, by the acquisition, leasing or consolidation of other lines; that the Wiggins Ferry system be shown upon the same map in like manner; that the St. Louis Merchants' Bridge and Terminal Railway System be shown upon the map in like manner; a different color being given to each of the constituent companies. That the map also show the date of organization of the different companies referred to in the bill and the answer.

We suggest also that the map show in different colors the freight and passenger stations of the St. Louis Terminal Association, the Merchants' Bridge and Terminal Railway Company, and the Wiggins Ferry Company. Also the connection of all lines entering the cities of St. Louis and East St. Louis. And that this map shall be accompanied by a key fully explaining what it shows.

Q. Will such a map as that be practical for you to make? A. Yes, sir.

Thereupon, by consent of counsel, I adjourn the further hearing of testimony herein to Friday, July 6th, 1906, at ten o'clock, a. m., in order that Mr. Pitzman may have an opportunity to prepare the map above described.

St. Louis July 6th, 1906.

Met pursuant to adjournment as above on Friday, July

6th, 1906, at the Federal Building in the City of St. Louis, Mo.

Present: R. E. Rombauer, Special Commissioner. Messrs. E. C. Crow, Chester Krum, and Charles Nagel in behalf of the complainant; Messrs. M. F. Watts, Henry S. Priest, and Frederick W. Lehmann in behalf of the defendant.

The following proceedings were had:

Mr. Watts: I should like to see the Articles of Association of the East St. Louis Railroad Company, which were offered in evidence at the previous session, and marked "Complainant's Exhibit 7." That is a company that I never heard of before, and one with which we have no connection in any form.

Mr. Crow: Here they are (handing paper to Counsel). Wasn't it succeeded by the Electric Company proposed to run south from the Merchants' Bridge?

Mr. Watts: I never heard of it before.

Mr. Crow: I think they cover the same route.

Mr. Watts: We object to the introduction of the paper which has been marked "Complainant's Exhibit 7," as irrelevant.

Mr. Watts: In response to the request of Counsel of complainant to produce certain documents, I now produce the following, in the order named:

1st. The lease of the St. Louis Merchants' Bridge Company to the St. Louis Merchants' Bridge Terminal Railroad Company; the date in the notice being July, ..., 1889; the actual date is February 1, 1889.

2nd. The lease of the St. Louis Merchants' Bridge Company to the Madison, Illinois & St. Louis Railroad Company; the date in the notice being ...., 1890; the actual date is August 1, 1893.

3rd. The contract between the Atlantic & Pacific Rail-

road Company and the Terre Haute & Indianapolis Railroad Company, and others; the date in the notice is March ...., 1873; the paper is dated 1874, but no day or month given.

4th. The agreement between the Terminal Railroad of East St. Louis, and the Terminal Railroad of St. Louis, and the St. Louis Bridge Company, and the Tunnel Railroad of St. Louis, made on March 3, 1880.

5th. The agreement between the Union Railway & Transit Company of St. Louis, and the Union Railway & Transit Company of Illinois, and the St. Louis Bridge Company, and the Tunnel Railroad Company, made on January 1, 1879.

6th. Copy of lease and agreement between the St. Louis Bridge Company, and the Tunnel Railroad of St. Louis, and the Wabash, St. Louis & Pacific Railway Company, and the Missouri Pacific Railway Company, dated July 1, 1881.

7th. The agreement made October 1, 1889, between Mr. Jay Gould on the one part, and the Cleveland, Cincinnati, Chicago & St. Louis Railway Company, the Wabash Railroad Company, the Ohio & Mississippi Railway Company, the St. Louis, Iron Mountain & Southern Railway Company, the Louisville & Nashville Railroad Campany, and the Missouri Pacific Railway Company, for the consolidation of the Union Railway & Transit Company and the Terminal Railroad Company of St. Louis, as the Terminal Railroad Association of St. Louis.

I furnish this in printed form, and attach to it two exhibits, also printed, referred to in the agreement but not called for by the notice.

8th. Assignment of the Bridge and Tunnel properties by the Missouri Pacific and Wabash Railroad Companies to the Terminal Railroad Association; the date in the notice being ...., 1889; the actual date is October 1, 1889.

Mr. Watts: Now with reference to the 9th, 10th and 11th paragraphs of the notice, General Crow has stated to me that he will give me a little more definite notice in respect to these, and when that notice is given the information will be furnished.

12th. Contract between the Terminal Railroad Association of St. Louis and the Wiggins' Ferry Company, dated the ..... day of ....., 1892.

We know of no such agreement, and on examination of the records find none.

13th. Tally-sheets of the Terminal Railroad Association for the years 1901, 1902, 1903, 1904, 1905 and 1906.

Those are being prepared now for General Crow.

14th. Guarantee between the Missouri, Kansas & Texas Railway Company and thirteen other railroad companies, and the Central Trust Company of New York, William Taussig, Trustee, and the Terminal Railroad Association of St. Louis.

I produce them in printed form.

That covers the fourteen documents called for.

The Commissioner: Before we proceed any further, there is one paper called for which Mr. Watts says he cannot find.

Mr. Watts: There is no such paper.

The Commissioner: Is it conceded that there is no such paper?

Mr. Crow: I cannot say anything about it. If he hasn't it, he can't produce it. If there is anything further about it, we will call your attention to it.

DIRECT EXAMINATION OF JULIUS PITZMAN, CONTINUED, BY MR. E. C. CROW.

Q. I will get you to state if you have made the map which was suggested by counsel at the last hearing? A. I have.

Q. What is that map? A. It is a map showing the railroads controlled by the Terminal Railroad Association of St. Louis, the St. Louis Merchants' Bridge Railroad Company, and the Wiggins Ferry Company; and I have shown on said map all railroads entering St. Louis and East St. Louis, and their connections with the above mentioned three companies; I have also shown the places of interchange of cars, and the depots for the receipt and delivery of freight and passengers.

Q. Does it show anything else besides the things you have mentioned? A. The map shows also the location of the main portion of the City of St. Louis, East St. Louis, Granite City, Madison, Venice, East Carondelet, and Carondelet.

Q. Does it show anything else? A. It shows the bridges crossing the Mississippi River near St. Louis; the so-called Eads Bridge, and the Merchants' Bridge, and also the places where the different ferries cross the river.

Q. Does it show all the ferries? A. Yes, sir; it shows all the ferries.

Q. Does it show any streets and alleys? A. It shows streets, but it is not a complete map of all the streets. It shows the streets in the vicinity of the railroad tracks.

Q. Are any depots shown? A. The map shows the Union Station and Relay Depot; and other depots are indicated by numbers and letters. The map is on too small a scale to show those connections and depots.

Q. You have marked on the map where they are? A. Yes, sir; practically where they are.

I think I had better state this: There is nothing on the ground to show where the different companies, of which this St. Louis Terminal Association is composed, begin and end. But these different roads, as marked in different colors on the map, I obtained from information received from the chief engineer of the St. Louis Terminal

Railroad Association. It is entirely taken from the records in said office.

Q. Will you state whether or not you have examined the records and files sufficiently to be able to say whether or not this map is accurate, as a description of the properties as they exist to-day? A. The map is accurate, but I cannot tell how far the right of way, for instance, of any of these associations which form a part of the St. Louis Terminal Railroad Association extends, and what right of way they own, or from what square to what square. But as this is taken from the records of the St. Louis Terminal Railroad Association, and from information received from the engineer, I am satisfied it is correct. From my general knowledge, I may say that little discrepancies may turn up, but I think, as a matter of fact, it is substantially correct.

Q. Are you able to state whether or not the physical locations of the tracks, depots, bridges and ferries are correct? A. Yes, sir; those are correct.

Q. Are you sufficiently acquainted with the details of that map to take it and describe the various properties that are located thereon? A. Yes, sir; but the map explains itself.

Q. Yes, but we cannot get that into the record. Please take the exhibits you have, and any other memoranda, and the map, and identify these properties, as we started the record the other day, with Exhibit No. 1. A. All the railroads leading to St. Louis and East St. Louis are marked by double blue lines, with dashes between them.

Q. That is, all the main lines of railroads? A. Yes, sir; to both St. Louis and East St. Louis.

The lines operated by the Terminal Railroad Association of St. Louis are represented as follows:

The Terminal Railroad Association of St. Louis, chartered July 30, 1889, is designated on the map by double lines with purple dashes between; it is in the City of St.

Louis, and extends from 21st Street to Grand Avenue, and from about Ninth Street to Eighteenth Street. Another branch starts at the Union Railway & Transit Company, near Eleventh Street, and runs southwestwardly to Ninth and Cerre Streets, connecting there with the Merchants' Bridge Terminal Railway Association.

The Terminal Railroad of St. Louis, chartered February 25, 1880, is shown on this map by double lines, colored brown between, extending from Twenty-first to Eighteenth Street, and connects the tracks of the Union Railway & Transit Company and Terminal Railroad Association of St. Louis. Total length two and one-quarter miles.

The Union Railway & Transit Company of St. Louis was chartered April 13, 1874; it is colored yellow on the map; it extends from the eastern end of the Terminal Railroad of St. Louis at Eighteenth Street, eastwardly to the junction with the Terminal Railroad of St. Louis, at Ninth and Poplar Streets. Its length is about five-eighths of a mile.

The Tunnel Railroad Company of St. Louis, chartered December 18, 1878, is shown on this map by solid green lines, beginning at Ninth and Poplar Streets, and entering a tunnel at Eighth and Spruce Streets, passing under Eighth Street to Washington Avenue, and east along Washington Avenue to the west entrance of the Eads Bridge, near Third Street; being about one mile long.

The St. Louis Bridge Company, chartered December 18, 1878, is represented on the above map by a heavy red line, and extends from Third Street in the City of St. Louis, across the Mississippi River to the Cahokia Creek in East St. Louis, connecting now with the Union Railway & Transit Company of Illinois; it is about one and one-eighth miles in length.

The Union Railway & Transit Company of Illinois, chartered April 14, 1874, is designated on the map by heavy

green lines, with dashes; it connects with the St. Louis Bridge at the Cahokia Creek, and extends to the present junction with the Terminal Railroad at East St. Louis (passing the Relay Depot in East St. Louis), near the point of intersection with the Cleveland, Cincinnati, Chicago & St. Louis Railroad; it is about seven-eighths of a mile in length.

The Terminal Railroad of East St. Louis, chartered April 19, 1873, is designated on the map by double lines with yellow and green dashes, the physical construction being in the form of a letter Y, and connecting at present with the tracks of the East St. Louis & Carondelet Railway, and the Cleveland, Cincinnati, Chicago & St. Louis Railroad, and also connecting with the Union Railway & Transit Company, near the Relay Depot in East St. Louis; it is about three-fourths of a mile in length.

The East St. Louis Belt Railroad Company, chartered June 15, 1898, is represented on this map by double lines with yellow dots and dashes, and begins near St. Clair Avenue, at the stem of the Y of the Terminal Railroad of East St. Louis, thence runs northwestwardly to the northern line of the St. Louis Stock Yards, and crosses the Stock Yards track near point "28," also the Troy & Eastern Railroad; thence running northwardly to a point marked "35" (the South Venice Junction), and connects there with the Madison, Illinois & St. Louis Railroad, the St. Louis, Troy & Eastern Railroad, the Chicago, Peoria & St. Louis Railroad, and the crossing of the Toledo, St. Louis & Southwestern Railroad.

Another branch of the East St. Louis Belt Railroad extends from a point on the Madison & East St. Louis Railroad northwardly of the point marked "35" on the map, and runs southwestwardly to the point marked "36" on the map (being a point on The Wabash Railroad in the northern line of the town of Brooklyn).

Another portion of the East St. Louis Belt Railroad starts near point "35" and runs southeastwardly to the point designated "29" on the map (which is the North Stock Yards connection at the St. Louis National Stock Yards). The total length is about three and five-eighths miles.

The Illinois Transfer Railroad Company was chartered October 27, 1899, and is indicated on the map by a broad purple line. It starts at a point in the East St. Louis Belt Railroad, about 1200 feet southeast of the point marked "35" (South Venice Junction), thence running southeastwardly, crossing the St. Louis, Vandalia & Terre Haute Railroad, and the Baltimore, Ohio & Southwestern Railroad, near the point marked "34" (a place called "The Willows"); thence running eastwardly and southwardly, crossing the Louisville & Nashville Railroad at the point marked "33" (the L. & N. Junction); thence southwardly to State Street in East St. Louis, at the point marked "32" (21st and State Streets); at which point it connects with the St. Louis & Belleville Electric Railroad (which is now used as a coal road); thence southwestwardly along 21st Street in East St. Louis, crossing the Southern Railroad at the point marked "31" (Southern Railroad crossing); thence southwestwardly to a connection with the Illinois Central Railroad at the point marked "30" (Valley Junction). Connecting also at the Illinois Central Railroad with the Valley Road, which belongs to and is generally known as the St. Louis, Iron Mountain & Southern Railroad in Illinois. Said Illinois Transfer Railroad Company also has a spur track connecting it with the Louisville & Nashville Railroad at the point marked "33" (L. & N. Junction). Total length is about five and three-fourths miles.

The East St. Louis & Carondelet Railway was chartered May 9, 1874, and is designated on the map by double lines with red dashes between. It starts at the St. Louis

National Stock Yards on St. Clair Avenue, in East St. Louis, and runs southwestwardly, passing near the Relay Depot, passing Cahokia Creek, the Baltimore, Ohio & Southwestern Railroad, the St. Louis, Vandalia & Terre Haute Railroad, the Louisville & Nashville Railroad, the Southern Railroad, the Chicago & St. Louis Railroad, the Mobile & Ohio Railroad, the East St. Louis Connecting Railway, and the Venice & Carondelet Railroad, leaving the city limits of East St. Louis near the point designated on the map as "No. 9" (dike connection of the Southern Railroad); thence continuing in a southwestwardly direction to the Mississippi River, near East Carondelet, at which point there are two inclines which are used to connect with car transfers, connecting with the St. Louis, Iron Mountain & Southern Railroad on the west side of the river. Its length is about eight and five-eighths miles.

Q. What ferries are those, do you know? A. I don't know by what company that ferry is operated.

A branch of the East St. Louis & Carondelet Railway departs from the main line, running through the village of Prairie du Pont, and terminates at the rock quarries at Falling Springs. It measures about two and five-eighths miles.

The St. Louis Merchants' Bridge Terminal Railway Company, chartered August 18, 1887, is shown by double lines with yellow dashes, and commences near the corner of Ninth and Cerre Streets, St. Louis, Mo., at a point where it connects with the tracks of the Terminal Railroad Association of St. Louis, running thence eastwardly between Cerre and Gratiot Streets, and across Plum Street, near Main Street, to the levee; thence along an elevated track along the levee, parallel with the river, passing beneath the approach to the Eads Bridge, to a point marked "I" (the public delivery track of the St. Louis Merchants' Bridge Terminal Railway in St. Louis on Main and Carr Streets).

Thence the track runs northwestwardly along First Street to Clinton Street, nearly parallel with the river; thence northwardly to North Market Street and Hall Street, crossing the St. Louis Transfer track near said point; thence northwestwardly along Hall Street to the point marked "R" on the map (Angelica Street), connecting at that point with the south approach of the west end of the St. Louis Merchants' Bridge; thence running northwestwardly to Broadway and Bircher Road, near Bellefontaine Cemetery. Being in all about 30,000 feet, or about five and one-half miles.

Said St. Louis Merchants' Bridge Terminal Railway Company connects with the northwestern approach of the Merchants' Bridge, near point "40" on the map (near Grand Avenue), and also connects with the Wabash Railroad at the point marked "S" on the map (Grand and McKissock Avenues). It also has a branch starting near point "Q," and running northeastwardly to connect with the Chicago, Burlington & Quincy Railroad. And another branch starting at North Market and Hall Streets, thence running southwestwardly to Clinton and Second Streets; thence southeastwardly along Second Street and along Collins Street, to Biddle Street. The northern terminus, near point "41," connects with the St. Louis Terminal Railway Company, the property of the Terminal Railroad Association of St. Louis, extending into St. Louis County. The total length is about seven and one-quarter miles.

The St. Louis Merchants' Bridge Company, chartered May 11, 1886, is represented on the map by double lines marked with green dashes and dots. It has two approaches on the west: one starting at the point designated "R" (Hall and Angelica Streets), which is the connection with the St. Louis Merchants' Bridge Terminal Railway; the other being near point "40" (near Grand Avenue), and connecting also with the St. Louis Merchants' Bridge Terminal Rail-

way Company. These two approaches join the bridge proper at the foot of Ferry Street; from which point the bridge structure proper starts, extending as a railroad bridge only over the Mississippi River, to a point about three hundred feet east of the east bank of the Mississippi River; from said point the road runs eastwardly on an embankment, extending to the west end of a Y of the Madison, Illinois & St. Louis Railway, being a point near the limits between Madison and Venice. The length is about two miles.

The Madison, Illinois & St. Louis Railway Company, being successor by change of name to the Electric City & Illinois Railway, was chartered September 29, 1891, and is designated on the map by double lines with red and brown dashes, beginning at the east end of the St. Louis Merchants' Bridge track, thence running southeastwardly to point "35" (South Venice Junction), where it connects with the East St. Louis Belt Railroad, the property of the Terminal Railroad Association of St. Louis. The other branch, starting also at the east end of the St. Louis Merchants' Bridge track, running northwardly and northeastwardly, crossing the Wabash Railroad, the Cleveland, Cincinnati, Chicago & St. Louis Railroad, the Chicago & Alton Railroad, and the Chicago Peoria & St. Louis Railroad, which said crossing is near point "38" (being a point within the city limits of Granite City, Illinois).

Another branch of the same road starts at the point where the Madison, Illinois & St. Louis Railroad crosses Edwardsville Avenue, near the boundary line between Madison & Venice, Illinois; thence running eastwardly to point "37," where it connects with the Toledo, St. Louis & Western Railroad, and the Chicago, Peoria & St. Louis Railroad. Total length about four and a half miles.

At this point recess was taken until 2:30 p. m.

After recess the following proceedings were had.

A. (Continued) The Wiggins Ferry Company was chartered February 11, 1853. The route of the ferry boats across the river is shown by double lines with red and purple dashes. The northernmost line, marked "Wiggins Car Ferry," starts at the incline at the foot of Mound Street in the City of St. Louis and crosses over to an incline, and connects with the East St. Louis Connecting Railway, and with the Chicago, Peoria & St. Louis Railroad, at a point north of Winter Avenue in East St. Louis.

The next route, marked on the map "Wiggins Wagon Ferry," starts north of Carr Street in St. Louis, Mo., and lands north of Wiggins Avenue on the Illinois side.

Both of the above ferry routes are north of the Eads Bridge.

The third route is marked on the map "Wiggins Wagon Ferry," and starts from the levee in St. Louis, Mo., near Spruce Street, runs northeastwardy, and lands on the Illinois side at Bogy Avenue, below the Eads Bridge.

The fourth route is marked on the map "Wiggins Car Ferry," and starts on the levee at St. Louis, at Miller Street, and runs northeastwardly, connecting with an incline from the East St. Louis Connecting Railway, about twelve hundred feet south of Trendley Avenue in East St. Louis, and north of Cahokia Creek.

Those are all ferries of the Wiggins Ferry Company.

The East St. Louis Connecting Railway Company, chartered January 4, 1878, is shown on the map by double black lines marked with red and yellow dashes, and extends from a point near St. Clair Avenue in East St. Louis, and running southwardly, thence westwardly, and thence southwardly, to Trendley Avenue in East St. Louis, there having two branches; one branch running in a southeasterly direction, connecting with the Illinois Central Railroad at Cahokia Creek; the other branch running southwardly to a point near the mouth of Cahokia Creek; another branch

extending eastwardly across the East St. Louis & Carondelet Railway, and across the Illinois Central Railroad, thence northwardly to the intersection with the Venice & Carondelet Railroad. Another branch begins at a point near Winter Avenue, in East St. Louis, thence runs northwardly and northwestwardly, following the general course of the high bank of the Mississippi River, to the intersection with the Stock Yards switch track, just west of the point marked "36" (being near the corporate limits of the town of Brooklyn, Ill.)

A track commencing at a point where the above described line crosses the Venice & Carondelet Railroad (near point "22") runs northwardly across St. Clair Avenue, the Stock Yards switch, the Venice & Carondelet Railroad, the East St. Louis Belt Road, to a point about 1500 feet northeast of point marked "No. 35," and is used jointly by the East St. Louis Connecting Railway and the St. Louis, Troy & Eastern Railroad. The length of the East St. Louis Connecting Railway is about five and one-half miles. The length of the track used jointly with the St. Louis, Troy and Eastern Railroad is about one and five-eighths miles.

The St. Louis Transfer & Railway Company was chartered June 25, 1884, and is indicated on the map by double black lines with green and red dashes. It begins at the Wabash Railroad, north of Grand Avenue, in the City of St. Louis, and runs southeastwardly to Bremen Avenue and Hall Street; thence southwardly along Hall Street to North Market Street; thence southeastwardly to the levee; thence following the levee on the surface, to a point near Mullanphy Street; thence crossing the Chicago, Burlington & Quincy Railroad, to a point in Florida Avenue and Lewis Street; thence along Lewis Street, and crossing again the Chicago, Burlington & Quincy Railroad, to the levee; thence southwardly along the levee, passing beneath the

Eads Bridge to Louisa Street, thence southwestwardly connecting with the St. Louis, Iron Mountain & Southern Railroad at Arsenal Street, a distance of about 32,000 feet, or six miles, in all.

The Granite City & Madison Belt Line Railroad Company was chartered December 27, 1892, and is designated on the map by double black lines with red dashes and dots. It begins on 16th and Madison Streets, in Granite City, and runs westwardly along 16th Street to C Street; thence northwestwardly to Niedringhaus Avenue; thence northeastwardly, and parallel with the Wabash Railroad, to about Twentieth Street: Its length is about three-fourths of a mile.

The remainder of the line, designated by red dashes and dots, simply represents the right of way owned by the Granite City Belt Railroad, which right of way surrounds Granite City. The Granite City & Madison Belt Line Railroad also has right of way connection, east of Granite City, with the Toledo, St. Louis & Western Railroad; and a right of way connection on the west side of the Wabash Railroad and the Chicago & Alton Railroad, to the Mississippi River, which line is designated on the map as a "right of way of the Granite City & Madison Belt Line Railroad."

The St. Louis Terminal Railway Company was chartered November 9, 1892, and is designated on the map by double lines with brown dashes. It begins at the station marked "41" (Bulwer & Carrie Avenues), at the intersection with the St. Louis Merchants' Bridge Terminal Railway, being designated "No. 41" on the map; thence runs northwestwardly along Bulwer Avenue; thence northeastwardly, crossing the Wabash Railroad, to the St. Louis Car Company's plant.

The main line of the St. Louis Terminal Railway commences at the same point, at Carrie Avenue and Bulwer Avenue, running thence northwestwardly to Broadway;

thence southwestwardly along a line nearly parallel with the Southeastern boundary line of Bellefontaine Cemetery, to Florissant Avenue; thence westwardly to a point of connection with the St. Louis Belt & Terminal Railroad near Easton Avenue, and extending from the point of connection with the St. Louis Belt & Terminal Railroad southwestwardly to a point on the Wabash Railroad, near Page Avenue, in St. Louis, Missouri. The total length is about six and three-fourths miles.

The route of the last described line is represented on the "Skeleton Railroad Map of St. Louis & Vicinity," entered in reduced scale on the northernmost portion of the large map.

The St. Louis Belt & Terminal Railway Company, chartered March 14, 1902, is designated by double black lines with brown and green dashes, on the skeleton map before mentioned. It begins at a point where it connects with the western terminus of the St. Louis Terminal Railway Company, near Easton Avenue, east of the Wabash Railroad, in the County of St. Louis; thence running in a westwardly direction, crossing the Wabash Railroad about one thousand feet north of Page Avenue; thence westwardly about three and one-fourth miles; thence southeastwardly about two and a half miles, to a point where it connects with the Rock Island Railroad just west of Clayton in St. Louis County. The total length is about five and three-fourths miles.

It also has a right of way, partly graded, extending from the last mentioned point in a southeastwardly direction about three and a half miles, to a connection with the St. Louis and San Francisco Railroad and the Missouri Pacific Railroad. It also has a right of way, partly graded, extending from a curve in the railroad about three and one quarter miles west of the Wabash Railroad, and running northeastwardly about four miles; thence eastwardly about

five miles, through St. Louis County, connecting with the St. Louis, Keokuk & Northwestern Railroad. Its right of way crosses the Wabash Railroad east of Ferguson Station.

DAVID R. FRANCIS, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant testified as follows, to-wit:

DIRECT EXAMINATION BY MR. E. C. CROW:

Q. Please state your name? A. David R. Francis.

Q. Do you remember when the agitation was first begun for the erection of the Merchants' Bridge? A. Very well.

Q. About what year was that, Governor? A. I think it began in 1884. I was partially responsible for it, if not directly so.

Q. Were you then Mayor of the City of St. Louis? A. I was at that time the President of the Merchants' Exchange.

Q. What was the cause of that agitation? A. The reason was the increased facilities for railroads entering St. Louis.

Q. What effect on the commerce of the city had the existing facilities at that time? A. Well, I thought they were inadequate, and that additional facilities should be provided. I thought additional terminal facilities would encourage the building of new railroads into the town.

Q. Was there any complaint at that time of the charges for transfer across the river? A. Well, I don't remember there was any more then than there had been previously and subsequently and has been all the time.

Q. Well, was there any complaint at that time? A. There was, yes, complaint in this way: that the feeling was that it should be made as inexpensive as possible for all railroads to come into the city, and that the transfer across the river should be made as low as possible.

Q. And the ground assumed by you and the other gentlemen was, that the expense at that time was too great and ought to be reduced? A. Well, that is what we thought, yes. Expenses were too great, and they should be reduced.

Q. Governor, who were associated with you in attempting to build this bridge, at the outset? A. If you will permit me, I would like to give you a little history of the thing at the inception of the enterprise.

Q. I shall be glad to have you do so. A. The matter was first agitated, if I remember aright, in the Transportation Committee of the Merchants' Exchange. I was President of the Exchange at the time. The next year I was made the chairman of the Transportation Committee of the Exchange, my term as President having expired. I continued to advocate the construction of another bridge across the river at St. Louis. I went to Washington with, I think, C. C. Rainwater and E. O. Stanard, and procured from Congress a franchise to bridge the Mississippi river at this point.

Q. Did you meet with any opposition in securing this franchise? A. No opposition that I recall, except there was one member of Congress from Chicago who opposed it. He was the only one. That man I knew personally, and know to-day. He was William E. Mason, who was afterwards United States Senator, and served six years in that position. At the time, however, that we applied for this franchise, Mason was a member of the House. There was no local opposition, that I was aware of; if so, it did not show itself.

The franchise was granted, and the Committee returned to St. Louis, made its report to the Merchants' Exchange, and said to the Merchants' Exchange, This franchise has been granted by the Federal Government; it belongs to you; we don't wish it; we have no interest in it; you take it and build the bridge.

Q. To whom was the grant made? It was made to a corporation, wasn't it? A. I think it was made to a corporation. There may have been other men who went along with Stanard, Rainwater and myself, but I do not recall them. Mr. Cobb was very active in the matter, but I think he was a member of Congress at the time.

Mr. Lehmann. Q. Seth W. Cobb, you mean?

A. Yes, Seth W. Cobb. I am not sure whether he was a member at that time, or was elected later.

The Merchants' Exchange replied that it had no means to build a bridge; that its charter did not authorize it to construct or operate a bridge; and that it was incumbent upon us to organize a company to build the bridge.

Mr. Crow: Q. What year was that, Governor? A. 1885, or 1886, I forget which.

In the meantime, I became Mayor of St. Louis in 1885. We organized a company. I think the company was chartered in Illinois, although it may have been chartered in Missouri. We applied to the Municipal Assembly of the City of St. Louis for a franchise to operate a railroad, a terminal road, on the streets of the city. I have forgotten whether I was one of the grantees in that franchise, but my advocacy of it was open and well known, and was very active.

Q. The franchise was granted to a company or a corporation? A. The franchise was granted to a company. We then proceeded to secure the money to build the bridge. We asked the public to subscribe to the company. I don't remember how many subscribers there were, but I am quite sure that every one who desired to become a subscriber was given the privilege. We proceeded with the work. After having expended all of the monies subscribed by the local people, and paid in, we found ourselves out of funds—

Q. Now, what kind of a bridge was it you started to

build? A. Just the bridge that is there now, a railroad bridge.

Q. A railroad bridge? A. Yes, sir. We never started to build any other kind of a bridge that I recall. There may have been some talk about another bridge, but there were never any plans drawn for another bridge, and certainly no specifications made for it. There may have been tentative plans drawn and submitted for another bridge.

Mr. Priest: Q. The bridge you refer to is what is now commonly known as the Merchants' Bridge?

A. Yes, sir, the Merchants' Bridge. When that money was exhausted, I was advised—I was in the Board of Directors, and I think on the Executive Committee during this time—

Mr. Crow: Q. Of the bridge corporation? A. Yes, sir, of the bridge corporation.

Q. That is the St. Louis Merchants' Bridge Company? A. Yes, sir, the Merchants' Bridge Company. I did not remain in that corporation very long, because when the Merchants' Bridge Terminal Railroad Company was organized it leased the Merchants' Bridge, and I, being a director in the Merchants' Bridge Terminal Railroad Company, ceased to be a director in the Merchant's Bridge Company. But long before the bridge was completed we were out of money, and I went East with Major Rainwater to endeavor to secure money. We were unable to do so. Returning to St. Louis, we called our stockholders, our subscribers, together; and said they must put up additional money for the enterprise, or else it would stop. I have forgotten the amount of that loan, but I think it was $800,000. The old subscribers, mainly, put that up.

That money was very soon exhausted, and I was called upon to go to New York again. I went, and failed again to get money. Upon that occasion, or the previous one, I cannot recall which, we borrowed a large amount of money

from the National Bank of Commerce in this city. The loan was secured by bonds on the bridge and on the Terminal Railway.

A third time we were called upon to raise money, because we didn't have sufficient to complete the bridge, and the approaches, to make them operative. I think I then myself suggested a collateral trust—about the first one I had ever heard of. We put all the securities we could in trust to the St. Louis Trust Company, and it issued notes, which our people took, and which we sold to the banks and to anybody else who would take them.

In the mean time, I had been elected Governor. I went to Jefferson City to live in January, 1889. The bridge proper was completed and dedicated sometime in 1890.

Q. It was opened in June, 1890? A. Yes, June, 1890. I remember coming from Jefferson City to participate in the opening of the bridge. Governor Fifer was Governor of Illinois, and I was Governor of Missouri. That was in 1890.

The bridge continued to operate as best it could until the panic of 1893.

Q. In the meantime, you had built some railroad tracks? A. Oh yes, we had built a good many railroad tracks in the meantime, and we had built the trestle on the levee, too.

Q. That is what is called the elevated? A. Yes, sir, that is what is called the elevated, on the levee.

Q. Just describe what tracks you had built? A. I cannot recall those. I haven't any idea of it. In fact, I was living in Jefferson City, and was not cognizant of the physical condition of the property, and not familiar with the construction work as it proceeded.

Q. Who was in charge of that, Mr. Rainwater? A. Yes, Major Rainwater was in charge of that.

Q. The elevated, constructed along the levee, had been built in 1893? A. I don't know whether it had been com-

pleted in 1893 or not. I don't remember. It had certainly been begun.

Mr. Priest: I think it is a fact it had not been completed.

A. It did not connect with the Union Station; I know that; but whether the track itself had been completed, I don't know.

Mr. Crow: Q. At that time, in 1893, the tracks of the Merchants' Bridge Terminal Railroad connected with the tracks of the Terminal Railroad Association of St. Louis, didn't they? A. I think not.

Q. You think not? A. Yes, sir, I think not. I think they refused to connect with us, is my recollection; although, as I say, I was living in Jefferson City, and not acquainted with the road, and wholly unacquainted with its physical condition. My recollection is that it did not connect with the tracks of the Terminal Railroad Association.

Q. Were the trains running over the Merchants' Bridge running into the Union Station at that time? A. When we sold the property?

Q. In 1893? A. Oh, no, indeed not.

Q. Was there any provision, Governor, in the Act of Congress authorizing the charter, that prohibited the consolidation of the Merchants' Bridge with the Eads or any other bridge over the Mississippi River? A. I think there was. I have been intending, since I was subpoenaed here, to look that up, but I did not know that I was to be examined to-day. It is my recollection there was some such provision in the original grant by Congress.

Q. Yes, there was a specific provision.

Mr. Priest: That will speak for itself.

Mr. Crow: I am asking about the facts. I am not offering the Act.

Q. (Counsel here reads from Act). Do you know your reason for having that inserted in the charter? A. Why,

the reason was to prevent the bridge from being purchased by the same people who owned the other bridge.

Q. And thus prevent another monopoly of the ingress and egress across the river? A. The object was to prevent the purchase of the property by the same people who owned the other bridge.

Q. What was the reason for not wanting the people who owned the Eads Bridge to obtain control of it? A. The object of the people who built this bridge was to maintain it as an independent structure across the river.

Q. Competitively with the other bridge? A. I don't know what you mean by "competitively." It was to provide independent transportation facilities across the river at this point. Competition was what we merchants desired all the time, of course. We would like to have these transfers made, if possible, without any cost at all.

Q. And that was the real reason back of the insertion of that clause? Do you know at what time that Act of Congress was amended so as to permit the acquisition of stock in the Merchants' Bridge Company by any other stockholder or corporation owning stock in the Eads Bridge? A. I do not. I did not know for a long time after it was done that it had been done.

Q. When did you first acquire that knowledge? A. I don't know when I first acquired that knowledge. I have been trying to recall it lately, in thinking the matter over. Major Rainwater is dead, and has been for five years—I don't remember exactly how long he has been dead, but four years at least; and I haven't talked with anybody about it.

Q. Do you know from whom you acquired that information? A. No, sir, I cannot recall, unless it was from him.

Q. That was an important fact in connection with that bridge property, wasn't it? A. Well, I suppose it was. I don't know.

Q. You were actively connected with the property up

to 1890, weren't you? A. No, sir, not after 1889. I went to Jefferson City to live in 1889, and from that time on I did not have any connection with the property except to be called in when any money was wanted.

Q. In that way, you were actively in touch with the property until the bridge was opened? A. I was actively connected with its financial needs.

Q. You were actively in touch with the property, weren't you? A. You will have to define what that means yourself.

Q. You have just stated yourself, Governor. I mean in the way of financing it. A. Yes, exactly. But men who furnish the money for those enterprises very often do not have anything to do with their operation. They are simply called upon to provide the money. They may familiarize themselves, if they desire or require, with the operation of the property; but I was Governor of the State, and I didn't have time to look after the operation of this bridge and terminal, and I was only called upon when money was short.

Q. Did you learn, when you did ascertain the fact, that it had been amended so as to permit its acquisition by them that the amendment had been made before the Merchants' Bridge was completed? A. No, sir; I didn't know when it was made. I was told it had been made, but I don't recall it.

Q. Do you now know it to be a fact that the charter was amended so as to eliminate the clause prohibiting the acquisition of it by the owners of another bridge, prior to the time the Merchants' Bridge itself was completed? A. No sir, I don't know that, but I take it for granted it must have been done prior to that time. I only know that it has been amended, by hearsay. I have never looked at the amendment, and have never looked at it since.

Q. Why do you say you take it for granted that it was

made before the completion of the Merchants' Bridge? A. I didn't say that. I thought you said before it was purchased by other parties.

Q. No; I said before the Merchants' Bridge was completed. A. I say that, because it was amended before these owners disposed of the property, and they disposed of the property before all of the approaches to the bridge had been completed.

Q. Had not the bridge been used prior to its sale? A. Oh, yes, the bridge had been used.

Q. When you speak of the approaches not all being completed, the Merchants' Bridge has on its west side an approach running northwest and another southwest, toward the city? A. Yes sir; but I think that northwest approach was built after the bridge was sold.

Q. And that was built, really, to permit connection with the St. Louis Terminal Railway, which was a line projected out into the county? A. That connection was not made, according to my recollection, before the property was sold. Of course, that was the object in building that approach.

Q. That is what I say. A. That was one object in building it. The bridge, in order to be operative, wanted to have approaches from all directions, on both sides of the river.

Q. Certainly, so as to make it as accessible as possible, from every direction? A. Yes, certainly.

Q. Were you a stockholder in the Merchants' Bridge at the time of the panic of 1893? A. Not the Merchants' Bridge. I think all the stock of the Merchants' Bridge was owned by the Merchants' Terminal Railway.

Q. And it was owned by the Merchants' Terminal Railway from the time prior to the commencement of the Merchants' Bridge, wasn't it? In other words, the Merchants' Terminal Railway Company organized the St. Louis Mer-

chants' Bridge Company, and always held the capital stock? A. No, sir, the Merchants' Bridge Company was organized before the Merchants' Bridge Terminal Railway Company. But before any stock of the Merchants' Bridge Company was issued the Merchants' Bridge Terminal Railway Company was organized, and I think acquired all the stock of the Merchants' Bridge Company.

Q. Were you a stockholder in the St. Louis Merchants' Bridge Terminal Railway Company before the panic of 1893? A. I was.

Q. How much stock did you hold, if you recollect, in a general way? A. No sir, I do not recall. I think I held between fifteen hundred and two thousand shares. $100 a share was the face value.

Q. It was full paid, wasn't it? A. Yes, full paid.

Q. So far as you were concerned? A. Yes, sir, full paid. There was no liability on it.

Q. Governor, the St. Louis Merchants' Bridge Company, you said awhile ago, you were not a Director in that for a very long time? A. I said that was my recollection. Of course, if you want me to answer definitely, you will have to give me time to look over the records.

Q. But you were a director in the St. Louis Merchants' Bridge Terminal Railway Company? A. I was.

Q. And when did you retire from that directorship? A. That is a question we have never settled.

Q. What do you mean by that? A. I thought I retired from that directorate in 1893.

Q. At the time of the sale of the stock? A. Very soon after the sale of the stock. In looking over some records lately, I found I did not retire then but continued, although as a nominal director, for quite awhile. I held stock in it, and hold stock in it now. I never had any dividends out of it, though.

Q. In 1893, at the time the panic came on, the St. Louis

Merchants' Bridge Terminal Railway Company owned the St. Louis Merchants' Bridge?

A. Yes sir, it owned the stock in the bridge. The bonds were outstanding, though, and we could not pay the interest on them.

Q. It owned the Merchants' Bridge legally, didn't it? A. It owned the stock in the Merchants' Bridge Company.

Q. That was all that represented the bridge, except the mortgage on it, and that was made by the bridge company? A. Yes, sir.

Q. And you were a director then in the St. Louis Merchants' Bridge Company? A. I was.

Q. And had been a director since its organization? A. I think so, but I am not positive. I may have remained awhile in the Merchants' Bridge Company before entering the Merchants' Bridge Terminal Railway Company.

Q. But very soon after you became a director? A. Yes, sir.

Q. Then the St. Louis Merchants' Bridge Terminal Railway Company, being the owner of all the stock of the Merchants' Bridge Company, was, of course, interested from 1887, when you began the bridge, on up to the time you retired; and you, naturally, would have been interested in that amendment of the Act of Congress, which enabled the bridge to be taken out of its control and placed in the hands of the other bridge company? A. I suppose I am interested in all legislation that affected the property.

Q. Was that question never up at a directors' meeting of the Merchants' Bridge Terminal Railway Company? A. Not at any meeting I ever attended—I do not say it wasn't up; but the amendment had been passed a long time before I knew of it.

Q. Do you know who were members with you on the Board of Directors of the Merchants' Bridge Terminal Railway Company? A. I cannot recall them all. I re-

member very distinctly some of them. Do you wish me to give their names?

Q. Yes. A. C. C. Rainwater was President. Charles D. McLure was a member.

Q. Where is he now? A. He is in St. Louis here, somewhere, I think—but I do not know. John T. Davis was a member.

Q. Where is he? A. He is dead. L. M. Rumsey was a member.

Q. He is dead, too, isn't he? A. Yes. A. B. Ewing was a member of either the Railway Company or the Bridge Company, I cannot recall which.

Q. Is he still living? A. Yes, he is living. John D. Perry was a member.

Q. He was your father-in-law? A. Yes, he was my father-in-law.

Q. He is dead, too? A. Yes sir, ten or eleven years. He died in 1895. John Whittaker was a member.

Q. Is he living? A. He is living.

Q. Where does he live, in St. Louis? A. I haven't seen him for two or three years; I don't know where he lives.

Mr. Nagel: He lives somewhere in the State of New York.

A. Somewhere in New York, the Genesee Valley, I think. William H. Thompson was a member.

Q. The late President of the Bank of Commerce? A. Yes, sir.

Q. He is dead? A. Yes, sir, he is dead. I could give you those very easily, if I had known you wished them. I guess you could find them in the records.

Q. It is pretty hard to go back so far. A. Yes, and so many people have died in the meantime. You see that company was organized in 1885, I think, twenty-one years ago. I was Mayor of the town then, and I can hardly realize that.

Q. Did you discover this amendment that had been made to the Act of Congress, during your term as Governor, or afterwards? A. Afterwards.

Q. Do you recall any of the circumstances under which you made that discovery, or the reasons that led up to it? A. Yes, sir, I can, I think: In 1893, in the midst of the panic, Major Rainwater sent for me, and said, "We cannot pay our interest on the bonds; what are we to do?" I said, "We cannot borrow any money to pay that interest, of that I am quite sure"—If you had been in business here, General, at that time, you would remember very well that you couldn't borrow money for anything. I said, "I will make the effort." So I went to three or four banks to borrow money to pay that interest with, and I couldn't get the money. Major Rainwater had made the effort himself before. I then said to him, "I will call upon the bond-holders, so far as I am acquainted with them, and ask them to sign an agreement to hold up their coupons;" their August coupons and their October coupons for 1893. The interest on the Bridge bonds was payable in August, if I remember aright; and the interest on the Merchants' Bridge Terminal Railway Company bonds was payable in October. They were payable semi-annually, you know, February and August, and April and October. We agreed that that was the thing to be done, if it could be done. I drew up such an agreement, signed it myself, and procured the signatures of most of the large bond-holders.

I remember going into a bank at that time and asking a bank cashier if he knew where any of those bonds were. He said, "I don't know; why do you want to know?" I said, "We cannot pay the interest on them, and I want to ask the holders to sign an agreement to hold up their coupons." I had not been out of that bank forty-eight hours before a broker came to me and insisted upon my buying some Bridge bonds at 75, and some Terminal bonds at 60, and

I found that they belonged to that bank cashier, who had taken advantage of my confidential inquiry of him to force me to buy the bonds. There were only ten of them altogether. I remember that distinctly, because when those bonds advanced to above par that same bank cashier came to me and said he thought I ought to give him those bonds back at the price I bought them at. I said, "You don't mean that?" He said, "I do." I said, "I won't do it." He is not a bank cashier now, and was not a year after that time. That hasn't anything to do with this story; except that it recalls the situation to me very vividly.

Q. That was in 1893? A. Yes, that was in 1893.

A few days after that Major Rainwater said to me, "I think we can sell that property, and if we do not sell it, it will go under the hammer,"—

Q. (Interrupting) Excuse me for interrupting, but were most of those bonds owned by St. Louis people? A. I don't know about "most of them"—Well I should say most of them were, yes. A great many of those bonds belonged to the company. They had not been sold, but they were deposited with the banks of the town to secure loans.

Q. They were up as collateral, but were really the property of the company? A. Yes, sir, and some of them were in the collateral trust held by the St. Louis Trust Company.

Q. Would you say most of them were in the collateral trust, or deposited as collateral for loans to the company? A. That is my recollection, but I would not say that positively, without looking into it. But I think we had more bonds deposited in the collateral trust, or as collateral, than with individuals.

Q. Then a comparatively small number of the Bridge bonds were owned by parties outside of the City of St. Louis? A. I would not say "comparatively small amount," but less than a majority.

Q. Less than a majority were owned outside? A. Yes, sir, outside St. Louis.

Q. Did you succeed in getting an agreement from these bond-holders to follow your suggestion and await the August and October coupons? A. I did, with all I could find. But the aggregate of the bonds, not by any means.

Q. What arrangement was made with those you did not find? A. There was not any arrangement made with those.

Q. Were they paid when the coupons became due? A. Yes, sir, they were paid. But I have forgotten whether they were paid by us, or paid by the parties to whom we sold them. I have forgotten when that sale was made, in 1893; if it was made before August 1st, possibly we got the money to pay the August coupons. It was certainly made before October 1st. It may have been that we borrowed money—I know we did have some money borrowed. I was individually an endorser on $75,000 or $100,000 of the Merchants' Bridge Terminal Railway paper.

The August interest on the coupons not held up must have been paid by us, and we probably borrowed the money on our individual endorsement, or on our assurance to the banks that we had sold the property, and the money would be obtained in a few days.

Q. Major Rainwater came to you in the summer of 1893, and stated you could sell the property? A. Yes, sir, that he thought we could sell the property.

Q. What did you say to him? A. I said "I don't want to sell the property, so far as I am concerned." Two years before that—four years before that—a proposition had been made to buy the property.

Q. That would be in 1889? A. Yes sir, in 1889.

Q. Who had made it? A. Well, that was always a question as to who made it.

Q. To whom was it made, your board of directors? A.

No sir, it was made to Major Rainwater individually, and Major Rainwater saw me about it, and I said that under no circumstances would we do it. I don't know who made the proposition—well, I do know who made the proposition too; the proposition was made by a man named George Morrison.

Q. Who was he? A. He was engineer of the bridge.

Q. Of your Merchants' Bridge? A. Yes sir, he was engineer of the bridge.

Q. He did not disclose whom he represented? A. Yes, sir, he said he represented Lee Higginson & Co. of Boston.

Q. Boston brokers? A. Brokers or bankers, very large financial men there. I never thought he represented Lee Higginson & Co. Well, yes, I thought he represented them, but I thought they were buying it for the Burlington Railroad.

Q. At that time the bridge was not completed? A. No sir, hardly begun. We were confident then we would have the money to build it ourselves.

Q. Had the Burlington Railroad reached St. Louis then from the north? A. Oh yes, the Burlington had reached St. Louis long before that. They had bought the Keokuk & Northwestern Railroad.

Q. Before 1889? A. Oh yes, long before 1889.

Q. Did you discover at that time, when Morrison made this offer, that the charter had been changed so as to permit its sale to a competitive bridge? A. Well, I don't think it had been changed then.

Q. It had not been changed? A. I think not.

Q. Do you know when it was changed? A. No, sir, I do not, indeed. I have been intending to look it up ever since I got this subpoena, but I have been very busy. Can you tell me?

Q. I have it here. I think it had been changed before the bridge was completed. A. Major Rainwater told me it

had been completed, when he told me about the sale in 1893.

Q. The charter was granted in 1887, and Section 11 thereof is as follows: (Counsel here reads) That is February 3, 1887. The amendment was made on September 1, 1888. And this was the amendment. (Counsel here reads.) A. I had not any idea it was made so early as that. I was out through the State campaigning for governor that year. It was the hottest summer I ever experienced in my life. I remember that very distinctly. Then that must have been required before we sold the bonds. I won't say that is a fact, but I can't remember why it should have been done at that date unless the people to whom we endeavored to sell the bonds required that.

Q. I believe you said that most of the people who bought the bonds were St. Louis people? A. Yes sir, that is so. But we never sold all of them.

Q. They wouldn't object to that being in there, if they wanted to protect themselves? A. Yes, sir, to restrict the purchase. In 1893, when Major Rainwater said to me he thought he could sell the property, I said that I would rather not do it. He said, "Where are we going to get the money?" He said, "I don't know where we will get it." He said, "We will go to foreclosure if we don't sell it." He said, "Furthermore, these banks where we have large loans are getting uneasy about this situation, and if this Bridge and Terminal Railway goes into the hands of a receiver, as it will, there will be a run on two or three banks in this town." The situation was very critical, indeed. I remember it as distinctly as if it were yesterday or last week. He said, "Regardless of our being able to carry this through eventually, a receivership at this time would be very disastrous to the business of this town, to its commercial interests." Banks were failing every day in Kansas City and in Chicago. We didn't have a bank fail here, but there was a great deal of uneasiness. I went to New York

myself, and spent a week there twice, to get money to prevent two financial institutions in this town from closing their doors; so I am somewhat familiar with the strain which was upon these financial institutions. Major Rainwater said, "These three or four financial institutions to which we owe this money, are very anxious, and the public are solicitous. We cannot afford a receivership, and we cannot afford to be caught on this interest."

Q. The public did not know they had a lot of their money invested in these bonds? A. Sure they did.

Q. Why did they know it? A. It was general talk around the town that three or four of the banks, with which three or four of us were connected, had advanced money.

Q. What banks were they? A. The Mississippi Valley Trust Company; the National Bank of Commerce, of which Rainwater was a director, had advanced money; the Laclede National Bank, of which I was a director and vice-president, had advanced money; in addition to that we had money from the St. Louis Trust Company. There were all sorts of rumors about the amount of money these banks had advanced to the Merchants' Bridge & Terminal Railway Company. And, just as is the case always, such rumors are magnified as they go from mouth to mouth. I would have been very much alarmed to have a receivership.

Q. As a matter of fact, the banks had not advanced enough to affect their solvency, had they? A. No, sir, not enough to affect their solvency, any one of them. But no bank has enough money to withstand a loss of confidence on the part of the public. And times have not changed in that respect to-day. If the public had lost confidence in the ability of the banks to pay, or believed that any bank had incurred a large loss, all the depositors would have wanted their money at once, and the result would have been a panic in St. Louis.

Q. Did the banks in St. Louis advertise the fact that

they had advanced this money, when they did it? A. You don't mean that as a serious question, General?

Q. I don't mean advertise it in the newspapers, but by announcing the fact: I mean it seriously in that way. A. Of course not. They had made every effort, as banks always do, to conceal their business. Their business is secret. There is no bank that I owe any money to to-day that is at liberty to tell anybody that I owe it money. But you can't keep those things secret, and whether they are true or not, such rumors are often circulated. But those rumors were true at that time as to the amount of monies owed to those banks by the Merchants Bridge, or the Merchants' Bridge Terminal Railway Company.

Q. Major Rainwater told you, did he, that he could sell that property, along in the summer of 1893? A. He said he thought he could sell it.

Q. And you told him you were opposed to it? A. Yes sir, I told him I would rather he did not sell it until I could confer with him, and confer with some of the other owners, and we had concluded to sell.

Q. At that time, you had retired from the governor's office? A. Yes, sir.

Q. You were then living in St. Louis, and in business here? A. Yes, sir.

Q. And connected closely with the financial world in the city here? A. Yes, sir.

Q. And had you discovered, independent of what Major Rainwater told you, that any difficulty with the bridge was liable to embarrass these banks? A. I don't know whether I want to answer that question or not. I don't know whether that is pertinent to this. I was at that time a director in two financial institutions in St. Louis, and of course, was very familiar with their business. Please read me that question.

Q. (The previous question was read to the witness).

Mr. Priest: A great many questions have been asked this witness, to which we might very properly have objected, because they are totally irrelevant to any issues in this case; but the purpose of this defense is not to withhold anything that the learned attorneys for the Government may think they are justified in bringing out from any witness in this case, because this defendant is now subject to censure and criticism, and we want all the light that the Government feels it can conscientiously introduce in the case. I think the objection of the witness to the question is well taken. He has already stated, of course, the financial conditions at that time; and has stated that large loans had been procured by this institution from the banks in St. Louis, and that money was not readily obtained.

The Witness: Go ahead, I have no objection to answering that question. Read it to me again.

Q. (The previous question read): "Had you discovered independent of what Major Rainwater told you, that any difficulty with the bridge was liable to embarrass these banks? A. I had.

Q. Then the opposition that you had to the sale of the bridge was not withdrawn by reason of the fact that Major Rainwater told you that a receivership for the bridge and the Terminal Company might embarrass the banks here? A. Not wholly, but in great part—yes. In great part it was. Let me explain a little, in connection with that: when I expressed my personal objection to the sale, when it was proposed by Major Rainwater, I stated at the same time that if a majority of the parties in interest desired to make the sale, I would not stand in the way.

Q. Was it disclosed to you at that time who would be the purchaser? A. I cannot say that it was.

Q. Didn't you inquire to ascertain who was going to purchase that bridge property? A. Oh, the nominal purchaser; oh yes, I knew who the nominal purchaser was.

Q. Who was that? A. Mr. E. R. Bacon.

Q. Who was he? A. At that time he was president of the Baltimore & Ohio Southwestern. I think his name is E. R. Bacon.

Q. Did you know at that time that he was the real purchaser? A. No, sir; I cannot say that I did. He told some one—I have forgotten whether I learned this from him directly or not—that he would have to go to London in order to make a final answer about some feature of the negotiation; and, consequently, my impression was that one of his principals, if not all of them, or the only one, was in London.

Q. Did you know any financial man in London who was connected with St. Louis railway interests at that time? A. No, sir—oh yes, I knew the house of J. S. Morgan & Co. in London, had interests in the terminals of St. Louis, owning the bonds, and had sold some of the bonds.

Q. When did you learn who the real purchaser was? A. I don't know that I know yet who the real purchaser was, unless it was Mr. Morgan, of the house of J. P. Morgan & Co.

Q. Do you remember a contract which was made in 1893 between the Merchants' Bridge Company and the Terminal Railroad Association of St. Louis? A. I remember there was such a contract made.

Q. Do you remember what was the occasion of the making of that contract? A. Well, I cannot say that I do remember what the occasion was. I should say the making of the contract was the result of the sale of the property.

Q. Yes, that is the point. A. Because the Terminal Railway Company—whatever it was called then—would never make any contract with us before the sale.

Q. The St. Louis Terminal Railroad Association, you learned through that contract, was the real purchaser of this St. Louis Merchants' Bridge Terminal Railway Company,

and thereby also became the purchaser of the St. Louis Merchants' Bridge? A. I cannot say I did. I supposed, however, that if it had not purchased it, it was in very close touch with the people who did.

Q. At the time when the sale was made? A. We left our securities, General—if you will permit me—at the St. Louis Trust Company. And we paid the money at the St. Louis Trust Company. I have forgotten whether I knew any more about the real purchaser than that, at the time.

Q. Who made the sale? The board of directors? A. The board of directors confirmed the sale—Oh, well, each stockholder did his share of selling, and each bondholder had a share.

Q. I understand. But the board of directors had to pass upon it before it got to the stockholders? A. They had to recommend it. I don't know that they had to, but they did recommend it.

Q. It was submitted to them before it got to the stockholders, wasn't it? A. I don't think there was any vote of the stockholders ever taken on it. There may have been, but I am not sure of that.

Q. Did the board of directors control a majority of the stock? A. I don't know whether they did or not. Not as individuals; not as individuals. There was a considerable amount of full paid stock in the treasury of the company. Now, whether the directors had a right to vote that, and did vote it, I do not recall. But there was never any difference, anyway. I don't remember that there was ever a dissenting vote on any proposition that was ever submitted to the stockholders.

Q. Didn't the terms of that contract of the 17th of August, 1893, provide that whereas the Merchants' Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis, each owned and operated railroads

in the city of St. Louis; and that whereas the Terminal Railroad Association desired to aid the Merchants' Company, in the completion and construction of its railroad, and the payment of its liabilities incurred in said construction, it is therefore agreed between said companies that the Merchants' Company agree to grant to said Terminal Association the right to the perpetual use of all tracks, sidetracks, switches, turn-outs, turn-tables, yards, depots, and all other terminal facilities then owned or that might thereafter be owned, possessed, controlled or acquired by said Merchants' Company in the City of St. Louis; and that the said Terminal Association accepted the said grant of right of perpetual use of said terminal facilities; and in payment and compensation therefor guaranteed the payment of all liabilities of said Merchants' Company, and further agreed to endorse, on or before September 1, 1893, its guarantee of payment of $3,500,000 of five per cent first mortgage bonds, of said Merchants' Company; and in consideration of the agreements hereinbefore set out said Terminal Association subscribed for 4384 shares of the capital stock of said Merchants' Company? A. Yes, sir.

Q. Then, at that time you must have known that the Terminal Association was buying the capital stock of the St. Louis Merchants' Bridge Terminal Railway Company? A. If it so states in that contract, I must have—yes. But you asked me if I knew who was making the purchase at the time. If you will ask me whether I did not believe that the same interest that was buying the Merchants' Company's securities controlled the St. Louis Terminal Association, I will say I did believe it.

Q. I am speaking of the corporation. A. Did the corporation, as a corporation? I don't know except what I know to-day. I probably read that contract at the time.

Q. Well, that is a matter of record. A. I wish to say that I did not read all the contracts, by any manner of

means, and did not read all that I signed, and for this reason; I had a lawyer at that time, who had been my lawyer for twenty-five years, and in whom I had perfect confidence, and when he told me to put my signature to a contract, I did it. He is dead, too. That was John H. Overall.

Q. As a director in this company, you were representing other people besides yourself? A. That is true, but as a director I did not sign. The president signs, you know.

Q. However it be, you now know, don't you, that the Terminal Railroad Association of St. Louis, in 1893, did acquire a portion of the capital stock of the St. Louis Merchants' Bridge Company? A. Yes, sir; and I must have known it then, since you have read it to me; but if you had asked me before I would say, I didn't believe it; I certainly did not recall it. I have signed a good many contracts since 1893.

Q. I suppose so. When did you acquire the knowledge, if you ever did acquire it, that a majority of the capital stock of the Merchants' Bridge Terminal Railway Company had been transferred to the Terminal Railroad Association of St. Louis? A. I don't know it now.

Q. You don't know it now? A. No, sir.

Q. Then you say you never have had that knowledge? A. I say I don't know. I don't know in whose name, or who controls a majority of the stock of the Merchants' Bridge Terminal Railway Company. I don't know it today. But, as I said before, I believed then, and I believe now, that the same interests that control the Terminal Railroad Association of St. Louis controlled a majority of the other.

Q. You haven't told us yet how in this transaction of 1893 Major Rainwater came to tell you that the Bridge could be sold to this Bridge Company, or the Terminal Railroad Association of St. Louis? A. I didn't say he said that

the bridge could be sold to the Terminal Association, or the Eads Bridge. He told me that the property could be sold.

Q. It could be sold under the original grant, couldn't it? A. It could have been sold at any time, if we could find a purchaser. When he said to me in 1893 it could be sold, he meant he thought he could find a purchaser. You are speaking of ability to sell in two senses. The franchise as originally granted did not prohibit the sale of the property.

Q. Certainly not. It only prohibited the sale to certain named persons? A. Certainly.

Q. To-wit, stockholders of a competitive bridge? A. Yes, sir.

Q. I asked you when you first learned that the Act had been amended so as to permit the sale of it to the stockholders of a competitive bridge, or any other bridge? A. I told you I didn't know. I didn't have any idea, until I read it here, it was in 1888.

Q. I understood you differently. I understood you to say in 1893, when Major Rainwater approached you about the sale of the property? A. He told me then, but I don't say he did not tell me before.

Q. Did he tell you in 1893 that that charter had been amended? A. He certainly told me then. I wouldn't say he didn't tell me before. I say, however, and I desire to repeat it, that it had been amended a long time before I knew it, but how long before I don't know.

Q. It had been amended in 1888; what was the occasion, then, of his telling you that the charter had been amended? A. I don't remember what the occasion was, unless it was a natural statement to make, in connection with our talk about the sale of the property.

Q. But if it was not going to be sold to another bridge, or to stockholders of another bridge company, it was immaterial whether the charter had been amended or not, be-

cause it could be sold under the original grant. A. That is true, if we could find a purchaser; but I knew sufficient of the situation in 1893 to know—

Q. (Interrupting) That nobody else but the people controlling the Terminal Association would buy it? A. That nobody else except those would be able to buy it.

Q. The same identical interests? A. I won't say that. Now, I am in the business myself, and have been for twenty years. At that time, and to-day, I might buy a property that I propose to handle in connection with other property, if the owners of the other property told me to do so. I am building a railroad to-day under the same conditions. The other people have no interest in the road, but they simply say, "Build the road," and if they had not said it I wouldn't build it. I did not know in 1893 whether the people buying this property were the people who owned the Terminal Association or not, but I did know, as well as I could know anything of which I did not have actual positive knowledge, that it was either the same combination, or an interest in harmony with that interest.

Q. Mr. Cobb, of your board of directors, was in Congress at the time this change was made, in 1888, wasn't he? A. I think he was.

Q. Where is Mr. Cobb now? A. He is living in this town when he is at home. I do not know where he is during the summer.

Q. Do you know whether he is home now? A. He is not in town now. I say he is not, because I have not seen him. He is in my office nearly every day when he is in town. But I have not been in town myself since last Saturday. He told me where he was going, but I have forgotten.

Q. Then your explanation of the occasion for your learning that this bill had been amended so as to permit this sale to another bridge company, or the owners of stock in an-

other bridge company, was the conversation you had with Major Rainwater about the sale of it, and your knowledge of the fact that practically nobody else could become a purchaser except a rival interest, or those closely allied to it? A. No, sir. And I want to say what I do say myself. I don't want you to go on with three or four sentences, and have me say yes or no.

Q. I only want to get the matter perfectly straight in the record. A. I am perfectly willing to repeat again, or to answer any question you will ask me.

Q. You say No then, to that question? A. No, sir, I do not say no to that. I do not say anything to that. I say that I will not answer yes or no to that, because there are three or four sentences there, a little complicated, and I do not propose to have you put into my mouth something I may have said, and may not.

Q. Let the stenographer read the question. I do not want to, and have no intention, of putting to you a question that you cannot answer.

(The previous question read.) A. That is not my explanation as the only one. I cannot answer that question definitely yes or no. I will say that the talk of the sale was an occasion for Major Rainwater telling me of the amendment of this bill. But I do not say, nor have I said, that it was the first time he had told me that the bill had been amended.

Q. Did you, at the time you first learned of the amendment of this bill, enter a protest against it? A. No, sir; I did not. I don't know when I first learned of it, either.

Q. You never made any objection to it? A. No sir, I never made any objection to it—you mean to the amendment of the bill?

Q. Yes, sir. A. No sir, I made no objection to it.

Q. Do you know whether or not you ever talked to Mr. Cobb about it while he was in Congress? A. No, sir, I

don't remember that. Will you permit me to state here, and I would like to put it into this statement, that when the bill was passed I was not only cognizant of the conditions under which the franchise was granted, but I advocated that condition being made in the granting of the franchise. But four or five years had elapsed. The situation was different. The circumstances had changed. The people who had their money in that bridge were greatly disappointed because the merchants of the town did not patronize it; and when I was told that the bill had been amended so as to enable the owners of the property to sell it to any one who might buy it, I offered no objection to it; and, on the contrary, I was pleased to learn it had been done.

Q. When the bridge was sold to the Merchants' Bridge Terminal Railway Company, what was the price paid for it? A. The bridge was never sold.

Q. You sold the Merchants' Bridge Terminal Railway Company, and that carried the bridge with it, didn't it? A. Yes, that carried the bridge with it.

Q. What was the price paid? A. My recollection is that the bonds of the Merchants' Bridge Terminal Railway Company were bought at ninety cents on the dollar. I don't remember what the stock was sold at. I cannot recall what price there was for the stock. The purchasers did not take all of the stock. They only took half of the holdings of each stockholder.

Q. At that time? A. At that time or since.

Q. They have not acquired it since? A. No sir, I have my half still on hand, and I would like to sell it for five dollars a share.

Q. You don't know that the other people have theirs? A. I have never heard of any trade in it, and I am in the business all the time. It never has been quoted since.

Q. You are talking about the bridge or the railroad? A. I am talking about the Merchants' Bridge Terminal

Railway. There has never been a share of bridge stock proper put on the market.

Q. As a matter of fact, the Merchants' Bridge Terminal Railway Company of St. Louis has been for years an owner of a majority of that stock; you know it, as a fact? A. I know it since you have been reading it here to-day.

Q. Didn't you know it before? A. I have answered that four or five times.

Q. I haven't asked you that before. A. I do not know to-day who owns a majority of the stock of the Merchants' Bridge Terminal Railway Company. I believe it has been owned—but my belief has nothing to do with this—but I have no objection to stating—I believe it is owned either by the Terminal Railroad Association, or by the same interests that own the Terminal Railroad Association. But the stock in the Merchants' Bridge Terminal Railway Company which the purchasers in 1893 did not take, has not been bought since. I sold only fifty per cent of my stock. I have fifty per cent of my stock still on hand. It never paid a dividend, not a cent of dividend, and I would be very glad to sell it to-day for five dollars a share.

Q. The stockholders all got an equal amount of bonds with the stock, didn't they? A. I suppose they did—I should say they could have done so.

Q. That was the arrangement, wasn't it? A. Yes, but I want to qualify that, General, in order to explain: There were different issues of stocks and bonds. There were sales of collateral trust notes. And every subscriber to one issue of bonds got the same amount of stock. There may have been a subsequent issue of bonds with which there was a different issue of stock. There might have been a subscriber to one issue, and not to the other. Likewise, there was stock with collateral notes.

Q. You got a dollar's worth of bonds, on the face, with every dollar's worth of stock you took, didn't you? A. I

don't recall whether I did or not. I have said fifty times, but I would like to say it again, that I never made any money out of the project.

Q. You have not said that fifty times here. A. I have said it fifty times in public.

Q. How much did you lose? A. I don't know.

Mr. Priest: That is objected to, as totally irrelevant.

A. I have no objection to answering that. In order to make that enterprise operative—I would like to have these gentlemen hear this—it is a little personal history, and nothing to do with the testimony, and yet I would like to have it taken down. I say, in order to make that enterprises successful, and make the bridge and terminals operative, I found that a great deal of property had to be bought, houses had to be erected, switches had to be built, in order to get business enough to pay the interest on the Merchants' Bridge Terminal Railway Company bonds, and on the Merchants' Bridge Company bonds. Consequently, I was instrumental in forming a number of auxiliary companies, to buy real estate, put up buildings, and build other branch roads. I had to do a good deal of that, without the assistance of the people who were subscribers to the enterprise. And I want to say, that taken altogether, I never made a cent out of the enterprise. Taking together what I lost on these outside enterprises, on the real estate that had to be bought, there never was any money made by me.

Mr. Priest: I want to state my ground of objection. I cannot see what possible relevancy the profit or loss of this witness can have with respect to the issues in this case.

The Witness: I am very glad to have it brought out, if it is the impression that I have made a great deal of money out of the Merchants' Bridge enterprise. I want the public to know.

Mr. Crow: Q. Governor, do you know what lines of road were built by the Merchants' Bridge Terminal Railway

Company in the State of Illinois, in connection with the bridge? A. No, I do not, General. I have forgotten whether there were one or two roads built over there as approaches.

Q. You were not familiar with those physical facts? A. No sir, I am not. I am familiar with the physical formation of the ground over there, if that is what you mean, but I don't know how many roads were built.

Q. That is what I mean. I don't suppose you would know. Your engineer probably would know that.

Q. Do you know whether they built a belt line down to East St. Louis from the end of the bridge? A. I don't know. My impression is they did not. At the same time, I will not say they did not. We had that in contemplation, but my impression is it had not been built when the property changed hands.

Q. Governor, I will get you to examine this printed paper; what does that purport to be? A. (After examining paper handed him.) It purports to be a circular issued by Francis, Brother & Co., March 15, 1906, relating to the general mortgage refunding four per cent sinking bonds of the Terminal Railroad Association of St. Louis.

Q. What is the aggregate of the bonds? A. The aggregate of the bonds here offered is $250,000, apparently. I never saw this circular before, although it was issued by my house.

Q. Examine it a little before you testify, because I want to ask you some questions about it.

The witness here examines the circular referred to.

Q. Can you tell how much the total issue of those bonds of the Terminal Railroad Association is, of which the $250,000 is a part? A. This circular states this is an issue of $50,000,000. Outstanding $18,000,000. Reserved to retire underlying liens, $17,500,000. The remainder, $14,500,000, of the authorized $50,000,000, is reserved for

issue after January 1, 1906. It ought not to exceed $1,000,000 in any one year, and said issues are for betterments and improvements and the acquisition of additional properties.

Q. Do you know how much of that authorized issue of $50,000,000 has been issued, or can you tell from that circular? A. Yes, sir; it says $18,000,000 have been issued.

Q. What is the date of that circular? A. This circular is March 15, 1906.

Q. And is the $250,000 a part of the $1,000,000 that should be issued in 1906, according to the terms of that circular? A. I should say it is.

Q. You have no knowledge except what is shown in that circular? A. Oh, it either must be a part of that, or a part of the outstanding $18,000,000.

Q. I call your attention to what purports to be a letter to J. P. Morgan & Co., from Julius S. Walsh. A. I never read it.

Q. Will you look at it and see what property it describes there?

Mr. Priest: I would like to inquire from the gentlemen, for I do not know, so far as I am familiar with the rules of evidence, on what ground they can put that circular in evidence, or interrogate this witness in respect to it.

The Witness: I suppose they are asking me as an expert.

Mr. Krum: The inquiry was not addressed to you, but to us. We say it is an entirely relevant inquiry.

The Commissioner: You know how I am situated.

Mr. Priest: We hardly thought the gentlemen would offer anything which they know is totally inadmissible according to the rules of evidence.

Mr. Crow: We think this is admissible.

The Witness: I have looked at it, but not closely, as it is too long.

Mr. Crow: Q. In this circular here, the part of it signed by your house, Francis, Brother & Co., you state that the Terminal Railroad Association owns and controls the entire terminal facilities in the City of St. Louis; have you any knowledge of that, personally? A. No, sir. That was written by Mr. Smith, our bond man, I suppose.

Q. Do you know who your house represented in that matter of advertising those bonds? A. Yes, sir; we represented ourselves.

Q. You had some principal behind you? A. Not a bit of it. We bought the bonds, and have got them for sale; got them now and have a loss on them.

Q. That is how you came to advertise them? A. Yes, sir.

Q. That statement, then, is your own statement concerning your own property? A. That is what that is.

Q. It must be correct, then, so far as you know? A. So far as I know, it is correct. But if you want to ascertain how the house got that information, I will either have to ask you to give me time, or send the bond man up who wrote that circular.

Q. I don't care particularly how you got the information, but what I am interested in is the accuracy of the information in the circular; if you are willing to vouch for the accuracy of it, I will interrogate you about it. A. What part of the statement?

Q. That part of it signed by your house. A. "The Terminal Railroad Association owns and controls the entire terminal facilities in the City of St. Louis, as well as valuable, etc., etc." (Witness reads from circular.)

Q. Is that information accurate and correct? A. I should say, on general principles, it is, because my firm name is signed to it; but I cannot personally vouch for it, because I did not write it. But I will send you the man

who did write it, and let him tell you where he got the information.

Mr. Priest: I think, your Honor, this is so manifestly incompetent that your Honor will be justified in excluding it.

The Commissioner: As a matter of course, gentlemen, I am perfectly willing to hear a discussion of this subject, but I desire to say this: when I was appointed Special Commissioner in this case, I had a talk with the Circuit Judge, and I wanted to have my powers in ruling defined in some way, but I could not get a definition, except the mere statement that my powers were, to hear whatever testimony was offered in the case. Judge Adams, however, volunteered the statement that if anything was so irrelevant that it appeared upon the first breath that it was irrelevant, I could strike it out. But that was a mere suggestion on the part of Judge Adams. So far as the judge who is at present in charge of this case, I could not get any definite directions from him at all.

Mr. Priest: I want the order modified so that your Honor may, at least, pass—I do not want to narrow the lines, but I do want all this sort of trash excluded, because it is irrelevant in the case.

Mr. Crow: That is your opinion, that it is trash. We don't think it is trash.

Mr. Priest: If you can show me any authority that will justify you in introducing such testimony—

Mr. Crow: It should not be necessary to show an experienced lawyer, and it is not necessary to show you.

Mr. Crow: Q. I see on this page, where your firm's name appears, this language is used: "These companies have entered into an agreement, etc., on freight traffic": You have no other knowledge on that question than what is contained in that circular? A. No, sir, none whatever.

Q. Can you tell me any way by which I could ascertain

where this information was acquired by your firm? A. No, sir, I can give you the name of the man who wrote the circular.

Mr. Watts: The defendant will furnish that contract if the Government desires it.

Mr. Priest: The answer sets out the contract, and just in that language.

Mr. Lehmann: It is not necessary to beat about the bush to get it.

Mr. Crow: It is not necessary to make those remarks. We do not criticize the way you conduct your case, and we would rather you did not criticise the way we conduct our side.

Q. Will you look at that letter of Mr. Walsh, and tell me if you know where the original of that can be obtained? A. I have no knowledge where the original can be obtained. I may have read this, but I don't recall it. This letter, however, or the authenticity of this letter, is not questioned, or we would not put it in our circular.

Q. I apprehend that. A. I make that statement on general principles. These statements here (indicating circular) are what are generally accepted on the street as facts. If you ask me where we got the information, I cannot tell you, but I will send the man up who wrote the letter, or I will find out and tell you, if I can.

Mr. Priest: I want to cross-examine you at some length—

A. (Interrupting): It is a quarter to six, Judge Priest.

Mr. Priest: Q. You are arranging to leave the city? A. Yes; I am going to leave the city next Wednesday evening, and shall be gone two or three, or possibly five weeks, unless I am called back sooner.

Mr. Priest: I don't want to interrupt Governor Francis' vacation, but wish to reserve the right to cross-examine him later.

The Commissioner: The testimony will be written out before Tuesday, and you can cross-examine him before Wednesday night.

The Witness: I will be extremely busy between now and Wednesday night. I don't see how I can do that.

Mr. Priest: I will ask the privilege of cross-examining this witness when he returns.

The Commissioner: Very well.

At this point, I adjourn the further hearing of testimony in this case until Tuesday, July 10th, at ten o'clock a. m.

St. Louis, July 10th, 1906.

Met pursuant to adjournment as above on Tuesday, July 10, 1906, at ten o'clock, a. m.

Present: R. E. Rombauer, Esq., Special Commissioner. Messrs. D. P. Dyer, E. C. Crow, Chester Krum and Charles Nagel in behalf of the complainant; and Messrs. M. F. Watts, H. S. Priest and F. W. Lehmann in behalf of the defendant.

The following proceedings were had.

DIRECT EXAMINATION OF JULIUS PITZMAN, CONTINUED BY MR. E. C. CROW:

Q. Mr. Pitzman, you may explain, if you will, the additions you have made to this map we have heretofore referred to, so as to keep it in consecutive order? A. I have indicated on the map, by red dots, the Interstate Car & Transfer Company Line, which starts at the incline of the Chicago, Burlington & Quincy Railroad.

Q. Indicate the point at which it starts, where the Chicago, Burlington & Quincy Railroad is located there? A. About 2500 feet north of Grand Avenue in the City of St. Louis. Then the transfer boat runs southeastwardly

along the center of the Mississippi River; thence southwardly, following nearly the channel of the Mississippi River, to a point opposite Carroll Street, in the City of St. Louis, connecting at that point with the incline located between Carroll & Lesperance Street in the City of St. Louis, and also connecting with an incline at the dike yard of the Southern Railroad, in St. Clair County, Illinois.

Q. With what railroad does the incline at Carroll & Lesperance Street connect? A. With the St. Louis Transfer Railway Company, and with the Missouri Pacific Railroad. There is also an incline built upon the land in Madison County, Illinois, and on the land of the East St. Louis, Madison & Granite City Railroad, being a part of the Southern Railroad system; and the Interstate Transfer Company transfers cars across to that point, which is in the State of Illinois, in the eastern continuation of Grand Avenue and Prairie Avenue.

I have also indicated upon the above map, so far as I have been able to ascertain it, the ownership of the land on the east side of the river, extending from a point about 4,000 feet north of the Merchants' Bridge, southwardly, to a point about opposite to or in the southern continuation of Carroll Street. The boundaries of the land owned by said Railroad Company are indicated on the said map, and the names of the respective companies are entered.

The northern portion is owned by the East St. Louis, Madison & Granite City Railroad, being a part of the Southern Railroad system. The next tract of land, extending north of the Merchants' Bridge, is owned by the Madison Ferry Company. The next tract of land is owned by the Venice Elevator Company; which I understand is also owned by the Madison Ferry Company. There is another tract of land in the name of the Madison Ferry Company, extending to a point opposite Dock Street in the City of St. Louis. Then a tract of land, about twelve

hundred feet front, is owned by the Wiggins Ferry Company. The next piece of land is owned by Haarstick & Orthwein, and contains about 2400 feet front. And from the Haarstick property southwardly to a point south of the Cahokia Creek, near the point marked "A," I am informed is owned by the Wiggins Ferry Company.

Q. What is the distance there? A. The frontage being about two and a half miles for the last three pieces.

The Wiggins Ferry Company land on this map is colored and bordered green.

The next piece of land, extending from a point opposite Chouteau Avenue to a point opposite Carroll Street, is owned by the dike yard of the Southern Railroad. And below that, a narrow strip of land, with a frontage of about two hundred feet on the river, is owned by the Illinois Central Railroad.

On the above map I have colored the lands owned by the different trunk railroads on what is generally known as "Bloody Island;" the land owned by the Chicago, Peoria & St. Louis Railroad is colored blue; the land owned by the Toledo, St. Louis & Western Railroad is colored red; the land owned by the Wabash Railroad is colored brown. The next tract of land, owned by the Wiggins Ferry Company, is within its borders edged green; the land of the Chicago, Burlington & Quincy Railroad is colored red; the land owned by the Chicago & Alton Railroad is colored brown; the land owned by the Baltimore, Ohio & Southwestern Railroad is colored blue; the land owned by the Chicago, Burlington & Quincy Railroad and the Baltimore Company, owned by the Wiggins Ferry Company, is colored green. The land between Missouri Avenue and Mullikin Avenue is also colored green. The land of the St. Louis, Vandalia & Terre Haute Railroad is colored brown. The land owned by the St. Louis Bridge Company is colored red. The land south of Bogy Street, owned by

the Cleveland, Cincinnati, Chicago & St. Louis Railroad, is colored red. The land owned by the Illinois Central Railroad is colored blue. The land owned by the Mobile & Ohio Railroad is colored brown. The next piece of land is owned by the Wiggins Ferry Company, and is used for a switch yard. Below that is the dike yard of the Southern Railroad.

Q. Between the land owned by the Trunk Line roads, in East St. Louis, last above indicated by you, and the river front, what land lies, if any, and who owns it? A. It is owned by the Wiggins Ferry Company, as I understand.

Q. What, if anything, is on that land, adjacent to the river front, in East St. Louis? A. The East St. Louis Connecting Railway runs along north and south on that piece of land, and it connects with manufactories and mills on both sides of it.

Q. There are various tracks besides those of the main lines on it? A. Yes, sir, several tracks.

Q. What else does that East St. Louis Connecting Railway connect with, as it passes along and over that strip of two and a half miles? A. I have not examined carefully, but I think it connects with all the trunk railroads.

Q. What is the use to which this Interstate Transfer Company is put, what business does it carry on?

Mr. Priest: I take it Mr. Pitzman will know that only from hearsay.

Mr. Crow: I thought perhaps he knew, and that is why I asked him.

A. It is used for the transfer of freight by cars.

Q. Is that all on this map that you wish to indicate now? A. Yes, sir.

Q. Then take the small map, which you have prepared; what is that map? A. This is entitled, "A Map Showing

the Railroad Connections Between Alton, St. Louis and East St. Louis."

Q. Does it show anything else besides railroad connections? A. It shows the Missouri River and the Mississippi River. It shows the St. Louis, Keokuk & Northwestern Railroad where it connects with the Central Belt Railroad of St. Louis. It shows where the St. Louis, Keokuk & Northwestern Railroad crosses the Missouri and the Mississippi Rivers, and where bridges have been erected. It also shows, on the Illinois side, the Cleveland, Cincinnati, Chicago & St. Louis Railroad, the Chicago & Alton Railroad, the Chicago, Peoria & St. Louis Railroad, connecting with the Terminal system of East St. Louis at Granite City, and connecting with the bridge at Alton.

Q. Does it show any other bridge besides the bridge over the Missouri River? A. It shows the bridge over the Mississippi River at Alton.

Q. Does it show any other railroads than those you have mentioned? A. No sir, those are the principal lines. It shows between the Missouri River and the Mississippi River the connection of the Cleveland, St. Louis & Kansas City Railroad, and the Cleveland, Kansas City & Northwestern Railroad, with the St. Louis, Keokuk & Northwestern Railroad.

Q. At what point on that map, if any, does it disclose that any of the lines of railroad thereon indicated, touch any of the lines controlled, owned or operated by the St. Louis Terminal Association, if you know? A. It only shows the connection of the St. Louis, Keokuk & Northwestern Railroad with the St. Louis Belt Railroad near the city limits of St. Louis.

Q. Is that in the City of St. Louis or St. Louis County? A. That is in St. Louis County.

Q. Is that all you care to say about that map? A. Yes, sir.

CROSS-EXAMINATION, BY MR. M. F. WATTS.

Q. I will ask you a question or two with reference to the map. At what point does the St. Louis, Keokuk and Northwestern Railroad connect with the St. Louis Belt Railroad in the County of St. Louis? A. It connects with the Central Belt Railroad, as I understand.

Q. What is the Central Belt Railroad, if you know? A. It is a line built from the St. Louis, Keokuk & Northwestern Railroad, southwardly, just prior to the opening of the Exposition.

Q. Have you ever seen this connection between the St. Louis, Keokuk & Northwestern Railroad and the Central Belt Railroad? A. I have seen part of the grading.

Q. Are there any tracks on that grade? A. I do not think there are any tracks now on it.

Q. So there is no connection at this date, is there? A. No, sir; it is merely a right-of-way.

Q. It is the right-of-way of the Central Belt Railroad, connecting with the St. Louis, Keokuk & Northwestern Railroad? A. Yes, sir.

JOHN SCULLIN, a witness of lawful age, being duly produced, sworn and examined, in behalf of the complainant testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name and residence? A. John Scullin; 5218 South Broadway, St. Louis.

Q. How long have you resided in St. Louis? A. A little over thirty years.

Q. During that period of time you have been engaged in various occupations, have you? A. Yes, sir.

Q. Principally street car and railroad business, however? A. Yes, sir.

Q. What kind of railways have you been connected

with? A. I had been connected with steam railroads, actively engaged, for twenty years prior to coming to St. Louis.

Q. I mean, here in St. Louis? A. Street railroads, up to the time I sold out, for twenty-four or twenty-five years.

Q. And with what steam railroads, if any, have you been connected since you have been in business in St. Louis? A. Well, I have been connected with the Colorado Road, and with a road in Texas.

Q. Haven't you been connected with the Wiggins Ferry Company? A. Yes, sir, the Wiggins Ferry Company, the East St. Louis Connecting Railway Company, and the Transfer Railroad on this side of the river.

Q. When did you become connected with that property, Mr. Scullin? A. I think in 1885 or 1886.

Q. What official relation to the corporation, if any, did you occupy? A. I was President of the company.

Q. President of the Wiggins Ferry Company? A. Yes, sir.

Q. At the time you became President of the Wiggins Ferry Company, what property did it own, operate or control? A. It operated the ferries, and operated the East St. Louis Connecting Railway, and operated portions of the Transfer Railways on this side of the river.

Q. Please describe the location and extent of these properties? A. The East St. Louis Connecting Railway extended from the lower part of East St. Louis up as far as Venice, and had switches connecting with the various railroads, and with the stock yards in East St. Louis, and connecting with the various industries up and down the river.

Q. What railways, if any, did it connect with? A. It connected with the Alton, with the Burlington, with the Vandalia, with the L. & N.—in fact, with all the railroads coming into East St. Louis.

Q. All of the railways that come into East St. Louis

from the East, terminate there, do they not? A. Yes, sir.

Q. What was the length of this East St. Louis Connecting Railway, do you remember? A. I think we had possibly twenty-five or thirty miles all told of tracks and switches.

Q. Were those tracks and switches immediately adjacent to the river bank? A. Yes, sir, up and down the river.

Q. Do you know, Mr. Scullin, who owned the land over which these tracks extended? A. Yes, sir.

Q. Who? A. The Wiggins Ferry Company.

Q. How much in extent did the Wiggins Ferry Company own up and down this river front? A. They owned the river front, extending from the lower part of the town, from—I cannot describe it, I have forgotten the name—pretty near down to what was known as the "Pittsburg Dike," up to Venice, less a strip of two thousand feet, opposite Brooklyn, that other people owned.

Q. This property was located between the river front and the termini of the Eastern roads entering East St. Louis from the East? A. Yes, sir.

Q. And the tracks of the East St. Louis Connecting Railway were upon this property, and connecting with the termini of these various Eastern roads? A. Yes, sir.

Q. What was the location of your East St. Louis Connecting Railroad, with reference to the Eads Bridge? A. We did not have any direct connection with the Eads Bridge, only via the Stock Yards we had a connection with the Bridge.

Q. In what way did you connect? Over what tracks? A. I don't remember. The details of that, I cannot tell you.

Q. How much in acres—how many acres, did the Wiggins Ferry Company own on this river front? A. I cannot tell you.

Q. Could you approximate it? A. No, sir.

Q. Several hundred acres, was it? A. Well, no, take all the property, scattered all around, you know, they owned property scattered all around, and they sold it off absolutely. I couldn't even approximate it.

Q. As compared with the river front of East St. Louis, so far as it was built up at that time, what was the extent of the property owned by the Wiggins Ferry Company? A. They owned all of the river front—that is to say, all east of Front Street; that is, between the river and Front Street, they owned absolutely all of that, less one elevator, I think.

Q. You don't quite apprehend my question; I guess I did not make myself exactly clear. Compared with the extent and south of the built up portion of East St. Louis at that time, what was the extent of the land on the river front owned by the Wiggins Ferry Company? A. I could not even tell you that. I could not approximate it. They owned considerable land. Most of it was accretions above East St. Louis, between East St. Louis and Venice. They had sold or disposed of the greater portion of their land on what was known as "The Island." They owned some pieces, but I could not tell you how much.

Q. The property they owned, however, was practically co-extensive with the City of East St. Louis, up and down the river front? A. Yes, sir.

Q. We understand, of course, what the "Island" is, but I want to get it into the record: Will you please explain what was called "Bloody Island," and how the termini of the Eastern roads are located? A. Yes, sir, they are all on the Island.

Q. What forms that Island? A. Cahokia Creek runs on one side, and the Mississippi River on the other.

Q. And is the City of East St. Louis principally built on that Island? A. No, sir, the principal part of the city is north of Cahokia Creek.

Q. But is not the Island practically covered with the city and with the railroad yards? A. No, sir. The Island proper is occupied principally with railroads and railroad yards.

Q. Then the City, principally, lies adjacent to that? A. Yes, sir, on the south side of Cahokia Creek.

Q. It is divided from it by the Creek? A. Yes, sir.

Q. I believe you stated that these Eastern Lines have their termini on the Island? A. Yes, sir.

Q. How many ferries were controlled by the Wiggins Ferry Company? A. We ran five boats at two landings on the east side of the river, and two on this side of the river; we ran five passenger ferry boats; and then we had transfer boats, two or three car transfer boats.

Q. Then how many boats were you operating altogether? A. Oh, I think we had seven or eight boats, of all kinds.

Q. Partly engaged in passenger business and partly in transferring railroad cars? A. Yes, sir.

Q. Loaded and unloaded? A. Yes, sir.

Q. What was the extent of the property controlled on this side of the river by the Wiggins Ferry Company? A. It owned what was known as The Transfer Railway, extending from the Arsenal on the south—

Q. (interrupting) Arsenal Street? A. No, sir, the Arsenal. That is down there near the Busch Place. From there up to the northern part of the city—I don't remember just the street—but up to the Waterworks, about.

Q. With reference to the Merchants' Bridge, above or below the Merchants' Bridge? A. Above, north of it.

Q. The line extended north of where the present Merchants' Bridge is? A. Yes, sir.

Q. What was the extent of that Line? A. I suppose we had, with switches and all, possibly ten or twelve miles.

Q. Did that extend through the business section of the city? A. It followed the meanderings of the river.

Q. And along the wharves? A. Yes, along the wharves.

Q. Touching various industries and plants? A. Yes, sir.

Q. Did it connect with any railroads? A. Yes, sir.

Q. What roads? A. We had connection with the Iron Mountain, the Missouri Pacific, the Burlington and the Wabash.

Q. Those are all lines that terminated on the west bank of the Mississippi River in the City of St. Louis? A. Yes, sir.

Mr. Priest: I don't suppose either Mr. Crow or Mr. Scullin wish to make that answer—that the terminus of those lines is on the west banks of the Mississippi River. Of course they have branches, but the terminus of the roads is not there.

Mr. Crow: I mean they stop at the City of St. Louis, Missouri.

Q. These roads you have mentioned, Mr. Scullin, as being connected with, on the west bank of the Mississippi River, are roads that stop at the city of St. Louis? A. Yes, sir.

Q. Except the Wabash Railroad; that goes across the river, does it not? A. Yes, sir.

Q. What roads, if any, did the Wiggins Ferry Company own and use in connection with its property on this side of the river? A. We owned considerable. I could not tell you from memory.

Q. Where was it located, in a general way? A. We had several pieces all along the line, some in fee and others by lease from the city; a good deal of wharf. Then we owned some up near the Stock Yards, several pieces.

Q. Principally up and down the river? A. Yes, sir.

Q. Did they own any back in the city, away from the river, used for their business purposes? A. No, sir, not that I know of.

Q. Please state the general nature of the business car-

ried on by the Wiggins Ferry Company at that time? A. The transfer of cars, loaded and empty; coal; all different kinds of freight; wagon traffic; and passengers.

Q. To and from where? A. To and from East St. Louis and St. Louis.

Q. East St. Louis, Illinois? A. Yes, sir, East St. Louis, Illinois.

Q. And St. Louis, Missouri? A. Yes, sir, St. Louis, Missouri.

Q. At that time what other companies, if any, were engaged in transferring passengers and freight by any method across the Mississippi River between the States of Illinois and Missouri at East St. Louis, Illinois and at St. Louis, Missouri? A. Well, there was part of the time the Venice Transfer boat, plying between—not Venice, but it connected with the Pittsburg Dike. I don't remember just the name of that transfer that ran there for several years.

Q. Where was that located, north of the Eads Bridge? A. No, sir, south of the Eads Bridge. Then there was the Illinois & St. Louis—I don't know what they called that line.

Q. A ferry boat line? A. Yes, a ferry boat line.

Q. How many boats did they run? A. I think they ran two.

Q. Any other corporations? A. Then there was what was called the Inter-State Sand & Transfer Company. They transferred cars across the river.

Mr. Priest: That is now called the Inter-State Car Transfer Company?

Mr. Crow: Q. The same corporation? A. Yes, sir.

Q. How many boats did they run? A. I cannot tell you. They had several.

Q. Was there any other ferry line? A. There was a ferry line from North Market Street up to Venice, called the Venice Transfer Company—I think they called it.

Q. How many boats did they have, do you know? A. I think they had two.

Q. That completes the ferries, practically? A. Yes, sir, that completes the ferries.

Q. Was there any other means of transportation across the river at that time? A. Only via the bridges.

Q. In 1885 there was only one bridge, wasn't there? A. Up to whatever time the Merchants' Bridge was built there was only one bridge.

Q. It was completed in 1890? A. Up to that time there was only one bridge.

Q. Mr. Scullin, at the time in 1885 when you began your operation of the Wiggins Ferry Company, and as you carried on the business you have described, it is or not a fact that the Eads Bridge carried foot passengers, wagons loaded and unloaded, and cars loaded and unloaded, across the Mississippi River, between the States of Illinois and Missouri? A. Yes, sir.

Q. And they transferred in the same capacity you did, except they used the bridge and you used the ferries? A. Yes, sir.

Q. And was the business they carried on received from these connecting carriers on either side of the river, the same as yours was? A. I suppose so.

Q. Mr. Scullin, do you remember when the St. Louis Merchants' bridge was erected? A. Yes, sir.

Q. Do you remember the time of the year it was completed? A. No, sir, I could not tell you.

Q. It was opened the 1st of June, 1890?

Mr. Priest: My recollection is, Governor Francis said the bridge was completed in 1890, but the dedicatory ceremonies were had upon the completion of the bridge, and not upon the opening. That is my recollection.

Mr. Crow: Well, it was completed some time in 1890, or the early nineties, to the best of your recollection.

A. Yes. I have not any definite recollection of it.

Q. When that bridge was built, do you know the reason for its erection? A. I cannot say that I do.

Q. You are not familiar with the conditions that led up to its being erected? A. No, sir.

Q. You don't know, then, whether or not there was complaint about the charges for this transfer service between these two States at that time? A. There may have been, but whether that was the motive that induced them to build the bridge, I don't know. I was not interested in it at all, and I did not know about it.

Q. When the bridge was built and finally opened for business, it was to carry on the same kind and character of business that the Wiggins Ferry Company and the old Eads Bridge had been carrying on for years? A. Yes, sir, I suppose so.

Q. And it did carry on that kind of business, did it not? A. I think so.

Q. And was in competition with the Wiggins Ferry Company and the Eads Bridge? A. Yes, sir.

Q. For the Inter-State transfer between Illinois and Missouri? A. Yes, sir.

Q. Mr. Scullin, I will get you to state, if you know, whether or not the opening of the Merchants' Bridge for business affected the rates and charges for transfer across the Mississippi River by the Wiggins Ferry Company and the Eads Bridge? A. Yes, sir, I think it did.

Q. In what way? A. It reduced them some.

Q. Do you remember about what year it was that reduction became operative? A. No, sir, I don't remember the year, but I remember there was a sharp competition for business. I don't know that it affected the rates so much as the getting of the business.

Q. How long did that competition last? A. It lasted some time.

Q. Mr. Scullin, in 1885, when you began this transfer business through the Wiggins Ferry Company, and on up through the succeeding years, will you please state whether or not, if you know, goods shipped from the East and destined to St. Louis, were billed to St. Louis, Missouri? A. I could not answer that; I don't know.

Q. Will you please state from whom you received the goods and merchandise that your Company transported across the river? A. Well, we received them from—I don't know that I understand your question.

Q. I expect you don't understand my question; maybe I did not make myself clear. A. Other than carload, we would have no knowledge of that. That would be from the Transfer Company.

Q. Your deliveries, then, were in carload lots? A. Yes, or in different wagons, which would pay their toll crossing over on the boats, so we would have no knowledge of that.

Q. In carload lots, from whom would you receive those goods? A. We received them from the railroad companies, and from different people; the railroads sometimes. But our principal business was coal, iron and that kind of stuff, that went on down to the levees. We handled but very little merchandise; there was no time, hardly, that we handled much merchandise.

Q. That coal and iron came from where? A. From different parts of the country; Illinois, and the East.

Q. And it was delivered in carload lots on the levee? A. Yes, sir.

Q. To your line? A. Yes, sir, to our line.

Q. In Illinois? A. Yes. It would be sent over on our connection at East St. Louis, and we would deliver it on this side.

Q. And you would deliver it to what places on the west side? A. To some railroad, if it was consigned to them.

There were certain unloading yards, wagon yards, that we had on the lines of the railroads.

Q. The business that went eastward over your line from the city of St. Louis: Describe how that was handled? From whom you received it and to whom you delivered it? Suppose it was goods destined to points in Illinois, or any places beyond? A. The railroad on the west side of the river would deliver it to us, and we would deliver it to the railroad to whom it was consigned on the other side of the river.

Q. Was there or not a bill of lading issued by your corporation for these goods? A. Yes, sir.

Q. And these bills of lading were issued to whoever shipped the goods? A. Yes, sir.

Q. Mr. Scullin, are you acquainted with the physical location of the properties known as The Terminal Railroad Association of St. Louis—just in a general way, and not in detail? A. In a general way, yes; but not in detail.

Q. What is the general character of the business carried on by that corporation? A. It is the handling of cars between different railroads, all the railroads, east and west, connecting across the river, and on this side; switching.

Q. To and from points in Missouri and Illinois? A. Yes, sir.

Q. East St. Louis, Illinois and St. Louis, Missouri? A. Yes, sir.

Q. What character of business do they do, passenger or freight, or both combined? A. Why, they do both.

Q. Can you tell whether or not the Terminal Railroad Association owns any freight and passenger cars? A. I could not tell you; I do not know.

Q. Have you seen trains of passenger cars marked "Terminal Railroad Association" moving across the river over their line? A. Yes, sir, I have seen them, but whether they owned them or not I don't know.

Q. Carrying passengers, were they? A. Yes, sir.

Q. Have you seen locomotives with the words "Terminal Railroad Association" on the sides of them? A. Yes, sir.

Q. Operating between these two States? A. Yes, sir.

Q. You stated awhile ago, I believe, that after the Merchants' Bridge was opened, these freight rates were reduced some, and that there was sharp competition for the carrying business between the States of Illinois and Missouri, and the transfer business? A. Yes, sir.

Q. Did I ask, or did you state, how long that competition continued? A. It continued up until I got out of the Wiggins Ferry Company.

Q. I will ask you if there was at any time, between 1890 and 1895, any arrangement or agreement between the Wiggins Ferry Company, the Terminal Railroad Association of St. Louis and the St. Louis Merchants' Bridge Terminal Railway Company, with reference to pooling or a division of the earnings of the three corporations, on a tonnage basis? A. Yes, sir, I think there was a tacit understanding of that kind, but they never lived up to it.

Q. Wasn't there a form of agreement of that kind entered into, the terms and conditions of which were agreed upon? A. Defined? Maybe there was, but I cannot really remember that.

Q. Let me see if I cannot refresh your memory about that: It has been a long time ago and a man who does as much business as you do is liable to forget some of these details. Did you know in 1893, one W. S. Hodges? A. Yes, sir.

Q. Who was he and what was his occupation? A. He was at one time our General Freight Agent.

Q. Was he at that time? A. I cannot say; I imagine he was.

Q. Did you know one Mr. John J. Baulch? A. Yes, sir.

Q. What position did he occupy and with what com-

pany? A. He was with the Terminal Association, and he was also in our employment, but I don't remember in what year.

Q. In 1892 and 1893? A. If Mr. Hodges was in our employment, Mr. Baulch succeeded him.

Q. They both occupied the same position in your company, but at different times? A. Yes, sir.

Q. Is it a fact that when Mr. Hodges was with you in that capacity, Mr. Baulch was with one of the other companies? A. Yes, sir.

Q. Do you know with which one? A. I think the Terminal Association.

Q. Do you know who represented the Merchants' Bridge Terminal Railway Company in the capacity of freight agent or traffic manager at that time? A. I don't remember. Possibly Henry W. Gays. He was their general manager.

Q. That is correct. Do you remember, Mr. Scullin, that in 1892, on certain classes of freight, the rate was considerably cut by the Merchants' Bridge Terminal Railway Company, and that you complained of that to Mr. Rainwater, who was then the president, I believe, or one of the chief executive officers of the Merchants' Bridge Terminal Railway Company, and that complaint was followed by a meeting between the representatives of the three companies? A. Yes, sir.

Q. Do you know where that meeting took place? A. No, indeed, I could not tell you. At some one of the offices.

Q. To refresh your memory, did not the first meeting occur down near Lafayette Park, in the neighborhood where Major Rainwater resided? A. No, sir.

Q. You don't remember that? A. No, sir, we never did meet at any such place, that I know.

Q. That is, you did not meet. A. I did not meet.

Q. You don't know but that the agents may have met there? A. Oh, I beg your pardon; I could not tell you where they met.

Q. You are correct about that. You were not at that meeting. A. No, sir.

Q. There was a later meeting, however, a few weeks or days afterwards, which you attended I believe, at the office of your Company, or the Terminal Company, in the city of St. Louis? A. Yes, sir, I think so.

Q. And that was attended by the presidents, I believe, of the three corporations? A. Yes, sir.

Q. The St. Louis Merchants' Bridge Terminal Railway Company, the Terminal Railroad Association of St. Louis and the Wiggins Ferry Company? A. Yes, sir.

Q. Was there any arrangements or conditions that were entered into there, as to the division of the earnings of the several companies, on a tonnage basis? A. I think there was, yes, sir.

Q. Were any of those conditions put into writing? Any memorandum made of them? I don't mean a signed instrument, but a memorandum of the conditions? A. There may have been, but I don't remember. There was an understanding, on a tonnage basis, between the three companies agreed upon.

Q. And that understanding and agreement covered the charges that were to be fixed and maintained for the transfer of passengers and freight between Illinois and Missouri, at St. Louis in Missouri and East St. Louis in Illinois? A. Yes, sir.

Q. How long did that agreement continue? A. To my recollection, a very short time. They never lived up to it.

Q. Which corporation was it that did not—all of you? A. All of us, I guess. I am not making any excuses. I don't think they carried it out in good faith. It was a kind

of a so-called "gentlemen's agreement," and they agreed to disagree directly after they made it.

Q. Is it a fact that by this agreement the rates that had been cut by the St. Louis Merchants' Bridge Terminal Railway Company were restored to what they had been prior to that time? A. No, sir. My recollection is that the rates they had made were sustained, but they agreed not to sin any more.

Q. After the year 1895, was there any other or further agreement or understanding as to the maintenance of rates between those companies? A. No, sir, I think that was lost. That is my recollection. There was never any compact any more to sustain rates, that I know of.

Q. Is it or is it not a fact, that from the year 1895 on up to the present time, with the exception of the year 1902 I believe, or a portion of that year, that the rates for hauling passengers and freight across the Mississippi River, either by ferry or bridge, for carload lots or less than carload lots, has been the same on the Merchants' Bridge Terminal Railway, the Terminal Railroad Association of St. Louis, and the Wiggins Ferry Company? A. No, sir, I think not.

Q. Have they been practically the same? A. On certain commodities, yes; on others no.

Q. What commodities? A. Well, for instance, coal.

Q. Coal forms what porportion of the volume of business that passes between these two States, over these several lines? A. That I cannot tell you, but it was a very large percentage of our tonnage.

Q. Of the Wiggins Ferry Company? A. Yes, sir.

Q. More than a majority of your tonnage? A. Oh, yes.

Q. Was the rate for coal the same on all three? A. That agreement did not last long, and after that there was no standard.

Q. These three corporations were all doing an inter-state

business, and all filed tariffs with the Inter-State Commerce Commission, did they not? A. Yes, sir.

Q. And if those tariffs were filed, were they lived up to? A. Yes, sir.

Q. And if the tariffs should disclose that the rates were the same, I presume that would be correct? A. I assume they were lived up to.

Q. You were in control of the Wiggins Ferry Company? A. I was the president, but I was not actually in control of the work of managing.

Q. You were not in touch with the actual handling of the traffic? A. No, sir, I was not.

Q. What man or men did have actual control of that actual handling? A. George L. Sands.

Q. Where is he? A. In St. Louis.

Q. In what business is he now? A. He is vice-president of a railroad in Arkansas.

Q. How long was he with your company? A. During all of the last fourteen or fifteen years.

Q. And during the year 1895? A. I don't remember when Mr. Sands first came with me, but I think he was there about fourteen years.

Q. And he was traffic manager during all those years? A. Yes, sir.

Mr. Priest: Q. General Manager, wasn't he?

A. Yes, sir.

Mr. Crow: Q. As general manager did he have charge of the traffic?

A. Oh, yes; of everything.

Q. That is what I am trying to get at, the man or men in your employ who could give that information. Is Mr. Sands still connected with you in business? A. Yes, sir.

Q. Where could he be found? A. In my office in St. Louis.

Q. When did you sever your connection, if you ever

severed it, with the Wiggins Ferry Company, as an officer? A. About six months after its sale. I don't remember now when it took place; when I sold out to the Rock Island Railroad.

Q. When was that sale, 1902 or 1903? A. I don't remember.

Mr. Priest: In 1902.

A. Well, in about six months after that.

Mr. Crow: Q. Up to that time had you general knowledge of the general volume of business, in the way of the number of cars handled by your company? A. No, sir.

Q. Do you know in a general way how many boats your Company operated at that time? A. Yes, sir.

Q. How many? A. We operated three passenger boats every day; two below the bridge and one above the bridge. Those were passenger boats. Our car transfers were operated as the volume of business demanded.

Q. How many car transfer boats did you have? A. We had two car transfer boats besides barges and a tug.

Q. How many locomotives did you have? A. That I could not tell you.

Q. You had several? A. Oh, yes, several.

Q. Did you have any freight cars? A. No, sir, not any freight cars.

Q. Had you any passenger cars? A. No, sir.

Q. Did you have any kind of cars? A. Yes, sir, we had a few dump cars.

Q. What do you mean by that? A. Dump cars, for hauling dirt.

Q. Cars for dumping dirt along the track? A. Yes, sir.

Q. That was the extent of your equipment? A. Yes, sir.

Q. Did you operate any other track on this side of the river other than the St. Louis Transfer track? A. No, sir.

Q. Do you know who bought the Wiggins Ferry Com-

pany in 1902? A. I supposed it was the Rock Island Railroad Company. The part I had to do with it, I sold my stock and recommended to all the other stockholders that they turn their stock over to the Rock Island Railroad Company.

Q. What was the fair market value of your stock at the time or shortly before this sale came up? A. Oh, anything from two hundred dollars to two hundred and twenty dollars a share.

Mr. Priest: The last sold at two hundred and thirty-five dollars a share.

A. Five shares.

Q. That was the extreme? A. Yes, sir, five shares sold for two hundred and thirty-five dollars a share.

Mr. Crow: Q. What price did you get for the stock you sold?

A. Five hundred dollars a share.

Q. Have you any knowledge as to what price the majority of that stock brought when it was sold? A. No, sir. It varied toward the last, when they bid it up high.

Q. That was only for a few shares, that a large price was paid? A. Yes, but it was considerable. I have no way of knowing.

Q. How many shares of the capital stock of that corporation were there at that time? A. Ten thousand shares.

Q. It is true, is it not, that at the time of the transfer of the majority of the shares of this stock, to whomsoever they were transferred, that prices were paid above the actual earning or market value of the stock? A. Oh, yes.

Q. Do you know the reason for that? A. I have an opinion; I do not know.

Q. As a practical railroad and business man, you know the reason they paid you more than the market value of that stock, do you not? A. Well, the Rock Island people wanted it for terminals of their great system of railroad.

They paid more than I thought it was worth, or I would not have sold it. I thought the price was a good price. We did not have the earning capacity to warrant a payment of five hundred dollars; but to a large railroad system that could use it, that would induce them to do it, and that was the ground that induced them to pay the five hundred dollars a share for it.

Q. And who were their competitors in an attempt to get control of those shares of stock? A. They employed Mr. Wade, of the Mercantile Trust Company to represent them, and the Mississippi Valley, represented by Mr. Jones, was the competitor in buying up those shares of stock. Who he represented, I don't know.

Q. You don't know what company or corporation he represented? A. No, sir, I do not know.

Q. Do you know who controls the Wiggins Ferry Company at this time? A. No, sir, I do not.

Q. Is it not the Terminal Railroad Association of St. Louis?

Mr. Priest: That is not what the answer states.

Mr. Crow: What is the answer?

Mr. Priest: The answer says, "the railroads of St. Louis."

Mr. Crow: Q. Do you know whether or not a majority of the ten thousand shares of stock of the Wiggins Ferry Company brought as much as five hundred dollars a share at the time of this sale? A. Oh, yes, it brought more—well, I beg your pardon, but I don't know that I have a right to say. I don't know. I know what I got, and I know what the rumors were. I have no right to say whether they did or not.

Q. Your knowledge on that is what you understood? A. Yes, sir, and what I got for my own stock.

Q. And is not your personal knowledge, except as to

what you got for your own stock? A. Oh, no. That is all; just what I got for my own stock.

CROSS-EXAMINATION, BY MR. H. S. PRIEST.

Mr. Scullin, with respect to the East St. Louis Connecting Railway, at the time you were connected with the Wiggins Ferry Company, as president, it had no track connection with any of the lines of railways of the Terminal Railroad Association, had it? A. I cannot answer that. I don't know.

Q. You don't recall any? A. I don't recall that they had.

Q. You said, I believe, in your examination in chief, in answer to Mr. Crow, that there was a connection through the stock yards? A. Yes, sir, we had a connection; but I don't know; it may have been over some other road. I cannot tell you just whether we owned that connection or not.

Q. The chief work of the Wiggins Ferry Company and the East St. Louis Connecting Railway, and the St. Louis Transfer Railway Company, was that of serving other common carriers? A. Yes, sir.

Q. That is, those common carriers that terminated in East St. Louis, with business in St. Louis? A. Yes, sir.

Q. Both on the incoming and outgoing business? A. Yes, sir.

Q. In carload lots? A. Yes, sir.

Q. Neither the East St. Louis Connecting Railway or the St. Louis Transfer Company, operated any trains of its own cars? A. No, sir.

Q. They simply provided the motive power for the cars that were furnished by the railroad lines with which they connected? A. Yes, sir.

Q. In other words, the business of those two companies was simply a switching business? A. Yes, sir, absolutely.

Q. Trains did not run upon any time schedule? A. No, sir; it was absolutely nothing but a switching business.

Q. Mr. Scullin, you have been intimately connected with railroads and the operation of railroads, for a great many years, have you not? A. Yes, sir.

Q. I want you to tell me whether or not, where two independent railroads connect, and cars are delivered by one to the other, it is not the usual custom and the general practice, to have a delivery track? A. Yes, sir.

Q. For the exchange of cars going from one to the other? A. Yes, sir.

Q. And the cars to be delivered by either to the other are placed upon the delivery track? A. Yes, sir.

Q. And there they await the convenience of the company to whom it is to be delivered to receive it? A. Yes, sir.

Q. And then it is received only after the car has been inspected and found to be in such condition as would warrant the company for which it is intended to receive it? A. Yes, sir, in good order, or if not it is turned back.

Q. Then the course would have been, if these switching lines were operated as it is usual to operate railroads, for the St. Louis Transfer Railway Company to deliver—assuming it had a point of connection with the Terminal Railroad Association lines—to deliver it upon a track called "a delivery track?" A. Yes, sir.

Q. And after the Company which it was expected would receive the car, had been notified that the car was there, delivered, for it, it would then await the convenience of that road to send inspectors to inspect the car; and then after it was inspected and found in good order to receive it and deliver it to the point of destination, or points of destination, on its line? A. Yes, sir.

Q. So if you would start with a car, and follow that usual custom and manner from, we will say, Granite City, on the east side of the Mississippi river, to a half dozen con-

necting carriers, how long would it take that car to come from Granite City to, we will say, a connection with the East St. Louis Transfer track in St. Louis? A. Well, that would be very difficult to answer that question. God knows when it would get there. It might get away. Perhaps they might have to send a tracer after it to hunt it up.

Q. These lines you see marked here upon this map (indicating Pitzman map) of East St. Louis and Venice and St. Louis and Granite City, are simply switch lines? A. Yes, sir.

Q. They are all what is commonly known as terminal or switching lines? A. Yes, sir.

Q. They do no general railroad business? A. No, sir.

Q. In the sense of offering cars for service, and handling trains? A. No, sir.

Q. It is simply a switching service? A. Yes, sir.

Q. In other words, they are common carriers of the railroads centering in East St. Louis and St. Louis? A. Yes, sir.

Q. These roads all being under one management, can in your judgment be much more conveniently and economically, as far as the service to the public is concerned, conducted, than if they were disconnected into a dozen different lines? A. That is absolutely correct.

Q. This switching company receiving a car—to use the illustration I have heretofore used—at Granite City, would take it over one or other of the bridges that would be the most convenient? A. Yes, sir.

Q. And deliver it direct to the point of destination in St. Louis, wherever that point of destination might be, whether the Merchants' Terminal Railway or the Terminal Railroad tracks, or on the St. Louis Transfer Railway tracks? A. Yes, sir.

Q. With one movement? A. Yes, sir, it would go right

through. That is one great advantage of controlling the whole property.

Q. Now I believe you said, Mr. Scullin, that you had seen passenger cars with "St. Louis Terminal Association" marked on them: You did not know whether they were owned by the Terminal Association or not? A. No, sir, I did not know.

Q. That is true, and to refresh your memory, only with respect to an accommodation train that serves the workmen in the car factories in Madison, is it not, that that is run morning and evening? A. Yes, sir, and I would like to say that is the only place I have ever seen the cars marked, standing on the side track over there.

Q. You never saw them in use? A. I never saw them in motion, or in use; I never happened to.

Q. Don't you understand, as a matter of fact, that that train is run only to accommodate the workmen who go over there early and return late? A. I don't know that. All I know is that I saw some cars standing on the side track over there with those letters on them.

Q. You never saw the train in motion? A. No, sir, I never saw them in motion.

Q. You have told us, Mr. Scullin, that the Wiggins Ferry Company owned a large amount of property on the river bank in East St. Louis? A. Yes, on what is known as the levee.

Q. That property is useful only for terminal property, is it not? Railroad property, and is very useful for that purpose? A. Yes, sir.

Q. It has not been developed yet to its capacity? A. No, sir.

Q. Terminal property of that character is very scarce in East St. Louis and in St. Louis? A. Yes, sir.

Q. Commercially you speak of East St. Louis and St. Louis as one town? A. Yes, sir.

Q. They happen to be divided by the Mississippi River, one being in the State of Illinois and the other in the State of Missouri? A. Yes, sir.

Q. But for all commercial purposes they are one common center? A. Yes, sir.

Q. There is no great amount of traffic between East St. Louis and St. Louis, that is, originating in St. Louis and going only to East St. Louis; or, originating in East St. Louis and going only to St. Louis? A. It is comparatively small.

Q. It is trifling and insignificant? A. Oh, yes.

Q. The great bulk of business done between St. Louis and East St. Louis is that brought from abroad, and which goes through one or other of those cities? A. Yes, sir.

Q. How wide is the river here between St. Louis and East St. Louis? A. I could not tell you.

Q. Approximately three-fourths of a mile, or a mile? A. Oh, no.

Mr. Crow: It is about twenty-five hundred feet.

A. I should suppose it is about that.

Mr. Priest: Q. Mr. Scullin, what is the general character of the west side of the bank of the Mississippi River? It is high, is it not, and inaccessible except at certain points, for railroad tracks? A. On this side that is true.

Q. The chief avenue is either around the city, as indicated by the Belt Line here (indicating Pitzman map) which has been projected, or up the Mill Creek Valley by the Union Station? A. Yes, sir.

Q. Either the southern point of Carondelet, or the Mill Creek Valley, or far north? A. Yes, sir.

Q. Coming to the west side of the river, and concerning the St. Louis Transfer Railway Company, it had no direct connection with any of the Terminal Railroad Association's tracks, had it? A. No, sir.

Q. As a matter of fact, it ran underneath the approaches to the bridge? A. Yes, sir.

Q. And there was no physical connection? A. No, sir.

Q. And looking at this map (indicating) there was no point of contact in common on the west side of the river? A. I think we had a bridge junction, or something. We had somewhere, so we could make deliveries, over some track, but I don't remember where. We had some way of making connection, on this side of the river.

Q. I am speaking of this side of the river? A. We connected with the Iron Mountain Railroad.

Q. But through the Terminal Railroad Association you had no connection? A. No, sir.

Q. And you reached no common points? A. No, sir.

Q. Isn't that also true of the system known as the Merchants' Bridge Terminal System, according to your recollection, that there were no points in common between that system and the Terminal Railroad Association? A. No, sir, no connection.

Q. They reached different parts of the city, the one running north directly east and west, and the other running northwardly along the river? A. I think we had a connection with the Merchants' Terminal.

Q. I am not asking you about the transfer; but about the Terminal Association simply as the Terminal, and the Merchants' Bridge simply as the Merchants' Bridge? A. That is right; as had none.

Q. With all those lines put together, under one management and control, would that in your judgment, be in the interest of economy and the public service? A. It certainly would.

Q. And you speak of that from long experience as a railroad man, and being familiar with traffic conditions? A. Yes, sir.

Q. Has not the growth of commerce and business in the

city of St. Louis in the past ten years made such a union as that almost imperative? A. Yes, sir, I think so.

Q. Mr. Scullin, the passenger traffic—I mean now persons traveling from St. Louis to East St. Louis, goes almost entirely upon the surface of the Eads Bridge, does it not? A. Yes, sir.

Q. Very little of that is carried by ferries or railroad trains—between those two cities alone, I mean? A. That is correct.

Q. Of course, there is a large volume of passenger travel across the Mississippi River between St. Louis and East St. Louis, that is destined to points beyond those two cities? A. Yes, sir.

REDIRECT EXAMINATION, BY MR. E. C. CROW.

Q. Your company, I believe you said, filed tariffs with the Inter-State Commerce Commission, giving the rates per hundred pounds on freight, etc., between the cities of Illinois and Missouri? A. Yes, sir.

Q. Over the lines of railroad and ferries? A. Yes, sir.

Q. And the lines of railroads that you used, the St. Louis Transfer Co. on the west side, the East St. Louis Connecting Railroad on the east side, and the connections therewith, were used in connection with the ferry boats, as one continuous line? A. Yes, sir.

Q. Over which you transported goods, and for which you made a common charge? A. Yes, sir.

Q. That was fixed by the tariff you filed with the Inter-State Commerce Commission? A. Yes, sir.

Q. You stated, as I understand you, Mr. Scullin, that the local traffic here was slight, between St. Louis and East St. Louis? A. That is, passenger traffic. On the Wiggins Ferry Company.

Q. But there is a large passenger traffic, is there not? A. Quite large.

Q. And before the electric road was put upon the bridge, did not your ferries carry a great many people? A. No, sir, they never carried very many. They carried people whose employment brought them down on the levee. That was about all.

Q. There was a considerable amount of that in the old days? A. Yes, sir, quite a lot, night and morning; we carried quite a bunch of passengers; but slight in comparison with the entire volume.

Q. Your service was superseded by the electric cars, because they were more speedy? A. I don't think the electric cars interfered with us very much.

Q. It is true, is it not, that there is quite a commerce that is carried on by wagons over and across your ferries and other ferries, at St. Louis and East St. Louis? A. Yes, sir.

Q. That is largely local, is it not? A. It is in consequence of all the railroads terminating on the other side of the river. It makes the total large. There are a great many wagons, and transfer teams, and private people, transporting goods over the river.

Q. And that volume is and has been constantly increasing? A. Yes, sir, enormously.

Q. Is it not true that the three corporations, the Wiggins Ferry Company, the Merchants' Bridge Terminal Railway, and the Terminal Railroad Association of St. Louis, together with their subsidiary corporations and the lines leased, operated or controlled by them, have practically all of the facilities for handling the commerce between the States of Illinois and Missouri, at St. Louis, Missouri and East St. Louis, Illinois? A. Yes, sir.

Q. And, of course, by virtue of the control of these facilities, they control that business? A. Yes, sir.

Q. You stated, in answer to a question of Judge Priest's, as I remember, that all of the lines marked on that map (in-

dicating Pitzman map) on either side of the river, in connection with these corporations, were practically switch lines? A. Yes, sir.

Q. Is that true of the Belt Line Railway, that runs around East St. Louis? A. That is a switching road, too.

Q. That is a switching road? A. Yes, sir.

Q. They all file their tariffs with the Inter-State Commerce Commission, do they not? A. I suppose they do.

Q. And the reason they do that is, that they transport commerce between these two States? A. Yes, sir.

Q. The East Line roads, that terminate on the east bank of the Mississippi River, and the western lines, that stop at St. Louis, Missouri, neither of them convey passengers or freight across the river, do they, so far as you know? A. Not that I know of.

Q. And they never have? A. No, sir—I beg your pardon, I do not think I understood your question. Please repeat it.

Q. The roads that terminate on the east side of the river, and the roads that stop at St. Louis, none of them transport passengers and freight across the river—themselves? A. No, sir, only through the medium of the transfer companies.

Q. And if a car comes, say from Denver, destined, via St. Louis, for Indianapolis or Chicago, when it arrives at St. Louis it leaves the rails of the western carrier, and passes over the lines of the Terminal Railroad Association? A. Yes, sir.

Q. Or some connecting carrier? A. Yes, sir.

Q. To the railroad east? A. Yes, sir.

RECROSS-EXAMINATION, BY MR. PRIEST.

Q. I omitted to ask you about the form of bill of lading issued by the Wiggins Ferry Company while you were with

it: You said it issued a bill of lading. Wasn't it commonly called a dray ticket? A. Yes, a dray ticket.

Q. And it was not a bill of lading? A. No, sir. Dray ticket would be the proper name and not bill of lading.

Q. That simply indicated the character of the goods received, and the carrier to whom you were to deliver it? A. Yes, sir.

Q. And it did not assume to carry it through to its ultimate destination? A. No, sir.

Q. You did not issue a bill of lading, but what is commonly called and is known as a dray ticket? A. Yes, sir, that is what it was, a dray ticket.

At this point by consent, recess was taken until half-past two o'clock.

After recess, at 2:30 o'clock, p. m., the following proceedings were had:

S. D. WEBSTER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your full name? A. S. D. Webster.

Q. What is your occupation, Mr. Webster? A. Railroad freight claim agent.

Q. What railroad are you with? A. The Terminal Railroad Association of St. Louis.

Q. How long have you been with that Association? A. Since 1889.

Q. When was that? A. In 1889.

Q. Have you occupied that same position all the time? A. Yes, sir.

Q. What are your duties; just state in substance what your duties are? A. My duties are the adjustment of

claims for over-charge, loss and damage of freight, which are presented against the company.

Q. Is that all of the duties that you perform? A. Yes, sir.

Q. Is that all that you ever have performed? A. No, sir.

Q. What other duties in connection with this Association have you performed? A. I have been secretary to the president for a part of that period.

Q. What were your duties, in a general way, as secretary? A. My duties were the same as any other secretary of officials—to attend to his official correspondence.

Q. Anything else than that? A. No, sir; not that I recall.

Q. Now, Mr. Webster, in 1892 you were connected with this Terminal Association? A. In the same capacity; yes, sir.

Q. Did you know Mr. W. S. Hodges, who was then with the Wiggins Ferry Company, as general freight agent? A. W. S. Hodges—I think those were his initials. Yes, sir; I knew a Mr. Hodges.

Q. Do you know where he now is? A. I do not know.

Q. Were you pretty well acquainted with him? A. I was acquainted with him officially, in a business way.

Q. That is what I mean. You met him every day for several years, did you not, or nearly every day? A. Yes, sir. I had known him before. He was general freight agent of the Wiggins Ferry Company, I think, and before that he was agent for some railroad, to the best of my recollection.

Q. You know Mr. H. W. Gays, do you? A. Yes, sir.

Q. What road was he with? A. He was with the Indianapolis & St. Louis, and afterwards with the Merchants' Bridge, and with the Wiggins Ferry later.

Q. Was he with the Bridge or the Terminal Company? A. With the Merchants' Bridge Terminal Railway.

Q. In what capacity? A. I think he was general freight agent or manager, or something of that sort.

Q. Did you know, and do you know, Mr. John J. Baulch? A. Quite well, sir.

Q. What company was he with, if any, in 1901 and 1902? A. I am not sure. I think he was agent of the Terminal Railway—general freight agent.

Q. Was he ever with the Wiggins Company? A. He was.

Q. Subsequent to that? A. After Mr. Hodges' time, I think he was general freight agent of the Wiggins Company.

Q. Where is he now? A. He is with the Manufacturers' or Merchants' Railway—I don't know which it is.

Q. With the Busch Railway? A. The Anheuser-Busch Railway.

Q. You knew Mr. Taussig, didn't you? A. William Taussig? Yes, sir.

Q. And you knew Mr. John Scullin? A. Yes, sir.

Q. And, in his lifetime you knew Mr. C. C. Rainwater? A. Yes, sir.

Q. Do you know, of your own knowledge, as to whether or not these three gentlemen, in 1891 or 1892, had a meeting with a view to adjusting and fixing freight rates between the three companies that they represented? A. I cannot say that I do.

Q. You have no personal knowledge on that subject? A. I do not remember.

Q. Have you any knowledge as to the condition of freight rates in 1891 and 1892, as to whether or not they were uniform for the haul from East St. Louis, Illinois, to St. Louis, Missouri, for the Merchants' Bridge Terminal Railway Company, the Wiggins Ferry Company, and the

Terminal Railroad Association of St. Louis? A. I cannot answer as to that specific period. But, as a rule, since 1877, the rates have been the same by all means of transfer across the river.

Q. Have you been connected with this transfer business —this business between these two states, since 1877? A. Yes, sir.

Q. Do you remember the traffic arrangement that was made in 1892 for the maintenance of rates between these three corporations, in which you were named as what is called a "Commissioner of the pool," tonnage pool? A. I don't remember any date.

Q. Well, that was about the time. We need not be specific about the date. A. In 1877, when the St. Louis Bridge was in the hands of the court in bankruptcy, there was an agreement entered into, subject to the approval of the Judge of the Circuit Court for the Eastern District of Missouri, which provided for a pooling of the net cash earnings—net cash receipts, of these companies.

Q. What companies? A. The Wiggins Ferry Company and the Bridge Company's receivers. As no question was ever raised about it, I supposed that the Court approved it, and that the arrangement was continued during the time of the receivership with the sanction of the Court.

Mr. Watts: Q. You have referred to bankruptcy proceedings. I will ask if you do not mean receivership?

A. Receivership, yes, sir.

Mr. Crow: Q. Is that the only pooling arrangement that you have any recollection of? A. I was auditor, or commissioner, subsequent to that, while under the new arrangement. I don't know when it was made.

Q. What do you call the new arrangement? A. When the Bridge Company took its own property, and was reorganized, there was another arrangement somewhat similar to the first one.

Q. That was between the Wiggins Ferry Company and the old Bridge Company? A. The old Bridge Company, —yes, sir.

Q. Are those the only pooling arrangements that you know anything about, in connection with this interstate transfer? A. No, I cannot say that, because there was another one made with the Madison County Ferry Company.

Q. When was that made? A. I cannot give you any dates. I do not remember.

Q. Well, the Madison County Ferry Company was simply taken into the arrangement between the Bridge Company and the Wiggins Ferry Company, was it? A. Yes, sir. I think ultimately the Madison County Ferry was bought out by the Wiggins Ferry Company.

Q. Are there any other pooling arrangements of that kind? A. The general arrangement was continued, more or less—I do not know up to what date.

Q. To refresh your mind a little, I will ask you if you did not act as Commissioner of a pool that was made in November, 1891, known as a "tonnage pool," between the Merchants' Terminal Railway Company, the St. Louis Terminal Railroad Association, and the Wiggins Ferry Company? A. I think probably I did. I don't know when the arrangement terminated, and so I cannot say. But I think it continued sometime after 1890, probably four or five years.

Q. It ran on for several years, didn't it? A. Yes, sir.

Q. That arrangement was the result of a memorandum agreement made between the presidents of those three companies, wasn't it? A. I am not able to say.

Q. Well, do you know whether or not the presidents of the three companies, Mr. Scullin, Mr. Taussig, and Mr. Rainwater, did have a meeting, and arrange—. A. (Inter-

rupting) If I answer at all, it would be to say that I presume they did.

Q. Do you know of your own personal knowledge? I simply ask of your personal knowledge.

Mr. Priest: What does the witness say?

Mr. Crow: He says he has no personal knowledge. I said that I did not care for what he had heard.

Q. Do you know as to whether or not after the Merchants' Terminal Railway Company was opened in 1890, the rates for the transfer of coal across the river, and other commodities, were cut by the Merchants' Terminal Railway Company? A. I do not.

Q. You don't have any recollection of that? A. No, sir.

Q. Well, to be specific, I will ask you if you know whether or not they reduced the tariff on coal, flour, rice, sugar, canned goods, and the heavier grocery supplies from one-half a cent to a cent on the hundred pounds, after the opening of the bridge, in 1890? A. I cannot say that I recall.

Q. What is that? A. I cannot recall whether they did or not. I know that they made some difference between the rates that existed in their published tariff, but I do not know what their tariff called for.

Q. The rates in what? A. In their published tariffs, and those that the other companies published. But I do not know what they were, specifically.

Q. You are familiar with the tariff sheets filed by those companies here with the Interstate Commerce Commission, aren't you? A. Yes, sir.

Q. I hand you certified copies of tariff sheets of the Merchants' Bridge Terminal Railway Company, of the years 1890, 1891, 1892 and 1893, certified to by the Secretary of the Interstate Commerce Commission, giving freight rates on coal, heavy groceries and other commodities, be-

tween St. Louis, Missouri, and East St. Louis, Illinois, and vice versa.

The Commissioner: If you are going to offer this in evidence, it should be described by some exhibit number.

Mr. Crow: I can keep it a little more connected by not offering it now.

The Commissioner: But while you are talking about it, you should show to what exhibit you refer.

The Witness: It could be called "Schedule of Rates Nos. 1 to 29, both inclusive."

The Commissioner: Let it be designated in that way.

Mr. Crow: Q. Now, Mr. Webster, please turn there to the first sheet that has the tariff on coal. What is the date of that? A. (Reading from paper). July 10, 1890.

Q. What does that purport to be—a tariff from where to where? A. (Reading) It says, "Pending the completion of the Terminal tracks of St. Louis, and the issuing of regular freight tariffs, the agents of the St. Louis Merchants' Bridge Terminal Railway will be governed by the following special on the commodity named, in car lots only, from east side railroad tracks to west side railroad tracks, or St. Louis. Article, Coal. Rate, one and one-half cents per hundred pounds, with minimum of $4.50 per car. Signed, H. W. Gays, General Manager."

Q. That is the Merchants' Bridge Terminal Railway Company, is it? A. Yes, sir.

Mr. Priest: Q. You had no part in making this schedule? A. None whatever.

Mr. Priest: Q. It is not a part of your work at all? A. Not at all. I am only saying what it purports to be.

Mr. Crow: He is a railroad man, and is familiar with them.

Q. Who fixes these rates of this kind? What official?

A. The General Freight Agent, or the manager of the company that issues the notice of the rate.

Q. I hand you now Schedule of Rates, Nos. 1 to 5 inclusive, of the Interstate Commerce Commission, being tariff sheets of the Terminal Railroad Association of St. Louis, and ask you to look at the one marked "Freight Tariff No. 15," and state, if you can from that, what the rate of coal was from St. Louis to East St. Louis at that time?

Mr. Priest: Q. Did you have any part in the preparation of that tariff sheet, or the paper which is in your hand? A. I possibly did, but I cannot say that I did.

Mr. Priest: Q. All that you recall about it is what appears on the face of the paper? A. Yes, sir. My name is not connected with it; but, connected as I was with the Terminal Railroad Association, I was very frequently consulted as to what the rate should be.

Mr. Priest: All those things that are properly certified by the Interstate Commerce Commission as schedules on file, we will admit without further identification.

Mr. Crow: I do not want to put them into the record at this time. I have a lot of others, and I want to put them all in at once.

Q. Do you know who was freight agent in 1891? A. There was no General Freight Agent at that time. Mr. Baulch was commercial agent.

Q. Who made the rates at that time? A. Mr. Baulch representing the Terminal Association, in connection with Mr. Taussig.

Q. Do you know what the rate on coal was at that time? A. Yes, sir.

Q. What was it? A. A cent and a half a hundred pounds, minimum 30,000 pounds.

Q. A cent and a half per hundred pounds? A. Yes; that is, thirty cents a ton.

Q. That is for a haul from where to where? A. That tariff will designate where it is from, I think.

Q. Yes, it does. A. (Reading from schedule): It says, "From railroads named above (that is, all the lines on the east side of the river) to Carondelet, and all industrial and intermediate points on the St. Louis, Iron Mountain & Southern to Oak Hill and Carondelet Railroads, to Cheltenham and all industrial and intermediate points on the Missouri Pacific and the St. Louis & San Francisco Railways, and all points on the Wabash Railroad (Union Depot line) east of Forest Park."

Mr. Priest: Q. These were all within the switching limits? A. These were within the agreed switching limits, on which the Terminal Railroad paid for the switching to the roads on which switching was necessary. And the rates paid those railroads for switching came out of the thirty cents per ton.

Mr. Crow: Q. That was true at that time, was it? A. It has been true up to within a few months past, continuously.

Q. It is not true now? A. I believe not.

Q. That was of date, 1891, about September 28th, wasn't it? A. That was September 28th.

Q. Now I hand you this St. Louis Merchants' Bridge Terminal sheet, as part of the exhibit heretofore designated by you as Schedule 1 to 29, being the 29th schedule—and ask you if you can state what the date of that is, and what the rate of coal there is. A. That is in effect November 4th, and the other was September 28th.

Q. Yes? A. This was a new tariff in effect at that time.

Q. It is a Merchants' Bridge Terminal Railway tariff? A. This made the rate on coal; Illinois coal, one and a half cent; Indiana coal, one and one-fourth cent.

Mr. Priest: Q. Now you make that statement from— A. (Interrupting): That is what the tariff says. I am stating what it says.

Mr. Crow: Q. What was the date of that? A. November 4th, 1891.

Q. And what is the one and one-fourth cent? A. One and a half cent; but the terms are different from the other tariff.

Q. Wherein is the difference? A. The other tariff provides—

Mr. Priest: Q. (Interrupting) What other tariff do you refer to? A. The tariff of the Terminal Railroad Association, dated No. 15, of September 28th, 1891.

Q. You mean it is a different service? A. Yes, sir, a different service.

Q. What is the difference in the service? A. The Terminal Railroad service at one and a half cent, thirty cents a ton, with a minimum of $4.50, provided for a delivery on the roads of other railroads, within certain limits, for which the Terminal Railroad, out of its one and a half cents per hundred pounds, would have to pay the switching. This tariff provides for one and a quarter cents—

Mr. Priest: Q. (Interrupting) Which tariff? A. The tariff of the Merchants' Bridge provides a cent and a quarter on Indiana coal and Illinois coal handled between the following railways terminating on the east side, and the following railways terminating on the west side—and those are the five roads that were then on the west side which it had connection with. But it says here, the foregoing rates apply to the connecting tracks of the railways named. The company will not absorb or pay any portion of the switching charges beyond. So practically this tariff was a quarter of a cent higher than that tariff, because most of that coal was carried at half a cent per hundred pounds.

Q. How do you figure that it was a quarter of a cent higher? A. Out of the cent and a half the Terminal Railroad paid half a cent out for switching, so that the Terminal Company got one cent per hundred pounds. On this

tariff they make a cent and a quarter delivered to the railroad, and leave the other man to pay the switching; and therefore they have this quarter of a cent more net per hundred pounds than the Terminal.

Q. That only applies to points off those four or five railroads. To points on those four railroads the service rendered for a cent and a quarter was the same as the service rendered by the other company? A. For a cent and a half, —yes, sir.

Q. And the only reason that the service was different in the case of the Merchants' Terminal was that at that time they did not extend to as many roads' points of connection as the Terminal Railroad Association did? A. No, sir, that is not correct. They say they will not pay the switching to roads that they do connect with.

Q. You said awhile ago that they did pay? A. I said the Terminal paid. This tariff (referring to Merchants' Bridge tariff) says they will not pay.

Q. That says points beyond. A. It says they will pay to the connection—to and from the connecting track of the railways named.

Q. Now did the Terminal Railroad Association pay for switching charges beyond the Wabash tracks with which it then connected? A. "From railroads named above to Carondelet"—that means, coming down the Iron Mountain— "and all industrial and intermediate points"—that means from Twelfth street clear through to Carondelet; to Cheltenham, which is twelve miles out on the Missouri Pacific and San Francisco, and all industrial and intermediate points on the Union Depot line east of Forest Park.

Q. Then you want to be understood as saying that there was no competition there that would interfere with the Terminal Railroad Association in that kind of service, at that time, if those were the charges, assuming that they were? A. I don't see how there could be any competition.

They did not connect with the railroads that the Terminal connected with.

Q. That was in 1891, wasn't it? A. Yes, sir.

Q. We will assume, for the purpose of the testimony, that that is correct. I don't suppose there will be any controversy about that.

Now, if that be true, then there would be no reason for any complaint by reason of that kind of competition on the part of either the Terminal Railroad Association, or the Wiggins Ferry Company? Is that right? A. I am not prepared to say.

Q. I say "that kind of competition." Just take those two services. A. I should say that the Terminal Railroad Association was delivering this coal for less money than the other fellow was.

Q. There would be no complaint, then, to make? A. It would certainly seem so.

Q. I hand you a letter which I believe is addressed to you. It is a copy of a letter purporting to be from Mr. Joseph Ramsey, Jr., to Mr. S. D. Webster, dated June 22, 1893, concerning railway matters in St. Louis. Examine it, and see if it is a copy of letter sent to you at the time named. (Handing witness letter). Do you recognize that as a letter which you received? A. (After examining letter referred to). I do not recall it definitely.

Mr. Priest: This does not purport to be an original. It purports to be a copy.

Mr. Crow: Q. Maybe I can refresh your memory. Do you remember that on the 4th day of November, 1891, there became operative an agreement between the St. Louis Merchants' Bridge Terminal Railway Company, the Terminal Railroad Association of St. Louis, and the Wiggins Ferry Company, under the terms and conditions of which you became the commissioner to determine and adjust the tonnage, and apportion the amount of the joint earnings to

each of the three companies named, on a designated basis that had theretofore been agreed upon as the proportionate share each should receive from the total earnings? A. I do not remember as to the date. I know there was some arrangement by which reports were made to me and upon which I passed, in the manner you indicate.

Q. That was prior to the date of that letter, 1893—because that letter seems to have been the year of the flood, wasn't it? A. Yes, sir.

Q. You remember that that was the year of the flood, don't you? A. No, sir; I don't remember. This refers to a flood in 1892.

Q. Maybe it was 1892? A. And the date is June 22, 1893.

Q. Was the flood the year before, 1892? A. There is always a flood in May or June, known as the June flood, or June rise. I cannot say from my memory. I should say from reading this that there had been a flood in May and June, 1892. It would have to depend entirely on this. Without this I could not have said a thing about it.

Q. Would you recognize the terms of the arrangement, if you should see a copy of it? A. I possibly would. My recollection as to the terms is that they were changed from time to time, by agreement.

Q. I will hand you what purports to be a Memorandum of Agreement between the Terminal Railroad Association of St. Louis, the Wiggins Ferry Company, and the Merchants' Bridge Terminal Railway Company, unsigned, made in 1891.

Mr. Priest: It is not claimed that this memorandum which you handed the witness was made by the witness, is it?

Mr. Crow: Oh no.

Mr. Priest: Or that it is the original memorandum?

Mr. Crow: I asked him awhile ago if he would know

those conditions if he saw them. I am not going to try to get him to say that he made them, because he did not make them. I thought perhaps he had seen those conditions.

Mr. Priest: I think you have mis-described this paper. You said "Merchants' Bridge Terminal Railway Company" was a party to it. That is not mentioned.

Mr. Crow: We have another, of a later date, with them all in it.

Mr. Priest: I only want to get this accurate.

Mr. Crow: Q. Look at this, Mr. Webster (handing witness paper referred to), and see if you ever saw the original or a copy of these conditions—the memorandum of agreement? A. I am not prepared to say whether I ever saw such an agreement or not. I would have to see the agreement to make sure. This is a mere memorandum, without head or tail, and merely purports to recite certain parts of the agreement.

Q. It purports to be a memorandum of an agreement, which was unsigned, and never was signed? A. It says here the memorandum was signed by the Terminal Railroad Association by W. T., President, and the Wiggins Ferry Company by J. S., President, August 4, 1894. And there is a memorandum following not signed, at all.

Q. The memorandum that follows shows that it never was signed, don't it?

Mr. Priest: The paper seems to be contradictory, then.

Mr. Crow: Yes, it is contradictory. They intended to sign it, but they never did.

Mr. Priest: He says it was signed.

Mr. Crow: This is only a copy of the original agreement, made at Union Station.

Mr. Priest: This says it was signed.

Mr. Crow: They put that on there themselves. We will not dispute it.

Q. You don't recollect seeing it? A. No, sir.

Q. You could not identify it, under these circumstances? A. No, sir.

Q. But there was an agreement along those lines? A. Yes, I suppose there was. I don't remember what the agreements were from time to time. As I stated before, there was some arrangement, and the tonnage was reported to me.

Q. And after the tonnage was reported to you, what were your duties? A. I compiled it, and furnished statements.

Q. To whom did you furnish these statements? A. I do not remember the individuals.

Q. Oh, no; I don't mean individuals. A. To the proper officials of the various parties?

Q. At this time, beginning in 1891, that referred to what company, the Wiggins Ferry Company? A. I should say the Terminal Railroad Association, and the Wiggins Ferry Company.

Q. Anybody else? A. I do not recall it at this moment. I don't know when the arrangement was made with the Merchants' Bridge Terminal Railway. There was such an arrangement.

Q. When it was made, the same statement was furnished them? A. The same practice would apply.

Q. What did this statement contain? A. To the best of my recollection, the number of cars, the earnings from the cars—

Q. (Interrupting): The gross earnings? A. The gross earnings. And the percentages.

Q. What do you mean by "percentages"? A. If one company had earned, say $75,000, and another $25,000, out of the $100,000 one would have earned 25 per cent and the other 75 per cent.

Q. All the net earnings would have been divided on that

basis? A. No net earnings about it. Those were gross earnings. The pool I spoke of in 1877, which was approved by the United States Court, was a pool of net receipts, after paying all expenses.

Q. This pool was a tonnage pool, wasn't it? A. Yes, sir.

Q. Tell us how the division was made on the tonnage pool? A. It is not proper to say it was a tonnage pool. It was a pool of earnings, gross earnings—but the tonnage was reported.

Q. Isn't it what is commonly known as a tonnage pool? A. No, sir.

Q. It is not? A. Not to the best of my belief.

Q. Tell us how it was operated, and how each company got its proportionate share? A. As I said, there was a statement made showing the number of cars.

Q. In the first place, didn't you have a basis to go on, as to what per cent each company should receive? A. That goes as to a division. You don't have to have any statement as to what each is to receive, when it is only reporting what traffic it handles. The two are not the same.

Q. Well, go ahead with your explanation. A. There was a report sent to me by the different companies daily of their business, showing the number of cars and the earnings from the traffic. That was tabulated at the end of the month for each company, showing the total number of cars for that month, the earnings for that month, and the joint earnings. Then a percentage statement was made, showing what percentage each had earned of that business. It varied, of course—it would not run evenly—that is, to the best of my recollection. Then by one of the agreements you understand there were several arrangements, not made by me, and I cannot be clear as to all of them—by one, at least, of them it was arranged that when the statement was made there was to be an adjustment by which the company receiving an excess, doing business in excess of a

certain percentage, a certain amount, was to pay to the other company that excess. That was changed from time to time as the earnings fluctuated, so there is nothing definite. It is practically an agreement to maintain rates. That is all it amounted to.

Q. And that is all that it was, in practical effect? A. Yes, and it was a very desirable thing to have.

Q. And that is the arrangement that you acted as commissioner for? A. Yes, sir.

Q. I believe that is the title that you had, in railroad parlance? A. Yes, sir.

Q. I hand you a paper and ask you to examine it (handing witness copy of statement).

Mr. Priest: These appear to be copies and not originals.

Mr. Crow: No, I have not the originals in my possession. These are copies that came through the office of the Interstate Commerce Commission. I am simply using these here because he did this business himself, and made these reports, and I want to refresh his mind about them.

Mr. Priest: Please describe the paper so that the witness can identify it, and set at rest all controversy regarding the identity of it.

Mr. Crow: They are copies from the office of the Interstate Commerce Commission.

Mr. Priest: If you had it certified by the Interstate Commerce Commission, there would be no question. A comparison with the records will show their accuracy.

Mr. Crow: Q. Is that the form of statement that you would make when you were acting for the Company? A. As near as I can recall it is. Whether I made the statement or not, I do not know.

Q. I was not asking you that. I was asking whether that was the form of the statement? A. It is.

Q. Now here are two more statements, that I want to call your attention to.

Mr. Priest: I see they have here in the right-hand corner of all these papers, in red ink "W. A. D. E. H. B. 17-1/2."

Mr. Crow: They are marks of the Interstate Commerce Commission. They are not my marks.

The Commissioner: I want to call your attention to the fact that the witness' testimony is absolutely unintelligible, because the Court does not know what paper he holds in his hand when he testifies. You say "this," but there is nothing to show what "this" refers to.

Mr. Priest: I have been trying to insist upon that. The papers are not offered in evidence. If they were offered in evidence, it would be all right.

Mr. Crow: I hand you two papers, marked "Exhibits E & G," being in type-writing, with numbers in the right-hand corner of Exhibit G, 19, and the right-hand corner of Exhibit E, 17-1/2, in red ink; and ask you to look at the letter again that I called your attention to awhile ago, directed to S. D. Webster, of June 22nd, 1893, and signed by Joseph Ramsay, Jr., and tell me whether or not you now have any recollection of that transaction, and if so, what it related to?

Mr. Priest: Of course, it is perfectly obvious that these papers are not in evidence, and cannot be put in evidence for any purpose whatever. They cannot be offered to the witness for the purpose of refreshing his memory. They do not fall within the classification of those papers which are entitled to be submitted to the witness to refresh his memory. They are not originals, and do not purport to be originals. They do not purport to be certified copies. It does not appear from what source they came. But we are not objecting to them. As I said to the gentlemen just now, if you get papers from the Interstate Commerce Commission, duly certified, we are willing to accept them, and

let them go in evidence. But I submit there ought to be some way of getting these things in right.

The Witness: I have no recollection of it, apart from what would be suggested by the copy of the letter itself. As a transaction, I recall nothing of it whatever.

Mr. Crow: Q. I will ask you if you have any recollection of having made any report, such as Exhibits E and G, marked as indicated in the last question? A. Assuming that letter to have been written to me, I would say that I have no more recollection of it than I have what I paid for my dinner on the 15th of May, 1892.

Q. Have you possession of these records of this class? A. I am not able to say. I had some, but I think they were destroyed. There was no occasion for retaining them.

Q. I hand you now a paper marked "Statement of Joint Earnings, August, 1892," in writing, pen and ink, words and figures, and ask you if you ever saw that?

Mr. Priest: Is that the way you are going to identify it?

Mr. Crow: That is all the identification there is to it. Look at it, and see.

Mr. Priest: I understand you offer that paper in evidence?

Mr. Crow: No, sir. I am showing it to him, and asking him if he ever saw it.

Mr. Priest: Let us get something in evidence.

Mr. Crow: We are getting something in.

The Witness: My name is not signed to it, but it appears to be in my handwriting.

Q. What is it? What does it purport to be? A. Statement of joint earnings, August, 1892.

Q. Joint earnings of what? A. It does not say what.

Q. Do you know what? A. I do, from the general details.

Q. What is it? A. Earnings of the St. Louis Bridge,

the Wiggins Ferry, the amount of them together, of the Merchants' Bridge, and the total.

Q. Why did you make that, and what was the object of it? A. Probably in accordance with what I have testified to, that it was made part of my business at that time to make up such statements from the daily reports sent me.

Q. For what purpose? A. To be furnished the companies in interest.

Q. In accordance with the agreement for the maintenance of rates and division on the basis agreed on? A. Presumably.

Mr. Crow: Now, I offer that sheet in evidence, and mark it "Complainant's Exhibit No. 24."

The paper referred to is so marked.

Mr. Crow: Q. I hand you another statement. What is that, Mr. Webster? A. It is a similar statement for March, 1892. "Statement of joint earnings, March, 1892."

Q. Is that signed by anybody? A. That was signed by myself.

Q. And it was made for the same purpose as the other one? A. Without question, to my mind.

Q. And under the same arrangements? A. Yes, sir.

Mr. Crow: We offer that paper in evidence, and ask that it be marked "Complainant's Exhibit No. 25."

The paper referred to is so marked.

Q. How long did this arrangement continue? A. I am not able to say, as I stated before. There were several different arrangements, and they were finally terminated. I don't know when—so far as I am concerned, they may be continued yet—but I have some doubts about it.

Q. Do you know about what year you ceased to be commissioner to adjust matters for the company, under this arrangement? A. I cannot tell—no, sir.

Q. Can't you approximate it? A. No, sir. It ran along for so long that it got to be second nature, and after

it was dropped, it was dropped. I should think, though, quite a while before 1900.

Q. Before 1900. Now, do you know whether or not there was any arrangement from the year 1900 on? A. I do not.

Q. Do you know, in a general way, what the freight rates were as to whether they were the same? A. So far as the published rates are concerned, they have been practically the same from—well, you might say, since the pool approved by the United States Circuit Court.

Q. Don't you know that for awhile there after the Merchants' Bridge was opened, that there was a cut in the rates? A. I think their published rates were about the same, but they made some special rates which were not published. I think that is the way the thing stood.

Q. Well, of course, the tariff sheets on file with the Interstate Commerce Commission show very clearly what those rates were, and I would not ask you to tax your memory all those years about that. A. I could not do it. Could not begin to.

Q. From 1900, about that time, on, you don't know anything about whether there has been any agreement or understanding? You have not had anything to do with the tariff business at all? A. I know that in substance the tariffs have been the same. And, as I stated before, I think it is very desirable they should be.

Q. Now, after 1893, weren't the tracks of the Merchants' Bridge Terminal Railway Company connected up with the Terminal Railroad Association tracks—or do you have any knowledge about those things? A. I would have to ascertain. I know that after the elevated road, as they call it—the L, the high line—was built—

Q. (Interrupting): Down on the levee? A. Yes. They connected it by an approach above over the Missouri Pacific and St. Louis & San Francisco roads.

Q. That is out of your department, however, isn't it? A. It is out of my depar'ment. It was in furtherance of a very desirable extension of the business, however.

JOHN J. BAULCH, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence, and occupation? A. John J. Baulch; residence, No. 3900 Cleveland Avenue, St. Louis, Mo.; Superintendent of the Manufacturers' Railway.

Q. How long have you been in the railroad business, Mr. Baulch? A. Since 1872.

Q. Thirty-four years? A. Yes, sir.

Q. How much of that time has been spent in the city of Louis? A. Since I came to St. Louis, in 1873.

Q. Did you go into the employ of a railroad company then? A. The old Kansas City & Northern road.

Q. In what capacity? A. Ticket agent at Biddle street.

Q. What road were you next employed with, and when? A. I went from there to the Cairo & St. Louis Railroad at Murphysboro, for a year and a half, with Mr. Hinckley, who had been Assistant Superintendent of the old Kansas City & Northern road.

Q. What road did you go with from there? A. To the Union Depot.

Q. St. Louis? A. St. Louis.

Q. In what capacity? A. As cashier of the Kansas City & Northern Railroad, who ran a station at that time in that depot.

Q. And how long did you stay there? A. From January 4, 1877, to January 4, 1894.

Q. 1894? A. Yes; seventeen years.

Q. With the Terminal Railroad Association? A. It was not known as that then. It was known as the St. Louis Bridge Company. I was with them all through the different changes, and do not carry the different changes of name in my mind.

Q. Were you ever with the Wiggins Ferry? A. From 1894 to somewhere about 1903, I think.

Q. The time of the sale, in 1902? A. Well, I had left the Wiggins Ferry and gone to the Interstate in the interim, and then back to the Wiggins again from the Interstate.

Q. What various positions did you occupy with what is now called the Terminal Railroad Association? A. I was cashier, and chief clerk, and assistant agent, and agent, and commercial agent.

Q. As commercial agent, what were your duties? A. To solicit traffic, and look after the movement of it.

Q. Did you have anything to do with the fixing of tariffs? A. I published the tariffs.

Q. In what capacity were you with the Wiggins Ferry Company? A. General Freight Agent.

Q. Same capacity that you had been with the Terminal? A. Practically; different title.

Q. Do you remember the opening of the St. Louis bridge for business? A. Yes, sir.

Q. Do you remember about what year it was in? A. No, I do not, really.

Q. Do you have any recollection as to whether or not the opening of that bridge and Terminal Railway, witnessed a cutting of the rate for freight business between East St. Louis, Illinois, and St. Louis, Missouri? A. As I remember, their tariffs were published about along the same line as those that were already established by both the Wiggins Ferry Company and the Eads Bridge.

Q. Did they maintain those terms? A. As far as I know, they did.

Q. They did. I will ask you if you have any recollection, in 1891, of attending a meeting down near Jefferson and Park Avenues, in this city, at which meeting there was Mr. John Scullin, President of the Wiggins Ferry Company; Mr. Taussig, President of the Terminal Railroad Association; and Mr. Rainwater, President of the Merchants' Terminal Bridge Railway; Mr. W. S. Hodges, General Freight Agent of the Wiggins Ferry Company; Mr. H. W. Gays, who occupied a similar position to Mr. Hodges with the Merchants' Bridge Terminal Railway; and yourself, occupying the position of General Freight Agent of the Terminal Railroad Association of St. Louis? A. I have a dim recollection that we had a meeting down there, but that is all.

Q. Do you know what the object of it was? A. As far as I can recall, the object of that meeting was to maintain the rates across the river at this point.

Q. At a uniform charge from all three companies? A. It was figured that the rates as quoted were only fairly remunerative to the companies, and it would be to the interest of all concerned to maintain them.

Q. There had been some complaint on the part of Mr. Scullin's line, hadn't there? A. Well, I guess there was a complaint from each one of them against the other, all the time, practically.

Q. Were there any subsequent meetings held to carry out the arrangements that were made there that night? A. I do not recall.

Q. Do you recollect a meeting that was held along in October, 1891, at the old Union Station, at which these three presidents were present, and you three general freight agents were outside, and you waited for them until they got through? A. No, I don't remember that particular case.

Q. Do you remember an unsigned memorandum of an agreement that was made on that occasion, with reference to the transfer of freight and the division of the business? A. No, sir.

Q. You don't have any recollection of that? A. I have no recollection of anything of that kind.

Q. You would not say that it was not made? A. It don't sound as though it was a logical proposition. That is all. I don't think it was ever made. It may have been.

Q. Well, how were these arrangements carried out, if there was no agreement made? A. I don't know. If there were any such arrangements, they were not left to the traffic officers.

Q. Was there an arrangement for the maintenance of rates, up to the time that you left the Terminal Railroad Association? A. There was an understanding, at any rate. I don't know that there was any arrangement. My instructions from my president were to maintain the rates.

Q. When was it you left? A. In 1894, and went to the Wiggins Ferry Company.

Q. After you went to the Wiggins Ferry Company, was there any understanding there as to the maintenance of rates? A. My instruction from Mr. Sands, who was in charge there, was that the rates were to be maintained.

Q. That is, that the rates were to be the same as the Merchants' Terminal Railway and the Terminal Association? A. There was a basis for all those charges, and they were considered fair and reasonable, and fairly remunerative to the companies who handled the business.

Q. But they were to be the same charges from all three of the companies—that was the arrangement, wasn't it? A. That is what the published tariffs showed.

Q. I am asking you about your understanding? A. My instructions were not to deviate from the rates in the pub-

lished tariffs. And the published tariffs read, I believe, just the same as the Merchants' and Eads Bridge tariff.

Q. They were all alike? A. They were all alike?

Q. How long did you stay with the Wiggins Ferry Company? A. Eight or nine years.

Q. That would be 1901 or 1902? A. Somewhere along there.

Q. And that was operative then? A. Yes, sir.

Q. Do you know when the Wiggins Ferry Company sold out? A. About three years ago. I think it has been about three years ago, now.

Q. 1903, was it? A. 1903 or 1902.

Mr. Lehmann: 1902. A. Time flies so. It was four years ago, then.

Q. Then you went to the Manufacturers' Railway? A. Yes, I went to the Manufacturers' Railway from the Wiggins.

Q. Are you acquainted with the general character of the business, and the manner in which it is carried on, between St. Louis and East St. Louis, as to transferring freight and passengers? A. Yes, sir.

Q. And have been for many years? A. Yes, sir. The practical handling of the business? Yes, sir.

Q. Do you know whether or not the Merchants' Bridge Terminal Railway Company publish a time-card? A. A freight time-card?

Q. No, sir; any kind of time-card? A. I do not know —no, sir.

Q. Do you know whether they run passenger trains in and out of Union Station? A. The Merchants' Bridge Terminal Railway Company?

Q. Yes. A. Oh, yes, I know they do, because I have entered Union Station by way of the Merchants' Bridge.

Q. You understand I mean Merchants' Bridge Terminal Railway trains, not the trains of other roads? A. I don't

know anything about that. I thought you meant trains of other railroads.

Q. No. A. I don't know anything about their passenger traffic.

Q. Have you ever been over to Brooklyn or Venice? A. Not on their trains.

Q. Not on their trains? A. No, sir.

Q. Do you know anything about the price for hauling coal from East St. Louis, Illinois, to St. Louis, Mo., being cut in 1901—being reduced, while you were with the Wiggins Ferry Company? A. There was a circular printed, but not issued, making the rate one cent a hundred pounds to the tracks of the Wiggins Ferry Company at St. Louis.

Q. From East St. Louis? A. From East St. Louis—yes, sir.

Q. Why was it not issued? A. I am unable to tell you that. Mr. Sands instructed me not to issue the circular, and it was not put out.

Q. Do you know whether or not the Terminal Railroad Association has run passenger trains of its own across to East St. Louis and other points in Illinois? A. There was a train run for a time, and I believe that the Bridge Company controlled it, between the Union Depot and the National Stock Yards.

Q. For carrying passengers? A. Yes, sir.

Q. Where did it run to, from the Union Station to the National Stock Yards? A. From the old Union Depot, at Twelfth street, to the National Stock Yards.

Q. About how far was that? A. About four miles, I should judge.

Q. Was it a daily train? A. I believe that it was.

Q. Open to anybody to ride on that paid the fare? A. Yes, sir.

Q. Tickets for it sold at the old Union Station? A. I think so.

Q. You were in the employ of that company for a long time? A. Yes; but I had nothing to do with the passenger business.

Q. Mr. Baulch, what is the largest item that comes in from the East in the way of shipments, in tons, to St. Louis? A. Coal.

Q. Does that come from distances close by, or far? A. The majority of it is Illinois coal.

Q. Well, within a radius of how many miles, should you say most of it comes? A. Forty-five, I should judge.

Q. Forty-five to one hundred? A. Forty-five to one hundred. There is not much of that extreme southern coal gets here. There are some shipments, but not very much of it.

Q. Do you know anything about the transfer charges for passengers on trains across the bridges? A. Absolutely nothing.

Q. Don't know anything about that? A. No, sir.

Q. Were you at more than one of these meetings where arrangements were made for the maintenance of rates? A. I presume I was.

Q. Do you recall any of them now? A. No, I do not. The general idea was that, as far as possible with the tonnage that was being handled across the river at this point, the rates ought to be maintained, and the business handled through the channel that would offer the least resistance.

CROSS-EXAMINATION, BY MR. H. S. PRIEST.

Q. That is, through the most economical and direct channels? A. The least resistance, both physically and financially.

Q. The published rates were observed? A. Yes, sir.

Q. Did I understand you to say that the St. Louis Terminal Railroad Association ran a passenger train between the Union Depot in St. Louis and the National Stock

Yards? A. I don't remember whether it was the Terminal Railroad Association. The old St. Louis Bridge Company ran for awhile what we knew as the "beef canning" train, and that took people from the old Union Depot to the National Stock Yards, and took them back again.

Q. That was simply for the employees? A. That was simply to serve the employees of that industry.

Q. At the stock yards? A. At the stock yards.

Q. And that train was abandoned years ago? A. I don't know. I know that I have seen it going back and forth, in connection with my other duties, but don't know anything about where it was run, or how long it was, or when it was taken off.

Q. The Wiggins Ferry Company did not own passenger cars, did it? A. Oh, no. They had a few old dump cars for their use, but no cars of their own.

Q. For construction purposes? A. Yes, sir, for construction purposes.

Q. And they owned no freight or passenger cars? A. No, sir.

Q. And the same applies to the St. Louis Terminal Association? A. The St. Louis Terminal Association and the Bridge Company owned only such cars as they needed in their construction work about the place.

Q. And the same is true, so far as you know, of the Merchants' Terminal Railway? A. Yes, sir.

Q. All three of these companies were simply operating as switching or transfer companies from one line to another; they were not operated as railroads are generally operated, they only served as drays for other railroads entering from East St. Louis to St. Louis? A. That is all.

Q. And all of those tracks of which you have any knowledge, belonging to either of these three systems, were used not for running an independent train, but for connecting

traffic between East St. Louis and St. Louis with their destination? A. Yes, sir.

Q. Your company did not issue any regular bill of lading, did it? Only issued what is called dray tickets? A. There were never any regular bills of lading issued by either of the three companies, the Merchants' Bridge Terminal Railway Company, the Wiggins Ferry Company, or the Terminal Railroad Association.

Q. Simply dray tickets? A. Simply dray tickets, that they exchanged for a bill of lading at the railroad company's office.

Q. When the freight reached the railroad company's office, then a regular bill of lading was issued? A. Yes, sir.

Q. Mr. Baulch, you have had many years' experience as a traffic and railroad man. Now with respect to independent railroads, having connection, the method of delivering freight from one to the other is to have a delivering track and a receiving track at the point of junction; and the one delivering has to put the car up on the delivering track, to be inspected by the receiving company, and, if found in good condition, accepted. That is true, isn't it? A. That is the method; yes, sir.

Q. So that, assuming the Merchants' Bridge line is independent of the St. Louis Terminal Railroad Association, at the point where they have physical connection, following the usual railroad practice, that is the practice that maintains with respect to an independent railroad, the Merchants' Bridge Company would place upon a delivering track a car which it would want to be delivered by the Terminal Railroad Association, and would await the inspection by the Terminal Railroad Association, and if the car passed inspection by the Terminal Railroad Association, it would be accepted by that company; is that correct? A. That would be the practice.

Q. So that if you wanted to deliver down here at a given

point (indicating) on the line of the St. Louis Transfer Company, a car that was received by the Merchants' Terminal Railway, that would pass from the Merchants' Terminal Railway to the St. Louis Terminal Association, and thence for delivery to the Transfer Company, and thence from the Transfer Company to the Iron Mountain Company; it would go through those four inspections, wouldn't it? A. Yes; each company would inspect the car upon receipt, and it would then be turned over and taken in charge by their engine, and taken as far as their road went, and put on a siding for the inspection by the next company, and they, in turn, would take it from them and move it on to its destination.

Q. Now, if those companies were all one line, there would be no inspection except at the point where the car was received, and carried on through by the one train to the point of destination? A. If there was only one management, or there was an arrangement by which it was carried through to destination, there would be only one inspection before the point of destination.

Q. That could be more expeditiously done, and more economically done, than under independent management? A. Very much more so—yes.

Q. Now would you express the opinion that if all of these lines were simply doing a switching business, or a terminal business, for the railroads that enter St. Louis or East St. Louis, that it would be in the interest of economy and dispatch, and for the good of commerce, that these several lines should be under one management? A. It has always been proven so. Because the location here in St. Louis is of such character that each company has a particular territory to serve; and the Merchants' Bridge taking business that ought to go through the Wiggins Ferry Company, or the Eads Bridge taking business that ought to go

to the Merchants' Bridge, or vice versa, would simply make more or less friction, loss and delay.

Q. So that instead of this assumed unity under one management of these railroads being an obstruction to commerce, it is a help to commerce in St. Louis? A. If it is handled practically, it would certainly be a help to commerce.

Q. You don't regard the business in East St. Louis as foreign to that of St. Louis, do you? A. What is that?

Q. You don't regard the business in East St. Louis, as foreign to that of St. Louis, commercially, do you? A. Oh, no sir.

Q. You treat East St. Louis, in a commercial sense, and in the sense of a traffic manager, as forming a part of St. Louis, don't you—one point? A. Yes, sir.

Q. So that whatever system of terminals is established in East St. Louis ought to be extended to St. Louis, and whatever exists in St. Louis ought to be extended to East St. Louis? A. One could not exist without the other.

Q. Do you know, Mr. Baulch, that within the past six or eight years the commerce of St. Louis has increased very rapidly? A. I don't know just what it has done in the last six or eight years. I know there has been a very great increase. There has been a gradual increase year by year.

Q. And an increase upon the maxim of each year previous? A. Of each year previous. I think since 1893 the business has gradually increased.

Q. And the commercial conditions have changed in the past ten or twelve years? A. I think so.

Q. Now assuming that all of the railroads that are competing for the commerce of St. Louis or East St. Louis, have a joint interest in both East St. Louis, St. Louis, and the adjacent territory; that gives to each one of those roads an opportunity to compete for the business originating at or destined to any point along the lines of the terminals,

does it not? A. It gives each railroad the same opportunity that its competitor has to handle business to or from any point on the terminal tracks of St. Louis.

REDIRECT EXAMINATION, BY MR. E. C. CROW.

Q. Mr. Baulch, did I understand you to say, in answer to a question of opposing counsel, that from the railroad standpoint St. Louis and East St. Louis were identical? A. Commercially, I should say they were identical; that business intended for St. Louis, when it reaches East St. Louis, is practically within the territory, when it is handled into the yards of the railroads terminating in East St. Louis.

Q. Then the logic of that would be that goods ought to be delivered, from a railroad standpoint, in St. Louis as cheaply as in East St. Louis? A. Mr. Crow, there is just as much reason for a charge across the Mississippi River, between East St. Louis and St. Louis, as there is between any other points between New York and East St. Louis.

Q. Why is that so? A. Why?

Q. Yes. A. Well, the physical position of St. Louis is on the west side of the Mississippi River. The railroads do not have their depots on this side of the river, and cannot have them. And they are established on the other side. And, while the physical condition is that the railroads terminate in East St. Louis, they have by means of various transfer lines an opportunity to get their business to this side of the river, or by ferry and wagon, if they choose. And it is as much a part of the railroads between New York and St. Louis—this Terminal Railroad is, or the transfer lines are—as is the division between Indianapolis and East St. Louis on the Vandalia line of the Pennsylvania system, running into East St. Louis.

Q. Then you say there ought to be this charge because they cannot get into St. Louis. Why can't they get into St. Louis? A. I don't know why they can't, unless it is be-

cause they are not wanted in St. Louis. The Pennsylvania line built a million dollar terminal here that has never been used. Perhaps they can tell something about it. I don't know why, and I have handled a great deal of business into St. Louis.

Q. There is no physical reason why they cannot get in? There is nothing about the Mississippi River to prevent putting a bridge over it? A. Oh, no.

Q. Isn't this the reason that they are not in here, because they have got a combination to control the ingress and egress to and from the city from the East? A. I don't think so.

Q. You don't think so? A. No, I don't think so.

Q. How do the railroads get into New York City? A. They get into New York City—the New York Central goes in on its own tracks into New York, and that is the only railroad that does. All the rest of the traffic into New York City—and with that goes what comes by the New York Central, by the way—has a terminal charge of three cents per hundred pounds on it, and this is deducted before the rate is pro-rated. Every pound of freight that goes in and out New York City has a three-cent per hundred pounds embargo on it, which is absorbed out of the rate before the divisions are made.

Q. Now the charge that is made here is simply an arbitrary charge, isn't it? A. I don't know whether you would call it an arbitrary charge or not.

Q. It is not based on the cost of the service, is it? A. I don't know about that.

Q. For instance, in the hauling of coal, it is simply arbitrary, isn't it? A. I don't think so. If you had to build a bridge, and a tunnel, or build a bridge across the river, you would expect to be remunerated for the service you render.

Q. Do you say it is based on the service rendered? A. I should think so.

Q. If that is true, why is it that at one time they fix it at fifteen cents, and at another time raise it to thirty cents? A. I did not know it was ever fixed at fifteen cents.

Q. Don't you know that? A. I don't think it was. Was it?

Q. When you were with the Terminal. A. At fifteen cents a ton?

Q. Yes. A. I do not remember it. Your saying that it was fifteen cents a ton brings to mind something of that kind, but I don't remember that it was ever hauled at that price. It may have been.

Q. Well, they did not haul it at a loss if they hauled it at fifteen cents, did they? A. I don't know that the Terminal ever made a dollar.

Q. Well, they did not haul it at a loss, did they? A. They must have done so. I should think so.

Q. Don't you know, as a matter of fact, that the Terminal Railroad Association compels the people to pay the cost originally of all the Terminal properties, and all the operating expenses of the fourteen contributing lines—and yet you say that they don't make any money? A. I don't so understand it.

Q. You don't so understand it? A. No, sir.

Q. You know that they are bonded for a sufficient amount of money to pay for these terminals, don't you? A. I have seen the circular that pretended to offer the bonds for sale, but I don't know anything about it.

Q. But, as a matter of common knowledge, you know it? A. I know that they are bonded. But I don't know it is a matter of common knowledge.

Q. You say that they did not make anything? A. As a matter of experience, I know that they did not make it while I was there.

Q. What makes you say that? Did you examine the books? A. I did not.

Q. Then what makes you say that? A. Well, because the Bridge Company went into the hands of a receiver twice while I was connected with it.

Q. When was that? A. Twice.

Q. It was a long time ago, when they sold it? A. I don't know.

Q. They never went into the hands of a receiver the second time, did they? A. I don't know. I thought they did. Oh, no, it was the Wabash & Pacific Railroad.

Q. Do you have any recollection of being appointed on a Committee with H. W. Gays, and W. S. Hodges, to make up an agreement, in 1891, for the fixing and maintenance of rates between the three companies, the Merchants' Bridge Terminal Railway Company, the Terminal Railroad Association of St. Louis, and the Wiggins Ferry Company? A. I may have.

Q. Well, you were, weren't you, as a matter of fact? A. I don't remember just exactly. I may have been, and probably was.

Q. You were on that committee, and got up that sort of agreement, didn't you? A. I never made any agreement.

Q. Didn't you make up an agreement, and submit it to the presidents of the companies, you three men? A. We may have done so.

Q. Well, did you, or did you not? A. I don't recollect. I have not had my memory jogged on that for a long time, and it would be in the order of business, if we were instructed to do so, to do it.

Q. Suppose you think that over, and let me know to-morrow, will you? Perhaps if you cannot think of it, I will jog your memory.

Mr. Crow: I want to examine Mr. Baulch some more to-morrow.

Mr. Priest: Why don't you finish now?

Mr. Crow: I will telephone him when I am ready for him again.

Mr. Priest: You have to conclude with one witness before you can bring another one on.

Mr. Crow: I do not suppose I can reach any more of my witnesses by telephone to-night.

The Commissioner: But there is no reason why you cannot finish with him the first thing in the morning, is there?

Mr. Crow: I don't know. There may be. I will let you know in the morning. I rather think that I can conclude with him right away. That is my opinion, but I do not want to make any agreement to that effect. Something might intervene.

At this point the further hearing of testimony is adjourned until Wednesday, July 11th, at ten o'clock, a. m.

R. E. Rombauer, Special Commissioner.

St. Louis, July 11, 1906.

Met pursuant to adjournment as above, on Wednesday, July 11, 1906, at ten o'clock, a. m., in the U. S. Court of Appeals Room, in the Federal Building, St. Louis, Missouri:

Present: Mr. R. E. Rombauer, Special Commissioner; Messrs. E. C. Crow, Charles Nagel and Chester Krum in behalf of the Government; and Messrs. M. F. Watts, H. S. Priest and F. W. Lehmann, in behalf of the defendant.

The following proceedings were had:

BRECKINRIDGE JONES, a witness of lawful age, being duly produced, sworn and examined in behalf of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Mr. Jones, do you remember the year in which the Rock Island Railway bought an interest in the Wiggins Ferry Company? A. Well, really, I cannot say just what year it was, General. I remember the transaction very well.

Q. It was three or four years ago?

Mr. Priest: It was in 1902.

A. I think that was about the time. I would not be sure whether it was 1902 or 1903, but it was three or four years ago.

Q. Did you represent anybody in that transaction? A. The Mississippi Valley Trust Company did.

Q. Through you? You represented the Mississippi Valley Trust Company? A. I was an officer of the Trust Company. I had no personal interest in it.

Q. What roads in interest did the Mississippi Valley Trust Company represent? A. We represented at the start of the matter, the Missouri Pacific and the Wabash Railroads.

Q. The Missouri Pacific and the Wabash? A. Yes, sir, and I think possibly the Iron Mountain Railroad.

Q. That is a part of the Missouri Pacific. A. I have forgotten whether the two or three of them signed—but it was the Gould interests.

Q. Subsequently did you represent other interests? A. Yes, sir, we represented them at the start; action had been taken very quickly, before others could be consulted, and later the number of them was seven.

Q. You mean the number of roads? A. Yes, sir, the number of roads.

Q. That you represented? A. That we represented.

Q. Do you know what seven they were? A. I have, of course, all that memorandum at my office, and I have not refreshed myself on that.

Q. Maybe you had better telephone down and get that? A. I don't think there is any question about what those seven roads were.

Q. If you know, just state it; it is a matter of refreshing your own memory. A. I can state it, I think, with reasonable accuracy. There was the St. Louis & San Francisco Railroad Company; the Louisville & Nashville Railroad Company; the Pennsylvania, or Vandalia Railroad; the Wabash; the Missouri Pacific; the Big Four, and the Baltimore, Ohio & Southwestern Railroad.

Q. You stated, I believe, that it was necessary to act quickly in the matter when it originated. Do you know the reason for that? A. The reason was, as I understood it—I got home one day, I think it was on a Friday, from New York; in the office they told me there had been a negotiation on about the sale of Wiggins Ferry Company, and the next day, or that afternoon and the next day, we had some conference with Mr. Church and Mr. Scanlan, as representing various stockholders of the Wiggins Ferry Company, and we presented the matter to our connections—at least to the Gould interests—to know if they would like to buy that stock. They authorized us to proceed. And then it was a question who would get control, and who would get the stock. The Mercantile Trust Company was in the market purchasing it under one arrangement, and we were in the market purchasing it under another. It was for a few days a very spirited contest, and it was that I called for quick action in the matter.

Q. With whom did you communicate, representing the Gould interests—what man? A. My communications personally were through Mr. Walsh. Mr. Walsh was President of the Mississippi Valley Trust Company at the time, and I was the Vice-President. I think personally I did not communicate with them at all, but Mr. Walsh communicated with them, through Mr. Ramsay.

Q. Mr. Joseph Ramsay, Jr.? A. Yes, he was President of the Wabash Railroad at that time.

Q. None of the Missouri Pacific officials were communicated with? A. Whether that very day or not, I don't know; but I know in this matter of the Wiggins Ferry Company, Mr. Ramsay and Mr. Harding of the Missouri Pacific Railroad were the two I came into contact with. But originally Mr. Walsh brought the matter to their attention. I knew nothing about that, except in that way.

Q. As I understand you, the reason for this move on the part of what you term the "Gould interests," was because they learned that some one else was about to or was attempting to acquire control of the Wiggins Ferry property? A. When we found that they were in the market—we are in business, and we looked up a client to see whether we could not sell it to some one.

Q. When you speak of "they" you mean the Mercantile Trust Company? A. Yes, sir; they were in the market buying stock and we felt we had some clients whose interests were in it and we brought it to their attention and they authorized us to proceed.

Q. You knew whom the Mercantile Trust Company was representing, did you? A. Oh, yes, I think so. The Rock Island Railroad.

Q. The Rock Island Railroad Company? A. I don't know whether I knew it absolutely, at the start, or whether it was an inference, because those things all happened very quickly at the time, and neither side was giving out any more facts or information than they had to give out.

Q. Who finally acquired a majority of the stock? A. We delivered, I think, something over fifty-seven hundred shares out of the ten thousand shares.

Q. You delivered it over to whom? A. The parties we represented at the time.

Q. Do you know to whom they were delivered? A. Do you mean to what individual?

Q. Yes. A. Well, I do not.

Q. Have you any data or memoranda which would disclose that, from your books or records? A. Yes, I could look up the memoranda and find out to whom we delivered the stock and how.

Q. Will you do that, please. A. Yes. I can state, in a general way. If I could get through here I would prefer it, as I am trying to get out of town, to go abroad, in a day or two. When it was finally delivered, Mr. Watts represented the parties in interest; but I could look up the receipts in our office and see to whom it was delivered, and give you that.

Q. When it was finally delivered, was it made to the representatives of the seven railroads, or the representative of the Terminal Railroad Association? A. It was the seven roads. I don't think the Terminal Railroad Association, as a corporation, we had any dealings with in the matter. It was the seven roads that purchased the property from us, and we were represented in the closing up of the matter by Judge Priest, and I think Mr. Watts—the seven roads, all instructed us to follow Mr. Watts' instructions in the closing up of the deal. But our instructions came entirely and absolutely from the roads that were our clients, and not from the Terminal Railroad Association at all.

Q. Then the delivery was finally made by your corporation, the Mississippi Valley Trust Company, to Mr. Watts, representing the seven railroads? A. Now whether the stock was delivered to Mr. Watts, I would have to look up the memorandum to say. I know the seven railroads either wired or wrote us that in the closing up of the transaction to follow Mr. Watts' instructions in the matter, so we would not have to deal with seven people.

Q. You received instructions, then, from representatives of the seven railroads, directing you to close the matter with Mr. Watts, and to recognize him as their representative? A. Yes, sir, that is my recollection.

Q. Could you furnish the Commissioner with the names of the representatives of these corporations who gave these instructions to you? I suppose your records will disclose those names? A. We have the telegrams, or the letters.

Q. I do not care for the telegrams or letters, but merely for the names? A. They were mainly the chief officers; of course we received instructions only from those whom we recognized as authorized to give them.

Q. Be kind enough to send those up to us here, when you go back to your office? A. Very well.

Q. Do you know whether or not the Rock Island interests that were represented by the Mercantile Trust Company, subsequently had a conference or meeting with the representatives of your clients on this subject? A. Well, I have no personal knowledge of it.

Q. Did you and Mr. Festus J. Wade, representing the Mercantile Trust Company, have a conference on the question? A. I think not, with reference to any settlement of this kind. We might have had a number of talks incidentally during the pendency of the Wiggins Ferry Company matter. I don't think Mr. Wade and I had any conference at all on this subject.

Q. Your connection with this matter was closed when the stock was purchased and delivered? A. Yes, sir.

Q. And you have no further knowledge of any subsequent arrangement that may have been made with the Rock Island Railroad? A. None.

Q. Do you know what would be about the average cost of the shares that were purchased by you, just an estimate of it? A. About, approximately, six hundred and forty or six hundred and fifty dollars.

Q. Per share? A. Yes, I think that was it. I have it all figured out in my office; but that is my recollection; it was something like that.

Q. That is all. A. You would like me to furnish you the names of the parties who gave us those instructions?

Q. Yes, the names of the gentlemen representing the various corporations, and particularly the Gould interests, with whom you or Mr. Walsh communicated first, if you can do that. The Missouri Pacific, Iron Mountain and the Wabash were the first people communicated with? A. Well, that was done through Joseph Ramsay, Jr., the then President of the Wabash Railroad, and Mr. Russell Harding, who was then the Vice-President of the Missouri Pacific Railroad. There are some of those names I can remember: The Pennsylvania, or Vandalia Railroad, the instructions came through Mr. James McCrea, who is the Fourth Vice-President, or some such position, and lives in Pittsburgh, Pennsylvania. The Louisville & Nashville Railroad, the instructions came through Mr. Milton H. Smith.

Q. Where does he live? A. Louisville, Kentucky. The Baltimore, Ohio & Southwestern Railroad, the instructions came from Mr. L. F. Loree.

Q. Where does he live? A. Baltimore, Maryland, I believe. He was there at that time. The Cleveland, Cincinnati, Chicago & St. Louis Railroad, the instructions came from Mr. M. E. Ingalls, the President.

Q. He lives in Cincinnati? A. Yes. The St. Louis & San Francisco Railroad I think it came from Mr. B. F. Yoakum. I have not a clear recollection of that. I think the telegram was signed by him.

Q. Where does he reside now? Here or in New York? A. In New York. The Missouri Pacific and the Iron Mountain Railroads, I think the instructions came from the two gentlemen I have previously named.

Q. The Missouri Pacific, Iron Mountain and the Wabash Railroads? A. Yes, sir.

Q. From Russell Harding and Joseph Ramsay, Jr.? A. Yes. I believe that covers the seven roads.

Q. You don't remember who first informed you that the deal was on between the Rock Island and the Wiggins Ferry Company, do you? A. Well, I do happen to remember: When I came into the office that day, arriving on the midday train from New York, our Mr. Lyle, Assistant Secretary in the office, met me and said: "There is a deal on with the Wiggins Ferry Company." That is the first I knew of it. Later in the day Mr. Walsh and I had a talk about it, and with Mr. Church, who was an old friend of Mr. Walsh's and a large stockholder in the Wiggins Ferry Company. Our negotiations in the matter, so far as seeing what stock we could purchase, in the meantime, were with Mr. Church and Mr. Scanlon. The next day we received a telegram—Mr. Ramsay was in New York at the time, and we received a telegram from him that there was being made an attempt to buy the stock of the Wiggins Ferry Company.

Our sole relations with it originally were with those three roads, and finally those seven roads came in. We purchased the stock and turned it over to them, and that ended our relations with it. We had nothing to do with anybody else in the matter, except with the people who were our customers, and from whom we received our instructions.

No cross-examination.

GEORGE L. SANDS, a witness of lawful age, being duly produced, sworn and examined on the part of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please give your name and residence and occupation?

A. George L. Sands, 5078 Cabanne Avenue, St. Louis, Missouri; railroading.

Q. What railroads here in St. Louis have you been connected with? A. With the St. Louis Transfer Railway Company.

Q. That is a part of the Wiggins Ferry Company? A. Yes, sir, it was.

Q. What other railroads have you been connected with? A. Not any others in St. Louis.

Q. Elsewhere? A. The St. Louis & North Arkansas Railroad, of Arkansas.

Q. That is recently? A. Yes, sir.

Q. Before your connection with the Wiggins Ferry Company with what railroads, if any, were you connected? A. I was with a Texas road, the San Antonio & Aransas Pass Railroad; and with the Atchison, Topeka & Santa Fe, immediately prior to coming here.

Q. In what capacity? A. General Superintendent.

Q. How long were you in railroad service before you came to St. Louis? A. Probably thirty years.

Q. And how long have you been here with Mr. Scullin in the Wiggins Ferry Company? A. Since December, 1892.

Q. And what position have you occupied with the Wiggins Ferry Company since that time? A. General Manager and Vice-President.

Q. What were your duties as General Manager and Vice-President? A. General charge of the operating of the property.

Q. Did that include the control and management of the Traffic Department? A. In a general way, yes, but not in detail though.

Q. Did you have a man under you that did look after the details of the traffic business? A. Yes, sir.

Q. Who was he? A. He was John J. Baulsch.

Q. B-a-u-l-s-c-h? A. Yes, sir.

Q. When did he leave your employ? A. I am unable to say, exactly when.

Q. Was it before the sale of the Wiggins Ferry Company? A. Yes, sir.

Q. Do you remember the sale of the Wiggins Ferry Company?

Mr. Priest: You mean the sale of the physical property.

Mr. Crow: I mean the sale of the stock.

Mr. Watts: It was in 1902.

Mr. Crow: Mr. Watts says the sale was in 1902.

A. I could not say positively.

Q. Was it before that, then? A. Yes, sir.

Q. Who fixed the freight rates for transferring goods and traffic from East St. Louis, Illinois, and points in Illinois, over the lines of the Wiggins Ferry Company, to St. Louis, Missouri? A. They were virtually fixed by the Terminal Association, and we simply met them.

Q. You simply met them? A. Simply met the rates that were made by the Terminal Association.

Q. Did you always meet their rate? A. We always tried to.

Q. Did you, as the representative of the Wiggins Ferry Company, have a conference with representatives of the Terminal Association, about those rates? A. Have conflicts?

Q. Conferences? A. Oh, I don't know that we had any special conflict.

Q. You did not understand me. A. I don't hear very well.

Q. I say, did you have any conferences with the representatives of the Terminal Railroad Association about these rates? A. I don't recall more than one conference, in my service with the Wiggins Ferry Company, and that was just after I came there.

Q. Did some one representing you have conferences with them? A. I think Mr. Baulsch at various times had meetings with them.

Q. Or with their representatives? A. Or with their representatives, yes.

Q. The object of those meetings was to fix the rates, was it? A. I don't know that that was it. I would not say that they met to fix the rates. I think it was a meeting to object, possibly, to some rates that they had put in, the position being that the Terminal Railroad, with their auxiliary lines, virtually controlled the larger portion of the tunnels here, and when they made rates they could maintain them; and our purpose was, to make the same rates, so as to get a fair share of the business that properly belonged to us, owing to our location. That was the situation.

Q. Well, you know that the result of these conferences was the fixing of the rates, don't you for the same service? A. I don't know that they ever agreed—that there was ever a virtual agreement, as to certain rates between the two companies, that we will put in this and you will put in that. But if we undertook to change our rates we gave them notice, gave notice to the Terminal Railroad Association that we proposed to change our tariff to so and so on such a date. And my impression is, that that was their custom with us.

Q. Whatever conferences Mr. Baulsch, representing the Wiggins Ferry Company, had with the Terminal Railroad Association, was with your knowledge and approval? A. Yes, yes.

Q. And under your directions, was it not? A. I expect that is right. I don't think he would take action of that kind without my approval, or possibly without my suggestion.

Q. Take the article of coal: That was about the biggest

traffic that the Wiggins Ferry Company had, was it not? A. I think so, sir.

Q. It constituted a majority of the volume of the business transacted by the Wiggins Ferry Company? A. I think so.

Q. From the East to the West? A. I think possibly forty or fifty per cent of it.

Q. Do you remember any changes in the last three or four years of your service with the Wiggins Ferry Company in that coal rate? A. Yes, sir.

Q. When was the change made to fifteen cents a ton? A. I cannot tell you the date.

Q. It was prior to the time you severed your connection with the Wiggins Ferry Company? A. I think it was fully a year before I left the service, or before the transfer of the Wiggins Ferry Company to other interests.

Q. What was the occasion of that change being made? A. The established tariff rates of the Terminal Railroad Association, particularly on grain, were not in my opinion being lived up to.

Q. On grain? A. Yes, on grain.

Q. What class of grain? A. Wheat and corn.

Q. What made you think that? A. Well, that was the information coming to me from different sources that I thought were reliable. Possibly some of our customers, who had always been doing business with us, and it was most natural for them to do business with us, we being the line of least opposition, suddenly left us and went to the other man; when the published rates of the companies were the same.

Q. Then you asked for an explanation? A. I imagined some concessions were being offered.

Q. And you investigated? A. I don't know that it got that far. Those are matters it is pretty hard for an in-

dividual to get the truth of, except as you might say, circumstantially. I could not prove it.

Q. In what year was that? A. I could not tell you that.

Q. When did you leave the Wiggins Ferry Company? A. I left the Wiggins Ferry Company—perhaps Mr. Watts can tell me?

Mr. Watts: 1903.

A. February, 1903, I think it was.

Mr. Crow: Q. How long before you left the Wiggins Ferry Company was this? A. As I say, I think it was during the last year I was with the Wiggins Company.

Q. Can you give me the names of some of your customers that you thought quit you without cause, except that you thought they were getting a better rate? A. No, sir.

Q. You are familiar with all your heavy shippers, aren't you? A. I could not tell them from memory now, even.

Q. You could not? A. No, sir.

Q. They were grain people here in St. Louis, were they? A. They had representatives here. Whether the firm was located here or whether they simply had their representatives here, I could not say.

Q. Do you know the names of their representatives? A. I would not undertake to name them.

Q. Have you any memorandum or record in the books of the Wiggins Ferry Company that would show that? A. No, sir, I don't think so; because everything that passed on that subject was simply in a conversational way and it was the result that convinced me, rather than anything that was said or written.

Q. Who was your conversation with, representatives of the grain people, or representatives of the Terminal Association? A. I may have protested to the representatives of the Terminal Association, in a verbal way, I don't think I ever wrote them, telling them I did not believe that they were living up to their tariff.

Q. The result was, that you did what? A. We reduced our coal rate; I think we cut the rate in two, if I am not mistaken. Maybe we were getting only twenty cents, but my impression is we were getting thirty cents, and we reduced the tariff to fifteen cents.

Q. Did the Terminal Railroad Association meet that cut? A. I cannot say as to that—excuse me a moment. Possibly I ought to make an explanation in there: The thirty cents rate, as I recall, covered deliveries to lines on the Terminal, and the Terminal tracks; and to some roads that we connected with direct. The fifteen cents rate simply covered delivery to the end of our rail, and to industries on our tracks. Now the Terminal Railroad Association, when we made that rate of fifteen cents on our tracks, that put the customers on our tracks in a great deal better shape than they were on the Terminal tracks, under the thirty cents rate. And my impression is that the Terminal Association had a rate which virtually made the industries on the Terminal tracks pay the same as they were paying, which was either thirty cents or twenty cents—whichever it was.

Q. When was the rate restored? A. The rate was restored after it became evident that other interests had control of the Wiggins Ferry Company.

Q. Other interests? A. Other interests than I had been previously employed by. That is, it had gone out of the control of the old Wiggins Ferry Company.

Q. It was after the sale of the stock in 1903? A. I don't think the sale was completed, but I think it was far enough advanced so that the old stockholders realized that the property was passing out from under their control.

Q. Was that restoration of the rate made by you? A. Yes, sir.

Q. And from whom did you receive the order to restore it? A. I did not receive any positive orders.

Q. What made you restore it? A. The suggestion being that it was better for all interests to work in harmony; but from whom that suggestion came I could not say now.

Q. Who was your immediate superior, from whom you received orders? A. There was no nominal change in that. After this transfer, after this sale was made, or being prosecuted, I was virtually left to myself, acting under my own ideas and suggestions.

Q. You did not suggest it to yourself, did you? A. I did not suggest it, no, sir.

Q. Who did suggest it? A. I cannot tell you from whom it came.

Q. You did not recognize any suggestions, however, from anybody except your superior officers in the Wiggins Ferry Company, did you? A. I recognized this, that the property was likely to go out from under the control of the Wiggins Ferry Company. I was not likely to stay with it. That it was foolish for me to work against the wishes of what I imagined were the people likely to come into control. The suggestion was made to me by some interest, some one I thought knew what they were talking about, or knew more of the transaction than I did, that the roads be in harmony—and I acted accordingly.

Q. You would not have done that unless it came from some one in authority, would you? A. Yes, sir, I would, if I had felt that it was some one who knew the general condition of affairs. I don't think I would have undertaken, realizing that I was to remain in the service so short a time, to work in any direction that was going to create friction.

Q. How did you know you were to retire from the service? Were you notified? A. I could "feel it in my bones," as the saying is.

Q. Did Mr. Scullin tell you that? A. No, sir.

Q. Was it Mr. Scullin who suggested to you to restore that rate? A. No, sir.

Q. Was it some representative of the Terminal Association? A. I don't think so.

Q. Was it the suggestion of some one of the roads interested in the Terminal Association? A. No, sir, I think not.

Q. To the best of your recollection, then, you simply restored the rate because somebody suggested it to you. You left there, then, in the February following? A. February, 1903, I think it was.

Q. And you have not had any connection with the Wiggins Ferry Company since that time? A. None whatever.

Q. Do you know whether the coal rate was cut any previous to this time, in 1903, during your service there? A. The coal rate?

Q. Yes, prior to this cut, at any time since you were in the service? A. My impression is that we originally had a thirty cents rate, and then it was brought down to twenty cents for some reason. I won't be at all positive on that, though.

Q. You expected your traffic man to look after the details of that? A. Yes, sir, but I was supposed to, and I thought I did know what was accomplished and what the general results were, as to rates.

CROSS-EXAMINATION, BY MR. H. S. PRIEST:

The only railroads operated by the Wiggins Ferry Company were the East St. Louis Connecting Railway on the east side of the Mississippi River, and the St. Louis Transfer Railway Company on the west side of the Mississippi River, are they not? A. Yes, sir.

Q. Those two roads had no direct connection with any of the tracks of the St. Louis Terminal Association, had they? A. No, sir.

Q. Generally, the East St. Louis Connecting Railway and the St. Louis Transfer Railway, ran north and south close to the Levee, on either side of the River? A. Yes, sir.

Q. And the general trend of the Terminal Association's tracks are east and west, at right angles to the tracks of the two former companies? A. Yes, sir. I am assuming that the "Terminal Association" does not cover the property they are controlling now.

Q. No, just the Terminal Association as it existed at that time? A. Yes, sir.

Q. The business handled by the Wiggins Ferry Company was such as came into St. Louis and East St. Louis from abroad, and passing through in one direction or the other, these two cities. A. Not entirely.

Q. I say, the bulk of the business? A. Well, no, not even that. I think possibly sixty per cent of the business was local industrial business, going to the tracks of the Wiggins Ferry Company or connecting tracks in the city, for city delivery.

Q. For city delivery? A. Yes.

Q. You mean business that came from the outside. Now your coal business, there did not any of that coal business originate in East St. Louis? A. No, sir; but it was delivered.

Q. That is what I mean. You were simply serving carriers who brought this business into St. Louis and East St. Louis? A. Yes, sir, the bulk of the business.

Q. That is what my former question meant. But a very small part of the business done by the Wiggins Ferry Company originated in either St. Louis or East St. Louis, and terminated either in St. Louis or East St. Louis? I mean local business, simply crossing the river for delivery in one city or the other, either way? A. In answering yes to that, I would not want to convey the idea that we did not originate on the Wiggins Ferry Company's tracks, that is,

tracks controlled by the Wiggins Ferry Company, considerable business that went to connecting lines.

Q. But I am speaking now of the local business. A. Strictly local between St. Louis and East St. Louis, simply as cities, a very small percentage.

Q. It was comparatively trifling? A. Yes, sir.

Q. The bulk of your business was such as was brought in by the railroads, either to St. Louis or East St. Louis? A. Yes, sir.

Q. And was meant for delivery to a point of destination, or was received at an industry to be delivered to some railroad on one side or the other of the river? A. Yes, sir.

Q. And, as a consequence, your Company never issued any bill of lading, did it? A. I do not want to commit myself on that. I do not want to testify on that, because my recollection is not right clear about it.

Q. Wasn't it generally the custom to take— A. The way-bills of the other lines.

Q. For freight that was to be delivered in St. Louis? A. Yes, sir.

Q. You would accept the way-bills from the other lines? A. That is my recollection.

Q. But that was not a way-bill issued by your Company? A. No, sir.

Q. When you received at an industry, for instance, in St. Louis, freight to be delivered to Cincinnati or Cleveland or Toledo, you issued simply a dray ticket, didn't you, and when the shipment was delivered to the railroad for carriage, beyond East St. Louis, it issued at its freight office a bill of lading. Was not that the usual course of business? A. I won't say; I won't say. I have a faint recollection of there being some trouble on that point, and just the outcome of it I am not sure of.

Q. You think Mr. Baulsch is pretty familiar with that? A. Very; thoroughly so.

Q. And whatever he said on that would be correct? A. Yes, sir, thoroughly so. I would trust his memory on that better than my own.

Q. He said yesterday the invariable custom was to issue a dray ticket. Neither the St. Louis Transfer Company nor the East St. Louis Connecting Railway Company, had any freight depots in common with the line of the Terminal Railroad Association? A. No, sir.

Q. Nor did they reach the same manufactories or industries? A. Direct; no, sir.

Q. Now, Mr. Sands, you were familiar with the lines of the Terminal Railroad Association, and of the Merchants' Terminal Railway Association, and of the Wiggins Ferry Company, were you not? A. In a general way, but not in detail.

Q. You have general knowledge? A. Yes, sir, a general knowledge only.

Q. The lines of the Merchants' Terminal Railway run practically at right angles to those of the St. Louis Terminal Association, don't they? A. A large portion of them, yes, sir.

Q. And, taking them as independent lines, they did not reach the same factories, or have the same freight depots, did they? A. No, sir, I think not.

Q. Now, then, take as an illustration, this point No. 25 on the map which has been frequently referred to and which has been identified by Mr. Pitzman: Suppose there was an industry on the Merchants' Terminal Railway, at Poplar street; and the Merchants' Bridge Terminal Railway Company would accept a loaded car there for delivery, say at point "A," at Compton Avenue, on the Terminal Railroad Association's tracks: That delivery would be made first by the Merchants' Terminal Railway Company hauling the car—taking the roads as they exist now, with the connections completed between Cerre street and Eighth street—

and it would there deliver the car to the St. Louis Terminal Association on their delivery track, would it? A. Wherever their connection is. They would have to deliver it to the St. Louis Terminal Railroad Association.

Q. And the car would then be inspected by the St. Louis Terminal Railroad Association Company, to see if it was in fit condition to be received or not? I am talking now on the supposition that these lines were operating independently? A. Yes, sir.

Q. So that the delivery of traffic in St. Louis would be impeded by as many times as there were different and independent routes, forming the complete route, from the point of receipt to the point of delivery, wouldn't there? A. I think that is reasonable.

Q. According to usual railroad practice, that would be true, would it not? A. Yes, sir.

Q. Then in order to facilitate the switching business between St. Louis and East St. Louis, and to do the work economically, it would be to the advantage of all to have all of the switching lines under one control, would it not? A. I question it.

Q. The traffic could be handled more rapidly, could it not? A. I believe the individual lines, with direct rail connection, could handle the business more rapidly and satisfactorily, than through a connecting line—that is, through the present Terminal Railroad Association.

Q. You mean if each railroad owned its independent terminals in St. Louis? A. Yes, sir.

Q. It could accept and receive freight and handle it more expeditiously than by a union terminal? A. Yes, sir.

Q. That would be dependent entirely upon physical conditions, would it not? A. Almost entirely.

Q. Now, the physical conditions here in St. Louis are not adapted to large, independent terminals for thirteen lines of railroads, are they? A. I hardly know how to answer

that question. I think I am safe in saying no, they are not to-day.

Q. The only place we have for terminals in St. Louis, owing to the peculiar topography, is such as is allowed by the Mill Creek Valley, and that at Carondelet in South St. Louis, and that above North Market Street in North St. Louis, isn't it? A. The only question is, the only terminals we now have.

Q. No, sir; but the only place for terminals as the city is at present built? A. My theory is and has always been, that the territory from the Merchants' Bridge to Carondelet, on the river front, and as far west as Third street, should be terminal property—terminal territory; and is the available terminal territory for St. Louis to-day.

Q. How is the levee occupied in that district? A. That would mean carrying out the Government's plan of establishing a harbor line, increasing the levee's width by about a couple of hundred feet, giving that much additional levee space to be utilized for tracks.

Q. Do you think thirteen railroads would find space along that levee for independent terminals? A. I think it would mean, or that proposition would mean, one thousand to fifteen hundred acres for additional terminal property.

Q. You mean by building the levee out into the Mississippi River? A. Yes, sir.

Q. Extending it two hundred feet? A. In some places two hundred feet. I think it would possibly average approximately two hundred feet from the Merchants' Bridge to the River Des Peres.

Q. And you think if the Government would do that it might provide space there for the terminals of all the railroads in St. Louis? A. By utilizing what we have and appropriating between Third street and the levee, and that width up and down the levee, as I have mentioned.

Q. From Third street down to the levee is built up with business buildings and manufactories? A. Some.

Q. Nearly all the way you have described, from the Merchants' Bridge down to Carondelet? A. There are a good many industries in there, yes.

Q. The bulk of the industries on the St. Louis side are located along the Mill Creek Valley, and along Third street—no, between— A. (interrupting) Third street has comparatively small number of industries.

Q. Between North Market street and Arsenal street on the south, isn't it? A. There are a great many large industries up in North St. Louis, north of Humboldt street.

Q. I am speaking of the bulk of the industries north of Humboldt street, those are new, aren't they? A. They are very extensive.

Q. Those north of Humboldt street have been built within what time? A. I think within seven or eight years.

Q. Within say eight years? A. Yes, sir.

Q. Since the terminals were extended up in that direction? A. Yes, sir.

Q. But my question primarily referred to the topographical condition as it exists to-day, and I am referring to that now, and will ask you if the space for railroad yards and terminals is not such as I designated? A. My answer must be an interpretation of the word "available;" as to whether that means property that is unoccupied, or property that can be secured at a reasonable figure—that is, reasonable for the purposes of terminal facilities, such as St. Louis requires.

Q. Of course it is possible, Mr. Sands, to tunnel the city, as they have done in Chicago, and have deliveries underground; but I am speaking about the topographical condition of the country to-day, and the unoccupied portion of the city. A. There is not any unoccupied territory, apparently available for additional terminals.

Q. There was an effort made about three years ago to get an ordinance to allow the St. Louis Railroad Terminal Association to extend its terminals down at the levee, was there not? A. Primarily, I think.

Q. Of course you have side tracks and depots and spurs leading into industries, but they are all for switching purposes and used for that purpose almost exclusively? A. The only thing that occurs to me is the passenger business on the Merchants' Bridge, between Granite City and St. Louis.

Q. You think the Merchants' Terminal Railway operates some trains on its line from St. Louis to Granite City? A. That is my understanding. That is my impression.

Q. From what point does the train start? A. I could not say. The only time I ever took the train it was at North Market Street, or possibly it was Washington avenue.

Q. It did for a time run a train, I understand, for the purpose of accommodating the workmen at Granite City and Madison, at the car works over there; people who lived in St. Louis and who were employed at the industries in Granite City and Madison. That is the only train you have ever heard of, that workman's train? A. That is the only one I ever heard of, and that is three or four years ago. I was on that once.

Q. Otherwise, neither of these companies, to your knowledge, own or operate any cars or trains? A. No, sir.

Q. They have no schedule of trains, so far as you know? A. Outside of that point I have just mentioned.

Q. And never have had? A. So far as I know, no, sir.

REDIRECT EXAMINATION, BY MR. CROW:

Q. Isn't it a fact that the Merchants' Terminal Railway Company publishes a time-card of trains in and out of the

Union Station, along with the other railways? A. I think I have seen it, yes.

Q. When you speak of there being no unoccupied territory in St. Louis available for terminals, I will get you to state, what is the character of the buildings and improvements that do occupy the majority of the space along the levee front, say from the northern part of St. Louis down to Carondelet? A. I have not been over that territory, I suppose in five years, fully; but there was some, as I recall it, industries there where heavy expenditures had been made, and a great deal of money invested; other portions of that same territory would have minor, inexpensive, and non-revenue producing I guess, class of buildings.

Q. Isn't it a fact, that the removal of the business of the city, westward, both retail and wholesale, together with the encroachments of railroad properties on the levee front, has rendered practically valueless a great deal of property that was formerly revenue producing, in that district? A. The transfer of the business westward has virtually done that. I don't think the encroachment of the railroads there has had any particular effect.

Q. And a great deal of that space is covered by property that could be removed and the ground turned into terminal facilities, without great expense? A. That is my judgment. I might add that the falling off of the river traffic has probably had a good deal to do with the transfer of the business further west from the river. It doubtless had.

RECROSS-EXAMINATION, BY MR. PRIEST:

Q. All of this territory is laid off into lots and blocks? A. Yes, sir, the bulk of it.

Q. And it is hilly, is it not? It is an ascending grade from the levee? A. Yes, sir.

Q. About what is the grade from the levee west? A. I could not tell you. I had it investigated once. I had a

survey made there once; but I cannot remember now what it was.

Q. It is a very rapid rise, is it not, from the levee up to Broadway, and especially up to Fourth street? A. Yes, sir, from parts of the levee it is.

Q. About what would you say the grade was, from the levee at the foot of Olive street, up to Fourth street? A. I would not attempt to express myself on that.

Mr. Krum: It is not uniform. There are at least three degrees in it.

Mr. Priest: It is pretty nearly uniform. That would be practically uniform from considerably north of the Eads Bridge as far south as Cerre street? A. No, sir; the easiest point, the least elevation you have to overcome from the water's edge to Third street, I think is about Plum or Valentine street, in about there. That is near where the Wiggins' Ferry Company's Plum street ferry lands. There is the least obstruction to teams there. That is the lowest point on the river front that I recall.

Q. But I say, the grade from the river up to Fourth street, is the grade you would encounter from far above the Eads Bridge down to Cerre street? A. Yes, sir, I think it is.

Q. And that is a very heavy grade? A. Yes, sir.

Q. To establish railroad yards there you would have to make that ground practically level? A. Yes, sir.

Q. And you would have to level the levee, would you not? A. Yes, sir.

Q. And about what is the grade of the levee along there, from the low-water mark up? A. I cannot tell you.

Q. It is very high, is it not? A. I don't think it is as heavy as the Olive street grade, from the levee up to Fourth street.

Q. They are both pretty heavy? A. Yes, sir.

Q. And the levee is occupied already by how many

tracks? A. Three, I think, main lines there; there is the St. Louis Transfer Railway, the Iron Mountain, and I don't know whether the other is the Missouri Pacific or not. There are three main lines on the levee.

Q. That is a joint track, isn't it, the Missouri Pacific and the Iron Mountain? A. There are two or three there.

Q. Being an extension of the Poplar street track? A. Yes, sir. There are two Main Lines there, up as far as the old Wabash depot.

Q. That line was built under an Act of the Legislature, many years ago, to connect the roads there.

REDIRECT EXAMINATION, BY MR. CROW:

Q. Is it not a fact that the franchise that was refused on the levee, which was referred to by Judge Priest, was one that was applied for by the Terminal Railroad Association two or three years ago, for that one corporation? A. I could not say, sir. All I know is what I read in the papers. I had no special interest in the matter at that time.

Q. Referring to the grades from Fourth street down to the levee: Is it not a fact that that grade practically runs out at the old Plum street depot, going south? A. Yes, sir, that is so.

Q. And that it is practically level ground from there back to Broadway? The Chouteau avenue depot, you know? A. I was under the impression that that station was north, was between Poplar and Plum streets. From the Iron Mountain Railroad's Plum street warehouse, south there for a distance is comparatively level.

Q. There is a track north of the old Plum street depot up Poplar street to the old Union Station? A. Yes, sir.

Q. Which the city has never been able to get removed? A. It is there yet.

Q. From that point to the Eads bridge, how far is it, approximately? A. I don't know.

Q. A mile and a half, or two miles? A. I don't think so.

Q. It is a mile, isn't it? A. I would hardly think it is a mile; I would not venture to say.

Q. In the neighborhood of a mile, or less, is it? A. I would say it is less than a mile.

Q. From the Eads Bridge north, isn't it a fact that after you get less than half a mile up the river the grade runs out? A. It runs out, I think, about Tyler street, or Madison street or somewhere in there.

Q. How far up is that, approximately? A. I don't know. This map here (indicating Pitzman map) should show the distance.

Q. It runs out below the Merchants' Bridge, does it not? A. Oh, yes.

Q. About Tyler street. A. This is Tyler street (indicating) south of North Market street.

Q. In the neighborhood of a mile? A. From where?

Q. From the Eads Bridge north? A. There is not so very much distance from the Eads Bridge north to North Market street; and from the Eads Bridge to Tyler street I think there is not very much difference.

Q. How much river front is there from "North St. Louis" as we term it, down to Carondelet, in miles, approximately? A. I think I would guess about twelve miles.

ROBERT M. FRASER, a witness of lawful age, being duly produced, sworn and examined on the part of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence and occupation? A. Robert M. Fraser; 4210 Washington Boulevard, St. Louis, Missouri. My occupation is Chairman of the Rail-

road Associations here in the city. Do you wish me to name them?

Q. Yes, please. A. The St. Louis East Bound Freight Committee, the St. Louis, Cincinnati and Louisville Freight Committee. I am chairman of those two committees. I am Secretary of the St. Louis Coal Traffic Bureau. Joint Agent of the St. Louis and Belleville Committee?

Q. What railroads are represented in those various organizations you have named? A. Practically all of the east side roads.

Q. And of the west side roads? A. No, sir.

Q. Is not the St. Louis & San Francisco Railroad represented in any of your associations? A. No, sir, not the St. Louis & San Francisco, but the Chicago & Eastern Illinois Company is, on the east side.

Q. That is a part of the St. Louis & San Francisco Railroad Company? A. Yes, sir. That is a member of our committee.

Q. And the Wabash Railroad? A. That is a member of our committee.

Q. And the Missouri Pacific Railway? A. The St. Louis, Iron Mountain & Southern Railway is.

Q. That is a Missouri Pacific line? A. Yes, sir.

Q. You say you are Secretary of the St. Louis Coal Traffic Association? A. St. Louis Coal Traffic Bureau.

Q. Who is the President of that organization? A. There is no President.

Q. There is no President? A. No, sir.

Q. The members of what railroads constitute members of that organization? A. Practically all of the east side roads.

Q. Can you name them, those that are members? A. The Baltimore & Ohio Southwestern Railroad; the Chicago & Eastern Illinois Railroad (Frisco System), the Cleveland, Cincinnati, Chicago & St. Louis Railroad; the East

St. Louis Suburban Railway; the Illinois Central Railroad; the Litchfield & Madison Railway; the Louisville & Nashville Railroad; the Mobile & Ohio Railroad; the St. Louis & Belleville Electric Railway; the St. Louis & O'Fallon Railway; the St. Louis, Belleville & Southern Railway; the St. Louis, Iron Mountain & Southern Railway (Illinois Division); the St. Louis, Troy & Eastern Railroad; the Southern Railway (St. Louis-Louisville lines); the Vandalia Railroad; the Wabash Railroad.

Q. Which of the roads named are other than steam railroads? A. The East St. Louis & Suburban.

Q. Where does that run from and where to? A. I cannot tell you. It runs from East St. Louis, in connection with the St. Louis & O'Fallon Railway, I believe; I believe they use the St. Louis & O'Fallon Railway part of the way out to their mine.

Q. It is an electric road? A. Yes, sir.

Q. And a coal road? A. Yes, sir, they carry coal.

Q. And only coal. A. That is all that I know of.

Q. What other road is not a steam railroad of those named by you? A. The Belleville Electric Railway.

Q. Where does that road run to and from? A. I understand it runs from East St. Louis out to Belleville.

Q. And on out to the coal fields? A. Yes, sir, out to the coal fields.

Q. How often does this Bureau meet? A. At no regular times.

Q. Who issues the calls for a meeting? A. I do.

Q. Is each of the roads named entitled to and have a representative at these meetings? A. They are entitled to it, yes.

Q. Are there any rules and by-laws of that Association? A. Yes, sir.

Q. Are they in writing, or oral—simply an understanding? A. They are in writing.

Q. They are in your possession? A. Yes, sir.

Q. How long has that Association been in existence? A. I have been in charge of the Association, or Bureau, since 1898.

Q. Where is it located? A. The office is Room 315, Wainwright Building.

Q. How many rooms have you there? A. We have three rooms; the building would call it five.

Q. And how many employes has this Association at that place? A. Eight. I want to qualify that: This Bureau and all of the Associations and Committees that I represent, occupy the same rooms, and the clerks and myself are all employed in common for the different Bureaus or Associations.

Q. Then I understand that you and the clerical force under you, do the work for all these Associations? A. Yes, sir.

Q. Now who pays you for your services, for the St. Louis Coal Traffic Association? A. The roads that are members of the Bureau.

Q. And you employ and pay the clerks you have under you, for all these Associations? A. Yes, sir.

Q. And is there any basis of compensation to you from the Coal Traffic Bureau? Is it a salary basis or a tonnage basis? A. Do you mean as to compensation?

Q. Yes. A. It is a salary.

Q. Of so much per annum? A. A stipulated amount per month.

Q. It is a yearly contract? A. Yes, sir.

Q. And what is that amount? A. You mean for their proportion of the expenses of the office?

Q. What do they pay you? A. One hundred dollars a month.

Q. The Coal Traffic Association pays you that? A. The Coal Traffic Bureau.

Q. And then they pay their proportionate share of the general office expenses? A. Yes, sir.

Q. Including clerical force expenses? A. Yes, sir.

Q. How do you estimate what that would be? Is it according to the volume of business? A. According to the amount of business each road gets into East St. Louis.

Q. Apportioning the expense between the Coal Traffic Bureau and those other Associations, is that fixed arbitrarily? A. The amount is fixed arbitrarily, that we are allowed for the maintenance of the office. Each Bureau or Committee pays for their own expense so far as printing and such things are concerned; but there is a fixed amount allowed by each Committee for the support of the organization.

Q. And when you come to the clerical help, how do you apportion it? A. The same way. There is a fixed amount authorized for the maintenance of the office.

Q. What is the proportion that the Coal Traffic Bureau pays? A. You mean in dollars?

Q. Yes. A. I could not answer that off-hand, because it varies.

Q. It does vary? A. Yes.

Q. Why does it vary? A. It does not so far as the clerical force is concerned, if that is what you mean. But the expense of the operation of the office in the purchase of stationery, etc.

Q. That is comparatively small, is it not? A. Yes, sir; I could not answer you off-hand what amount is allowed for the maintenance of the Coal Traffic Bureau. I could furnish you that.

Q. With reference to the total expense of the clerical help, how much does the Coal Traffic Bureau pay? A. My recollection is that it is $125.00.

Q. Of the total expense? A. Yes, sir.

Q. And what proportion of the rent do they pay? A. They pay $73.00 out of $170.

Q. The several railroads you have mentioned constitute practically all of the east side coal carrying roads, do they not? A. Yes, sir.

Q. Both steam and electric? A. Yes, sir.

Q. Is it the business of your Association to keep track of the volume of coal that comes into St. Louis? A. Yes, sir.

Q. From the east side? A. Yes, sir.

Q. In what way do you keep an account of that? How do you get your figures? A. By reports furnished by the agents of the roads.

Q. Of the coal carrying roads? A. Yes, sir.

Q. Do those reports come monthly, weekly or daily? A. Daily.

Q. And they are recorded in your office? A. Yes, sir.

Q. Are they tabulated? A. Yes, sir.

Q. And do you send those reports to anybody? A. Yes, sir.

Q. Do you know about the amount of coal that came in last year from Illinois into this city, in round numbers? A. No, sir.

Q. Couldn't you approximate the amount of soft coal? A. No, sir.

Q. Was it as much as five million tons? A. I would not undertake to mention figures. I can furnish them, if you require it.

Q. Have you an accurate statement of it in your office? A. Yes, sir.

Q. Will you furnish that, please? A. I will, yes, sir, if it is required.

Q. We can get it more accurately from you than from anybody else. The rates on coal are fixed there at that office, aren't they? A. We do not issue any tariffs.

Q. You do not issue any tariffs? A. No, sir.

Q. Your Coal Traffic Bureau does not issue any? A. As a Bureau, we do not issue any tariffs. The individual roads issue their tariffs.

Q. The individual roads meet, through their representatives, at your office, and fix the tariff on coal, from the inner, outer and middle groups, into the city of St. Louis? A. They announce their intention to make certain rates.

Q. And that announcement is made at their meetings there at your office? A. Yes, sir.

Q. You say your Bureau does not issue any coal tariffs: I will get you to look at this paper I hand you: is that your name signed to that circular? A. (After examining paper): Yes, sir.

Q. What does it purport to be? A. It contains copies of the individual rates charged by the several roads between the points named therein, on bituminous coal, from mines in the State of Illinois.

Q. What roads are named there? A. Do you want me to read this?

Q. Yes, if you please. A. Baltimore, Ohio & Southwestern; Chicago & Eastern Illinois Railroad (Frisco System); Cleveland, Cincinnati, Chicago & St. Louis Railroad; East St. Louis & Suburban Railway; Illinois Central Railroad; Litchfield & Madison Railway; Louisville & Nashville Railroad; Mobile & Ohio Railroad; St. Louis & Belleville Electric Railway; St. Louis & O'Fallon Railway; St. Louis, Belleville & Southern Railway; St. Louis, Iron Mountain & Southern Railroad (Illinois division); St. Louis, Troy & Eastern Railroad; Southern Railway (St. Louis-Louisville lines); Vandalia Railroad; Wabash Railroad.

Q. This purports to contain the freight rates charged, together with the distances on these different roads, from points in Illinois, into East St. Louis, Illinois, and to St. Louis, Missouri, doesn't it? A. Yes, sir.

Q. And these rates were fixed at your office? A. They were announced by the roads at my office.

Q. They were agreed upon at your office, as the rates that should be charged by the roads named, for carriage from the mines at the points named to East St. Louis, Illinois, and St. Louis, Mo.? A. There wasn't any agreement about it.

Q. I will ask you if there was not an understanding and agreement—

Mr. Priest: (Interrupting) I submit that whenever a paper is offered in that way, in connection with the testimony of a witness, the paper itself must go in evidence. I think that paper ought to go in evidence, and be marked.

Mr. Crow: It will, perhaps, before we get through.

Mr. Priest: There should be no "perhaps" about it.

Mr. Krum: We don't have to put it in evidence unless we want to.

Mr. Priest: Then I object to the witness testifying as to the contents of the paper.

The Commissioner: So far as the witness testifying as to the contents of the paper is concerned, the objection is well taken.

Mr. Crow: I was not asking him to testify as to the contents of the paper.

Q. I will ask the witness if it is not true that there is an agreement, or understanding between the representatives of these Coal Traffic Associations, which meet at your office, that the rates announced there shall be the rates which shall be charged, and the rates that shall be maintained for the coal business? A. No agreement.

Q. Isn't there an understanding of that kind with you? A. I am not prepared to say whether there is such an understanding or not.

Q. You know whether or not you have such an understanding with the representatives of these roads, don't you?

A. If they want the rates changed, they notify me, and I change them.

Q. What is the reason they notify you? A. Because they want the rates changed.

Q. Why do they notify you? You are not connected with the roads? A. We promulgate the change for the benefit of the others.

Q. You do that in accordance with the purposes and objects of the Association, don't you? A. We do it for the benefit of all concerned.

Q. Isn't it true that whenever one of these roads does cut the rate that you promulgate, and it is discovered, the matter is brought up in a meeting there? A. I presume the matter is discussed when they do come together.

Q. That is the place they come together, isn't it? A. Yes, sir, if they want to get together.

Q. That is their meeting place, isn't it? A. Yes, sir.

Q. And when one of them charges another road with cutting the rate, the matter is taken up and discussed, and some adjustment of it is made there?

Mr. Priest: I am at a loss to see how that can be pertinent to this inquiry here. It looks to me like a fishing expedition, for something else—I don't know what it is—but something with which we have no concern.

Mr. Crow: The railroads in the Terminal Railroad Association, on the east side, that are carrying coal, are all in this association (indicating circular). The coal of St. Louis, with practically no exception, comes from the Illinois coal fields. This is a Bureau which controls that trade, and fixes the rates. They are enabled to do it because of the fact that they have ingress and egress to and from St. Louis and the East.

The Commissioner: Of course, I am in this position. If the testimony can in any way become relevant, I cannot rule it out.

Mr. Crow: The charge in the information is, that they control the trade and traffic, and coal is the heaviest item of traffic that passes in and out our city, one single item.

Mr. Priest: If the gentleman wants to try this case through the newspapers, he can do it. But I am concerned only with the trial before the Court. If he wants to try it for some other purpose, I have no power or disposition to interfere. But I want to get before the Court only the matters that are pertinent to the things in issue here.

Mr. Crow. Q. I will repeat my question. When one of them charges another road with cutting the rate, the matter is taken up, and discussed, and some adjustment of it is made there? A. Matters of that kind are discussed when the members do get together.

Q. Well, is there some settlement or understanding reached about those matters? A. It depends upon circumstances.

Q. What do you mean by that remark? A. They may or may not come to an understanding.

Q. To be specific, I will ask you if you remember a year ago last spring, the fact that what is known as the Valley Road, on the East side (being a part of the Missouri Pacific system) cut the rate from the Carterville district from 62½ cents a ton to about 35 cents; and that the representative of the Illinois Central Railroad, Mr. Harwood, the Coal Traffic Manager, came to you, and to the Coal Traffic Bureau, and made a complaint, and that there was a controversy about it there, and the representative of the Missouri Pacific Railroad, finding they had cut the rate—the matter was taken up and investigated? A. I remember a discussion in regard to the matter.

Q. And wasn't it taken up by your Association, and investigated, and wasn't it finally determined that the rate

had been cut for the Big Muddy Coal Company? A. Not through me.

Q. Who did investigate it? A. I don't know. Possibly the Illinois Central did. They made the charge.

Q. They did make the charge? A. You say they made the charge.

Q. Do you know Mr. Harwood? A. Yes, sir.

Q. He is a member of your Association? A. Yes, sir—the Illinois Central Railroad is.

Q. He is the Illinois Central Railroad's coal representative? A. Yes, sir.

Q. He lives in Chicago? A. I don't know where he lives. His office is in Chicago.

Q. After this occurrence the rate was reduced on all the lines from the Carterville district, to thirty-five or forty cents? A. I don't remember the figures, but the rates were reduced at one period.

Q. Was that the occasion of the reduction? A. I cannot say.

Q. Was it discussed there in your presence? A. Yes, sir, but I don't remember all the circumstances regarding those discussions. The rate was reduced.

Q. When it was reduced, was a new circular issued by you? A. I think so.

Q. In accordance with the understanding arrived at? A. Subject to the announcements made by the different roads, whatever they were.

Q. Subsequently, the rate was raised again, wasn't it? A. Yes, they raised it, according to that Information Circular No. 6, which are the rates in effect at present.

Q. How much of an increase is that, from the Carterville district? A. I don't remember.

Q. Can you tell by looking at that paper (indicating circular). A. No, sir, I cannot.

Q. They are practically restored to what they were be-

fore? A. Yes, sir, some of them were. I believe there were some changes made.

Q. Do the rules and by-laws of your organization provide any penalty for an infraction of these published rates? A. No, sir.

Mr. Priest: I submit that whatever the rules and by-laws are is best shown by a copy of the rules and by-laws.

Mr. Crow. Q. Is there any rule of your association, or any understanding, that there is any penalty attached to the cutting of these rates? A. No, sir. They are individual rates.

Q. I hand you now a daily statement issued by the Coal Traffic Bureau, signed by R. M. Fraser, Secretary, and ask you if that is the character of statement that you issue every day? A. (After examining paper) Yes, sir.

Q. What does it purport to give, the tonnage of the various roads? A. It purports to give the number of cars of coal received.

Q. Now we are going off on that thing again: I submit the paper itself is the best evidence of what it contains.

Mr. Crow: The paper does not prove itself.

Mr. Priest: The witness can identify the paper, and its genuineness, but what the paper shows must be shown by the paper itself, and not by the witness' interpretation of what it shows.

Mr. Crow. Q. What is the object of making these daily statements of the amount of coal hauled by each road? A. I cannot say. The railroad companies desire to know the amount of coal received, and for that reason they support the Bureau.

Q. You are in charge of that Bureau? A. Yes, sir.

Q. And you are there because the railroads employ you? A. Yes, sir.

Q. Now, don't you know the reason for wanting these statements? A. No, sir. No more than for information.

Q. For what purpose do they want this information? A. I cannot answer that. I don't know.

Q. Is it used for any adjustment between the railroads, that you know of? A. No, sir.

Q. Do you make any other or different statement from the form there made (indicating circular)? A. Except monthly, a consolidation.

Q. That is a consolidation and recapitulation of the daily reports? A. Yes, sir.

Q. And at the end of the year a consolidation and recapitulation of those? A. Yes, sir.

Q. And those are the only statements you render to the roads? A. Yes, sir.

Q. Do you know the proportion of coal that comes in from the Illinois coal fields, relatively to the entire amount of coal brought into the city of St. Louis? A. No, sir.

Q. Haven't you any idea what it is? A. No, sir, and I have no means of knowing.

Mr. Priest: Do I understand this paper is in evidence?

The Commissioner: No, and it has not been identified as yet. If the Government wishes to offer it in evidence, it should be identified.

Mr. Krum: The paper has not been offered in evidence.

The Commissioner: It ought to be marked so as to show to what paper the witness referred in his testimony.

The paper referred to is so marked.

Mr. Crow: We offer in evidence the first paper identified by the witness, and same is marked "Complainant's Exhibit No. 26."

Mr. Crow: We offer in evidence the second paper identified by the witness, and the same is marked "Complainant's Exhibit No. 27."

The paper referred to is so marked.

Mr. Priest: We do not concede the competency or

relevancy of either of these papers to the issues here; but think we can economize time by not making objection.

E. K. VOORHIS, a witness of lawful age, being duly produced, sworn and examined, on behalf of the Complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence, and occupation? A. E. K. Voorhis; St. Louis, Mo.; General Freight Agent of the St. Louis & San Francisco Railroad Company.

Q. Are you the representative of your company in the St. Louis Coal Traffic Bureau? A. The St. Louis & San Francisco Railroad is not a member of the St. Louis Coal Traffic Bureau.

Q. Is the Chicago & Eastern Illinois a member? A. I understand so.

Q. Are you its representative? A. No, sir.

Q. Who is its representative there? A. Mr. J. A. Middleton, the freight traffic manager, I believe.

Q. And where does he live? A. St. Louis, Mo.

Q. What is his address? A. Frisco Building.

Q. Then you know nothing about this Bureau? A. No, sir; I am not an official of the Chicago & Eastern Illinois.

Q. I hand you what purports to be an Illinois Central Coal Tariff, No. 900, Interstate Commerce Commission No. E665, and among other names appearing thereon as signing it, as a joint freight tariff, is E. K. Voorhis, General Freight Agent, of the St. Louis & San Francisco Railroad, St. Louis, Mo. Will you look at that and tell me what it is?

Mr. Priest: This is not made up by the St. Louis & San Francisco Railroad, I take it. It is filed by the Illinois Central Railroad.

A. (After examining paper). This seems to be the tariff of the Illinois Central Railroad, fixing the rates on coal, from the points named to points of destination.

Q. Isn't your name signed to it as the representative of the St. Louis & San Francisco Railroad? A. Yes, sir.

Q. Is that the extent of your knowledge and acquaintance with the soft coal business into the city of St. Louis? A. Yes, sir. St. Louis & San Francisco Railroad is interested in this tariff only on the traffic going to the destination shown as being on the Frisco, or points in the St. Louis suburban district.

Q. Then it is the coal representative of the Chicago & Eastern Illinois road who would know about whatever interest the St. Louis & San Francisco might have in the Illinois coal traffic? A. He would know whatever interest the Chicago & Eastern Illinois would have in the Illinois coal traffic. I would like to make an addition to my reply when I said that Mr. Middleton represents the Chicago & Eastern Illinois. Mr. E. J. Knickerbocker also represents the Chicago & Eastern Illinois. and I don't know whether he or Mr. Middleton represents it in this Bureau.

W. R. PEABODY, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name and occupation? A. W. R. Peabody; General Freight Agent of the St. Louis, Iron Mountain & Southern Railroad Company.

Q. Who represents, if anybody, the St. Louis, Iron Mountain & Southern Railroad in the St. Louis Coal Traffic Bureau? A. Our traffic manager.

Q. What is his name? A. W. C. Stith.

Q. Where is he located? A. St. Louis.

Q. In the Missouri Pacific Building? A. Yes, sir.

Q. Is he in the city now? A. No, sir.

Q. Where is he? A. I think in Chicago.

Q. Temporarily absent? A. Yes, sir.

Q. You have no knowledge about this Coal Traffic Bureau? A. No, sir.

At this point a recess was taken until 2:30 o'clock, p. m.

After recess, on July 11th, the following proceedings were had:

J. L. PENNEY, a witness of lawful age, being duly produced, sworn and examined, on behalf of the Complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name in full? A. J. L. Penney.

Q. What is your occupation? A. Traffic manager of the Terminal Railroad Association.

Q. How long have you been with the Terminal Railroad Association, Mr. Penney? A. About eighteen years.

Q. With the Terminal Railroad Association all that time? A. The Terminal Railroad Association, and its predecessor.

Q. What was the style of the corporation when you first began to work for it? A. St. Louis Bridge & Tunnel Company.

Q. That was in 1888? A. Yes, sir.

Q. In what capacity did you begin working with the St. Louis Bridge & Tunnel Company, in their freight department? A. Yes, sir.

Q. What successive positions have you filled? A. Chief clerk, agent, commercial agent, and traffic manager.

Q. The character of the business carried on by the corporation that preceded the Terminal Railroad Association of St. Louis was very similar to the character of the business carried on by this corporation? A. Yes, sir.

Q. Will you describe the duties of the chief clerk, and the other positions which you filled? A. The chief clerk is an assistant to the agent. The agent has control of the men in the freight department, and the collection of the freight receipts. The commercial agent, in a general way, has charge of the establishment or promulgation of the rates. The traffic manager's duties are practically the same.

Q. Practically the same as commercial agent? A. Yes, sir. About the same.

Q. Do they have the same two positions, with the same duties, in the same corporation? A. There was no traffic manager when they had a commercial agent.

Q. And vice versa? A. Yes, sir.

Q. Did you become commercial agent for any other corporation engaged in the transfer and hauling of freight and passengers between Illinois and Missouri, at East St. Louis and St. Louis, other than the corporations you have named? A. Yes, sir.

Q. What were they? A. St. Louis Merchants' Bridge Terminal Railway.

Q. At what time was that, about? Do you remember the year? A. 1894.

Q. What position did you occupy with this Terminal Railroad Association of St. Louis at that time? A. Commercial agent.

Q. Do you know who operated the Merchants' Bridge and the Eads Bridge at the date you mention? A. The Eads Bridge was operated by the Terminal Railroad Association. The Merchants' Bridge by the St. Louis Merchants' Bridge Company.

Q. Do you know who controlled the St. Louis Merchants' Bridge Company at that time? A. No, sir.

Q. You said awhile ago, I believe, that the duty of the commercial agent was, among other things, to fix the

rates—if I understood you correctly? A. I did not say fix the rates.

Q. That is what I understood you to say. If not, what did you say?

Mr. Priest: He said promulgate the rates.

The question referred to was here read, and the answer thereto.

Mr. Crow: Q. As commercial agent in 1894 for the Merchants' Bridge Terminal Railway Company, and the Terminal Railroad Association of St. Louis, I will ask you if the same rates were promulgated and fixed for the same kind of service over both lines? A. Practically—yes, sir.

Q. How long did you occupy the position of joint commercial agent—if I might use that term? A. Until Mr. Gays left the Merchants' Bridge, I think.

Q. Until Mr. Gays left the Merchants' Bridge? A. Yes, sir.

Q. Do you refer to Mr. H. W. Gays? A. H. W. Gays, general manager of the Merchants' Bridge.

Q. Do you know where he is now? A. No, sir.

Q. Is he in the city? A. I think he is somewhere in Canada.

Q. In Canada? A. Yes, sir.

Q. When did he leave the Merchants' Bridge? A. I don't remember. I cannot say.

Q. You cannot even approximate the year? A. I think perhaps a year, but it may have been nearer two years.

Q. Well, I don't care about the year; as well as you recollect. A. I do not recollect.

Q. Could you fix within the year, a year or two? A. It may have been a year, or two—it may have been less or more.

Q. What do you mean by that? A. A year from 1894.

Q. You mean he left a year or two afterwards? A. Yes, sir.

Q. Now, what position did you assume then, after he left? A. I acted in the same capacity, for the Merchants' Bridge as I did before he left.

Q. Well, did you still act for the Terminal Railroad Association? A. Yes, sir.

Q. In the same capacity? A. Yes, sir.

Q. Do you still so act? A. Yes, sir.

Q. Then you have continuously occupied that position? A. Yes, sir.

Q. Are the rates for the service—the same kind of service—rendered by the Merchants' Bridge Terminal Railway and the Terminal Railroad Association of St. Louis, practically the same now? A. Yes, sir.

Q. Can you tell me, Mr. Penney, whether or not the Merchants' Bridge Terminal Railway Company owns any passenger cars? A. No, sir; that is, I cannot tell.

Q. Have you seen passenger cars operating on their tracks? A. Yes, sir.

Q. How recently? A. Within a few days.

Q. What kind of cars are they? Regular coaches? A. Yes, sir.

Q. Do you know any points to and from which they daily run trains? A. St. Louis, Madison and Granite City.

Q. In Illinois? A. Yes, sir.

Q. From what point in St. Louis, Missouri? A. Washington avenue. I don't know just how far west they do go.

Q. Do you know whether or not they go to Union Station? A. No, I do not. I think not, though.

Q. Can you state whether or not tickets are on sale at Washington Avenue, in St. Louis, Missouri, to the points named by you, or other points in Illinois? A. Yes, sir.

Q. That can be utilized on the train that you mention? A. Yes, sir.

Q. Are those trains daily? A. Yes, sir.

Q. Do you know whether or not the Merchants' Bridge Terminal Railway Company owns any locomotives. A. No, sir, I don't know.

Q. You have nothing to do with the operating department? A. No, sir.

Q. Do you know who is the commercial agent of the Wiggins Ferry Company at this time. A. Yes, sir.

Q. Who is it? A. Mr. L. W. Putnam.

Q. How long has he been commercial agent? A. About a year, I should judge.

Q. Whom did he succeed? A. A man by the name of Hartwell.

Q. Where is Mr. Hartwell now? A. I don't know.

Q. Where is Mr. Putnam's office? A. On the third floor of the Rialto Building.

Q. As commercial agent of the Merchants and Terminal properties, do you have any conferences with Mr. Putnam? A. Yes, sir.

Q. What is the object of those conferences? A. Oh, we naturally come in contact with each other on subjects of mutual interest.

Q. Well, do you have any conferences for the purpose of fixing uniform charges? A. Yes, sir.

Q. For business between Illinois and Missouri, at East St. Louis, and St. Louis? A. Yes, sir.

Q. Then those rates are filed with the Interstate Commerce Commission, are they? A. Yes, sir.

Q. Is that a part of your duty, to file those rates? A. He files the rates, I presume, for the Wiggins Ferry Company; I file them for the Terminal Railroad Association.

Q. Do you have anything to do with the routing of the goods? For instance, I mean, not by the shipper but by

the companies after they take charge of it; whether it shall go over one bridge or the other bridge? A. Yes, sir.

Q. You are the official who directs that? A. Yes, sir.

Q. And do you direct that over either bridge you see proper, in the absence of specific instructions from the shipper? A. Yes, sir.

Q. Do you have the same authority to direct the goods to be sent over the Wiggins Ferry? A. Yes, sir.

Q. Do they have authority to route goods over either bridge? A. I presume they have.

Q. I mean the Wiggins Ferry Company? A. We would take it. They have no authority.

Q. No more than you have to direct one hundred cars that might be turned over to the Terminal Company to be turned over to the Wiggins Company? A. I would presume that the Wiggins Company would take that freight, and send it to them.

Q. Are you familiar with the physical conditions of the Merchants' Bridge Terminal Railway Company, and the Terminal Railroad Association of St. Louis? A. Fairly well, yes.

Q. At what point is the connection made for the transfer of cars, of freight, on the west side of the river, and below the Eads Bridge, if there is any point of connection, between the Merchants' Terminal and the Terminal Railroad Association? A. There is none.

Q. Where is the point of connection north of the Eads Bridge? Is there any physical connection? A. Between the Eads and the Merchants'? Mill Creek Valley?

Q. Yes. That is the only point of connection? A. Yes, sir.

Q. Whereabouts is the point of connection between the Merchants' Bridge Terminal Railway tracks and the Wiggins Ferry tracks? A. About North Market street.

Q. That is north of the Eads Bridge? A. Yes, sir.

Q. And south of the Merchants' Bridge? A. Yes, sir.

Q. And where is the connection between the Terminal Association tracks and the Wiggins Ferry tracks made? A. It has none.

Q. It has none? A. No, sir.

Q. Is there no way to transport the cars and freight over roads connecting those two lines? A. No, sir.

Q. Then business cannot be transferred from one line to the other without breaking the rail connection? A. Without using the rails of another company.

Q. Are the rails of another corporation used, and such connection made? A. At times; yes, sir.

Q. What company's rails are used? A. The Missouri Pacific.

Q. At what point? A. In the Mill Creek Valley. I might explain this by saying that we make it by paying regular switching charges to the Missouri Pacific, the same as we would any other intermediate line that we wanted to use.

Q. Now, you have no connection with the keeping of the books of the Terminal Association, or anything of that sort? A. No, sir.

Q. The only business that you have with the Terminal Company is that which you have described? A. Yes, sir.

Q. Do you know the man or men who are running the St. Louis Transfer Company? A. Yes, sir.

Q. Who is the man in charge of their traffic? A. I think Mr. George A. Tansey; Mr. Tansey and Mr. De Figuerido—either or both.

Q. What is the nature of the business that the St. Louis Transfer Company carries on? A. General drayage business.

Q. Where is that business carried on? Wholly in St. Louis. A. St. Louis and East St. Louis.

Q. What means of communication or transportation do

they use across the Mississippi River? A. This is general information, that everybody has.

Q. Certainly. A. I assume they use all. They use the Eads Bridge, and the ferry. I see them on ferry boats every day.

Q. Now, as traffic manager for the two properties you mentioned, do you have any business transactions with the St. Louis Transfer Company? A. Very little.

Q. Very little? A. Yes, sir.

Q. Do you know whether or not the two companies that you represent have any arrangement for the transfer of freight by the St. Louis Transfer Company, from the termini of the Eastern railroads in East St. Louis, to St. Louis, Missouri. A. Yes, sir.

Q. What is that arrangement? A. The same as with any other drayage company.

Q. It is the same? A. Yes, sir.

Q. No other, and no different? A. No, sir.

Q. Has it always been that way? A. So far as I know.

Q. Are you the official of your two companies that would make those arrangements? A. Ordinarily—yes, sir.

Q. Have you ever made any special arrangement of any kind with them? A. No, sir.

Q. Do you know whether or not this fact is true: that if a shipment is consigned from New York to East St. Louis, say over the Vandalia Line, and its final destination is a wholesale house on Washington Avenue, if the St. Louis Transfer Company is given an order by the consignee to transfer these goods, that five cents per hundred pounds is allowed—or four cents, or whatever it is—by the railroad company to the transfer company? A. To transfer the goods to the store?

Q. Yes. A. No, sir.

Q. You don't know anything about that? A. No, sir.

Q. In other words, the Terminal Railroad Association has nothing to do with that? A. No, sir.

Q. Whereabouts would that arrangement be made? Between the Transfer Company and the Eastern railroad company? A. Yes, sir.

Q. And what official of such an eastern line as I have mentioned would properly make that arrangement? A. Ordinarily, the traffic official, the freight traffic official.

Q. Of that road? A. Yes, sir.

Q. And he would be the proper person to get that information from, if it is true? A. Yes, sir.

Q. What official of the St. Louis Transfer Company would have control of that part of their business. A. Oh, ordinarily, I would say, Mr. Tansey, or Mr. De Figuerido.

Q. They are the two chief executive officers, are they? A. Yes, sir, as I know it.

Q. Now, in handling the traffic over the lines of the Terminal Railroad Association and the Merchants' Bridge Terminal Railway Company, does your department settle with the shippers? A. Yes, sir.

Q. And collect the bills? A. Yes, sir; that is, the freight department.

Q. I am speaking of the freight business now—not the passenger business. A. Well, the passenger business, too.

Q. Then your department would handle the coal business? A. Yes, sir.

Q. If a train load of coal was shipped from Carterville, Illinois, to some coal dealer in St. Louis, where would it be billed to, St. Louis, or East St. Louis; suppose it came over the Illinois Central? A. Probably 85 per cent. of the coal—you cannot take one particular car—would be billed to St. Louis. Or, if it were billed to East St. Louis, the reconsignment order from the shipper would be lodged with the agent at East St. Louis, prior to the arrival of the coal at East St. Louis.

Q. It would be lodged with the shipper?. A. Lodged with the agent.

Q. The agent of the railroad? A. Yes, sir.

Q. What do you mean by the "re-consignment order?" The order directing your company to take it? A. No, sir. Assuming that the car was billed to East St. Louis—it would be the order to change the billing to read St. Louis, and to the particular point in St. Louis where the coal was destined.

Q. When you say "change the billing," what do you mean by that? What would the agent there do? I just want to get it in the record. A. On receipt of the re-consignment order, as it is called, the agent would notify the yard clerk at probably the outer yard, to card the car to the connection, and probably to the yard of destination. He would issue—

Q. (Interrupting) When you say "card the car," do you mean that he would put a placard on it naming where it should go to? A. Yes, sir. The agent would then issue billing covering the car, which would accompany it to the transfer line.

Q. Well now, that billing you speak of would be a new bill of lading, would it? A. No, they do not issue a bill of lading.

Q. What is it? A. A way bill.

Q. A way bill? A. Yes, sir. Carrying a description of the property, the consignee, destination, and charges.

Q. And that would read to where? To the connecting line, you say; from the Illinois Central to the connecting line? A. For instance, this car is going over Eads Bridge, destined to Cupples Station. The billing for that car would read something like this: From the Illinois Central to the Terminal Railroad Association, Cupples Station, St. Louis. Coal; so much weight, so much charged;

on which the Terminal Railroad Association would handle the car.

Q. To whom would that way-bill be sent? A copy, of course, would be kept by the sender? A. Yes, sir.

Q. And to whom would the other one be sent? A. The way-bill would be sent to the transfer line, in this case the Terminal Railroad Association.

Q. The Terminal Railroad Association? And what would the Terminal Railroad Association do with it? A. They would take it in their account, collect the proper charges from the consignee, and make settlement with the Illinois Central.

Q. Would there be any charge for the simple re-consignment of the car? A. In this case, no.

Q. In what cases would there be, on coal? A. It is my understanding that if the re-consignment order is not placed with the agent of the railroad at East St. Louis prior to the arrival of the car, and the car is placed—

Q. By the central company? A. By the receiving line —yes, it could be called the central company; then if it is re-consigned to a connecting line a re-consignment charge is made.

Q. How much? A. Two dollars.

Q. Is that re-consignment charge in addition to the switching charge that the receiving line may have? A. The receiving line has no switching charge. The re-consignment—

Q. (Interrupting) You have it clear in your head, and I want to make it clear in mine.

Mr. Priest: He was starting to make an answer when you interrupted him.

Mr. Crow: I want to get it in the record in my own way.

Mr. Priest: But he wants to answer, when he begins.

The Witness: (Continuing) The re-consignment includes the handling of the car to the connecting line.

Q. When you say the car being placed by the receiving line, what do you mean by that? A. In its right place in the yards.

Q. Put on a side track, or something like that? A. Well, presumably, for delivery.

Q. Well, taken off the main track and put on one of the receiving tracks? A. Yes, sir.

Mr. Priest: Delivering tracks.

Mr. Crow: Well, receiving off the main line, and delivering to another line. I guess "delivering" would be more accurate.

Q. Now if that car was ordered, after it reached the delivering track, by the consignee, to the Terminal Railroad Association, it would have to be moved out by the road that brought it in, off that side track, or delivering track, and taken over to the connection, wouldn't it? A. Yes, sir.

Q. Would there be any switching charge for that? Or do you know anything about that? A. The $2.00 charge that I mentioned would cover that service.

Q. It covers that service? A. Yes, sir.

Q. And that is what is meant by re-consignment? A. Yes, sir.

Q. When a car has gotten over here to Cupples Station, what are the charges that your bill would carry; supposing the freight had not been paid at the other end? A. It would be—I cannot tell.

Q. I don't mean any amount. I mean just the character. A. The charge may represent the haul into East St. Louis, or not, as the shipper chose. It might include that, and the re-consignment charge, or neither. I think the general custom is to deliver such cars to us without any charges. The delivering line—say the Illinois Central

—as we have mentioned—collecting all charges up to the delivery to us. That is simply a matter of convenience and arrangement with the shipper.

Q. What lines of goods, or products, or manufactures are the heaviest shippers out of St. Louis eastwards? Do you know? A. Do you mean what is our heaviest tonnage?

Q. From St. Louis. A. From St. Louis proper?

Q. Yes; that originates here; St. Louis business. I guess that is what you would call it. A. I should judge, beer.

Q. Now the next heaviest line? A. Oh, I cannot tell.

Q. You can't tell that? A. No, sir.

Q. Isn't there a great deal of paper, and a great deal of woodenware shipped eastwards out of here? A. Very little.

Q. Very little? A. In car lots.

Q. Is it in broken lots? A. Yes, sir.

Q. Isn't St. Louis a big shipper of woodenware? A. Yes, sir.

Q. Which way does it go? A. Car lots go principally into the West, and Northwest, and Southwest.

Q. Is St. Louis a heavy hardware shipper? A. Yes, sir.

Q. Which way do the car lots go? A. Nearly all westward. That is, the larger portion of that tonnage from St. Louis is distributed westwards.

Q. Is St. Louis much of a shipper of groceries, a general line of groceries, eastwards? A. Yes, sir.

Q. Does that go in car load lots? A. Seldom.

Q. Broken lots? A. Yes, sir.

Q. How about dry goods? Do they ship much in the dry goods line eastwards. A. Not in proportion to the business handled.

Q. Not in proportion to the volume that goes in other directions? A. No, sir.

Q. Is the coal product the heaviest single item that comes in? A. Yes, sir.

Q. Next to that, what is probably the heaviest item from the East? A. Coal, and bituminous coal. I don't know that you make the distinction that we do. And structural iron, I should say, was the next heaviest tonnage we have, west-bound.

Q. Those structural iron shipments originate in East St. Louis, and adjacent territory, or further east? A. further east.

Q. Come from points along toward the Atlantic coast? A. Pittsburg, and the Lake Erie district.

Q. You refer now to structural iron shipments that are really St. Louis business, shipped into St. Louis, and not beyond? A. Both.

Q. What would be the third item in that line of shipments from the East to the West, in your judgment? A. I am not sure that iron is second.

Q. Oh, just your judgment about it, you know, as a traffic man for so many years? A. Cement is another thing we have a great deal of.

Q. Does that originate at near-by towns in Illinois and Indiana? A. Within a radius, I should say, of 400 miles of St. Louis, largely.

Q. Mr. Penney, the Merchants' Terminal Railway Company, and the Terminal Railroad Association of St. Louis, together with the respective bridges over which they operate, the Merchants' Bridge and the Eads Bridge, are operated as one property, are they, as far as the freight department is concerned? A. No, sir.

Q. They are not? Wherein are they independent of each other? A. Just as separately as any two companies

could be. We have our Merchants' Bridge accounts and business, and Eads Bridge accounts and business.

Q. Well, you are traffic manager for both roads. A. Yes, sir.

Q. You stated, I believe, awhile ago, that as traffic manager, if one hundred cars were turned over to either one of the corporations, that you could route those cars over either bridge that you thought proper? A. Yes, sir.

Q. Now, is that true of all other carriers that do a transfer business and an interstate business between Illinois and Missouri at St. Louis and East St. Louis? A. I don't know.

(The last two questions and answers were here read to the witness.)

Q. Have you the power, for instance, to route those cars over the Wiggins Ferry? A. Yes, sir.

Q. Where do you get that power? A. The Wiggins Ferry Company, or the Ivory Ferry, would be glad to have the business.

Q. But you are not their traffic manager? A. Not at all. It does not follow that I would have to be traffic manager.

Q. Isn't this true; that the business originating on the Merchants' Terminal, and the business originating on the Terminal Railroad Association, either by delivery by connecting carriers, or from industrial plants or factories on the roads of either corporation named, are handled indiscriminately over Eads Bridge and over the Merchants' Bridge? A. Not indiscriminately. They are handled over the route of least resistance, as we call it.

Mr. Priest: That means the road that would give the quickest and best service? A. That is it.

Mr. Crow: Q. That is, if it is most convenient for you to get the cars from the Blackmer Post Company and send them over the Eads Bridge than the Merchants' Bridge,

then you would send them over the Eads Bridge? A. We do not consider the convenience as much as we do the time.

Q. Put it that way. If you can get a quicker service by sending it over the Eads Bridge, you send it that way? A. Yes. We send it over the line that we can get rid of it quickest.

Q. That is, as between those two companies. A. Yes, sir.

Q. But if you could get it to Illinois quicker by sending it over the Wiggins Ferry, would you send it that way? A. That has never arisen. If we wanted to get rid of freight for any reason, we would not hesitate to give it to the Wiggins Ferry.

Q. If you wanted to get rid of freight for any reason, you would give it to any connecting carrier that is most suitable to you? A. Yes, sir.

Q. That is true not only of the Wiggins Ferry, but any other carrier? A. Yes, sir.

Q. How many carriers are there engaged in the transportation of freight and passengers from East St. Louis, and St. Louis, and Granite City, and Brooklyn, and Venice? A. How many others besides the two bridges?

Q. The two bridges, and two railroad corporations, and the Wiggins Ferry? A. Two bridges, two railroad corporations, and the Wiggins Ferry. The Madison Ferry is one. There is a ferry at South St. Louis—Victor Street, I believe. The Madison Ferry is for teams and passengers. The Victor Street is for teams and passengers. The Ivory Ferry is for freight.

Q. Cars? A. Freight cars; and I don't know whether passengers or not. I believe not.

Q. Is that all of the ferries? A. That is all I know of.

Q. What business does the Interstate Transfer have. A. They are a car ferry.

Q. They are a transfer car ferry? A. Yes, sir.

Q. Do you know who owns the Ivory Ferry? Just a matter of general information. A. The Missouri Pacific and Iron Mountain Railroad.

Q. That ferry, then, is used for the business of that road, and not for the general public, is it? A. It is used for the general public. Yes—it is a general ferry. They use it for the general public.

Q. For all roads? A. Yes, sir.

Q. Who owns the Interstate Transfer? Do you know? A. I do not know.

Q. Do you know who operates it? A. No, sir.

Q. Do you know who its chief officer is, its executive, managing officer? A. No, sir, I do not. Mr. Kavanaugh, I think. He used to be. I don't know whether he is now or not.

Q. The Madison Ferry is simply a wagon and passenger ferry? A. Yes, sir.

Q. Not a car ferry? A. No, sir.

Q. There is no transfer ferry north of Eads Bridge, is there, except the one that the Wiggins Company runs? A. The Interstate goes north.

Q. Does it? How far north does it go? A. About half a mile, or a mile, above the Merchants' Bridge.

Q. Do you know whether the Terminal Railroad Association has any freight depots? A. Yes, sir.

Q. Where are they located? A. About Twelfth to Eighth and Poplar. In that vicinity.

Q. In St. Louis, Missouri? A. Yes, sir.

Q. How many depots have they there? A. Two.

Q. What are their sizes? Not in exact dimensions, but are they small or large? A. Large depots.

Q. Are they the largest depots of their kind in the city? A. No, sir, I should judge not.

Q. Have they any freight depots elsewhere? A. No, sir.

Q. Are there any in East St. Louis? A. No, sir.

Q. Has the Merchants' Bridge Terminal Railway Company any freight depots? A. No, sir.

Q. Has the Terminal Railroad Association any passenger station? A. Yes, sir.

Q. Where is it located? A. At Fifteenth and Market streets.

Q. What is that station known as? A. St. Louis Union Station.

Q. Who handles the trains east-bound out of that station? A. The Terminal Railroad Association.

Q. Where are the trains, for instance, of the Pennsylvania Railroad, delivered to the Pennsylvania Railroad, after leaving the Union Station in this city? A. At the junction, either at the Relay Depot, or "The Willows," as they call it.

Q. In Illinois? A. Yes, sir.

Q. Are those trains made up again there, or do they proceed eastwardly in the manner in which they are made up here? A. I believe that can be better answered by a transportation man.

Q. Of course, if you don't know— A. No, I do not know. Except as a matter of general information.

Q. What official of your company would know about these things? A. Any of the operating officials.

Q. What one? The Master of Transportation? A. Mr. Burlingame, or Mr. Copeland.

Q. Mr. Copeland? What are his initials? A. Mr. J. J. Copeland.

Q. Where is he located? At Union Station? A. Yes, sir.

Q. What position does he occupy with the Terminal Company? A. Superintendent.

Q. Superintendent of the Terminal Company? A. Yes, sir.

Q. Mr. Penney, I will ask you if you know whether or not the Terminal Railroad Association of St. Louis, or the Merchants' Bridge Terminal Railway Company, either through you, or your department, or through any other of the departments of either corporation, has directly or indirectly given or allowed any rebates from the regular tariff?

Mr. Priest: I do not think that is involved in the issues of this case at all.

Mr. Crow: We think it is, in this way. That it has been developed here pretty thoroughly, in fact practically admitted, that they control the transfer between St. Louis and East St. Louis, and that they have established a tariff and rate. Now if they used that power to control this commerce, to discriminate, it is certainly injurious to the public, and meets exactly the spirit of the law under which this proceeding is held. That is the theory on which I ask the question.

Mr. Priest: Now, let's see what the theory of the Bill is. The Bill sets up certain contracts and certain agreements, and says that those contracts and those agreements are illegal, because they tend unreasonably to monopolize and obstruct interstate traffic and commerce. That is the whole charge in the Bill.

The legal question is whether, if those things are proven as alleged in the Bill, they constitute a violation of what is commonly known as the Sherman Act. If they do not, then they have the legal right of existence, and that legal right of existence cannot be broken down by violating some law which is incidental to the exercise of that right. In other words, the charge alleged in the bill either constitutes a violation of that law, or not; and those charges cannot be superadded to by any added delinquency in the performance or enjoyment of a legal right.

The Commissioner: It seems to me that your objection

is well taken. Unless he can show where that element comes in.

Mr. Crow: I did not understand from the order that you had any authority to exclude these questions.

The Commissioner: No, I have not the authority to exclude the question; except that it appears by the testimony offered that it is so irrelevant as to appear to be irrelevant at first blush to any issue that is on trial in this case. That is the information that I got from the judges.

Mr. Crow: Well, in every prosecution of trusts or combinations that I have ever known of, the question of rebates has always been gone into, on the theory that the very power to give a rebate implied a control of the business.

The Commissioner: What is the question?

The question is here read by the stenographer.

Mr. Priest: That certainly has no tendency to prove any of the allegations of the Bill, whatever.

The Commissioner: That is the way it strikes me.

Mr. Crow: Well, I must confess that I am somewhat surprised at it; I will have to take the matter up with the Judge.

The Commissioner: I am perfectly willing that the question should be kept in abeyance, until I can consult the Court about it.

Mr. Priest: There is, of course, a way that the General can get the Court to pass upon that question, if he wants to.

Mr. Nagel: Isn't that a good suggestion; that the Court be asked to pass upon it?

Mr. Priest: Your Honor, we have allowed the greatest latitude, but there must be a limit to it somewhere. We cannot—

The Commissioner (Interrupting): I must say that I am in a peculiar position in regard to this matter. I have repeatedly asked to have my powers defined, but I have not been able to get a clear definition of my powers, except in

regard to certain matters that I insisted upon. As to my power of ruling on irrelevant questions, I will hear the suggestion of the Judges, as a matter of course.

Mr. Crow: Well, you can submit the matter to the Judge. It will be the same as our going up and presenting it.

Mr. Priest: I think the proper way is to empower the Commissioner to pass upon the relevancy or irrelevancy of testimony.

The Commissioner: I have no such power.

Mr. Priest: I am perfectly willing to modify the order, and I think we ought to do so, in order to facilitate this examination.

The Commissioner: I will bring the matter to the attention of the Court.

CROSS-EXAMINATION, BY MR. H. S. PRIEST:

Q. Mr. Penney, I assume that your employment by the Terminal Railroad Association of St. Louis during the past eighteen years has given you an opportunity to familiarize yourself with the general terminal situation in St. Louis, and East St. Louis. I will inquire first concerning the facilities for handling terminal business by the Terminal Railroad Association of St. Louis: The lines of that company run generally east and west, across the river, over the Eads Bridge at St. Louis, do they not? A. Yes, sir.

Q. The lines of the Merchants' Bridge Terminal Railway run generally north and south, intersecting the lines of the Terminal Association at right angles? A. At St. Louis, yes, sir.

Q. At St. Louis. The two lines have no connection and no shipping points in common, except that which was made after the agreement between the Terminal Railroad Asso-

ciation and the Merchants' Terminal Railway Company, in 1893? A. That is true.

Q. Where is that connection, and by whom is it owned? You may indicate the point on the map which has been referred to by Mr. Pitzman in his examination. A. I can indicate the point of connection, but not the ownership. This is the point of connection (indicating).

Q. That is from between Eleventh and Twelfth and Ninth Street, south of Cerre, along Cerre Street, and over Cerre Street? A. We call it Eighth and Gratiot.

Q. Now that connection is by an elevated structure which was built by the St. Louis Terminal Railroad Association after 1893? A. About that time.

Q. Where you have described in your examination in chief, the freight depots of the Terminal Railroad Association as located at Twelfth Street, and between Twelfth and Poplar Streets? A. Yes, sir.

Q. Has the Terminal Railroad Association—I mean on the lines of the Terminal Railroad Association in St. Louis—any other freight depots than those two you have described? A. The Cupples Station is considered a freight depot of the Terminal Railroad Association.

Q. The Cupples Station? A. Yes, Cupples Station.

Q. Where is Cupples Station? At the mouth of the tunnel at Eighth Street? A. At the mouth of the tunnel at Eighth and Poplar Streets.

Q. At Eighth and Poplar Streets? How is the Union Depot reached by trains from the Merchants' Terminal Railway?

The Commissioner: Do you mean the Union Station?

Mr. Priest: The Union Station—yes. A. From the Merchants' Bridge over the Levee Elevated up to Eighth and Gratiot, and along about Gratiot Street over the connection, the incline which you have just described as the connection, and down through the Eads Bridge yard.

Q. Over the tracks of the Terminal Railroad Association? A. Yes, sir.

Q. So that independently of the Terminal Railroad Association the Merchants' Bridge Railway Company has no connection with the Union Station whatever? A. No, sir.

Q. Now, suppose freight should originate at some industry, we will say for sake of illustration, between St. Louis Avenue and Dock Street, on the line of the Merchants' Terminal, and it was intended to be delivered to the Frisco Railway for shipment to the West. What terminal lines would be used in transferring that shipment to the Frisco road? A. The Merchants' Bridge line to Eighth and Gratiot, and the Eads Bridge line to Twenty-third Street, the Frisco connection.

Q. In other words, the lines of railway of the Terminal Association, and of the Merchants' Terminal Railway, in St. Louis, are simply supplementary to each other? A. Yes, sir.

Q. And connecting the industries and shipping points of car-load lots in St. Louis with the railroad highways out from St. Louis? A. Yes, sir.

Q. And the terminal system and terminal advantages of St. Louis would be incomplete without those roads supplementing each other's efforts? A. Yes, sir.

Q. In addition to freight depots, has the Merchants' Terminal any team tracks or sidings? A. Yes, sir.

Q. How many team tracks or sidings has that company in St. Louis, and where are they located? A. I don't know the exact number. One is located at Twelfth and Gratiot Streets; another at Main and Carr Streets; another at Main and Biddle Streets; another at Main and Florida Streets; another at Main and Tyler Streets; another at Main and North Market Streets; another at Main and Branch Streets, running up toward Broadway; another at Main and Destrehan Streets; another at Main

and Bremen Avenue; another at Ferry Street—I don't know whether it is Main and Ferry—but at Ferry Street; another at Grand Avenue, just east of the intersection of Broadway.

Q. These last ones that you have mentioned are located on the line of the Merchants' Bridge Terminal Railway? A. They are all located on the line of the Merchants' Bridge Terminal Railway.

Q. How are these team tracks used? Explain the operation there, of receiving and discharging freight, and what facilities are necessary? A. They are used for the loading and unloading of freight to and from St. Louis proper. They are common to all railroads entering St. Louis and East St. Louis. They furnish the tracks with the proper road-ways for getting to the cars.

Q. The tracks upon which cars to be loaded or to be unloaded are placed? A. Yes, sir.

Q. The roadways are so that teams may approach and load and unload from the cars? A. Yes, sir. The yards are policed and in charge of yard clerks, for the performance of the routine duties incident to the loading and unloading of cars.

Q. Does the line of the Merchants' Terminal, or the Wiggins Ferry, so far as you know, handle any merchandise in parcels? A. No, sir.

Q. Why do they not handle it in parcels? A. No demand for it, I presume.

Q. So that the work principally performed by those two companies, so far as you know, is in delivering bulk freight, freight in cars? A. Car-load freight.

Q. To and from the industries and the unloading tracks? A. Yes, sir.

Mr. Crow: Which two companies is that?

Mr. Priest: The Merchants' Terminal Railway and the Wiggins Ferry.

Q. Some parcel business is done by the Merchants' Terminal Association? A. Between lines, a great deal, I was going to add.

Mr. Crow: What do you mean by "between lines?" A. Between connecting lines; as different from its having a warehouse of its own. For instance, the Wabash has opened a St. Louis station for less than car-load business, and the Merchants' Railway handles that business between the Wabash terminals in St. Louis and the Wabash line into East St. Louis.

Q. Do either the Merchants' Bridge Terminal Railway, or the Terminal Railroad Association of St. Louis, or the Wiggins Ferry Company, do any other than that which is commonly denominated a terminal or switching business? A. No, sir.

Q. Aside from the passenger train operated on the Merchants' Terminal, to which you have referred, no passenger trains or freight trains are operated over either of these lines? A. Oh, yes.

Q. I mean by schedule time. Of cars owned by those companies? A. No, sir.

Q. Of course, we understand that the Terminal Association handles all of the trains coming into East St. Louis from the East; to take them either at "The Willows," by the Merchants' Terminal, or at the Relay Junction, by the Terminal Association, and bring them into Union Station? A. We have no trains of our own except those I have mentioned.

Q. Now, I am getting you a little bit out of your line of business; but, take, for instance, the Pennsylvania Railway Company trains out of St. Louis. Some of them go over the Merchants' Bridge by way of the Terminal Association tracks and the Merchants' Bridge Terminal Railway tracks? A. Yes, sir.

Q. That is done in order to avoid the inconvenience to

the traveling public, occasioned by the smoke of the tunnel in passing over Eads Bridge, isn't it? A. That is what they advertise.

Q. Well, a good many of the roads prefer that the passenger trains go that way in order to avoid the tunnel? A. The passengers desire to go over that line, and insist, as far as they can, in going over that line, to avoid the tunnel.

Q. That tunnel extends from Gratiot Street— A. (Interrupting) Eighth and Clark Avenue.

Q. Up to Washington Avenue? A. Third and Washington.

Q. Thence on Washington Avenue to Main Street? A. Yes, sir.

Q. Is there any physical connection on the west side of the Mississippi River between the tracks of the Terminal Railroad Association of St. Louis and the Transfer Railway Company? A. No, sir.

Q. You have said to General Crow that the charges for the same service on the Merchants' Bridge Terminal Railway and on the St. Louis Terminal Association, for like service, is the same? A. Yes, sir.

Q. Is that true with respect of the service rendered by railroads generally between points; say, for instance, between Chicago and St. Louis, are the rates on the different lines running between Chicago and St. Louis the same? A. Yes, sir.

Q. And the rates which have been published by the Terminal Railroad Association, and the Merchants' Bridge Terminal Railway, have been filed with the Interstate Commerce Commission? A. Yes, sir.

Q. And each of these schedules has been signed by you as officer of the St. Louis Terminal Association, and of the Merchants' Terminal Railway? A. Yes, sir.

Q. When did you first begin filing those schedules with

the Interstate Commerce Commission? A. When I took charge of the tariffs, the publication of the tariffs and rates, in 1894.

Q. In 1894? A. Yes, sir.

Q. There has never been any concealment of the fact that you are acting as traffic manager for both of those lines? A. No, sir.

Q. And the schedules filed with the Interstate Commerce Commission bear your name as traffic manager of both of those roads? A. Yes, sir.

Q. This passenger train that you spoke of on the Merchants' Terminal Railway, is a train to accommodate—leaving at the foot of Washington Avenue in St. Louis—is to accommodate the workmen who live in St. Louis and who are employed in the industries over in Madison, Granite City, and East St. Louis? A. Yes, sir.

Q. And it runs only in the early morning, and late evening, to accommodate those workmen? A. It runs all day.

Q. Does it run all day? A. Yes, sir.

Q. And it is simply an incident to the general business of that company, to accommodate people employed over there? A. Yes, sir.

Q. Who would otherwise be without convenient service? A. Yes, sir.

Q. Now, Mr. Penney, isn't it a fact that with all of the terminals as portrayed on this map which you have now in front of you (I refer to the map concerning which Mr. Pitzman has testified) the railroad interests in St. Louis are still cramped for terminal facilities? A. Yes, sir.

Q. And has there not been an effort on the part of the railroads and the Terminal Association of St. Louis to extend and enlarge the facilities? A. Yes, sir.

Q. An earnest effort? A. Yes, sir.

Q. And that effort requires the concurrence of the Mu-

nicipal Assembly of St. Louis, which the Association has been unable to get, so far? A. Yes, sir.

Q. Now, Mr. Penney, I will ask you, from your experience as traffic manager, and as a railroad man, whether, if all of those terminals were combined under the control of one person, or one management, the commerce of St. Louis and East St. Louis could not be served with greater economy and facility, than if they existed as independent lines? A. Yes, sir.

Q. Under one management, every railroad entering St. Louis would be able to compete for the business which would arise at any industry upon any one of the lines, if they were united? A. Yes, sir.

Q. Otherwise, they would not be able to compete, because they would not have the same facilities; isn't that true? The same track facilities. A. They would not be able to compete; they would not have the same facilities, and would not be able to do the same business they are now doing.

Q. There are physical difficulties in the way of extending and enlarging the facilities in St. Louis, together with the want of legal consent by the public authorities of St. Louis, are there not? A. Yes, sir.

Q. Now to illustrate this inconvenience, suppose we start with a car of merchandise, or of anything else coming in over the Frisco road and delivered to the Terminal Railroad Association at Twenty-third Street, in St. Louis, Missouri, destined, we will say, to a point at the stock yards in East St. Louis. The car would be received at Twenty-third Street by the Terminal Railroad Association; it would then be delivered to the Merchants' Bridge Company at the connection here? A. Yes, sir.

Q. It would wait, according to the usual practice, an inspection there, to see if it was in a condition to be received? A. Yes, sir.

Q. On a delivering track, wouldn't it? A. Yes, sir.

Q. Then, after it was accepted, and it suited the convenience of the Merchants' Terminal Railway, it would take the car and deliver it to the next connecting carrier—which would be the East St. Louis Belt Railway. When it got to that point of connection, it would be delivered upon a delivering track, subject to inspection by the receiving company, and if found correct would await the convenience of the East St. Louis Belt Railway, and so on. Each connecting carrier, according to the usual practice, and the Master Car Builders' rule, would be entitled to inspect the car before it would be compelled to receive it, and all of that would occasion delay and a multiplication of agents in handling it, would it not? A. Yes, sir.

Q. Whereas, if there was one handling it, the car, immediately upon its arrival, would be delivered from Twenty-third Street to the National Stock Yards? A. Yes, sir.

Q. Have you any knowledge of the amount of time consumed by that process, if multiplied by the volume of business done over these different lines in St. Louis? A. We interchange 7,000 freight cars a day.

Mr. Crow: When you say "we," do you mean the two railroad companies? A. When I say "we," I am speaking generally of the Merchants' and the Eads.

Mr. Crow: And the Wiggins Ferry Company? A. No, sir. I don't know anything about that. The inspection probably takes now two minutes to the car. If those cars were inspected under the joint inspection rules at each connection of one of the companies that are shown here (indicating the Pitzman map) as being separate companies, it would increase, in my judgment, the inspection time alone, ten-fold.

Mr. Crow: Q. You mean the time now given to inspection would be increased ten-fold? A. Yes, sir. The result of it would be a capacity to handle perhaps seven or

eight hundred cars, at a maximum, instead of 7,000, a day.

Mr. Priest: Q. And the number of employes would be increased to meet that increased service? A. It would be an impossible thing to do. You cannot calculate the number of employes it would take.

Q. Do you know, as a fact, who are the owners of the stock of the St. Louis Terminal Railroad Association? A. No, sir.

Q. So in your opinion, Mr. Penney, to operate these terminals as independent roads, as railroads are now operated, and under the rules, it would be a practical embargo upon commerce in St. Louis? A. Absolute paralysis.

Mr. Priest: It is our purpose to show, as set forth in the Answer, that this terminal property is owned by the railroads jointly, as a terminal facility, and employed by them and maintained by them, and that no dividends are paid upon its stock at all, but that all of its earnings go to maintain the structure, and to extend the facilities. And it is so provided there are no dividends to accrue. It is to serve as a public utility, at the command, and for the convenience of all of the railroads entering St. Louis. But this witness seems to have no personal knowledge of that, and his business does not bring him in connection with that.

Q. Is that true, Mr. Penney? A. Yes, sir.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. Then it is because these roads are operated—the Merchants' Bridge Terminal Railway and the Terminal Railroad Association—as one road, so far as connections are concerned—that enables them to handle the 7,000 cars a day, is it? A. Yes, sir.

Q. Then, they are practically operated as one road? A. I was not speaking of the Merchants' Bridge. I was speaking of the some twenty lines here.

Q. You include the business each side of the river, do you? A. Yes, sir.

Q. Don't you include the Merchants' Bridge in there? A. Yes, sir.

Q. Both bridges? A. I include every one—as I understand the question asked—every one of the different colored lines here (indicating Pitzman map), as a separate company.

Q. You don't want to be understood to mean to testify, do you, that if these corporations were operated independently, that the business of St. Louis could not be carried on by them in practically the same shape it is now, do you? A. Absolutely.

Q. You do? A. Yes, sir.

Q. Then if they should get into the hands of competitors, your idea, as a traffic man, is that the business of St. Louis would be paralyzed? A. Absolutely.

Q. There was a time, wasn't there, when they were not in the hands of the same corporation, and not operated jointly, wasn't there? A. Not within my knowledge.

Q. Not within your knowledge? You began work for the Terminal in 1888? A. Yes, sir.

Q. Did the Terminal at that time own the Wiggins Ferry? A. No, sir.

Q. Up to 1893 they did not own the Merchants' Bridge either, did they? A. Not that I know of.

Q. The Merchants' Bridge Company was operative, wasn't it? A. Yes, sir.

Q. The business of St. Louis went on, didn't it? A. If you will allow me to explain; I was not speaking of the three companies; I was speaking of the various companies that go to make up each one of the three companies you are speaking of, when I said that if they were operated separately the business would be absolutely paralyzed.

Q. Explain what you mean by that? A. Here is one company—

Q. Mention them. Give the name of the company you mean. A. The Terminal Railroad Association; the Union Railway & Transit Company; the Tunnel Railway of St. Louis; Eads Bridge; Terminal Railway of East St. Louis; East St. Louis and Carondelet Railway—

Q. You mean the constituent companies that have been built up from time to time, and that now form, first the Terminal Railroad Association, and then the Merchants' Bridge Railway Company, and then the Wiggins Ferry Company? A. Yes, sir.

Q. I did not understand that was what you testified to. A. I understood that was the question.

Q. Referring now to the various companies that you have mentioned; you know, as a matter of fact, don't you, that they were all short and comparatively insignificant pieces of line, as compared with the present system into which they are merged—the Terminal Railroad Association? A. Yes, sir.

Q. And never were intended to be operated independently, were they? A. No, I should not think so.

Q. As a practical railroad man, you know that? A. Yes, sir.

Q. And when the additions were made to what is now the Terminal Company from time to time, necessarily the operation was as one company? A. Yes, sir.

Q. Are you acquainted with the location of the Relay Depot in East St. Louis? A. Yes, sir.

Q. Does your business as traffic manager cause you to understand the workings of that institution known as the Relay Depot? A. No, sir.

Q. Do the two lines that you represent as traffic manager deliver freight to the relay depot? A. Only one.

Q. Only one? A. The Eads Bridge.

Q. Now speaking about those passenger trains operated by the Merchants' Bridge Terminal Railway Company, I will ask you if it is not a fact that those trains pass over the Eads Bridge as well as the Merchants' Bridge? A. No, sir.

Q. All over the Merchants' Bridge? A. Yes, sir.

Q. They are intended to serve not only people that live in St. Louis, but people that live in Madison and Granite City, are they not? The residents there? A. The trains were put on for the purpose of serving those industries at Madison and Granite City.

Q. They carry anybody, though, that will buy a ticket and get on and ride? A. Yes, sir.

Q. Isn't it a fact that the citizens of Madison and Granite City do most of their travel between St. Louis and their respective towns by means of this Merchants' Bridge Terminal Railway? A. Our ticket sales would indicate that there are very few.

Q. What is their method of getting over? A. I think the most popular is the traction line.

Q. Is there a trolley line to Madison and Granite City? A. To Madison, and East St. Louis. Yes, sir.

Q. The trolley runs up there? A. Yes, sir.

Q. Then the traffic goes over the Eads Bridge? A. Or the Madison Ferry.

Q. How long has it been running up there? A. Several years.

Q. Several years? A. Yes, sir.

Q. Do you know the distance between the Eads Bridge and the Merchants' Bridge? A. About two and a half miles.

Q. The St. Louis Transfer Railway Company's tracks run up the west bank of the Mississippi River from a point below the Eads Bridge to a point north of the Merchants'

Bridge, don't they? A. They run to about Grand Avenue, I think.

Q. That is north of the Merchants' Bridge, where Grand Avenue goes into the river? A. Yes, sir.

Q. Now, the Merchants' Bridge Terminal Railway Company's tracks run from the west approach of the Merchants' Bridge, down the river, southward, practically parallel with the Transfer tracks, until they reach the elevated road, don't they? A. Yes, sir.

Q. And there they pass along the same street, but above the surface instead of under it? A. Yes, sir.

Q. Down to Gratiot Street, or that neighborhood? A. Yes, sir.

Q. Where it turns westward and connects with the Merchants' Terminal Railway tracks? A. Yes, sir.

Q. The Merchants' Terminal Railway Company, together with the Merchants' Bridge, was built as a competitor, was it not, of the Eads Bridge, and the Terminal Railroad Association of St. Louis? A. Yes, sir.

Q. And the Wiggins Ferry was there doing the same kind of business that it does now, practically, prior to the time that either of them was built, wasn't it? A. Yes, sir.

Q. And it still continues to do the same kind of business that both the Merchants' Bridge Terminal Railway Company and the Terminal Railroad Association does? A. In a measure—yes.

Q. Do you know whether or not the Wiggins Ferry Company transfers any passenger cars? A. I do not know.

Q. They don't transfer passenger cars here at all now, do they? A. No, sir.

Q. But there are a great many freight cars transferred by ferry, aren't there? A. Yes, sir.

Q. Can you tell me how many lines of Eastern railways

come into East St. Louis? Have you any knowledge on that subject? A. I can, by counting them up.

Q. Well, never mind. A. I think there are sixteen, if my memory serves me.

Q. Can you tell me how many come to St. Louis from the West. A. Six.

Q. Six main lines? A. Yes, sir.

Q. That makes twenty-two railroads? A. Twenty-two.

Q. I believe you stated awhile ago that you had no knowledge of the arrangements between the transfer companies and those Eastern lines, except in a general way? A. Well, yes, I have knowledge.

Q. Of what portion of the business do you have any knowledge? Do you have any knowledge of the contracts that they make for delivery? A. Oh, no. My knowledge would be the same as possessed by any other railroad traffic man in St. Louis.

Q. What would that be—what character—of a general nature? A. A general nature. But, nevertheless, it is correct.

Q. Have you any knowledge of the arrangements that the Transfer Company has for securing the goods outbound and inbound from St. Louis, that is destined to travel over the rails of the Eastern roads? A. I would say not, except through their warehouse.

Q. Have they warehouses here in St. Louis? A. They utilize the warehouse of the St. Louis Transfer Company for accomplishing their St. Louis rate.

Q. What do you mean by that? A. The freight rates to and from the East are now made to St. Louis, and have been since the first of the year.

Q. The first of 1906? A. Yes, sir. St. Louis bills of lading have been given, and the Eastern roads make the

St. Louis Transfer Company depots the delivering points, at the St. Louis rate, for St. Louis business.

Q. How was that St. Louis rate made up? East St. Louis plus the Terminal rate? A. No, sir.

Q. How was it? A. It was made up of a rate to St. Louis, a differential higher than East St. Louis.

Q. Made up of a rate to East St. Louis, plus the transfer charge, wasn't it? A. No, sir.

Q. Well, what was it made up of? A. It was made up, as I say, of a rate to East St. Louis, plus a differential, which is not a transfer charge.

Q. How much per hundred pounds? A. A maximum of one cent a hundred pounds from East St. Louis on less than car-load business.

Q. On what lines of goods? A. Dry goods, hats and caps, boots and shoes, woodenware—nearly every class of merchandise in less than car-loads.

Q. First class merchandise? A. First, second and third.

Q. Coal, however, is omitted from that classification? A. It is reduced 33 1-3 per cent.

Q. I say it was omitted from that classification? A. This is the official classification, which does not apply to Illinois.

Q. Does not apply to points anywhere in Illinois? A. No, sir.

Q. To all points beyond Illinois? A. Yes, sir.

Q. That is, the eastern boundary of Illinois? A. All points beyond the eastern boundary of the State of Illinois, practically.

Q. Is that the extent of your knowledge of the transfer arrangements between the railroads and the St. Louis Transfer Company? A. Yes, sir, practically.

Not being able to complete the taking of testimony, I

adjourn the further hearing of same until Thursday, July 12th, 1906, at 10 o'clock, a. m.

R. E. Rombauer, Special Commissioner.

St. Louis, July 12, 1906.

Met pursuant to adjournment as above, on Thursday, July 12, 1906, at 10 o'clock a. m., in the U. S. Court of Appeals Room, in the Federal Building in the city of St. Louis.

Present: Mr. R. E. Rombauer, Special Commissioner. Messrs. D. P. Dyer, E. C. Crow, Charles Nagle and Chester Krum in behalf of the Complainant; and Messrs. M. F. Watts, and H. S. Priest, in behalf of the Respondent.

The following proceedings were had:

Mr. Dyer: In this matter of taking testimony, there are certain witnesses here to-day, and others will be here to-morrow and the next day, whose testimony we desire to take during the present week; but the Government's counsel appreciate fully the urgency for some vacation in the summertime, when it is more convenient to Your Honor and more convenient to counsel to take it; and after conference this morning we have sought to accommodate each other, with a view of expediting this case and closing the taking of testimony as soon as possible. If Your Honor pleases, we have agreed that after this week's testimony is concluded you may announce an adjournment until the first Monday in October, 1906.

It is stipulated and agreed by and between counsel for the Government and counsel for the Respondent, in this case, that the Complainant in the Bill shall have until the 20th of October, 1906, to conclude the taking of testimony upon the part of the Government; and that the Respondent shall have until the 1st day of November, 1906, to conclude the taking of testimony upon its part. If necessary the Com-

plainant shall have ten days after said 1st day of November, 1906, in which to put in rebuttal testimony, if any such be required; with this reservation, however, that if either side is unable to produce any witness or witnesses during the period of time covered by this stipulation, then the Court may grant such further time for the taking of their testimony, with all expedition, as may be fair and proper, for both sides.

The Commissioner: I understand this has been agreed to by both sides, and it may be entered upon the record.

GEORGE H. MORGAN, a witness of lawful age, being duly produced, sworn and examined on the part of the Complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence and occupation. A. George H. Morgan; St. Louis, Missouri; Secretary of the Merchants' Exchange of the City of St. Louis.

Q. As Secretary of the Merchants' Exchange, do you compile the tonnage of St. Louis, inbound and outbound? A. I do.

Q. In that compilation is it separated into tonnage that goes eastward and comes from the East into St. Louis, and that which goes in other directions? A. The inbound and outbound tonnage of each road is reported.

Q. Of each road? A. Each road.

Q. Who reports that? A. The local agents of the various roads.

Q. Of the respective roads? A. Yes, sir.

Q. To whom is that report made? A. It is made to the Merchants' Exchange.

Q. And to what particular officer of the Merchants' Exchange. A. To myself.

Q. What do you do with that material when you get it?

A. Those statements are made monthly; I aggregate them and at the end of the year make up a total and publish it.

Q. Have you the reports for the years 1904 and 1905 of the roads used for inbound and outbound shipments? A. I have.

Q. On different items? A. Yes, sir.

Q. Have you it on the item of coal for inbound shipments? A. I have the inbound shipments of coal, but not the outbound.

Q. Will you give the stenographer the total tonnage for the years 1904 and 1905? A. I have it in print here (indicating circular).

Mr. Watts: Why not offer the printed statement?

Mr. Crow: Q. This is the total tonnage you have here, of everything? A. Yes, sir.

Q. This is an accurate, printed copy of the reports compiled by you? A. Yes, sir, that is correct.

Mr. Crow: We offer in evidence this printed statement, being a report made to the Merchants' Exchange of St. Louis of the business of the St. Louis Bridges and Ferries for the year 1905, which contains also the amount of coal received in St. Louis over the respective roads and by river, for the years 1905, 1904, 1903 and 1902.

The Witness: I ought to state that these figures comprise receipts on both sides of the river; that is not separated; all of the tonnage brought in on the East side, whether it comes over to this side or not, is included in this statement.

Q. I do not catch your point. A. These receipts of inbound and outbound freight received on the east side of the river are included. The freight that is transferred to St. Louis is not separated. In other words, say the Baltimore & Ohio Railroad brought into East St. Louis so many tons of coal. Whether that all came over on this side, we

do not know. As we know, a great deal of it goes to the industries in East St. Louis.

Q. And you have no figures to show that? A. No, sir.

Q. Then your figures count East St. Louis freight as East St. Louis freight? A. Yes, sir, as St. Louis freight.

The paper referred to is marked "Complainant's Exhibit No. 28."

Q. This report shows the business on the bridges? A. Yes, sir, on the first page.

Q. But it does not show the coal that goes over the bridges? A. No, sir.

Q. Haven't you those figures? A. No, sir.

Q. I thought you compiled a book that showed the coal that came over the bridges and ferries. A. That is the same thing. That is what is published in our Annual Report.

CROSS-EXAMINATION, BY MR. H. S. PRIEST:

Q. Have you in your office the data showing the growth of the traffic in St. Louis and East St. Louis during the past twenty-five years? A. I don't know that I have those tonnage statements for that length of time. I have it for a number of years.

Q. How far back? A. I don't recall now, but for a number of years, fifteen years, perhaps.

Q. Your comparison here (indicating Exhibit No. 28) extends back to 1895 only? A. I think I have it for longer.

Q. This tonnage from west to east has increased from 2,825,077 tons to 6,508,884 tons in 1905, has it not? A. I think those are the figures there.

Q. The total tonnage from east to west increased from 5,627,882 tons in 1895 to 9,653,892 tons in 1905? A. Yes, sir, that is right.

Q. The total increase in both ways, from 1895 to 1905,

was from 8,452,959 tons to 16,162,776 tons? A. Yes, sir, that is right.

Q. That is practically double. A. Nearly.

Q. In ten years? A. Yes, sir.

Q. Are you familiar with the physical terminals in St. Louis? A. No, sir.

Q. You know nothing about the operation of the terminals? A. No, sir, I have no occasion to know about them.

Q. In your data you treat East St. Louis and St. Louis as common commercial points? A. Yes, sir.

Q. And it is so understood in commerce? A. Yes, sir.

Q. Mr. Morgan, if you have it conveniently, will you kindly tabulate the statistics of the traffic from 1895 back as far as you have them. I should like you to go back to 1887, and include in that the traffic done on the river by boats, and the dimunition of the traffic by river. That has diminished constantly since the railroads were opened, has it not? A. I understand you mean inbound and outbound freight by river?

Q. Yes, and the combination of the two. A. Yes, sir.

Q. As far back as you have it. A. Very well. By river and rail. You mean a tonnage statement like this (indicating Exhibit 28)?

Q. Yes. A. I can do that, yes.

Q. Showing the increase of tonnage by rail, if there has been an increase; and the diminution of tonnage by river, if there has been a diminution. A. Very well, I will do it.

RE-DIRECT EXAMINATION BY MR. CROW:

Q. Are you familiar with the circumstances that led up to the securing of the charter for the Merchants' Bridge? A. Well, somewhat.

Q. Were you present when the meetings were held on

the Merchants' Exchange in favor of the enterprise? A. Yes, sir.

Q. Did you know anything about the amendment to the charter? A. I did not, no, sir.

Q. You were not a member of the Board of Directors, or anything of that sort? A. No, sir.

Q. And all you know was what was a matter of general knowledge? A. I know what was a matter of record before the Board.

Q. You mean the Board of Directors of the Merchants' Exchange? A. Yes, sir.

Q. Was the proposition before the Board? A. You mean the charter?

Q. No, I mean the proposition to build the Merchants' Bridge? A. Yes, sir.

Q. The Merchants' Exchange officially did not take any action on it, did they? A. Why, as I recall it—it is a long time ago—the Exchange did take action looking to getting a charter for the new Bridge. But it was found that the Exchange under its charter could not undertake such an enterprise, and, as I remember now, the Bridge Company was then formed.

Q. And that was all the connection that the Merchants' Exchange had with the matter—that is, official connection? A. If I remember aright, certain gentlemen were requested to take the matter up and carry it on, as the Exchange, as a corporation, was not empowered, under its charter, to undertake it.

Amount of freight in tons received at and forwarded from St. Louis (including East St. Louis) for years named:

	By Rail.	By River.	Total Tons.
1905	39,141,663	370,425	39,512,088
1904	37,050,165	377,935	37,429,000

1903	34,551,579	552,617	35,104,196

1873	4,400,594	1,584,305	5,984,899

Statement furnished by Mr. George H. Morgan, in response to request by counsel for the defendant.

O. A. ORVIS, a witness of lawful age, being duly pro-

duced, sworn and examined on the part of the complainant, testified as follows:

DIRECT EXAMINATION BY MR. E. C. CROW:

Q. Please give your name, residence and occupation? A. O. A. Orvis; St. Louis, Missouri; I receive and ship grain.

Q. How long have you been in the grain business here? A. Fourteen years.

Q. Were you in the grain business before you came here? A. Yes, sir.

Q. Whereabouts? A. In Kansas City.

Q. What is the character of the business that you do in receiving and shipping grain—describe it? A. I am a buyer; buy it and bring it in here; sell it and ship it out.

Q. You buy it at points outside of the City of St. Louis and ship it into the City of St. Louis? A. Yes, sir.

Q. You ship it in in the name of your firm or your own name? A. Yes, sir.

Q. And when you ship it out it is shipped out to some party who buys it? A. Yes, sir, some party in the South or East.

Q. You are familiar with the character of the service rendered by the Merchants' Bridge Terminal Association, and the Terminal Railroad Association—what is commonly termed the terminal service, here in St. Louis, are you? A. Yes, sir.

Q. I will get you to state whether or not your business suffered any delays by reason of the service?

Mr. Priest: We object to the question in that form. It is for the witness to state the facts, and not draw his conclusions.

The Commissioner: The objection will be noted.

Mr. Crow: Q. Tell us the facts that have happened with reference to the shipment of grain by you, whether

or not the delivery from these terminal tracks, and the roads in connection therewith, has been prompt at all times? A. Well, yes, they are as prompt as the facilities at their disposal would allow.

Q. Have you suffered any delays? A. Oh, yes, at times, serious delays.

Q. When did that happen? A. Oh, that was two or three years ago, just prior to the World's Fair.

Q. How extensive were your delays? A. Oh, sometimes we would be eight or ten days getting a car across the river.

Q. After it arrived at the east side? A. Yes, sir, but more on this side, coming east. My business would be that way more.

Q. Do you know, or did you ever investigate to learn the cause? A. Yes, sir.

Q. What was it? A. Lack of motive power, and terminal facilities.

Q. Lack of motive power on the part of the Terminal Companies? A. No, sir, the inbound Companies. The roads bringing it in, not being able to move it promptly to the switch road, and then when the switch road would get it, it had not trackage room to handle it as promptly as they should.

E. H. EHRLER, a witness of lawful age, being duly produced, sworn and examined, testified, in behalf of the complainant, as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Give your name, residence and occupation. A. E. H. Ehrler; St. Louis, Missouri; Traffic Manager for the Graham Paper Company.

Q. How long have you been Traffic Manager for that Company? A. About twenty-five years.

Q. What are your duties as Traffic Manager of that Company? A. Everything pertaining to freight matters in a commercial business.

Q. The shipping of goods in and out? A. Shipping in and out, routing the freight, handling the freight claims, tracing, looking after the deliveries of freight at the depots whenever there is any delay, or to look after the payments of freight bills at the various stations, and car service matters of that kind.

Q. How does the volume of business carried on by your house compare with the volume of business carried on by similar houses throughout the country? A. In a similar line of trade, you mean?

Q. Yes, that is what I mean. A. The probabilities are, that the Graham Paper Company is second to none, so far as the paper business is concerned.

Q. What particular kind of paper do you handle? A. We handle all kinds of paper, except wall paper; that is a special business.

Q. Your house is not a manufacturer of paper? A. No, sir.

Q. You are what is termed a "jobber?" A. Jobbers and wholesalers.

Q. You are familiar with the terminal conditions here in St. Louis, of course? A. Yes, sir.

Q. And with the rail conditions and facilities in and out of the city? A. Yes, sir.

Q. Does your house do any business that requires you to handle goods across the river, backward and forward? A. A good deal of it, yes.

Q. What method do you use there, to get your goods across the river, where you have a shipment that goes to Indiana or Ohio, say? A. We handle all of our business to and from East St. Louis with our own teams—that is, 95 per cent. of it.

Q. What is the reason you do that? A. So as to be able to better serve the trade.

Q. In what way do you better serve your trade by handling it with your own teams? A. For instance, in making a shipment to any point in Illinois or east thereof, by carting it across the river with teams, we endeavor to get it to the railroad in time to load it out the same day, so as to have the shipment at its destination the following day, or as soon thereafter as possible; whereas, if we delivered it on this side, the chances are it would be delayed about twenty-four hours or longer by reason of its having to be forwarded from the terminals on this side to the terminals on the east side, and unloaded in station order.

Q. If it is delivered to some warehouse of the Terminal Railroad Association, or in a car on the receiving track of the Terminal Railroad Association, on this side of the river, suppose it is bound over the Pennsylvania, to a point over in Indiana, what would be the process of handling and re-handling which that shipment would go through? A. On less than car-load shipments we would necessarily have to deliver it to the Terminal Railroad Association station—or to the St. Louis Transfer Company, rather. In delivering it to the Terminal Company it would necessarily have to be unloaded at the Vandalia depot in East St. Louis, and reloaded again the next day.

Q. What do you mean by that? Do you mean it would be loaded here in St. Louis for the Pennsylvania Railroad depot in East St. Louis? A. Yes, sir.

Q. Then, what would happen in East St. Louis? A. They would take it out of the car, and place it, in station order, in the regular line of handling their business. As against that, we deliver to the St. Louis Transfer Company's depots, on this side, and the freight would be taken right over to East St. Louis and delivered right to the

Vandalia depot. That, however, would mean additional cost for transfer.

Q. How much would that additional cost be? A. It would average up about four cents a hundred.

Q. And to obviate that, on less than car-load lots you use your own teams? A. Yes, sir.

Q. If the service was prompt, by delivery to the Terminal Company on this side, the necessity of using your own teams would be obviated? A. If that could be done —yes, sir.

Q. Do you know what that team service costs you, in excess of what the charge would have been if the delivery could be had on this side, a perfect service had—say, for last year?

Mr. Priest: I am utterly at a loss to see the relevancy of this sort of inquiry, but I suppose, to economize time, we will let it go in.

A. It costs more to do business from East St. Louis than it does on this side, because of the longer trips and the charge for bridge transfer, for teams; and since the reduction in the bridge toll we do more business on this side.

Q. When was that reduction made? A. In January or February of this year.

Q. Are you familiar with the method of getting goods into the city that come from the east side lines? A. The conditions west-bound are the same as east-bound. We also haul our in-bound trade from East St. Louis with our own teams.

Q. For what reason? A. For the same reason, that there would be more or less delay in goods getting over from the east side to the west side.

Q. You have had that experience, have you? A. Yes, sir.

Q. Do you know whether or not there is any arrangement between the East side lines that are members of the

Terminal Railroad Association, as they call it, and the St. Louis Transfer Company, for the reception and delivery of freight by the Transfer Company in St. Louis? A. That is a question they are trying to solve now, I believe.

Q. But what was the arrangement, before the 1st of January, 1906, if you know? A. Before that time the freight rates from eastern sections applied to East St. Louis, and another set of freight rates applied to St. Louis. And the St. Louis rate as a general proposition was the bridge toll higher than the East St. Louis rate. Consequently, the Transfer Company, in hauling from East St. Louis, would charge the consignee in St. Louis the cost of drayage on freight to St. Louis.

Q. What would that average, on general merchandise? A. It runs about four cents a hundred.

Q. What would that aggregate for an average size car? A. The maximum car, as a general proposition, is about 30,000 pounds, which would make it about twelve dollars.

Q. I will get you to state—if you know—whether or not, prior to 1906, the East Side lines belonging to the Terminal Company made any allowance to the St. Louis Transfer Company, or the consignee of goods that were ordered delivered from the East Side lines by the St. Louis Transfer Company? A. On shipments delivered direct to the merchants, I hardly believe any allowance was made to the Transfer Company by the railroad company for delivering the goods. But the railroad companies would pay the Transfer Company whenever the Transfer Company would haul the goods to the St. Louis Transfer Company's depot. After that, the merchants would have to call at the St. Louis Transfer Company's depots to get the goods. In other words, I do not believe there are any "store-door" deliveries here.

Q. The goods that were handled by the Transfer Company from East Side lines were delivered to what point in

St. Louis? A. To the St. Louis Transfer Company's depot.

Q. And for that service, you say the railroad companies on the East Side allowed the Transfer Company? A. They would allow the Transfer Company. That applied on such business where the rates were the same to St. Louis and East St. Louis.

Q. But suppose the rates were not the same? A. Then, I believe in most cases the Transfer Company, or the drayage companies, would have arrangements with the commercial houses for a fixed rate for cost of transfer across from East St. Louis to the store door.

Q. After the goods arrive at the warehouse of the St. Louis Transfer Company, how would the merchant get them to his place? A. In that case the St. Louis Transfer Company sends out a notice to the consignee of the arrival of goods. The consignee would go down there, the same as going to any other railroad depot, and obtain delivery.

Q. If the goods were ordered over, say, the Weber Transfer Company, having been billed to St. Louis over the East Side line, would any drayage charge be paid by the railroad, in that event? A. Well, of course I don't know, but I hardly think there would.

Q. Do you know whether or not, they allowed it to any other line than the St. Louis Transfer Company, prior to 1906? A. My impression is they did not, because I know quite a number of private drayage companies that tried from time to time to get similar conditions, but it seemed that usually the railroad companies recognized the St. Louis Transfer Company as their appointed agent. It was not a case of discrimination, but more to regulate the business.

Q. I believe you stated that the reason your house put on this special service of drays and teams of your own was

to enable you to compete with your competitors who sold goods east? A. Yes, sir; for instance, Chicago, Cincinnati, or Indianapolis, will make deliveries in territories east of here the next day; and in order for us to do likewise it is necessary that we deliver our freight to the East St. Louis stations of the different railroads, and get them started out of town.

Q. Do you know any other houses, in different jobbing lines, that are compelled to do the same thing? A. Well, I don't know of any one in particular, but there are any number of firms doing it, because that is the freight that is going across the bridge all the time.

Q. Do you know, as a matter of fact, whether or not there is a heavy traffic of that kind over the Eads Bridge? Do you know that of your own knowledge? A. Yes, sir.

Q. Does any of it go by the ferry, too? A. Well, when I speak of the bridge, I practically speak of the ferries, too, as they are in the same condition. Because a team will take either the bridge or the ferry.

F. H. BLANKENMEISTER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please give your name, residence and occupation? A. F. H. Blankenmeister; St. Louis, Mo.; glass and queensware, at 721-723 North Eleventh Street.

Q. How long have you been in business in St. Louis? A. I have been in business in St. Louis for myself twenty-one years.

Q. Do you wholesale, or retail, or both? A. Wholesale only. I have been thirty-seven years in the line.

Q. Do you do any wholesale business in Illinois or Indiana? A. Yes, in Illinois and Indiana.

Q. Are you acquainted with the service that is rendered by the Terminal Company in handling goods that you may

sell here to be delivered in Illinois? A. Yes, sir, I have used the St. Louis Transfer Company. To give a description of that, in 1885, when I started in business, we had all our goods brought over by the transfer companies at that time. There were different companies. Afterwards we were persuaded to go to the Cupples' Block. We were paying seven, six and five cents a hundred to cross the river. We were persuaded to go to the Cupples' Block, on promise of a special reduction, of a delivery to Twelfth and Poplar Streets, at a two cent rate. In 1902 I retired from the St. Louis Glass & Queensware Company, and started a new business on Washington Avenue, a wholesale business, and I had the St. Louis Transfer Company bring my goods over; of course, I had a part of that refunded—

Q. (Interrupting) Who refunded it? A. The St. Louis Transfer Company, to a five cent rate. I afterwards made an arrangement with the St. Louis Drayage Company. They had their headquarters at Third and Washington Avenue. They are not now in existence. The Columbia Company bought them out, absorbed them or ran them out. After I had used them for about a year, I concluded to take my own team, and I have been using my own team ever since, for several reasons. The best reason is, to get my goods over the river promptly, and to get my goods to my house. When I take goods over the bridge, the team brings goods back. I made arrangements with the railroad company to collect advance charges over the bridge. Every package that went over the bridge cost twenty-five cents, whether it weighed fifty or a hundred pounds. I delivered to my customers, sometimes with a charge and sometimes without a charge, but my charge was never over ten, twenty-five, or fifty cents on big crate lots.

Q. Did you institute this team service of your own because— A. (Interrupting) On account of the saving of time in delivering and receiving my own goods.

Q. Have you had any particular instances of delay in inbound shipments? A. With the Terminal Railroad Company in bulk cars.

Q. What were they? A. The delays were, that the car would come in on Saturday night, or Sunday, as it were, and it would be about ten days before I would get that car. I would telephone every day, and I finally got in with a friend to get him to urge and use his influence to get the car placed on the track, and then after it was placed on the track—this last car—I had a car last week that lay in the Bremen yards for three days before I could get it.

Q. A car of china-ware? A. A car of fruit-jars. Now here is a car (witness produces bill of lading) where there is an overcharge, and I had to get a refund. Here is a car I am unloading now. The car arrived Friday last. I telephoned to the terminals in EastSt. Louis, and to Mr. Clark, and Mr. Rapp, and everyone else, until finally I got the car on this side.

Q. Who are those men? A. They are Terminal Railroad people.

Q. What do you mean by "over-charge?" A. This (indicating paper) is an over-charge. Of course they claimed the railroad made it. This is two cents per hundred extra on the car. The car was to come here at fifteen and a half cents, and they charged me seventeen and a half cents; and the other car is just the same way.

Q. How long have been those delays? Has that been your experience right along? A. It is not very often I get bulk cars, but I have gotten in about seven this year, and there has not been a single one but what was delayed.

CROSS-EXAMINATION, BY MR. H. S. PRIEST:

Q. How many teams do you use in getting your merchandise from St. Louis to East St. Louis? A. One team.

Q. Is it a four horse team, or a two horse? A. A two horse team.

Q. How many trips a day does it make each way? A. Sometimes it makes a trip every day. They are supposed to. Of course sometimes things come up. We are unloading this car now, and we have but one team, so we make two trips. Only he cannot make but one trip in the morning, and one in the afternoon.

Q. What is the volume of your annual trade? A. Oh, I don't know; about $75,000 or $100,000.

Q. A year? A. Yes, sir.

Q. That is the total amount of your sales? A. Yes, that is the total amount of our sales. It is not it exactly, but that is as much as I will give.

Q. You say that is not it exactly? A. It may be more.

Q. Where are your sales principally made? A. Illinois, Missouri, Arkansas, Indian Territory and Oklahoma.

Q. Your shipments are principally in piece shipments aren't they? A. In bulk.

Q. In bulk? A. Barrels, casks, crates.

Q. Parcels—you don't use car-load lots? A. No, sir. We sell car-load lots—yes. But they do not come to St. Louis—Well, yes, they come through here sometimes—and they are delayed when they come through. But they are shipped right from the factory. And lots of other goods are shipped right from the factory.

Q. You have had seven cars in the last year, in bulk? A. Fruit jars—this year, I said.

Q. What do you mean by "this year?" A. 1906. I had very few, I think, in 1905. I believe only three cars.

Q. You had a bill of lading in your hand in responding to General Crow's questions; where is that shipment from? A. Cincinnati, Ohio.

Q. What is that road? A. By the Southern road.

Q. Were you notified when the car reached East St.

Louis? A. I don't think I was notified. I telephoned them and told them to look out for the car when it arrived, and they told me when it arrived. They had the car and turned it over to the—

Q. Whom do you mean by "they?" A. The Southern Railroad Company.

Q. You say you asked them to notify you when the car arrived? A. Yes, sir.

Q. The Southern Railroad Company? A. Yes, sir.

Q. You telephoned over there? A. Yes, sir.

Q. And then you were advised that the car had arrived? A. Yes, sir.

Q. Where did it arrive? A. It was what they call—not "The Willows"—but Denverside.

Q. And then what? A. Then I telephoned them again to get it there and turn it over to the Terminal Company—

Q. Whom did you telephone? A St. Clair, 703, the Terminal Company.

Q. You telephoned to the Terminal Company to turn the car over to the Terminal Company? A. I telephoned to the Southern Railroad Company to turn it over to the Terminal Company; and I telephoned the Terminal Company that the car was in the hands of the Southern Railroad Company, and to push it over as quickly as possible. They said they would. I called them up the next morning—

Q. (Interrupting) Whom did you call up? You say "they," and "he"—who are these indefinite people you refer to? A. The Terminal Railroad Company's man. I had nothing more to do with the Southern Railroad then.

Q. Now who of the Terminal Railroad Company did you call up? A. I don't know who it was over there. There used to be a man over there called O———. I don't know his name.

Q. What did he say? A. He said he would see to it that the car came over as quick as possible.

Q. And then what? A. Then I guess we waited. That was Thursday and Friday, and then I telephoned the Terminal Company again on Friday, and I told them I didn't want this car turned over to me on Saturday morning, because we couldn't open the car and take it. He said, "All right. The car is on the way to St. Louis." I telephoned to Mr. Clark at the Carr Street Station, to get my car, and he said he had no notice of it, and didn't know where the car was. Finally, on Monday morning, I got notice from him that the car was in the yard, and would be placed Tuesday morning.

Q. Placed where? A. In the Carr Street Station, on Tuesday morning.

Q. And it was placed there on Tuesday morning? A. Yes, sir; now that was Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday, Monday; it was just nine days to get that car over here.

Q. Do you know, as a matter of fact, when it was delivered to the Terminal Company by the Southern Railroad Company? A. I could not tell you that exactly, only what I was told by Mr. Clark, who telephoned me that the car was there.

Q. That was not until Saturday? A. No, sir, that was Tuesday morning.

Q. And you went up then and found the car was there Tuesday morning. A. Yes, right there, and placed nicely, too.

Q. Now, you don't know whether the delay was caused in the yards of the Southern Railroad or in the yards of the Terminal Railroad Company? A. I think it was in the yards of the Terminal.

Q. You think so? A. I didn't follow the car.

Q. You don't know? A. No, sir, I haven't any personal knowledge.

Q. You have no personal knowledge of when the car came into the hands of the Terminal Company? A. Yes, sir, I can infer that, because I telephoned them that the Southern Railroad had stated to me they had turned it over to them.

Q. The Southern Railroad told you that? A. Yes, sir.

Q. But otherwise than that, you have no knowledge of it at all? A. No, sir.

Q. You made some complaint there about an over-charge; whose over-charge was that? A. They claim—

Q. (Interrupting) Who were they? A. The Southern Railroad.

Q The Southern Railroad claimed what? A. They claimed they made an over-charge.

Q. The Southern Railroad claimed they did make an over-charge? A. Yes, sir.

Q. Did you want to create the impression that the Southern Railroad claimed that the Terminal Railroad Company had made an over-charge? A. No, sir; but it had been previous to that that it was charged on cars as a Terminal charge, and it was told me on one car load that I should go to the Big Four—

Q. Who told you? Who is this indefinite individual, "they," and "he?" I want to know the individual. I want to know where to place the responsibility. A. Mr. Clark told me. He said, "I have nothing to do with this over-charge. You go to see the railroad company."

Q. When was that? A. Five or six weeks ago. He said that a Terminal charge should not be put on there, that they refunded it to the Terminal Railroad Company, and that should have been taken off in the start. And I got my money.

Q. So the overcharges, in both instances, were made by

the railroad company? A. I guess that is where it was done.

Q. And not by the Terminal Railroad Association? A. No, sir.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. What day did the Southern Railroad Company tell you they would turn the car over to the Terminal Company? A. Thursday.

Q. A week ago to-day? A. Yes, sir.

Q. Do you know what day that car left Cincinnati? A. Yes, sir. That car left Cincinnati—

Mr. Priest: Of course he cannot know.

A. It was on the invoice. But I haven't the invoice here. It was July—I don't know exactly what date it was. But it don't take long for a car to come over here. It was only two days, I think, or three days at the outside, to come here from Cincinnati.

EDWARD KNIPPENBERG, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence and occupation. A. Edward Knippenberg; St. Louis, Missouri; wholesale grocer, located at 206-8-10 South Seventh Street, St. Louis.

Q. You are a jobber of groceries? A. Yes, sir.

Q. A general line? A. Yes, sir.

Q. What territory do you sell? A. Missouri and Illinois.

Q. Have you salesmen traveling in Illinois? A. Yes, sir.

Q. Are you familiar with the service of the Terminal

Railroad Company in transporting goods across the river between the States of Illinois and Missouri, between the cities of East St. Louis and St. Louis? A. Yes, sir.

Q. Have the service that is rendered, and the charges thereon, had any effect on your business; if so, you may state what it is? A. The service is entirely too slow, and the charges are enormous.

Q. What is the effect of that on your business here in St. Louis? A. That we transfer all our goods direct from East St. Louis.

Q. You transfer them with your own teams? A. Yes, sir.

Q. That is an additional cost and expense to you? A. Yes, sir, especially since June 1st.

Q. If you did not so transfer it, could you compete with jobbers in Indianapolis, Chicago and other places? A. No, sir.

WILLIAM E. BURR, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name and occupation? A. William E. Burr; President of the Carterville Coal Company.

Q. Where does the Carterville Coal Company do its business? A. We operate mines in Williamson County, Illinois, one hundred miles southeast of here.

Q. On what road? A. The Illinois Central.

Q. Any other road? A. No, sir.

Q. Do any other roads reach that district? A. Yes, sir, but no others reach us.

Q. What other roads reach that district? A. The Missouri Pacific, and the Burlington.

Q. What line of the Missouri Pacific? A. I believe what is known as their Illinois Division.

Q. Where does that run—to the Thebes Bridge? A. It runs down to Fountain Bluff, and there strikes the Main Line of what is known as "The Old Valley Road."

Q. Were you operating the Carterville Coal Company—or your company operating it—last spring? A. Yes, sir.

Q. Do you remember what the rate was from the Carterville District, over the Illinois Central Railroad, into St. Louis, up to that time, a year ago last spring? A. I think it was a year ago that the rate was changed from 62½ cents to 40 cents, and then cut to 35 cents.

Q. Do you remember the circumstances under which that cut occurred? A. My remembrance is that it was made by reason of the cut made by the Missouri Pacific Railroad.

Q. Do you remember investigating that matter? A. The only investigating I did was that I thought some of my competitors were selling coal too cheap, and I made several trips to Chicago to make my complaint, that I thought we ought to have reduction in the rate.

Q. To whom did you make your complaint? A. Mr. Harwood, the coal traffic manager of the Illinois Central Railroad Company.

Q. What competitor of yours—the Big Muddy Coal Company? A. Yes, sir, and everybody down there.

Q. Everybody on that Valley Road? A. Yes, sir.

Q. Theretofore there had been a uniform rate for that district on the Illinois Central road? A. Yes, sir; 62½ cents was the rate from our field.

Q. Do you know what Mr. Harwood did? A. No, sir, I don't. But I know he granted us the reduction, after about four months' complaint.

Q. Did you look up a freight bill issued by the Missouri

Pacific Railroad, and turn it over to Mr. Harwood, showing that reduction? A. No, sir, I did not.

Q. Did you get possession of one? A. Yes, sir.

Q. Where did you get it? A. I got it from a third party.

Q. Who was it? A. I would rather not tell, because I don't know who he got it from.

Q. You have it; you got it from a third party? A. Yes, sir, I got it from the secretary and treasurer of our company, who is sick at home now.

Q. What is his name? A. William J. Dwyer.

Q. Do you know from whom he got it? A. No, sir.

Q. It showed that the Missouri Pacific had cut the published tariff?

Mr. Priest: It is clearly improper to state what the bill shows. If the bill is in existence, it is the best evidence of what it shows.

Mr. Crow: I don't know that it is the best evidence. The published tariff is the primary evidence of what the rate is.

Mr. Priest: But you are asking about the contents of a written instrument. That instrument is, of course, the best evidence of its contents.

Mr. Crow: Q. Do you know where that is, at present? A. No, sir.

Q. To whom did you turn it over? A. I turned it back to Mr. Dwyer.

Q. Who is Mr. Dwyer? A. The secretary and treasurer of our company.

Q. What did you do with it before that? A. Why, I made a copy of it.

Q. Did you show the original or the copy to Mr. Harwood? A. I think I sent Mr. Harwood the copy. But that is a matter of memory.

Q. Mr. Harwood is the coal man of the Illinois Central Railroad? A. Yes, sir.

Q. Did Mr. Harwood tell you what he wanted to do with that? A. No, sir.

Q. You know what he wanted to do with it? A. I had my idea.

Q. Do you know what he actually did with it? A. No, sir, I do not.

Q. What was the rate that coal was billed out at? A. As near as I can remember, I think it was on a forty-cent rate to East St. Louis.

Q. Then subsequently the rate was cut by all the roads to thirty-five cents? A. From our Group—yes.

Q. From the Carterville district? A. Yes, sir.

Q. Was it raised afterwards? A. Yes, sir; raised on the 15th of June, this last June.

Q. Was the forty-cent rate below the published tariff? A. No, sir; Mr. Harwood told me that he made the rate that—I went to him and said, "Here, I think you ought to let me in on the inside." He said, "No, I won't do it; everything is published."

Q. What was the published tariff at the time? A. The Illinois Central Railroad Company's published tariff was 62½ cents.

Q. Do you know what the rate is now? A. Fifty-five cents.

At this point a recess was taken until 3 o'clock, p. m.

After recess, the following proceedings were had:

EDWARD F. DALY, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence and occupation.

A. Edward F. Daly; Secretary and Treasurer of the Brock & Daly Commission Company.

Q. How long have you been in that business? A. Fifteen years.

Q. Describe the business that you carry on. A. We are in the receiving and shipping business in St. Louis. We receive grain from the West, and ship it to the South and Southeast.

Q. What volume of business do you do, in the way of cars? A. We handle about 3,000 cars a year.

Q. Three thousand cars a year? A. That is not exact, now. Just about that.

Q. What per cent. of that is handled by the Terminal Association, or any of the Transfer lines here—the Wiggins—the Merchants'? A. I should say 70 per cent.

Q. Does much of it go across the river? A. That is, 70 per cent. of it goes across the river.

Q. What is your experience with the service they furnish, Mr. Daly—would there be delays? A. Right now, we have not any complaint; but there was a time about two years ago when they got into those blockades.

Q. What was the result of that? A. We would have stuff come in over the Burlington, and we would order to the Southern Elevator, or some connection on the east side of the river. Sometimes it would take ten, or twelve, or thirty days, to get over the river. I have known it to be as long as forty days.

Q. Do you know the occasion of that? A. Well, we would call up the Burlington, and they would tell us that the Terminal, or the Wiggins, or whatever road it was, was blocked, and couldn't take any more, and we would have to wait until they would take it.

Not being able to complete the taking of this testimony, I adjourn the further hearing of same until Saturday, July 14th, at 10 o'clock, a. m.

St. Louis, July 14, 1906.

Met pursuant to adjournment as above on Saturday, July 14th, 1906, at 10 o'clock, a. m., in the United States Court of Appeals Room, in the Federal Building, St. Louis, Missouri.

Present: Hon. R. E. Rombauer, Special Commissioner; Messrs. D. P. Dyer, E. C. Crow, Charles Nagel and Chester H. Krum in behalf of the complainant; and Messrs. M. F. Watts and H. S. Priest in behalf of the defendant.

The following proceedings were had:

JOSEPH RAMSAY, JR., a witness of lawful age, being duly produced, sworn and examined, in behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. D. P. DYER:

Q. State your name? A. Joseph Ramsay, Junior.

Q. And your residence? A. 26 Washington Terrace, St. Louis.

Q. How long have you lived in St. Louis? A. Since April, 1893.

Q. What connection, if any, had you during your residence here with the St. Louis Terminal Railroad Association? A. I came here in April, 1893, to accept the position of General Manager of the Terminal Railroad Association. I had been connected with it, as representing the Big Four Railroad, from January 1, 1890. I was then general manager of the Big Four Railroad, and left that company to accept the general managership of the Terminal Railroad Association, in 1893.

Q. How long did you continue as manager of the Terminal Railroad Association, from the time you came here in 1893? A. Until December 1, 1895.

Q. At that time what did you do? A. I accepted the

general managership and vice-presidency of the Wabash Railroad.

Q. And how long did you continue in that position? A. Up to October, 1905—ten years.

Q. In 1893, when you took the superintendency of the Terminal Railroad Association, will you state what that embraced at that time; what properties, generally, did the Terminal Railroad Association control at the time you came here? A. The East St. Louis properties, the Eads Bridge, the Tunnel, the Union Station, and the Terminal Association properties in Mill Creek Valley, connecting with all the railroads.

Q. When, if at all, during your administration of these affairs, was the Merchants' Bridge managed and controlled by the Terminal Railroad Association? A. The Merchants' Bridge was managed and controlled by its own Board of Directors and officers during my incumbency of the managership of the Terminal Railroad Association.

Q. Do you recall the time when the Terminal Railroad Association of St. Louis controlled or had the management in any wise of the Merchants' Bridge and its terminals? A. I do not recall when the Terminal Railroad Association, as a company, had the control and management of the Merchants' Bridge.

Q. Do you know at what time, if at all, they acquired the control of the stock of the Merchants' Bridge Terminal Railway Company? A. There was some stock bought, I think in 1892, or 1893, I would not be certain which.

Q. How much of it? A. I do not know.

Q. By whom was it bought? A. I think that was handled by Dr. Taussig.

Q. And Dr. Taussig was the president of the Terminal Railroad Association of St. Louis? A. He was.

Q. And how long did Dr. Taussig continue to be pres-

ident of the Terminal Railroad Association? A. I think until the spring of 1895; March, 1895, I think it was.

Q. March, 1895? A. Yes, March, 1895.

Q. Who succeeded him as the president of that association? A. Mr. Julius S. Walsh.

Q. How long did Julius S. Walsh continue as president? A. Mr. Walsh continued as president of the Terminal Railroad Association until about 1903, when he was made chairman of the Board, and Mr. McChesney was elected president.

Q. During the time you were managing and controlling practically the St. Louis Terminal Railroad Association, from 1893 to 1895, who was the chief officer in charge of the Merchants' Bridge Terminal, and having control of those terminals? A. Major Rainwater was the president of it, and, as I remember, practically general manager of it. During all my incumbency as general manager, all my dealings with the Merchants' Terminal Company were through Major Rainwater.

Q. What arrangements, if any, did the Terminal Railroad Association have with Major Rainwater controlling the Merchants' Bridge Terminal Railway Company, during the time you were there, as to rates over the two bridges? A. I don't know of any arrangement controlling the rates over the two bridges, or controlling the bridges. There was an agreement, which Dr. Taussig called "The modus vivendi," I believe, under which the Terminal Railroad Association had the right to use jointly with the Merchants' Bridge Terminal Company its tracks, if it desired to do so.

Q. During that time, under this arrangement which you call the "modus vivendi"— A. (Interrupting) That is the term Dr. Taussig gave it.

Q. (Continued) —how were the rates over the two bridges arranged, and what was the agreement in that re-

gard, if there was any? A. I don't know of any agreement in regard to the arranging of the rates, but they were practically the same over the two bridges, and also over the Wiggins Ferry. The published tariffs were the same, with the exception of some special tariffs that the Merchants' Bridge Terminal Company had with the Vandalia, and the Louisville & Nashville, in regard to the transfer of car-load stuff to and from their freight houses on this side of the river—to and from the freight houses of the Vandalia and the Louisville & Nashville roads.

Q. State how the freight coming into St. Louis from the east side was apportioned among those three transportation companies, across the river, to-wit: The Merchants' Bridge Terminal Railway Company, the St. Louis Terminal Association, and the Wiggins Ferry Company and its terminals, if you know. A. I don't know of any method of apportionment. Each interest handled its own traffic, and kept its own accounts in that way. There was no method of apportionment, that I know of.

Q. Was there any arrangement as to the amount of tonnage, or any understanding between the companies as to the amount of tonnage each was to have; and if so, by whom was that made, and how was it kept? A. As I remember it—I don't know that I ever saw any agreement of any kind—but as I remember it, there was a general understanding that the tonnage of the three interests—they had been running, of course, and each one doing—or, rather, each one doing its business; and the average percentage had amounted, as I remember it, for several years, to, I think, 20 per cent. on the Merchants' Bridge—it doing the smallest amount of traffic; the Wiggins Ferry Company, either about 23 or 25 per cent.; and the Eads Bridge, or the Terminal Railroad Association, had been handling the balance of the traffic, about 55 per cent., probably. The only understanding or arrangement I know of was—I

never saw any paper of any kind, and I do not know that there was any; I never saw any—but the understanding was that the three companies would do the same amount of traffic, in order to prevent the cutting of rates, and the payment of rebates, and so on.

Q. Do you know what was done with reference to how that matter should be ascertained and carried out, in the way of apportionment? A. Oh, there were returns made by each of the companies, showing the amount of traffic they did, the billing and all.

Q. Who was the person in charge of that business, who had charge of these reports, and to whom reports were made by these several companies? A. They were made to Mr. Webster.

Q. Do you know how often they were made? A. My recollection is that copies of all the billing were sent to him.

Q. By all three of the companies? A. Yes, sir; he kept the records.

Q. He kept the records; S. D. Webster, you mean. A. Yes, sir.

Q. He is the one to whom all these bills were sent by the three companies? A. Yes, sir.

Q. How long did that arrangement continue, so far as you know? From what time to what time? A. Oh, I don't think it lasted very long. Probably a year or two years. Of course, there was no way of enforcing it at all. If one road wanted to handle more traffic than the general understanding permitted, of course they did so.

Q. Of course, there was no way of controlling it; but there was an agreement between the three companies to do the business, and to handle it in proportion? A. There had been a good deal of one thing and another done to secure or to pull traffic away one from the other, and it was simply to maintain the open published tariffs; it was

done simply to prevent the cutting of rates and the giving of rebates.

Q. At the time that arrangement was made, who was the representative of the Terminal Railroad Association? A. Who made the arrangement?

Q. Yes. A. It was made between the principal officers, of course. I was General Manager. But it was made by the higher executive officers.

Q. You were advised of it, and knew it was going on? A. I knew the result of it, and probably knew of it while it was being discussed. I would not be certain of that, however. Dr. Taussig was president.

Q. After this arrangement was made, and during its continuance, was the agreement, whether in writing or verbal, lived up to, on the part of the companies? A. I see that one of the parties to the agreement testified the other day, that it was not. Not being a party to the agreement myself, I cannot say. No, they did not carry the exact percentages. As I said awhile ago, some months it would run over, and some months not, according as the traffic ran. There was no controlling of the traffic. No line refused to accept any traffic. They took just what came to them, just as they had done. But during that period they did not do anything to secure it, by any underhand methods, or any improper or illegal methods.

Q. That is to say, if freight went to one company in more than the proportion that should have gone to it, then Mr. Webster, under this arrangement, would equalize the amount between the companies; is that true? A. I suppose that was the intention.

Q. Wasn't it carried out, practically? A. I cannot say now how it was done.

Q. That was the intention. That is to say, if the Eads Bridge and its terminals carried more than 50 per cent. of the freight, then the Eads Bridge and its terminals in the

end got its 55 per cent., and the balance of it was apportioned between the Merchants' Bridge Terminal Railway Company and the Wiggins Ferry Company; is that true? A. I suppose by routing the business, or something, they could even it up in that way.

Q. Now, Mr. Ramsay, according to your knowledge, who were, and who is now (although I don't think there is any question about it) the owner of all the stock of the St. Louis Terminal Railroad Association? A. At that time there were six railroad companies who owned the Terminal Railroad Association, undivided interests. That is, each one having an equal interest. Now, there are fourteen roads in it. When the Terminal Railroad Association was first organized, in 1889, there were seven roads at that time that were to come in, but the Pennsylvania Railroad at that time did not come, until about probably ten years later. Then there were three other lines came in; the Rock Island, the Frisco and the Missouri, Kansas & Texas, making ten lines, after the Pennsylvania came in. Then, about 1903, the Burlington, the Chicago & Alton, the Southern, and the Illinois Central all came in, making fourteen roads at present. From the very beginning of the Terminal Railroad Association, all lines had been invited, and were urged to come into an equal interest in the Association, so that the terminal facilities here would be open to all the roads, and not controlled by any particular road or interest. That has been the plan.

Q. That has been the plan, and, so far as you know, it has been carried out? A. Yes, sir, and I had a good deal to do myself with bringing in the other lines.

Q. The greater number of the roads that are interested in this Terminal Railroad Association terminate on the east side of the river, don't they? A. Yes, sir; the greater number of them terminate there, because there are a great

many more roads on the east bank than on the west bank of the Mississippi River.

Q. In the ordinary shipments made by railroad, they ship only to East St. Louis, do they? A. That is the terminus of all the eastern lines, on the eastern bank of the river, and always has been.

Q. And their way-bills were made to East St. Louis, were they, and there they are turned over to the Terminal Railroad Association? A. Or to the Transfer Company, or to the shipper himself. That was optional with the consignee on this side of the river, to handle it by his own wagons, or by the Transfer Company's wagons, or send it over by the Terminal Company. It was there, subject to his order. The delivery, according to the bill of lading, was at East St. Louis.

Q. I will get you to state what you know, if anything about through rates, say from the Atlantic Ocean to the Pacific Ocean, through St. Louis? A. Well, of course, I can't give you the rates, but I can give you the principle. They bill through—

Q. Say, from New York to San Francisco? A. Yes; with any connecting line at St. Louis, the Missouri Pacific, Iron Mountain, Frisco, Rock Island, or any other road. Of course, it is a through billing, under the arrangement of those roads.

Q. That through billing included the transfer at St. Louis by the St. Louis Terminal Railroad Association? A. The rates divide at East St. Louis, and the western roads, of course, take their proportion from East St. Louis to wherever it is destined in the West. They take their rates, and in those rates, of course, they include the charge of delivery on this side. In other words, they pay the Terminal Railroad Association for its work.

Q. In whatever way it was paid— A. It was paid by the companies on this side.

Q. That is, they paid the bridge companies, and the Wiggins Ferry Company, if they transferred by that—they paid them the rates here? A. Their switching charge, whatever it was. That is, they settled that with the Bridge and Terminal and the Wiggins Ferry Company.

Q. Explain a little more fully, if you please, what you understood to be the arrangement made, with reference to the bridges across the river here, composing part of the line over which this through freight was had, or through bills of lading sent; why would the Bridge company here take freight? A. Well, there are only two ways of getting it across the river. One was on the cars by the Wiggins Ferry, the Merchants' Bridge, or the Eads Bridge; or by hauling it over in wagons and re-loading it on this side. And as neither the eastern nor the western lines had direct connections themselves, they had to pay an intervening company, who did the work, just as they would pay a switching road in Chicago, or any other city, to take it from one portion of the city to another. The western roads, under the old rate agreement, which made the east bank of the Mississippi, I think from Dubuque on the north to Memphis on the south, the dividing line of rate—then all the western roads received all their traffic on the east side and paid the Bridge Company whatever the charge was for delivering it to them on the west side. The eastern lines had nothing whatever to do with the charges on through traffic.

Q. Now, may I ask you this question: Under this arrangement, these bridges across the river have been used as a part of the through line for these through shipments, haven't they? A. They have done a part of the service, certainly.

Q. They have done a part of the service, and received their compensation upon these through shipments, in the manner you have indicated? A. Yes, sir, from the west-

ern roads. There was a while there, I believe, when the Burlington Railroad operated some thirty boats of its own across the river, and, of course, they could receive on the east side and make direct shipment, and I presume they did not pay anything to the Bridge, but they paid their own expenses on their own ferries.

Q. Suppose the freight instead of going west was coming east, billed from San Francisco to New York, say; how were the bridges used, and how were they compensated for the use of that through freight? A. The western lines delivered it at East St. Louis and paid whatever charges there were for crossing the river.

Q. The western lines used the bridge, and paid the charges through? A. Yes, sir; they delivered it to the eastern lines at East St. Louis. The eastern lines, between the points I have mentioned, Dubuque and Memphis, have nothing to do with the bridge or toll charges. They are all apportioned on the through business with the western roads. In other words, the western rates apply to the west bank, and the eastern rates apply to the east bank, of the Mississippi River, or vice versa.

Q. Suppose that a shipment originating in St. Louis, and destined for the East, how are those charges paid? For instance, you send freight from here to New York, how is that arranged? A. The shipment is delivered on the east bank of the Mississippi River, either by the shipper's wagon, or by ferry, with a ferry charge; or, if it were loaded on this side, that rate would be a local charge. It would be a charge against the traffic in addition to the rate from East St. Louis to its destination. With the exception of some traffic which went to the Green Line territory, which is a southeastern territory, where the Iron Mountain would be competitive, we will say, with the Louisville & Nashville, the Iron Mountain would take it down on this side and deliver it to the Louisville & Nash-

ville, and the Louisville & Nashville would absorb the bridge charge on that traffic, in order to get into that territory; in other words, to make that charge equal.

Q. That was caused by the Memphis Bridge? A. Yes, sir.

Q. If a person desired to ship a car-load of freight from here to New York, he would have to pay to the Bridge Company the rate from here to East St. Louis, and from there on to the road that took it? A. He would either have to pay that, or the charge would follow, in addition to the regular rate.

Q. It would follow? A. It would follow.

Q. That is to say, at the other end of the line, if the bills were collected at New York, for instance, if it followed, they would collect not only for the railroad rate but for the bridge charge as well? A. That much additional, if it was a following charge.

Q. That obtained during your entire knowledge of the Terminal Railroad Association? A. Yes, sir, that I think always obtained.

Q. You have spoken of the arrangement, so far as you know of it, between the Merchants' Bridge and the Terminal Railroad Association of St. Louis; what connection, if any, had you, Mr. Ramsay, with the acquisition of the stock of the Wiggins Ferry Company? I will be glad if you will state fully all you know about the purchase or attempted purchase of the stock of the Wiggins Ferry Company, and by whom, and for whom it was made. A. It was a purchase—

Q. (Interrupting) Will you state how you became connected with it, and all you know about it, without my interjecting any questions about it? A. Sometime in April, I think it was in 1902—it was on a Friday afternoon, I remember that very well, but the exact date I am not so clear about; but it was in April, I think, of 1902, I was in

New York, and I received a telegram from Mr. Breckinridge Jones of the Mississippi Valley Trust Company—No, I think the telegram was from Mr. Walsh, president of the Trust Company, but I would not be positive of that, but from one or the other of those two gentlemen—advising that Mr. Wade of the Mercantile Trust Company had stated that he had purchased the Wiggins Ferry Company stock for the Rock Island Railroad, and that he—the sender of the telegram, either Mr. Walsh or Mr. Jones—thought the statement was a little premature, and that a controlling interest in the Wiggins Ferry Company could be purchased for $600 a share if immediate action was taken. I took my telegram and went into Mr. Gould's office—

Q. (Interrupting) Mr. George Gould? A. George J. Gould, the chairman of the board—well, he wasn't chairman of the Board at that time; Mr. Ashley was chairman of the Board of the Wabash. Mr. Gould had received a similar message, as President of the Missouri Pacific Railroad. We discussed the matter for a few minutes, and I told Mr. Gould that the Missouri Pacific, the Iron Mountain, and the Wabash Railroads could well afford to purchase the Wiggins Ferry Company, in order to prevent such a valuable property from passing into the control of a competitor of those railways. And that as immediate action was necessary, there was only one thing for us to do, and that was to wire to St. Louis to go in and purchase a controlling interest, and that the Wabash, Missouri Pacific and Iron Mountain Railroads would stand good for the purchase. Such a telegram was sent. I sent a telegram, and Mr. Gould sent one a little later, authorizing the purchase, if it could be secured at those figures. Mr. Jones went to work immediately, and I believe by Monday morning had about 51 per cent. of the stock.

Q. At what rate? A. Well, at that time, when I

reached here on Tuesday morning—I came right on from New York, and got here either Monday or Tuesday morning, I think Tuesday morning—he had secured, as I said, about 51 per cent. of the stock, and at the rate, or about the rate named, $600. Of course, by that time, there was considerable hunting around for loose stock going on; and I believe the prices had run up to $1,000, and in some cases even $1,500 had been offered. But we stopped bidding for the stock on Tuesday morning, and the flurry was over then.

Q. Then what arrangement was made, after you came here, with the Mississippi Valley Trust Company, in reference to who should stand good for these purchases? A. When I got here on Tuesday morning, the Mississippi Valley Trust Company had secured pledges and promised the delivery of this stock. Arrangements had to be made to pay for it. Mr. Russell Harding, who was then Vice President and General Manager of the Missouri Pacific and Iron Mountain Railroads, and myself, signed a paper authorizing the Mississippi Valley Trust Company to buy, on behalf of the Wabash, the Missouri Pacific and the Iron Mountain Railroads, Wiggins Ferry stock at the prices which it had amounted to at that time. Of course, I had notified Mr. Harding before doing that, that Mr. Gould and I had made the arrangement; but the papers were signed by the two of us. Immediately after signing that paper, I wired the seven other roads then interested in the property—No, there were only four other roads then interested in the property—I notified them that we, the Missouri Pacific, and Iron Mountain, and Wabash Companies, had secured the stock, and if these other roads desired to come in and take an equal interest in the property, each for itself, they must notify us immediately. They all came in, and the seven roads then stood equally interested in the Wiggins Ferry Company.

Q. Name the seven, please. A. Missouri Pacific; Iron Mountain; Wabash; Baltimore, Ohio & Southwestern; Pennsylvania (that is, the Vandalia); Louisville & Nashville; Cleveland, Cincinnati, Chicago & St. Louis; and St. Louis & San Francisco.

Q. Then the addition of these other roads that came in after you had made this purchase, or authorized this purchase for the three roads that you represented, to-wit, the Wabash, Missouri Pacific & Iron Mountain—the other four came in subsequently, and assumed their proportion of the liability and paid their part of the purchase price? A. The other four of the seven roads agreed to come in. Mr. McCrea of the Pennsylvania, and Mr. Ingalls of the Big Four wired me that they didn't know much about the situation, but that if I advised it, they would come in. I think it would be proper for me to make this statement: When I reached here on Tuesday morning, Mr. Walsh had a paper drawn up for all the roads to sign, but I said, No, the Missouri Pacific, Wabash, and Iron Mountain railroads had authorized the purchase, and that we would sign for these three roads; and that if the other roads wished to come in they could do so. And I wired them accordingly. Of course—I don't know whether this is apropos or not—the sole object in the first place that induced the Wabash, Missouri Pacific, and Iron Mountain railroads to go into the purchase of that property was to prevent any other single road from obtaining control of the most valuable terminals on either side of the river, and thereby put that road in a position to shut out our lines from access to these properties, and elevators and industries, and so on along there. While from the first proposition to buy they contemplated letting the other roads in, still it was for the purpose of preventing them obtaining control in that way.

Q. You did not want the Rock Island road to get this independent line into St. Louis, that might control ter-

minals against your interest, on either side of the river? A. We didn't have any objection to the Rock Island getting a line into St. Louis, but we did have an objection to the Pennsylvania or the Rock Island road controlling valuable terminals which had been open to all of us from the beginning, and thereby practically shutting us out as they pleased. If they owned their terminals they could secure their own traffic, and if we owned them we could secure our traffic; but if they were owned by all, they would be open to all.

Q. If the other railroads you mentioned had not come in with the Missouri Pacific, Iron Mountain, and Wabash, you would have had absolute control? A. We would have had them.

Q. You would have had absolute control of the terminals, just as the Rock Island was seeking to get control? A. Yes, sir, we would have had absolute control; and, as I told Mr. Gould, "The Wabash can well afford to pay half of that for control on the east side, and the Iron Mountain can well afford to pay the other half for control on this side. The Big Four and the Pennsylvania no more wanted the Missouri Pacific, Wabash, and Iron Mountain railroads to control the terminals, than they wanted the Rock Island."

Q. In your purchase of this stock at $600 a share, you got only what in point of fact the Wiggins Ferry Company owned? A. I suppose that is all.

Q. That is all you got? A. Yes, sir.

Q. And the advance price—Do you know what the stock was worth intrinsically at that time? A. Oh, it is pretty hard to express an opinion on that. They owned immense quantities of land on the east side.

Q. What was the cash, or fair market value of the stock at that time? A. I know what we paid for it, and they

say the value of a property is what a man is willing to pay for it.

Q. I know that is sometimes said; but I want to ask you what was the fair market value of that stock of the Wiggins Ferry Company before these competing lines put up the prices? A. The last price I knew of prior to that was somewhere around $250, I believe.

Q. You had something to do also with the purchase or control of the bridge at Alton, didn't you? A. I believe I did.

Q. Just state what that arrangement was; at what time it was made, and what companies went in, for the purpose of controlling that Alton Bridge. Just state in your own way. A. The arrangement was simply a purchase of the Alton Bridge. There were ten roads that went into the purchase.

Q. Name them, please. A. Wabash; Missouri Pacific; Iron Mountain; St. Louis & San Francisco; Rock Island; Pennsylvania (Vandalia); Louisville & Nashville; Baltimore & Ohio Southwestern; Cleveland, Cincinnati, Chicago & St. Louis, and the Missouri, Kansas & Texas. Since that time the Chicago, Peoria & St. Louis Railroad came in and took an equal interest, which makes eleven. The Chicago, Peoria & St. Louis is not a Terminal Association road.

Q. State the objects and purposes for that purchase. A. The reasons which led me to recommend the purchase of the Alton Bridge by the various lines, was simply to keep open a contemplated outside belt or delivery line between the roads on the east side and the roads on the west side, without having to pass through the narrow, contracted gateway of St. Louis. At that time we were contemplating the immense traffic of the World's Fair, and it was evident to all of the roads interested that the traffic through St. Louis was growing very rapidly, and would continue to

257

grow, and that it would become necessary ultimately to have an outside belt. The West belt had been built up to North St. Louis, or was being built, and had reached within about seven miles, as I remember the distance now, of the Alton Bridge, or a connection with it. The distance from West St. Louis, we will say from the Missouri Pacific, Frisco, and Wabash, out west here, to Alton, is much shorter to Alton on the west side than it would be to go through St. Louis over to East St. Louis and then go up to Alton on the East side. At Alton there were four or five principal roads reaching Alton from the North and East, and an outer belt was contemplated from east of East St. Louis up to Edwardsville, and then to Alton. When the Alton Bridge got to a point where it could be bought at a pretty fair price—was not earning its fixed charges really, and was "in the soup," like the Merchants' Bridge was for a few years after it was built—I went in and got the other lines to agree to take it. They did so.

Q. Was it contemplated at the time by those that purchased it, that that bridge should be used in carrying the freight between Alton and St. Louis, or was it contemplated to use it for freight beyond that, out on the Missouri, Kansas & Texas, the Burlington, and so on? A. Of course, it could be used for freight to either point.

Q. It could be, but was that the purpose? A. That was the purpose of it. Of course, at present, without the building of that six or seven mile gap or link there, they would have to arrange with the Burlington to come into St. Louis; while it does now get a direct connection with the Missouri, Kansas & Texas, and the Burlington, and there is a considerable amount of traffic now handled over there, going to and from western points.

Q. Did you know at that time, at the time you got those railroad companies you have named to go in and purchase the bridge at Alton—did you know, as a matter of fact,

that the Burlington Railroad was negotiating for the purchase of that bridge? A. I did not know they were negotiating. I felt pretty sure they were waiting an opportunity for the plum to fall in their mouth. They had been doing considerable business over that bridge, with passenger trains and all, to Alton. They took that all off. Of course, then the traffic was not sufficient to support the bridge, and keep up the fixed charges; and I have no doubt if it had been left there for six months or a year longer, the Burlington would have gotten it, at their own price, probably.

Q. If you didn't understand it, you believed that the Burlington Railroad was attempting to get control of that bridge? A. I believed it.

Q. And you got those other roads to go in and get it, to prevent the Burlington from having absolute control of the bridge; isn't that true? A. That is one of the reasons.

Q. Wasn't it the most important reason, and the most persuasive reason, that you could assign for that action? A. I don't know that it was. If you have a St. Louis map, you will notice that the short cut for a railroad from St. Louis is to cross north of St. Louis by the Alton Bridge. Before these other ten roads came in, the Wabash, Rock Island, Missouri Pacific and the Frisco had agreed that they would take the bridge if the other lines did not come in, because it was vital to them to hold open that short cut across there for future traffic.

Q. The western shipments of the roads who own that Alton Bridge now, the shipments that go beyond these terminals in St. Louis, instead of going in through St. Louis, go over the Missouri, Kansas & Texas, and the Burlington, now? A. No, sir, none of the Wabash business goes that way; none of the East St. Louis lines. The Chicago & Alton Railroad, which is not interested in the bridge, probably handles more traffic to and from the bridge than the Burlington and Missouri, Kansas & Texas do, or any other

line, unless it would be the Chicago, Peoria & St. Louis. Because the eastern lines have no direct connection to it now; and all their traffic, and all the Wabash traffic goes —some of the Big Four traffic goes that way—if consigned to the Missouri, Kansas & Texas they may prefer to take it that way. It rests with the Western road to say. The Wabash cannot receive traffic over that.

Q. What effect would it have had, had the Burlington road secured control of the bridge at Alton? A. It would have put them in a position to control that bridge for their own traffic, shutting out everybody else if they wanted to.

Q. Would it have affected in any way the traffic of the lines that have now got control of the Alton Bridge? A. I don't know that it would. Not if the Alton carried out their published tariffs they couldn't. But I mean if the Burlington complied with their published tariffs.

Q. I mean, if the Burlington did not comply with its published tariffs, and had used and owned the road, then as a competitor for business for the West it would have had you people at its mercy, would it? A. It would have had a decided advantage.

Q. It was to avoid that advantage to them that you advised the taking in of the bridge by these other railroads? A. It was certainly to our interest—just as the Wabash came in and spent $3,000,000 for real estate in St. Louis to protect their interests.

Q. It was a gateway which might or might not affect the roads you were interested in? A. I suppose so.

Q. If they had been disposed to so use it, in opposition to you? A. I suppose so.

CROSS-EXAMINATION, BY MR. H. S. PRIEST:

Q. To continue the discussion of the purchase of the Alton Bridge, Mr. Ramsay, as I understand your explanation to Colonel Dyer, it was that that bridge was necessary

to accommodate such through business as might find difficulty in getting through St. Louis by reason of the limitation of the terminals in St. Louis? A. That was the principal reason, really; and to furnish, as I stated, a short cut from the belt lines west, the Missouri Pacific and the Wabash.

Q. In other words, it was contemplated to send through business, business that would otherwise pass through St. Louis and East St. Louis, over this route, in order to relieve the congestion of the terminals at St. Louis and East St. Louis? A. In order to avoid passing through the City of St. Louis terminals, which were very much congested, and will be.

Q. Of course, the terminals in connection with the Alton Bridge are not yet completed, as contemplated at the time that purchase was made? A. No, sir; there is a gap which will have to be built to connect it with the other lines west.

Q. And it was contemplated that should be done? A. Yes; understand one thing, the Terminal Railroad Association has no interest whatever in the Alton Bridge.

Q. I understand that is owned by the railroads you have mentioned? A. Yes, sir, and the Terminal Railroad Association had no connection with it in any manner.

Q But in order to facilitate through business handled by the owning companies, in that way; business which would otherwise pass through St. Louis, and be liable to meet with delays incidental to terminals; and it is to provide a shorter route? A. Yes, sir.

Q. Like providing common terminals in any other city? A. Yes, sir.

Q. Or places where traffic would otherwise be congested? A. Yes, sir.

Q. And available for a number of companies? A. Yes, sir.

Q. You say the Wiggins Ferry Company's stock was

purchased by the roads that you have named for the same purpose, in order that they might be kept as an open terminal for all the companies that own the property? A. For all the companies, whether they were owners or not; common, Terminal Association properties. Just as open, and on the same terms exactly, to outside companies as they are to the owning companies. Immediately after securing control of that, we had a conference with the Rock Island people, and offered them at once—asked them to come in and become equally interested in the properties, the same as all the other railroad companies. The object was not to keep the Rock Island out.

Q. The object was to keep the terminals open for all companies coming into St. Louis? A. Yes, sir, and the Rock Island came in and got access to all facilities and terminals, without paying any more money, just the same as all the other railroads. The result of this conference was that they came in, and the other four roads came into the Terminal Railroad Association.

Q. How is the Wiggins Ferry Company, and the Terminal Railroad Association, and the Merchants' Bridge Terminal Railway Company operated? How are those lines operated? As railroads, or as terminals? A. Oh, they are operated as terminals.

Q. Entirely? A. Yes, sir; switching roads, terminals, and transfer agents.

Q. Is there anything similar to the arrangement that exists here in St. Louis in respect to these companies, in other large cities? A. Oh, there are some similar cases; not so extensive, however.

Q. How about Chicago? A. There are some cases in Chicago. There is the Western Indiana properties, which are owned by five roads, and they operate these, practically, on the same—well, exactly on the same basis, you might say, as the Terminal Railroad Association here. They have

a belt line there also. The Western Indiana Belt Line is owned by the Western Indiana Company, and that switches to and from connecting lines, and to and from industries, on charges per car, for all the lines; certain tolls per car. But there is no such extensive and general application of the terminal proposition as there is here in St. Louis in any city I know of, where through the three terminal companies any one road can reach any point or any industry in the city on equal terms.

Q. What is the advantage of that arrangement to commerce? A. If you want my opinion?

Q. I would like to have it. A. I should say it would be a decided advantage, so far as the convenience of handling the traffic, so far as the shipper controlling the routing of his traffic by any road he wishes, and the operation of the railroads. It is all decidedly to the advantage of the shippers, in any community, and the railroad companies. I am speaking now of the operation of the railroads, outside of charges and anything of that kind.

Q. How about the economy in service and the disposal of business? A. Well, it is cheaper than if there were half a dozen firms, with half a dozen charges. It is certainly better to have one charge for terminal service than if it had to pass over two or three lines and have each one put on its own charge, which would make the charge much greater.

Q. How about the service? Could that be rendered more efficiently and quickly? A. I think it can be rendered more quickly by one company handling it between all the lines.

Q. How about the matter of competition between the railroads for the business located in the different parts of the city? A. Of course, where eighteen or twenty lines have access to one industry, the competition would be much greater than where that industry is controlled by one road.

I can illustrate. In Pittsburg you have an industry on the Pennsylvania Railroad track, and you say, "I want to route my traffic to St. Louis by the B. & O." The Pennsylvania road says, "We will take it to St. Louis; we don't switch for the B. & O. or any other road. We will take it to St. Louis and get the long haul out of it." In St. Louis the shipper can ship over any road he wants to.

Q. Or from any terminal? A. Yes, sir, or from any industry reached by the Terminal Railroad Association, the Wiggins Ferry Company, or the Merchants' Bridge Terminal Railway Company's tracks.

Q. You said something in your examination-in-chief about there being a terminal charge for through freight delivered at St. Louis, and carried beyond St. Louis by western lines; is that terminal charge absorbed in the tariff of the western lines, or the proportion of the western lines? A. I think so, where it goes through.

Q. Doesn't that same rule obtain with respect to all traffic going out of New York over other lines than the New York Central? Isn't there a terminal charge there? A. At New York?

Q. Yes; except going over the New York Central, exclusively, and that is absorbed by the other lines. A. There is what they call a lighterage charge in New York of three cents a hundred on everything that is handled from the east side. In some cases that is doubled. Of course, it goes to some of the docks, at three cents to the dock, and three cents lighterage charge additional. That is deducted out of the through rate. For instance, on grain going from St. Louis or Chicago to New York, the three cents lighterage charge is deducted by the eastern lines, and then the balance is pro-rated between the roads. In other words, it is paid by the railroad company in the through rate.

Q. What you term the "lighterage charge" goes to the

owner of the terminals? A. Yes, sir, to the railroad companies down there, generally.

Mr. Crow: Q. It is deducted and not added to the freight rate? A. It is in the freight rate. Without that three-cent lighterage, the rate would be one and a half cents. The Wabash can ship grain to Buffalo, New York, for Boston, and get more out of it than it would out of a haul to New York. Naturally, that works against New York, and in favor of Boston. You see that is about $18 a car, on an average.

Mr. Priest: Q. That lighterage is added to the charge, and that goes directly to the individual owner of the terminal. But it is paid by the railroad company having the haul of the freight out from New York? A. Yes, sir, or into New York.

Q. Isn't that also true of Philadelphia? A. I don't know of any lighterage charge at Philadelphia.

Q. Or the terminal charge there for the Pennsylvania road? A. Not terminal charge. Of course if they are switching over other roads, there is, and if they switch over the Belt they have a switching charge. But you can get a traffic man who can testify to that directly. I would not want to be understood as testifying to details at any of these points, as to rates or charges. I think Philadelphia has a one and a half cent, or a one cent differential under New York, as to grain rates.

Q. The arrangement which the Terminal Railroad Association made with the Merchants' Terminal Railway Company was a right to use the terminals of the Terminal Company? A. That is what I understood.

Q. That was a written agreement, wasn't it? A. I think that was in writing, and completed. I don't remember reading it.

Q. But it is your understanding that that was a written agreement? A. Yes, sir.

Q. So that that paper will speak for itself? A. Yes, sir, I presume so.

Q. I will ask you whether these terminals of St. Louis are open to any railroad, whether it is a stockowner in the Terminal Railroad Association or not? A. They are open to all railroads on exactly the same terms and conditions as to rates and usage.

Q. And without any discrimination? A. Without any discrimination. There is no advantage to an owner, but there is a burden on him which is not on the outsider. That is, he guarantees fixed charges on certain conditions, while the outsider has no obligations of that same kind, and yet uses it exactly on the same terms. If I were building a railroad to St. Louis, I would not bother about terminals. I would reach some point within five or six miles of the city, and I would have access to all the terminals without putting up a dollar, or doing anything more than making connection with one of the terminal properties.

Q. Has there been an effort made to extend the terminals, and is there not a necessity of extending the terminals to accommodate the traffic of St. Louis? A. Certainly there has been continual effort, since my knowledge of the terminals, to develop, increase and add to the terminal property. They have always been buying property and putting in new tracks. The first step after the organization of the Terminal Railroad Association was to build a big Union Station here, at an expense, with the property and all, of about $6,000,000; buying immense quantities of land west, and opening up and developing new yards and facilities.

Q. These freight terminals correspond exactly with the Union Station and passenger terminals? A. Practically, yes. The Union Station is divided exactly on an expense basis. Each one pays so much, according to the number of cars running in and out of the station. They pay the

station expenses and rentals. The terminals make a charge per car, or per hundred, or per ton, and the result is practically the same. There were no dividends for several years.

Q. Now, then, so long as you were connected with the Terminal Railroad Association, and the terminals of St. Louis, was there any purpose to operate those properties for profit? A. No, sir. The only problem was to operate them, and make both ends meet.

Q. Then the charges were just sufficiently large to make the necessary repairs, renewals and extensions, and to pay the cost of operation? A. Some years they didn't do that. We had a deficit several years.

Q. Who paid the deficit? A. We borowed money and carried it along until there were some bonds issued. The growth of the property was expected to make it good in the course of years. But whatever profits they might have, whenever a year would show profits, those profits would have to go right back into the property.

Q. For renewals? A. Yes, sir, renewals and extensions. And not only that, but a good many million dollars besides that. When the terminals of St. Louis cease growing, then the city has ceased growing.

Q. Then they will have to go on growing so long as the commerce of the city continues to increase? A. Yes, sir, and St. Louis is a growing gateway between the East and the West. Traffic through St. Louis increases in much greater percentage than through any other gateway, in my observation.

Q. And in your opinion, that increase can be met only by terminals which are subject to common use of all the railroads that come into St. Louis? A. They ought to be kept open to all railroads.

Q. According to the present plan? A. Yes, sir.

Q. Until your connection with the Wabash Railroad

Company ceased, you were a director of the Terminal Railroad Association of St. Louis? A. I was not a director the last couple of years, because I could not find time to attend the meetings. Mr. Pryor was a director, but I kept very closely in touch with it at all times up to the last, very close, indeed.

Mr. Crow: We will excuse you now, Mr. Ramsay, but will want to recall you later.

F. H. HARWOOD, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence and occupation? A. F. H. Harwood; residence, Chicago; occupation, Coal Traffic Manager of the Illinois Central Railroad.

Q. What are your duties as coal traffic manager? A. I have charge of the handling of all coal traffic, insofar as pertains to rates and routes is concerned.

Q. Who fixes the rates for coal traffic? A. The rates are compiled by clerks in my office.

Q. They do not fix the rates; who fixes them? A. The rates are fixed, so far as the Illinois Central traffic is concerned, by myself.

Q. In conjunction with anybody else? A. On through business, yes.

Q. On business from the inner, outer and middle groups of the Illinois coal mines, into St. Louis, who fixes those rates? A. We fix them individually for our own line.

Q. When you say "we," whom do you mean? A. The Illinois Central Railroad Company.

Q. Do you confer with any other roads about it? A. We discuss the general situation and conditions.

Q. With whom? A. With all lines operating railroads in similar territory.

Q. What roads do you discuss the matter with, with reference to the St. Louis rate? Just name them. A. Louisville & Nashville; Cleveland, Cincinnati, Chicago & St. Louis; Chicago & Eastern Illinois; Missouri Pacific; Wabash; Chicago, Peoria & St. Louis; Litchfield & Madison; Baltimore & Ohio Southwestern; East St. Louis & Suburban; St. Louis & Belleville Electric Railway; St. Louis & O'Fallon Railway; St. Louis, Troy & Eastern Railway; Southern Railway; Vandalia Line; Mobile & Ohio.

Q. Isn't there an association known as "The Coal Traffic Association" of St. Louis, composed of the coal traffic men of each of the coal-carrying roads from the territory I have mentioned into St. Louis? A. There is a Bureau established for the purpose of compiling statistics, known as the "St. Louis Coal Traffic Bureau."

Q. What is the difference between a coal traffic bureau and a freight traffic bureau; a coal traffic association and a freight traffic association? A. I consider there is little or no difference.

Q. They are both for fixing rates and maintaining the same? A. No, sir, absolutely not.

Q. Do you know whether or not there is a uniform rate fixed for these coal rates into St. Louis? A. The rates are not uniform.

Q. They are not now? A. No, sir.

Q. And have not been? A. No, sir.

Q. When were they not uniform, from the same territory? A. They never have been uniform, and are not now. As an illustration, the Louisville & Nashville carry a rate of forty-seven and a half cents a ton from Eldorado to East St. Louis. We carry from Eldorado to East St.

Louis a rate of fifty-five cents per ton. There is one instance.

Q. Any other? A. Yes, sir. The Baltimore & Ohio Southwestern carry a rate from Sandoval to East St. Louis of forty-seven and a half cents.

Q. How far is that from St. Louis? A. Sixty miles by the Baltimore & Ohio Southwestern; we carry a rate of $1.026. The Baltimore & Ohio Southwestern carry from Odin a rate of 47½ cents. We carry a rate of $1.03.

Q. There is some special arrangement about those particular points between the roads? A. None whatever.

Q. Isn't it a fact that you have made complaint that the rates established were not lived up to by some of these roads? A. We do, from time to time, find that some line has an advantage. We naturally look around to get the facts, and when we discover them we generally reduce our rate.

Q. To whom do you make those complaints? A. We make the complaint to the interested line.

Q. Don't you make it to an association? A. No, sir.

Q. Haven't you in the past made such complaint to the Coal Traffic Association of St. Louis? A. I have not made a complaint to the Coal Traffic Association.

Q. You have made it at their meetings? A. I have made it at their meetings.

Q. At the meetings of the Coal Traffic Association? A. To the individual lines.

Q. And the other lines were represented there? A. Yes, sir.

Q. And the matter was considered and discussed by the other lines? A. I don't know just what you have reference to, what particular case.

Q. Wherever you have made complaint that these rates were not lived up to, that were established as uniform. A. When we find it necessary to make a reduction in our

rates, we simply serve notice through the Chairman of the Bureau, that effective on a certain day the Illinois Central Railroad, from a given territory, will establish such and such a rate.

Q. You are compelled to do that by a rule of the Association? A. No, sir.

Q. Do you mean to say there is not a rule of the Coal Traffic Association, a written rule, that requires you to give notice of a change of rates, to the interested roads, and to the secretary of that Association? A. There is an understanding whereby any line cannot reduce a rate without giving notice to the chairman of such reduction.

Q. Isn't there a rule to that effect that is in writing? A. I don't know of one.

Q. How long have you belonged to that Association? A. The Illinois Central Railroad Company? I don't know. Personally, I have been handling the coal traffic for a little over two years.

Q. That is the extent of your information on the question? A. Yes, sir.

Q. When complaint has been made by a line that a uniform rate of two roads or more, from any given point in this district—take the Carterville district as an illustration —has been reduced without notice, the matter is presented at a meeting of this Association, is it not? A. Yes, sir.

Q. And it is discussed by the representatives of the various lines? A. Yes, sir.

Q. And the rate is either restored by that road, or the other people reduce their rate? A. As a general thing.

Q. And, as a rule, when the rates are reduced or advanced by one road, they are reduced or advanced by all, aren't they? A. They are compelled to do that, in order to protect the operators on their own system, naturally.

Q. That is true, nevertheless; it is a fact? A. When one road reduces a rate, as a general rule, they all follow.

Q. Does not the rules of this association require each road which belongs to it to furnish not only the tonnage to the Secretary, but also the rate, and the name of the party to whom it is consigned? A. I am not familiar with the manner in which statements are obtained by the Secretary or Chairman of the Coal Traffic Bureau; but I understand each individual line furnishes a list of shipments showing—I don't know whether they show the consignee or not, but they show the tonnage.

Q. You are the traffic man of the Illinois Central Railroad Company? A. I am the coal traffic manager.

Q. Isn't it your department that furnishes those daily statements to that Bureau? A. No, sir, it is our local agent.

Q. It is your local agent does that? A. Yes, sir.

Q. He gets his directions to do that from you? A. Yes, sir, he does.

Q. Don't you know whether or not he was directed to furnish the rate, and the consignee's name, as well as the tonnage? A. No, sir. The rules or instructions given were long before my time. Those, I suppose, are still in force. There has been no change since my time.

Q. You have a copy of those? A. I could look them up. But it's far back.

Q. You have a copy of them, I say? A. I suppose so.

Q. You never looked at it? A. I don't suppose so. I did not think it material.

Q. Isn't it a fact that you made complaint about the Missouri Pacific Railroad charging a less rate than your rate to competitive points in the Carterville district, a year or so ago? A. I made complaint that a lower rate was made than we were making.

Q. That was by the Valley Road? A. Yes, sir.

Q. Did you investigate the matter? A. I did.

Q. What did you find? A. I found the Missouri Pa-

cific was carrying a rate of forty cents a ton into East St. Louis.

Q. From what point? A. From what is known as the Carterville Herron district. We immediately met that by—

Q. What had been your rate prior—

Mr. Priest: Let the witness finish his answer.

Mr. Crow: Let him answer my question.

A. I don't know what the published rate of the Missouri Pacific was, but I know the rate we were charging was sixty-two and a half cents. We immediately reduced our rate to forty cents.

Q. Is that all you did? A. No, sir. A short time after —two or three weeks—we found the Missouri Pacific had, in effect in the same district, to Bixby, which is their crossing to the river to get on the west side, a rate of thirty-five cents.

Q. Their crossing, you mean where the Valley Road crosses to the Iron Mountain? A. It is where they transfer their business from the east to the west bank of the river.

Q. So Bixby is practically St. Louis for freight purposes? A. That is handled principally in handling freight from the east to the west side.

Q. It was a St. Louis rate? A. No, sir, East St. Louis.

Q. East St. Louis plus the transfer? A. Yes, sir.

Q. They made the rate thirty-five cents? A. Yes, sir, and we immediately reduced our rate to thirty-five cents.

Q. While you were investigating this matter, you had the question up at a meeting of the Coal Traffic Association? A. Yes, sir.

Q. You made the charge that Mr. Stith, as the representative of the Missouri Pacific Railroad, had cut the established rate? A. Mr. Stith, and the Missouri Pacific, was not a member of the Bureau at that time.

Q. Whoever was a member? A. None of the roads represented by Mr. Stith was a member of the Bureau.

Q. You made the charge, didn't you, that that system had shipped those shipments for less than the tariff published? A. We made the charge—or, rather, in order to justify our action in reducing the rate from sixty-two and a half cents to thirty-five cents, we made the statement that it was by reason of the Missouri Pacific Railroad having in effect a lower rate.

Q. Didn't you make the charge that they had shipped out at less than their tariff rate? A. I did not.

Q. Did you look at their tariff to see what it was? A. I did.

Q. What was it? A. The tariff I had was sixty-two and a half cents.

Q. That was the published tariff? A. They may have had a supplement, or another tariff, of which I was not advised.

Q. That was a published tariff? A. Yes, sir.

Q. And, so far as you knew, it was operative at that time? A. It was.

Q. Was the rate subsequently restored to that district by the coal-carrying roads on that commodity? A. The rate was advanced on the Illinois Central road on the 15th of June.

Q. What year? A. This year.

Q. To what rate? A. Fifty-five cents to East St. Louis.

Q. Was it advanced by the other roads that reached that same territory? A. The only other road reaching that territory is the Chicago & Eastern Illinois, and the Missouri Pacific. The Missouri Pacific advanced their rate to fifty-five cents; and the Chicago & Eastern Illinois to sixty-two and a half cents, I believe.

Q. What caused the difference in the rate? A. Some

lines do not care to haul the business for such a long haul at such a low rate.

Q. That is the rate now, is it? A. Fifty-five cents is our rate.

CROSS-EXAMINATION, BY MR. H. S. PRIEST:

Q. I think through inadvertence in answering General Crow's questions, you have stated these rates to be to St. Louis? A. To East St. Louis.

Q. Wherever you have stated in your examination-in-chief that these rates were to St. Louis, you mean to say, to East St. Louis? A. Yes, sir, to East St. Louis.

Q. They are all within the State of Illinois? A. Yes, sir. That was an inadvertence on my part.

Mr. Crow: Q. You don't mean to say that with reference to the present rate? A. I mean to say the rate of fifty-five cents applies to East St. Louis.

Q. You don't mean to say that your road does not make a rate to St. Louis from the Carterville district? A. No, sir; the rate is seventy-five cents.

Mr. Priest: Q. But the rates of which you were speaking, prior to the fifty-five cent rate, were to East St. Louis, in every case? A. Yes, sir.

Q. That fifty-five cent rate is to East St. Louis? A. Yes, sir.

HENRY MILLER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence and occupation? A. Henry Miller; St. Louis, Mo.; General Manager of the Wabash Railroad.

Q. Are you an official of the company that owns the bridge at Alton now? A. Yes, sir.

Q. What position do you occupy with reference to that company? A. Vice President and director.

Q. And what is the name of the corporation? A. The Missouri & Illinois Bridge Company.

Q. And do they own the railroad that is operated over that bridge—I mean the track? A. Yes, sir.

Q. Has there been a portion of the track of the Alton Bridge taken up since its acquisition by this company? A. No, sir.

Q. There has not been? A. No, sir.

Q. Have you been up there lately? A. Yes, sir.

Q. Have any of the connections been taken up? A. One, I think, with the Illinois Terminal. There was some trouble about it, and they took it out.

Q. Wasn't there one on this side that was taken up? A. No, sir.

Q. Is that a double-track bridge? A. Yes, sir.

Q. And both tracks are still on the bridge? A. Yes, sir.

Q. Is there any St. Louis business that is sent over that bridge now? A. I am not sure. I think there is.

Q. Who would know about that fact, Mr. Miller? A. The Superintendent of the Bridge.

Q. And who is he? A. W. T. Lowden.

Q. Where does he live? A. In Alton.

Q. Do you know anything about the purpose in acquiring that bridge, or have you any knowledge on that subject? A. I was not connected with a road that had any interest at that time, and have no knowledge of the details of the purchase.

Q. Well, is the Bridge Company controlling it making any effort to connect it with the St. Louis terminals at this time? A. There is a plan for a connecting belt.

Q. At what point would the connection be made with the St. Louis terminals? I mean, with what track?

Mr. Priest: Here is a map (producing small map prepared by Mr. Pitzman).

A. (After examining map) This does not show the proposed line.

Mr. Crow: Q. Is the St. Louis Belt Line the point of proposed connection? A. I thought the connection was to be made with the Wabash near Ferguson.

Mr. Ramsay: That was the contemplated plan.

Mr. Crow: We have that all designated on the other map.

Mr. Priest: No, sir, you haven't Ferguson on the other map, at all.

The Witness: No part of that proposed Belt Line has been built.

Q. It is not proposed to be connected with what is called the St. Louis County Belt Line? A. Yes, it is.

Q. Hasn't a portion of it been graded? A. The Central Belt Line is entirely graded.

Q. I said the St. Louis County Belt Line?

Mr. Crow: Part, you said the other day, Mr. Watts, was graded.

Mr. Watts: Part is graded, but no rail on it.

Mr. Crow: Q. That is the road with which it is planned to connect, is it? A. Yes, sir.

Q. There have been no steps taken to build it, so far as actual construction is concerned? A. No actual construction work has been done as yet.

Q. No tracks laid, or anything of that sort? A. No, sir.

Q. Do you know whether it is the policy of the Directors of that Bridge to make it a part of the Terminal System of St. Louis? A. Not at present.

Q. Not at this time? A. No, sir.

Q. Do you know where the business comes from that maintains that bridge now; from what lines? A. On the

west side, the Missouri, Kansas & Texas, and the Burlington. On the east side there are five lines—the C., B. & St. L.; C. & A.; Big Four, and the Illinois Terminal. That is all, I think—four.

Q. Have they any tracks other than approaches to the bridge—the Bridge Company, I mean? A. Yes, sir, they have delivery tracks on both sides of the river.

Q. How extensive are they? Do they touch the Burlington properties? A. They connect with the Burlington.

Q. At what distance from the bridge, approximately? A. About three miles. On the east side they have a direct track connection with all of the lines.

Q. All of the lines that touch Alton? A. Yes, sir, all lines that touch Alton.

Q. Do you know what lines those are? A. I have just named them.

Q. And those extend to the trackage on the East side? A. At present. There is a project to extend this belt line; it was in the original charter; but nothing has been done about that.

Q. Extend it on the east side? A. Yes, sir.

Q. Extend it down to Edwardsville and on the east side? A. Yes, sir.

Q. What distance would that be? A. About twenty miles.

Not being able to complete the taking of this testimony, the further taking of same is adjourned until Monday, October 1st, 1906, at 10 o'clock, a. m.

R. E. Rombauer, Special Commissioner.

St. Louis, Mo., Oct. 1, 1906.

Met pursuant to adjournment as above on Monday, Oct. 1, 1906, at ten o'clock a. m., in the Federal Building, in the city of St. Louis, Mo.

Present: Hon. R. E. Rombauer, Special Commissioner; Messrs. E. C. Crow and Chester Krum appeared in behalf of the Government; and Messrs. H. S. Priest, M. F. Watts and F. Lehmann appeared in behalf of the defendants.

The following proceedings were had:

JOSEPH RAMSAY, JR., recalled testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW.

Q. Mr. Ramsay, I want to ask you if you were with the Terminal Railroad Association in 1893, as an official? A. I went with the Terminal Railroad Association in April, 1893, as General Manager, and remained with it until December 1, 1895.

Q. At that time, Mr. Ramsay will you please state what the properties of the Terminal Railroad Association consisted of in St. Louis and East St. Louis, and vicinity? A. I cannot state in detail. In East St. Louis they consisted in what is known as "East St. Louis Terminal property," the yards, bridge approaches. They had no Belt Line at that time in East St. Louis. And in St. Louis it consisted of the Mill Creek Terminals and the Union Station properties, yards, team tracks, and freight houses in the Mill Creek Valley.

Q. Were there any means of communication across the river owned by that Association? A. Yes, sir, the bridge and tunnel properties.

Q. What business, if any, were they carrying on at that time? A. A general terminal and transfer business, passenger and freight.

Q. Do you know, in a general way, the expense of their trackage, in miles, at that time, on either side of the river,

or on both sides? A. No, sir; I couldn't give the total mileage.

Q. Could you approximate it? A. Well, they had at that time, I should say, about six miles of what we would call double main tracks connecting with yards at East St. Louis, with yards and properties on this side of the river—

Q. Crossing the bridge? A. —and probably sixty to eighty miles of yards and side-tracks and connecting lines, and so on. That is only guess work.

Q. Just approximately, I understand. A. Yes, sir.

Q. What rolling stock, if any, did the Association own or operate at that time? A. I could not say definitely now. They had, probably, thirty to forty engines, but little if any, passenger or freight cars. They had no freight cars outside probably the repair cars for repairing tracks, and handling material, dirt, and so on.

Q. At that time, as Superintendent or Manager of the Terminal Railroad Association, or subsequently, did you have any connection with, or control over, the properties of the St. Louis Merchants' Bridge Terminals? A. I don't think I had any official connection whatever with those properties.

Q. Did you at any time during the period that you were connected with the St. Louis Terminal Railroad Association? A. I don't remember that I had any official connection.

Q. How long did you remain with the Terminal Railroad Association, as manager? A. Until December 1, 1895.

Q. That is the time you left them and went to the Wabash? A. Yes, sir.

Q. Have you any personal knowledge of the extent, class and character of the property, in 1893, owned, operated by the St. Louis Merchants' Bridge Terminal Railway Company? A. Oh, yes, I had knowledge of it, general knowledge.

Q. Will you please state, in a general way, what that property was—without going into detail? A. The Merchants' Terminal & Bridge Company had, through its own ownership and leased properties, main tracks leading from Granite City to Seventh Street—

Q. Seventh and what? A. Seventh and Gratiot Streets. It had yards at the east end of the Merchants' Bridge, and it had a so-called belt line or tracks leading from the west end of the Merchants' Bridge in St. Louis, northward, toward the northern limits of the city. They were built at that time to the Broadway crossing of what is now the West Belt Railway.

Q. Will you state whether or not they operated trains between Illinois and Missouri? A. They handled switching-cuts and transfers, but no passenger trains, that I know of, at that time. They had no passenger connection with the Union Station, or with any of the other stations.

Q. Do you know whether or not they handled any freight? A. They did a switching and transfer business.

Q. Did they handle any freight direct from Granite City, or Madison, or those places, to St. Louis? A. You mean, locally, on their own bills of lading, or anything like that?

Q. Yes? A. I don't know if they did any local business. Of course they switched for any connecting roads that delivered traffic to them. The Vandalia had a connection with them, and reached what was then the Vandalia freight-house, on their own tracks. The L. & N. also had a freight-house on this side, and reached that freight-house over the Merchants' Bridge tracks—that is, the Merchants' Bridge Company handled that to and from that freight-house.

Q. Is that freight-house still maintained by the Vandalia Company? A. The Vandalia freight depot has not been operated by them for a number of years. It is now leased to the M. K. & T., or the Burlington—one or the other.

Q. Do you know the period about when they discontinued its use on this side? A. They used it until a receiver was appointed for the Vandalia road, about 1896 or 1897, and then they abandoned the use of it, on account of its not paying. It was a very expensive method of getting the traffic, and both the Vandalia and the L. & N. closed up their freight-houses for awhile.

Q. Is that the period when the Pennsylvania Railroad Company acquired control of the Vandalia? A. When they acquired control of the Vandalia, a receiver was appointed on account of some bond issues on that line, and the receiver closed the freight-house.

Q. Do you know whether the Pennsylvania Railroad Company ever built a freight-house on this side of the river? A. Since?

Q. Since or before? A. I think the so-called Vandalia freight-house was built by the Pennsylvania Railroad. I am not certain of that, but that is my impression.

Q. They controlled that situation at that time? A. They controlled the property. It was operated by the Vandalia.

Q. Are you familiar with the growth of these properties since the time you were with them? A. I am familiar, in a general way, with the growth of all terminal properties; it has been enormous.

Q. Do you know whether or not, prior to October, 1905, the St. Louis Merchants' Bridge Terminal Railway Company, and the St. Louis Terminal Railroad Association, carried freight and passengers to and from the States of Illinois and Missouri? A. Why, of course, all the traffic they handled over the bridge was between the States of Illinois and Missouri, the Mississippi River being the dividing line; and both associations, therefore, handled traffic between those two States.

Q. I will get you to state, in a general way, how many miles of what you would term "main track" these two cor-

porations have in the States of Illinois and Missouri at this time, or had a year ago? A. When you speak of them as "corporations"—

Q. I mean, the Merchants' Bridge Terminal Railway Company? A. Do you mean their controlled properties, belt lines, etc.?

Q. I speak of them as "properties," the properties they own or control. A. As a general system?

Q. Yes. A. What would properly be called "main lines," they have about forty (40) miles, including the length of the belt-lines and all their principal connections with other roads in St. Louis and East St. Louis. They have between forty and fifty miles of main lines.

Q. Of what does that consist, single or double tracks, the greater part of it? A. A good portion of it is double track. The Merchants' Terminal Company main line, and the St. Louis Terminal Railroad Association main line, the belt from the west part of St. Louis to the connection with the Merchants' Bridge—they are all double tracks. The connections from the East St. Louis belt—I don't know whether it is now a double track or not; it is from the Vandalia and the Baltimore & Ohio tracks to the Merchants' Bridge, a double track.

Q. Do you know what, if any corporations, other than the St. Louis Merchants' Bridge Terminal Railway Company, and the Terminal Railroad Association of St. Louis, the Wiggins' Ferry Company, and the leased and controlled properties of these three companies, operated in October, 1905, and prior thereto, any facilities for transferring freight in car-load lots across the Mississippi River at St. Louis and vicinity? A. The Missouri Pacific Railroad Company had their transfer across the river, at Carondelet.

Q. By ferry? A. By ferry. And the Burlington Road, I think, had their transfer up in North St. Louis, across

the river. The Interstate Sand Company, I don't know whether it was still operating in 1905 or not.

Q. The Missouri Pacific and the Burlington ferries, were they public carriers, accepting all cars offered, or were they simply operating for their own roads? A. I cannot say what they handled, but, being operated by those companies, presumably it was their own traffic, to and from connecting lines, and to and from points on their own lines.

Q. Then, so far as you now recollect, there was no other carrier engaged in a similar business, except the three mentioned, carrying on that business in St. Louis? A. You mean carrying on the business of transferring anything that anybody would offer?

Q. Yes? A. Unless it would be the Interstate Sand Company. I think they were still operating then.

Q. Do you know how many railroad companies enter East St. Louis? A. Do you wish me to name them all.

Q. Can you name them? A. I think I can.

Q. Do so, please. A. Illinois Central, Mobile & Ohio, Valley Division of the Iron Mountain, Louisville & Nashville, Southern Railroad Company, Baltimore & Ohio, Pennsylvania Railroad Company, Vandalia, Wabash Railroad Company, Clover Leaf, Chicago, Peoria & St. Louis, Big Four, Frisco. I don't know what they call it now; the Chicago, Rock Island, or the Eastern Illinois; Chicago & Alton, The Burlington. And then there are three or four small coal roads that enter East St. Louis.

Q. Those you have mentioned are those that are termed in railroad parlance, "trunk lines?" A. Yes, sir; roads, in a general sense, having an extensive mileage, and all of them engaged in regular State and Interstate traffic.

Q. Of those you have mentioned, how many do not belong to the St. Louis Terminal Railroad Association? A. There is the Chicago, Peoria & St. Louis. That is practically the only one on the east side, except those three or

four coal roads; and the Clover Leaf. The Mobile & Ohio belongs, really, through the Southern. The Southern Railroad Company is in the Terminal Association, and I believe the Southern and the Mobile & Ohio are practically the same.

Q. The membership is in the name of the Southern? A. The Southern Railway Company is a member. Probably, if I give the names of the members on the East side, that will make it clearer.

Q. Yes, do that. A. The Chicago & Alton, The Burlington, The Big Four, The Wabash, The Pennsylvania Railroad Company, Vandalia; The Baltimore & Ohio, The Louisville & Nashville, the Southern Railway Company, The Illinois Central, The Iron Mountain, what they call the Valley Route; I think that covers all those east side roads.

Q. Do you know the names of the roads that enter St. Louis from the west, south and north; I mean on the west side of the river? A. Yes, sir.

Q. Please state them? A. The Burlington, Missouri, Kansas & Texas, Wabash, Missouri Pacific, Rock Island, St. Louis & San Francisco, Iron Mountain.

Q. These are what might be termed trunk-line, or main-line roads? A. Yes, sir; trunk lines, all of them having large mileage, reaching all through the Northwest, Southwest and West.

Q. Will you please state, if you know, which ones of those on the west side are members of the St. Louis Terminal Railroad Association? A. I have just stated that they are all members. In fact all the lines reaching St. Louis, excepting the Clover Leaf and the Chicago, Peoria & St. Louis, are members of the Terminal Association, jointly and equally interested in the properties and the use of them.

Q. I will get you to state if you know what relative proportion of the business between the States of Illinois and

Missouri, consisting of in-bound and out-bound freight, from St. Louis territory, going and coming, east of the Mississippi River, the Terminal Railroad Association of St. Louis, the Merchants' Bridge Terminal Railway Company, and the Wiggins Ferry Company, and their controlled and operated properties handle? A. You mean the proportion that each of them handle?

Q. No, sir, the proportion that the three of them handle? A. As to the entire amount?

Q. Yes? A. They handle all except that which is handled by the Missouri Pacific ferry, and probably the Burlington, if it is still operating its ferry: I don't know whether it is or not. I should say they handle fully ninety-five per cent of that which crosses the river at St. Louis. The combined terminal transfers here, the Wiggins Ferry, the Merchants' Bridge, the Eads Bridge (or Terminal Association), and the Interstate Sand Company, handle from ninety to ninety-five per cent of all the traffic. I am now speaking of railroad traffic, of course.

Q. Mr. Ramsay, referring now to the sale of the Wiggins Ferry Company stock, in, I believe, 1902 or 1903, I will ask you to state, if you know, who paid the money for the stock that was purchased by the Mississippi Valley Trust Company? What official of those roads, I mean, if any? A. All the railroad companies entering into that purchase agreed with the Mississippi Valley Trust Company to furnish their proportion of the purchase price. The Mississippi Valley Trust Company advanced the money on their agreement to do that.

Q. Have you any knowledge as to the time and manner of reimbursement to the Mississippi Valley Trust Company? A. No, sir.

Q. The details you are not acquainted with? A. No, sir, not the details of it.

Q. Could you tell me what official of any of the roads

interested could furnish that information? A. No, sir.

Q. The details you are not acquainted with? A. No, sir, not the details of it.

Q. Could you tell me what official of any of the roads interested could furnish that information? A. Well, I don't quite catch your first question, as to who paid the money?

Q. The point is, I want to find out what official of each respective road paid either the cash, checks, or drafts, to the Mississippi Valley Trust Company, for the stock paid for by the respective roads. A. My recollection is that each road paid to the Mississippi Valley Trust Company several hundred thousand dollars on their first payments on that property, in order to carry it along, and then afterwards there was, of course, a bond negotiated, a loan negotiated, which paid off the property. But the Mississippi Valley Trust Company acted for the individual railroad companies, fourteen of them ultimately, seven originally.

Q. What official, if any, of these roads, if you know, could furnish this information, or would be likely to have the detailed information? A. Of course, if there was any money paid by the companies, it would appear on the Treasurer's accounts, the Auditor's vouchers, or advances. Presumably, through the Mississippi Valley Trust Company would be the simplest way to find out how the money was paid.

Q. You say there was a loan negotiated on these properties, which carried a proportion of the purchase price subsequently: I will get you to state if you know what officials of the companies arranged the details of this loan? A. I think the details of that loan were arranged by a Committee representing the several companies. My recollection is that that Committee was composed of Mr. McCrea of the Pennsylvania, Mr. Ingalls of the Big Four, and I think Mr. Yoakum of the Rock Island. I am not certain as

to the last name. This Committee represented the companies.

Q. And that is about the extent of your information upon the question of the details of that transaction? A. Of course, I was present at those meetings, but that was four or five years ago, and there were so many of them, and so many details discussed, that I cannot state definitely what they were.

Q. That was meetings of committees, and not of the corporations, officially? A. Meetings of the presidents of the corporations involved. They were always called "Executive Meetings," "Presidents' Meetings."

Q. There was no official record kept of those meetings, other than memoranda made for reference, I suppose? A. I think that was all.

Q. And whatever they were, would be simply retained by the officials for their own use? A. Yes, sir. Of course, the final payments were made through a bond or obligation. I think I testified in my first testimony in regard to that, that the thing was guaranteed in the first place by the three roads, the Wabash, Iron Mountain and Missouri Pacific, before the Mississippi Valley Trust Company made any move in regard to the purchase of those properties, and of the Wiggins Ferry Company stock, and the other roads came in; but they were the first guarantors.

Q. You stated that in your former testimony. I will ask you if you know whether or not any other road than the Rock Island was interested with the Rock Island, originally, in the effort to purchase a controlling interest in the Wiggins Ferry Company? A. I don't know anything about their arrangements, if any, or their combinations with the other roads.

CROSS-EXAMINATION, BY MR. H. S. PRIEST.

Q. Mr. Crow asked you, in your direct examination, this morning, whether the Terminal Railroad Association did

a passenger and freight business between St. Louis and East St. Louis, and you answered that it did do a passenger and freight business: You mean that was business supplied by railroad companies terminating in St. Louis and East St. Louis, hauling the passenger cars of such companies? A. That was all. The Terminal Railroad Association did no passenger business of its own; that is, it ran no passenger trains, and handled no passengers on its own trains. They merely furnished facilities and transferred the trains of other companies.

Mr. Crow: What time are you referring to now?

Mr. Priest: The time concerning which you examined him.

Mr. Crow: I examined him concerning from 1893 to 1905.

A. Yes, sir.

Mr. Priest: Q. And that has been the rule ever since, at all times?

A. So far as the Terminal Railroad Association is concerned—yes sir. The association of railroads using the Eads Bridge, handled their own passengers, furnished their own trains and cars, and the Terminal Railroad Association had nothing whatever to do with them, except probably to furnish some engines to handle the trains, or something.

Q. That is, they furnished the engines to handle the passenger trains of the roads terminating in East St. Louis and St. Louis? A. Some of them. Some ran their own engines and complete outfits.

Q. Using simply the way of the St. Louis Terminal Railroad Association? A. Yes, sir. The Merchants' Bridge Terminal Railway ran some work trains of its own, I believe, between Granite City and St. Louis, or did; I don't know whether they do it still, or not.

Q. Do you remember what time the Merchants' Bridge Terminal Railway Company ran passenger trains between

St. Louis and Granite City—during what period? A. It did that from 1904 on—to my knowledge. I don't know whether they are still doing it or not.

Q. When did you cease to have any official connection with the St. Louis Terminal Railroad Association? A. December 1, 1905.

Q. You ceased to be a director at that time? A. No, sir; I ceased to be an officer. I remained a director off and on until 1904 or 1905, when I had Mr. Pryor take my place in the Board.

Q. You spoke of all the roads, except two, terminating in East St. Louis, having an interest or membership in the Terminal Railroad Association: those two, I believe, are the Chicago, Peoria & St. Louis, and the Clover Leaf; how is the business of those two roads handled, between East St. Louis and St. Louis? A. It is handled on exactly the same terms and conditions as the business of the proprietary lines. There is no distinction between them, and those two roads have been invited more than once to become associated with the Terminal Railroad Association.

Q. Do you know, personally, of an invitation of that kind being extended, to become members of the Terminal Railroad Association, during your official connection with the Terminal Railroad Association? A. Yes, sir; in a general way. Of course there were no written or printed invitations extended.

Q. There was no discrimination in any manner, state or form, between those two roads and the other roads holding membership in the Terminal Railroad Association, was there? A. None whatever. If anything, the outside roads always had a little the most interest shown to them, in order to prevent them doing their business in other directions, or away from St. Louis—to induce them to bring it here for transfer. The Clover Leaf have, or did have, their

freight-house on this side for quite awhile. I don't know whether they have now or not.

Q. And they have the free use of the terminals at East St. Louis and St. Louis? A. Exactly the same as the other roads.

Q. Exactly the same as the lines holding membership in the Association? A. Yes, sir; exactly the same.

Q. Every line of railroad coming into East St. Louis from the East has its terminus on the east side of the Missippi River, doesn't it? A. Yes, sir.

Q. And that is true of the Wabash, which has lines both east and west of the Mississippi River? A. Yes, sir, but they terminate on the east and west side.

Q. Now, every line coming into St. Louis from the West, terminates on the west side of the river, at St. Louis, doesn't it? A. They do.

Q. And every line coming from the North terminates on the north side of the cities of St. Louis and East St. Louis? A. Yes, sir; their own yards are on the north side. The Burlington and the M. K. & T., and the Wabash coming into the city from the North, from Ferguson, terminates in North St. Louis.

Q. And every line coming into the City of St. Louis from the South terminates on the south side? A. The Iron Mountain terminates on the south side. They connect also with the Missouri Pacific at Carondelet. There is no line entering East St. Louis or St. Louis, from any direction, that is a through line, except as a through line is formed by a connection with the through tracks of the Terminal Company? A. Of the terminal companies—yes.

Q. So that the lines that terminate in St. Louis, coming from the West, must use the Terminal Railroad Association's lines for a connection with the lines on the east of the river? A. If they come through St. Louis, yes, sir.

Q. And those coming from the north, and having a ter-

minus in the north part of the city, must use the Terminal Railroad Association's lines in order to have through traffic to the South? A. Through St. Louis, yes.

Q. And with those terminating in the South, the reverse is true? A. Yes, sir.

Q. And those from the East, in the same way? A. Yes, sir.

Q. Now, cutting out the terminals, there is not a single through line through St. Louis or East St. Louis, is there? A. None whatever—you mean all the terminals of St. Louis, the Merchants' Bridge, and the Eads Bridge, and the Wiggins Ferry connections?

Q. Yes. A. Yes, sir; that is correct.

Q. Now, by means of the lines of the Terminal Railroad Association, and those that you have heretofore designated as belonging to the Terminal system, generally, every line coming into St. Louis, from any direction, or into East St. Louis from any direction, is a through line? A. Is a through line, and has through connection with every other road coming into St. Louis. And any new railroad reaching any outlying tracks of the Terminal Railroad Association, has immediate connection with all the other roads, and with every industry in East St. Louis or St. Louis.

Q. And any industry accessible to any railroad track or railroad terminal in East St. Louis or St. Louis, has access to every railroad coming into East St. Louis or St. Louis? A. Through the Terminal Railroad Association system, they have.

Q. And likewise, the passenger trains of all these roads coming into St. Louis, the same is true? A. Passenger or freight traffic, mails or express.

Q. Do you recall in what localities of St. Louis the terminal yards are? A. As they exist to-day?

Q. Yes. A. Of all the systems?

Q. No, sir, just the Terminal Railroad Association's

yard? A. The Terminal Railroad Association has all the yards, team-tracks, warehouses, and passenger station facilities in the Mill Creek Valley, which are not owned by the Missouri Pacific, Wabash, or Frisco properties, individually. They extend from Manchester Road, practically, clear through the Mill Creek Valley, to the tunnel; practically controlling nearly all the track and facilities on the north side of the Missouri Pacific and Wabash tracks, in the Mill Creek Valley. And they have the north and west belt lines, reaching around and connecting all the railroads west and north of the city.

Q. I am asking especially about freight yards, switching yards? A. The Terminal Railroad Association proper, the freight-yards are principally in the Mill Creek Valley, in St. Louis.

Q. Has it anything north of the Eads Bridge in St. Louis in the way of Terminal yards? A. No, sir.

Q. What other terminal yards are in St. Louis, and in what locality, belonging to the Terminal Railroad Association? A. The Wiggins Ferry Company owns the tracks along the levee with large and important yards in South St. Louis and in North St. Louis. On the levee in North St. Louis, extending on up to the water-works; that is, above the Merchants' Bridge; and reaching practically all connecting lines along the river front, north and south of the levee and water-front properties. The Merchants' Bridge Terminal Railway Company has yards at Gratiot Street, elevated tracks, and then yards from Franklin Avenue north almost up to the Chain of Rocks, away up above the Burlington yards, now, that being extended to a lot of new tracks since I got out of touch with them.

Now, those three systems cover the river front, North and South St. Louis, and the only other freight section of St. Louis, the Mill Creek Valley. And through the connections in the Mill Creek Valley, the Terminal Rail-

road Association reaches out as far as DeHodiamont, with the Burlington & Frisco tracks, within the switching limits of St. Louis.

G. F. M. WARD, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW.

Q. Give your name, residence and occupation? A. George F. M. Ward; Mt. Vernon, Illinois; merchant.

Q. In what line of business are you engaged? A. Clothing, furnishing goods, hats, shoes, and ladies' ready-to-wear goods.

Q. How long have you been in business there? A. Since 1879.

Q. Continuously? A. Yes, sir.

Q. Do you purchase goods to retail in your store, at Chicago and St. Louis? A. Yes, sir.

Q. Will you state, if you can, what are the relative times, if goods are ordered from Chicago, Ill., and St. Louis, Mo., on the same day, that they will be received at your place?

Objected to by counsel for defendants as immaterial.

The Commissioner: In regard to objections, I desire to state that I have discussed this matter with the Judge of this Court since our last meeting. The Commissioner can only note the objections, and if you desire the Commissioner to rule on these matters, you will have to ask for a modification of the order appointing him.

Mr. Priest: This case may be extended indefinitely, if we are to sit here and listen to the complaints of every man who is a shipper over any of these roads. We may consume a full year in taking that sort of testimony, and we will create a whole lot of false issues.

Mr. Krum: The Commissioner cannot pass upon the competency of these matters.

Mr. Priest: Questions may be certified to the Court, to pass upon those matters.

The Commissioner: The Supreme Court has fixed that by its rules. The Court has power to modify the powers of the Commissioner by a special order, but the Court has not done so in this particular instance.

Mr. Priest: My impression is that even in the taking of a deposition before a Commissioner, a question may be certified and brought to the attention of the Court for decision. I take it, of course, that these gentlemen representing the Government would not want to pad this record with a mass of irrelevant testimony.

Mr. Krum: We say it is not irrelevant: that is where we differ.

Mr. Priest: We can determine that question very speedily, by empowering the Commissioner to pass upon the competency of the testimony.

The Commissioner: If you had that in the order, it would be very different. But I have been distinctly informed that my only power is to note objections.

(Previous question read).

A. I have received goods from twenty-four to forty-eight hours earlier from Chicago than from St. Louis, having ordered them at the same time.

Q. What is the distance from your place to Chicago, and from your place to St. Louis? A. I think it is about seventy-eight miles to St. Louis, and something like two hundred miles further to Chicago.

Q. I will get you to state whether or not these orders were given, and the goods shipped, at practically the same time, if you noticed as to that? A. Yes, sir.

CROSS-EXAMINATION, BY MR. PRIEST.

Q. You say you are in the dry goods business at Mt. Vernon, Illinois? A. Yes, sir.

Q. What amount of business do you do annually? A. About seventy-five to eighty thousand dollars.

Q. What is the size of the stock you carry on hand? A. That varies.

Q. Generally, what is the average? A. Probably my stock now—this year I expect to do over $100,000 business, and my stock is larger than what it has been at other times. We have added some new departments. The stock would probably run now $50,000 to $60,000. I cannot say, myself, exactly. I haven't looked at it recently.

Q. How long have you been in business in Mt. Vernon, Illinois? A. Since 1879.

Q. Do you get your invoices in car-load lots? A. No, sir.

Q. In parcels? A. I get them in local shipments, usually.

Q. What do you mean by local shipments? A. That is, in case-lots, or small lots, packages, boxes, etc. My line of business does not usually call for car-load lots.

Q. Have you any distinct recollection as to the precise time, date, and character of goods, ordered simultaneously from Chicago and St. Louis, when shipments from Chicago & St. Louis were simultaneous, and the St. Louis shipment was delayed from twenty-four to forty-eight hours? A. I presume—

Q. I don't want any presumption. A. I think, in fact I am satisfied, that what brought me here today is a "kick" I made about a year ago in regard to some rubber goods.

Q. I didn't ask you about that.

Mr. Crow: Go on, and answer.

A. The weather was very bad, and we needed the goods very badly.

Mr. Priest: Q. I want you to answer my question, and not have Gen. Crow tell you how to answer it.

(Previous question read).

A. I couldn't give the date, but something near a year ago.

Q. What was the character of the goods you ordered? A. Rubber goods, rubber shoes and boots.

Q. From whom did you order them in Chicago? A. From the Sanders Duck & Rubber Company in St. Louis, and the "Duck Brand" Company in Chicago.

Q. How did you give the order? A. By mail.

Q. Sent out on the same day? A. I think so, or about the same day.

Q. "About?" Twenty-four hours is "about." A. Well—

Q. Do you know? A. I know at that time I was ordering goods, and when I ordered them from St. Louis I was usually a week, or something near a week, getting them; and often I ordered them from Chicago, and if I wrote the letter on Sunday I had the goods in my house on Tuesday. That I know, because we took special notice of it.

Q. We will go over all these occasions in your cross-examination. But this particular shipment you referred to—do you know that the order was made by mail on the same day, and if so, how do you know it? A. I couldn't state that positively, no, sir.

Q. You did state it, in your examination in chief, that they were mailed at the same time? A. I say if they were ordered at the same time.

Q. Didn't you state in your examination in chief that the order was made at the same time in Chicago and St. Louis?

Mr. Crow: He answered my question, and my question was, "If they were."

A. The point I am trying to testify is, that if I ordered.

Q. I am not concerned with what you are trying to testify, but with the fact. A. That is the fact. When I ordered them from Chicago on one day, they came quicker by twenty-four hours than if I ordered from St. Louis.

Q. You say this occasion, of about a year ago, was the cause of your being subpoenaed here? A. I think so. I don't know it personally. Because I made some previous kicks about that time.

Q. I asked you to give me the time, the character of the goods, the date of the order, etc. Now, I want to get through with this instance first, and then we will take up the others later on. Now, did you state, that in this instance to which you referred, the orders were made on the same day? A. No, sir; I cannot state that positively, although I have no doubts my records would show it, but I cannot state that positively.

Q. Did you order the goods personally? A. Yes, sir.

Q. You made these orders? A. Yes, sir.

Q. Do you know when the goods were shipped from Chicago? A. I know that I ordered goods on one day, and the third day, one day intervening from the time I made the order, I would have the goods in the house; the same as if I would order to-day—

Q. You want to get away and deal in generalities; I want to deal in specific things. I want to know if you know the date on which the goods were shipped from Chicago in this particular instance? A. I could not name any particular day, no, sir; because I haven't charged my mind with the date, for a year.

Q. Do you know the date when the goods were shipped by the Sanders Duck & Rubber Company, from St. Louis? A. No, sir; I couldn't state that.

Q. Do you know how they were shipped? A. Yes, sir; I know they were shipped over the L. & N. Railway.

Q. Was it a car-load lot or a parcel? A. Parcel lot.

Q. To whom was it delivered, and where, do you know? A. I couldn't say that, either.

Q. Do you know whether it was delivered directly to the L. & N. Railroad Company? A. No, sir, I know when I received them—that is all.

Q. Wouldn't the bill of lading show? A. I think it would.

Q. Have you the bill of lading in your possession? A. No, sir. I have a memorandum in my possession now of goods I ordered last week, when I was over here, that I haven't got yet. I don't know what they have done with them. I have the receipt here.

Q. We will get to that later. But referring to this particular instance: do you know whether they were delivered direct to the L. & N. Railroad Company, or to some one else? A. I couldn't say.

Q. Would your bill of lading show that? A. I presume so, if I would look it up.

Q. When you were making this complaint, didn't you look to see the date? A. I was kicking at the house, and not the railroad company.

Q. Your complaint was that the house was not particular in filling your order? A. I haven't any complaint to make. I am simply testifying to the facts as they occurred with me.

Q. I want to fix the responsibility here, of who is at fault. A. Here is a bill of lading, shipped on the 26th, and it is not at my place yet. I don't know who it was delivered to.

Q. Let me see that bill of lading? A. Here it is (handing paper to counsel).

Q. I will take that up later. I want to get through with this other first. So you don't know when you order from the Sanders Duck & Rubber Company was shipped, and to whom it was delivered for shipment; you simply know that

it arrived at your place over the L. & N. road, sometime after you ordered it? A. Yes, sir.

Q. That is the sum of your information? A. And also about the same time, with another shoe house—the name I cannot just call to mind now—I had considerable trouble in receiving goods.

Q. Now, is there any other instance besides that of the Sanders Duck & Rubber Company, to which you referred? A. It is the general rule—

Q. I am not asking you about the general rule. A. That is all I can testify to, is the general rule.

Q. I want to test the general rule by specific instances: Can you give me any other specific instance? A. I could not give you any dates, because I have not charged my mind with them.

Q. I am not asking about dates, but instances. A. With the Hargadine-McKittrick Dry Goods Company, I have had goods delayed in the same way.

Q. Did you call to mind, in making that answer, any specific instance of dealing with Hargadine-McKittrick, or is it a general impression you are testifying to? A. It is the general rule that our goods are delayed from St. Louis. We can count on a week. Often I order goods by express to save the delay.

Q. How often do you order from St. Louis? A. I suppose two or three times a week.

Q. From what houses? A. Hargadine-McKittrick, Roberts, Johnson & Rand, Sanders Duck & Rubber Co., Rice-Stix, Loth Jeans Clothing Co.

Q. Have you had the same difficulty with all those companies? A. Pretty much. It is not always that freight is delayed that much—

Q. When was the last instance that—

Mr. Crow: Let him finish his answer.

A. I cannot say how often.

(Previous question and answer read to witness).

The Commissioner: Do you want to add anything to that?

A. I think not.

Q. By Mr. Priest: When was the last instance of delay? A. That is that receipt there (indicating). I should have had those goods in the house Friday or Saturday.

Q. You have shown me a receipt: when did you make the order that called for those goods? A. A week ago Tuesday: that is two weeks ago to-morrow.

Q. When did you leave home? A. This morning, between four and five.

Q. And the goods had not yet arrived? A. They had not.

Q. Whose receipt is that? A. The L. & N. Railroad Company's, I think.

Q. Do you find any L. & N. on that receipt? A. (After examining receipt). It is the St. Louis Transportation Company receipt to Morris A. Heinmann Mfg. Co.

Mr. Crow: It is Transfer Company instead of "Transportation."

Mr. Priest: Let the witness testify.

Mr. Crow: It speaks for itself, and I can read.

Mr. Priest: So can the witness.

Q. Do you know what the St. Louis Transfer Company is? A. I am not posted on these things over here.

Q. When were those goods, according to this receipt, delivered to the St. Louis Transfer Company? A. I didn't look to see. (After examining paper). The receipt calls for the 26th. I presume that was when they were delivered.

Q. This receipt is evidence of delivery to that company, isn't it? A. Yes, sir.

Q. And you say you ordered those goods two weeks ago? A. It will be two weeks to-morrow.

Q. According to this receipt, then, the Morris A. Hei-

mann Mfg. Co. held your order for more than a week, didn't it, before they shipped the goods, or delivered them to the St. Louis Transfer Company? A. Yes, sir, but goods delivered here to the Transfer Company on the 26th ought to be in Mt. Vernon on the next day, or on the 28th.

Q. Can you count on the Heimann Company shipping promptly in response to your order? Didn't they hold this order some time? How do you account for that? A. Very likely they didn't have the goods, didn't have them manufactured.

Q. Isn't that probably true in regard to the Sanders Duck & Rubber Company also? A. It may be.

Q. So your delays in receiving goods from St. Louis may be on account of the delay of the merchants in shipping the goods, may it not? A. Well, if they tell the truth, it is not.

Q. I say, so far as you know. A. So far as I know—yes, sir.

Q. And you have in evidence the only memorandum which you have in writing, that the party of whom you ordered them held the goods more than ten days? A. I have had other receipts, where the goods have been longer delayed than that.

Q. Give me those other receipts. A. I throw them away when the goods come in.

Q. I am not able to pin you down to another specific instance. You testify generally, and when you give me a particular memorandum in which you complain of delay I find, on examining it, that the principal delay is on account of the delay of the party from whom you ordered the goods. A. The only other thing I can give you is my recollection.

Q. Examining this receipt further, don't you see that the Transfer Company did not get these goods until the 27th of September? Look at the date on that stamp. A. (After

examining paper). I was looking at the date of the receipt. You are either younger, or have better eyes, for I cannot see that date.

Q. General Crow may read it. He corrected you on another part of it. A. I am not able to see that date—Yes, I believe I can make it out; a sort of a pencil mark blurs it.

Q. That shows the 27th? A. Yes, sir.

Q. Well, this receipt was dated the 26th, but the goods were not received by the St. Louis Transfer Company until the 27th of September? A. That is correct.

Q. And that was more than ten days after you had ordered them, before the goods were shipped to you? A. That is correct.

Q. Have you any objection to this receipt going in evidence as an exhibit to your testimony? A. None in the world.

The paper referred to is marked "Defendant's Exhibit Ward Receipt."

Q. You know nothing about this shipment except the fact that you ordered the goods from St. Louis and you received them at Mt. Vernon by the L. & N. Railroad? A. That is about all. I don't keep track of them. Of course I know the time I receive the receipt, and if I do not get the goods in a reasonable length of time I begin to ask them to trace. I have no special interest in the matter, and do not keep tab on it.

Q. Do you know whether the St. Louis Transfer Company deliver at St. Louis or East St. Louis direct to the L. & N. Railroad Company? A. No, sir, I don't know that. I think most of the goods are delivered on this side, but I don't think that is always the case.

Q. Delivered by what companies on this side, do you know? A. I do not know.

Q. Have you any personal knowledge of it at all? A. No, sir, none whatever.

Q. Why do you say you think? A. I have seen my receipts, and to the best of my recollection some of them are delivered to the railroad company on this side.

Q. When did you last examine those receipts? A. I could not say?

ALPHONZO DE FIGUEIREDO, a witness of lawful age, being duly produced, sworn and examined on the part of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW.

Q. State your name, residence and occupation? A. My name is Alphonzo de Figueiredo; I reside at 4132 McPherson Avenue, St. Louis, Missouri. I am Assistant Manager of the St. Louis Transfer Company.

Q. How long have you been connected with the St. Louis Transfer Company? A. Since January, 1892.

Q. Who are the officers of the St. Louis Transfer Co.? A. Mr. George J. Tansey is the President and General Manager; Mr. Gaston B. Walls is Secretary and Treasurer; and I occupy the position of Assistant Manager and Auditor.

Q. What are your duties in the position you occupy? A. My duties are as Assistant to the President and Manager, to exercise supervision over the transportation, and also the traffic of the Company. And as Auditor I submit a monthly statement of the operations of the Company, and approve vouchers for the payments of supplies and other expenses.

Q. What is the extent and character of the property owned and controlled by the St. Louis Transfer Company? A. The St. Louis Transfer Company owns and operates some three hundred freight wagons, eight hundred horses and some twenty carriages and baggage wagons; this equipment being used for the movement of freight and passen-

gers and their baggage. It also owns and operates depots on Second and Carr Streets in the City of St. Louis; at 400 South Broadway, and on Third Street between Valentine and Poplar Street, for receiving and transferring freight, destined either for railroads at St. Louis or East St. Louis, or for storage on account of whom it may concern.

Q. To and from what points or what States does the St. Louis Transfer Company carry on its business of transporting passengers and freight? A. The St. Louis Transfer Company delivers freight to the railroads having termini at East St. Louis in the State of Illinois, and also to the railroads having terminals in the City of St. Louis.

Q. Do you transport any freight from the State of Illinois to the State of Missouri? A. Yes, sir.

Q. What class and character of freight? A. As a general proposition, ordinary merchandise, but we transport everything we are able to handle, or our wagons are able to carry.

Q. How many men, teams and wagons have you in that part of your service? A. To-day we are operating probably two hundred and seventy-five teams, which necessarily means two hundred and seventy-five drivers, and an additional force of not less than three or four hundred men, in the way of clerks, laborers, superintendens and so forth. That is in the Freight Department alone.

Q. About how many men have you on your pay-roll, altogether? A. It depends upon the season of the year. When business is brisk we generally carry about from eight to nine hundred men in all departments, both freight and passenger.

Q. Have you any idea of the tonnage you will actually transport between Missouri and Illinois, to and from the railroads that have termini in East St. Louis, Illinois? A. I think about in the neighborhood of four hundred thousand tons per annum.

Q. Prior to the 1st day of October, 1905, what rate was charged for the general merchandise transported by your company between St. Louis, Missouri, points in this city, and East St. Louis, Illinois and vicinity, of the character you have mentioned? A. I could not answer that off-hand, because we have a tariff which specifically states the rate. But as a general proposition carload business is four cents per hundred pounds and less than carload business is five cents per hundred pounds. Then there are a number of exceptions, which our tariff indicates.

Q. The bulk of the business that would go, would that be at the four cents or less than four cents rate? A. Yes, sir, most of it would be; that is, taking into consideration the carload business.

Q. Will you describe the method that is gone through with in handling freight where there is a shipment from New York City, for instance, to a wholesale firm in St. Louis, Missouri, if it is billed by your Transfer Company; Tell us just what you do? What I want to get at is, the part of the service you perform in getting that into St. Louis? A. To begin with, we have a list of consignees in St. Louis, who are on our delivery or guaranteed accounts. Such consignees receive the freight direct from the terminals at St. Louis, at their door, the St. Louis Transfer Company collecting the freight charges, plus its charge for the service from the consignee..

Q. With whom do you settle for your bills? A. Then we settled with the Railroad Companies every week for the amount of traffic handled by the Transfer Company for the account of each, whatever that amount may be. We do that every week, or, rather four times a month.

On the business destined to consignees who are either within the delivery limits, or who do not have a credit with the Transfer Company, the freight is unloaded in the warehouse, and the consignee notified, and when he calls for the freight he will pay the charges from the point of shipment

to St. Louis, and the same process will be followed, that is, the Railroad Company will get its proportion by settlement, and the difference will be handled by the Transfer Company, as its payment.

Q. The warehouse you speak of would be located where, in the City of St. Louis? A. In the City of St. Louis, State of Missouri.

Q. How long has this method you speak of been in operation? A. Practically, General Crow, since 1859.

Q. A store door delivery? A. Yes, sir; and warehouse delivery.

Q. When did the store door delivery begin? A. The history of the Transfer Company will show that freight was hauled from East St. Louis, and either unloaded in warehouses of the Transfer Company, and the consignee notified, or then by arrangement with the consignee, by the payment of drayage charges, the freight was hauled directly to the consignee.

Q. Before the first of January, 1906, was the St. Louis Transfer Company making a general store door delivery within the limits you have mentioned, within the City of St. Louis? A. Yes, sir.

Q. I will get you to state, who paid the transfer charges prior to October 1, 1905, that were collected by the Transfer Company, for the services which it performed? A. On what business do you refer to.

Q. On business generally, shipments from the East, coming in. A. It would be desirable to indicate whence the shipment originated, because in some instances where the rates apply to St. Louis, the consignee did not pay as much as when those rates did not apply.

Q. What class of freight would it apply to, before October, 1905, in St. Louis? A. The rates in operation in the territory that is known as "Green Line Territory," or "Southern Freight Association Territory," the rates apply

to St. Louis; and where the freight was delivered direct to the consignee, half of the transfer charges was paid by the Railroad Company and the balance was paid by the consignee.

Q. That is, in Green Line Territory the Railroad Company paid all of the charge to the Transfer Company: Is that right? A. No, sir. If the freight was delivered at the door of the consignee, the Railroad Company paid one-half of the transfer charge, and the consignee paid the balance. But if the freight was unloaded in the warehouse, to be called for by the consignee, the Railroad Company paid the entire charge for transferring.

Q. Will you designate where the Green Line Territory is? A. It is that territory south of the Ohio and West of the Carolinas and Mississippi River.

Q. When did the arrangement you mention begin operating with the Railroad Company and the Transfer Company, with reference to Green Line Territory? A. That is all, I think, since 1893 or 1892.

Q. Prior to that time the same rules applied to what is now known as "Green Line Territory" as applied to other territory, didn't it? A. No, sir. The other territory did not come in under that. But if I am to go back to ancient history—in 1859 that was the condition, that the rates applying to St. Louis, the railroads made the delivery of the freight here, paying the Transfer Company in the shape of tonnage for the cost of transferring it across the river.

Q. You know when the Green Line Territory was designated, do you? A. I do not.

Q. That was not in 1859, was it? A. No, sir; but in 1893 it was that these arrangements went into effect.

Q. Do you know the occasion of those arrangements being made? A. I am not familiar with it, because I went to the St. Louis Transfer Company just about that time.

Q. Wasn't it because of the building of the bridge at

Memphis? A. That might be. But as I stated before, I came to the St. Louis Transfer Company about that time, and I am not familiar with that.

Q. You spoke of goods coming in to the Green Line Territory: Please tell us, if you know, what was the arrangement as to who paid the charges on goods coming from St. Louis destined to points south of the Ohio River? A. The reverse of that proposition. That is, when hauled from the door of the shipper, the shipper pays half the cost; and when delivered by the shipper to the depots of the Transfer Company, the cost is absorbed.

Q. That is, who pays it? A. The railroad companies.

Q. The territory north of the Ohio River, what is the arrangement as to who pays the charges, on inbound freight? A. I am not very familiar with that, because I would like to look at the tariff.

Q. In a general way? A. In a general way, from points in Iowa and Wisconsin—I don't know whether the Chicago & Alton is yet doing it—but on freight destined to Missouri River points, on the Chicago & Alton road, the same conditions exist.

Q. What do you mean by "the same conditions?" A. That is, the Missouri Pacific and the Wabash Railroad having terminals at St. Louis, and the Chicago & Alton having to depend upon the Terminal Railroad Association or the St. Louis Transfer Company for terminals, has necessarily to absorb or make the rate the same that is made by the Wabash and the Missouri Pacific to Kansas City and Missouri River points.

Q. On points east of the Missouri River, on say freight destined to Kansas City, would the railroads take care of the charge of your company, if they are transferred by your company? A. Yes, sir.

Q. Take it upon shipments from St. Louis territory, north of the Ohio River, out-bound shipments, into terri-

tory called "Trunk Line Territory," what rates if any apply for transfer charges, and who pays the same? A. That is a condition that has been open in St. Louis within the past few months, and not yet generally accepted, so I am not in a position to indicate, as a sweeping statement, that every railroad is doing it; but such as are, will absorb the full cost of the transfer when the freight is delivered at the depots of the St. Louis Transfer Company; and when the freight is hauled from the shippers' stores, they will pay only one-half, or will pay varying prices, according to the classification, it being two cents on the first three classes, one and one-half cents I think on the fourth and fifth classes, and one-half cent on the sixth class. But that rate is not recognized or paid by all of the railroads; there are some exceptions.

Q. You are speaking now, of course, of payments to your Company and not to any other? You are speaking of your own business only? A. Yes, sir, I speaking only of ours, although I understand they are doing it to others..

Q. Is it true that the railroad companies make any difference between shipments that are sent in from the East, from the merchants, manufacturers or citizens of St. Louis, in the amount of cost of carriage, in order to obtain delivery in St. Louis, if the goods are consigned to your Transfer Company? A. If they make any difference?

Q. Yes. A. They are the best able to judge. I know only what we do and what they allow us.

Q. I am asking you if you know about that condition? A. I know that we are not by any means handling all of the traffic. Why I do not know.

Q. I ask you if you have any knowledge on that question? Of course if you haven't you cannot answer. A. No, sir; I haven't any positive knowledge.

Q. What is the next largest transfer company to yours? A. The Columbia Transfer Company.

Q. Have you any general knowledge as to the amount of property, number of teams and the amount or number of men they employ? A. Not sufficient to testify. All my information is hearsay.

Q. What other Transfer Companies are there engaged in the same general character of business, so far as freight is concerned, that your Company is engaged in? A. There are the Fidelity Transfer Company, the Mound City Transfer Company, the Bailey Transfer Company, the Kinney Transfer Company, Noble's Express Company. I don't know how many there are, but a great many. I am citing you a half dozen or more.

Q. They do a similar business to what your Company does, on a smaller scale? A. Yes, sir.

Q. What official of your Company has charge of the records and stub-books, do you know? A. The Secretary.

Q. And what did you say his name is? A. Gaston B. Walls.

Q. Where is his office? A. 400 South Broadway.

Q. Is he in the city now? A. He was this morning.

Q. Do you know whether or not the roads that compose the Terminal Railroad Association pay to your Company the same rates for hauling, all of them, where they pay anything? A. Where they pay anything they pay the same.

Q. The same rates? A. Yes, sir.

Q. Take the article of boots and shoes, have you any arrangement with any of the boot and shoe houses to handle their business, along the lines you indicated a little while ago? A. I don't think we have at present. We are handling boots and shoes that are delivered to the depot at Broadway and Spruce streets. But we are not handling—in other words, we are not carrying between the railroads and the wholesale boot and shoe houses, and have not been for some time.

Q. When you handle boots and shoes for a merchant on Washington Avenue to your depot in this city, to East St. Louis, for whom do you handle those goods? A. We handle it on account of the Railroad Company we represent.

Q. What amount of that class of business do you carry on—very much of it? A. No, sir, not very much.

Q. Take the grocery line: Do you handle goods directly for the wholesale grocers, under any specific arrangement with them? A. No, sir; we handle carloads of sugar for storage, and that is about all.

Q. Take their out-bound shipments for points in Indiana and Ohio, north of the Ohio River: Do you handle that from your depots, or from the wholesale houses? A. We might handle it from our depots, probably, if we are offered something; but not enough to attract attention.

Q. Do you know how the majority of that line of goods is handled? A. The largest wholesale grocers are located at the Cupples Station. And the others, a great many of them, are located on Second Street, and own their own teams, or have some "boss" teamster who handles the freight directly from their store to East St. Louis.

Q. The men at Cupples Station do not team over to East St. Louis, do they? A. No, sir.

Q. They are able to load directly on to the cars? A. Yes, sir.

Q. Do you know how the in-bound shipments of the wholesale grocers are handled from the termini of the eastern roads? A. About the same way. We do very little of that business, as I stated, unless carloads of sugar or some staple article, coffee, or something like that, may come in.

Q. Take the dry goods line: That is a bulky line of business, isn't it? A. Yes, sir.

Q. Do you handle that directly to the store? A. We handle a great deal for one firm.

Q. What firm is that? A. The Carleton Dry Goods Company. All the others have their private teams, to either go to East St. Louis, or haul from the terminal on this side.

Q. On the out-bound shipments, how do they handle it? A. The same way. We are now getting, from some firms, some in-bound shipments of dry goods for Ferguson-McKinney. It is only a small lot, not like the other, the Carleton Dry Goods Company, for whom we do all their hauling.

Q. What proportion of grocerymen haul their own goods from East St. Louis, on in-bound shipments? A. I would not like to make a sweeping statement, from East St. Louis, whether from East St. Louis or the terminals on this side. As a general proposition, I would say that every wholesale grocer, not located at the Cupples Station.

Q. Would you say the majority of the dry goods men do the same? A. The majority of the dry goods men are a little different. Some of them are shipping their freight directly by the Terminal Railroad Association, because they have warehouses located on or contiguous to the tracks of the Terminal Railroad Association. On their out-bound freight, they either deliver it to the Terminal Association on this side, or to the railroad company at East St. Louis.

Q. There is a large amount of steel business, the manufactured product, handled in and out of St. Louis? A. Yes, sir.

Q. How is that handled? A. By private teams, or on tracks on this side of the river, principally.

Q. Principally on this side of the river? A. Yes, sir.

Q. How is the lumber traffic from eastern points handled, or do you know—that is a bulky product, too? A. From my experience in the past, all the lumber business we have from the East—I cannot remember anything particularly, in large quantities, coming from the East. Most

of the lumber comes from the North and the South, and, of course, would be handled from this side. Such roads as would bring it from the other side, the C. B. & Q., or the Chicago & Alton, all the principal lumber yards are located on tracks in North St. Louis, for example. That is not handled by wagons, at all.

The usual hour for recess having arrived, recess was taken until 2:30 p. m.

After recess on Monday, October 1st, 1906, the following proceedings were had:

On the application of counsel for plaintiff, it is ordered that R. N. Frazier, of St. Louis, Mo., produced at the taking of testimony in this cause, before the Special Commissioner, on the 2nd day of October, 1906, at ten o'clock, a. m., and following days, the following books, records, and papers:

Information circulars, Nos. 1 to 8, inclusive, issued by the St. Louis Coal Traffic Association.

All records of meetings held during the year 1905, down to the month of October of said year, by the East-bound Freight Committee of St. Louis.

All records of meetings held during said year, down to the month of October, by the St. Louis & Belleville Freight Committee.

All records of meetings held during said year, down to said month of October, 1905, by the St. Louis & Cincinnati Freight Committee of St. Louis.

DIRECT EXAMINATION OF A. DE FIGUEIREDO, CONTINUED, BY MR. CROW.

Q. You stated, or at least, I understood you to state, before noon, that there was not any difference in the method of shipping in here now than what there had been since the

beginning of the business of the St. Louis Transfer Company? A. That is right, yes sir.

Q. Is there any difference as to the price that is paid for shipping the different classes of freight in here from the East than what there was in 1905, and prior to that date? A. General Crow, before replying to the various questions which you may see fit to put to me, I desire to qualify a statement which I made this morning.

Q. Certainly, you may do so. A. And that is, with reference to your question as to whether there were any other transfer companies in this city that were engaged in a similar mode of transportation to that practiced by the St. Louis Transfer Company. In reply to that query, I stated Yes, and mentioned several. But I desire to qualify that with an additional statement, and that is, that although they may have, and do have, wagons and drivers, yet they do not furnish the railroads the terminal facilities which the St. Louis Transfer Company furnishes them. They do not have the amount of capital invested in real estate and buildings; they do not employ the number of clerks for the purpose of furnishing the railroads a clearing-house. They do not advance to the railroads the vast sums of money which the St. Louis Transfer Company does. In other words—

The Commissioner: They are not in the same class.

A. "They also run."

Mr. Crow: Q. They haven't any warehouse, either? A. No, sir; they simply furnish the teams. In reply to your query I stated there were several other companies, and I failed to qualify that although they were in the way of business similar to ours, they did not furnish these facilities.

Replying to your query of this afternoon, I say, no sir, the St. Louis Transfer Company of to-day has the same tariff it had at that time.

Q. My question was a little broader than that. I will

ask it in another form. I will get you to state if, prior to October, 1905, the railroads billed freight direct to St. Louis by way of the St. Louis Transfer Company? A. Yes, sir.

Q. Was that an ordinary thing? A. Yes, sir.

Q. Was the freight billed to St. Louis, and St. Louis bill of lading issued? A. No, sir.

Q. Then it was billed to St. Louis by the St. Louis Transfer Company, as a connecting carrier? A. Yes, sir.

Q. At this time, how is the bill of lading issued? A. I don't know. I haven't seen a bill of lading.

Q. That is out of your department? A. Yes, sir.

Q. You do not handle that? A. No, sir.

Q. What official of your company would know about those things? A. If the consignment is delivered direct to the consignee, then only the consignee would know it; but if the consignment were unloaded in the warehouse, and would have a bill of lading presented for the consignment, then it would be a matter of record, and in possession of our department.

Q. Prior to the 1st of October, 1905, the arrangement for the transportation of goods in-bound, from East St. Louis to St. Louis, was between the St. Louis Transfer Company, and the consignee, wasn't it? A. Ninety-five per cent of it, yes.

Q. And the arrangement for that transportation I mentioned, was not between the railroad company and the St. Louis Transfer Company? A. No, sir.

Q. Now the arrangement is the other way, isn't it? and the matter of the transportation to St. Louis is arranged between the St. Louis Transfer Company and the railroad company? A. No, sir.

Q. It is not? A. No, sir.

Q. How is it arranged? A. Wherever and whenever the St. Louis Transfer Company has filed with the railroad companies terminating at East St. Louis, an order for the

delivery of their consignments to the St. Louis Transfer Company, that order is observed by the company terminating in East St. Louis. In the absence of that order, it is optional with the railroads terminating at East St. Louis whether the freight shall be delivered to the St. Louis Transfer Company, or whomsoever they please?

Q. Is there any difference now in the price of a shipment, on first-class freight, from New York City to St. Louis, if it is billed by way of the St. Louis Transfer Company, and what it would be to the consignee if it is billed by way of the Weber Transfer Company? A. I am unable to answer that question, for the reason that I do not know what the Weber Transfer Company collects.

Q. Is there any difference in the price for hauling, as paid by the railroad companies now, and what there was in October, 1905? A. Yes.

Q. What is that? A. The difference is whatever the differential may be, perhaps one cent a hundred.

Q. Explain what you mean by "the differential"? A. If A B C at New York should ship to C D E or to D E F at St. Louis, a box of first-class merchandise, the rate being eighty-seven cents to East St. Louis; and if D E F were a customer of the Transfer Company, to whom the Transfer Company would make direct delivery from East St. Louis, then the rate charged to that consignee would be the first-class rate to East St. Louis, 87 cents per hundred pounds; plus one cent, the St. Louis rate; making an 88 cent rate; plus the delivery to the door of that consignee, at whatever the charge may be,—we will say three cents; making a total of ninety-one cents. Formerly—

Q. Who would pay that ninety-one cents? A. The consignee. Formerly that same box, over the same route, but under different conditions, would arrive at East St. Louis, at the East St. Louis rate, 87 cents, plus the delivery from East St. Louis to the door of the consignee, five cents,

making it 92 cents. Therefore, the consignee, under the present arrangement, is the gainer at the rate of one cent per hundred pounds. I don't know if I make my meaning clear?

Q. I understand it. It is very clear to me. How much of that would the railroad company pay? A. It being first-class, according to the published tariffs, and I believe they are on file with the Interstate Commerce Commission.

Q. Of your Company? A. Yes. We don't file them, but I believe the railroad companies do. But the railroad companies' files indicate that they pay the St. Louis Transfer Company two cents per one hundred pounds.

Q. Additional? A. It comes out of this entire amount. So that the consignee pays only three cents.

Q. Then the railroads actually ship freight into St. Louis for two cents less than they formerly did? That is the practical result of it to the railroads? A. How is that, General?

Q. I am asking you if that is true? A. How do you make it two cents less?

Q. They did not formerly pay anything, did they, and now they pay two cents? A. They did not pay anything formerly.

Q. And they have not increased the freight rate to St. Louis one cent and to East St. Louis two cents? A. Yes, two cents.

Q. To St. Louis they receive one cent less than they did formerly? A. Yes, sir.

Q. Do you know what per cent—just approximately—of the business that is handled by teams, in-bound and out-bound from East St. Louis across the Mississippi River, your company does? A. I have no means of ascertaining.

Q. Have you any judgment about it, as a man who has been in the business a long time? A. My judgment might be very poor.

Q. Could you say that your Company does a majority of it? A. No, sir, I could not.

Q. You couldn't say that? A. No, sir.

Q. If a shipment was delivered, say, by a house on Washington Avenue to your Company, at the warehouse of your company in St. Louis, and it is less than a carload lot, destined, say, to a point on the Pennsylvania Railroad, east of Indianapolis, Indiana, what process does that go through before it is finally started on its journey eastward? A. If a car-load is delivered—

Q. No, sir, less than a car-load—fractional car-load lots is what I am getting at, just how they are handled? A. Upon delivery by the consignor's team of any freight to the depot of the St. Louis Transfer Company, whether the same be located at Broadway and Spruce, or at Second and Poplar Streets, a receipt is issued, which is signed by the Receiving Clerk of the Transfer Company; such shipment is then billed by the clerks in the Bill Office, loaded on wagons of the Transfer Company, and forwarded to the road via which the shipment was routed. In all such instances, the rates apply from the depot of the St. Louis Transfer Company, and the railroads, through their representative, the East-bound Traffic Association, having an officer to inspect and determine and verify the authenticity of the shipment, as having passed through the depot of the Transfer Company, the charge for transferring it from St. Louis to East St. Louis is paid by the receiving line.

Q. That is to a point beyond Indianapolis? A. Yes, sir. There are so many exceptions and qualifications by these railroad companies, that I am simply making a sweeping statement. In some cases they do, and in some they don't.

Q. Just state to the best of your knowledge. Do you know whether or not there is any point on this side of Indianapolis, to which, if that same shipment was con-

signed, either the consignor or the consignee would have to pay the transfer charge? A. General Crow, there have been a number of tariffs issued—

Q. If you don't know, don't state. A. I know they do, and then they don't, and so it is impossible for me to answer that.

Q. One other point in connection with that question: After the goods are put upon your wagon here in St. Louis, or in one of your warehouses, would they be loaded directly into the car at East St. Louis, in less than car-load lots? A. I would have to speak from what I am told, because I am not at East St. Louis to determine that. But I believe the practice is that all less than car-load lots are placed upon the platform.

Q. What platform? A. Of the Railroad Company receiving it.

Q. Is that the end of your carriage of it? A. Yes, sir.

Q. When you receive goods from the East, in-bound for St. Louis, in less than car-load lots, at what point in the journey do you receive the goods—in the car or on the platform of the railroad company? A. In both places.

Q. Either place? A. Yes, sir.

Q. It doesn't matter which? A. No, sir.

Q. Who loads the wagon, your man or the railroad company's man, or is it a joint operation? A. It is a joint operation.

Q. They assist you? A. They do for us what we do for them. We load their freight here, and we expect them to load our freight there. It is a sort of reciprocal arrangement.

Q. The Terminal Railroad Association's tracks, and those of the Merchant's Bridge Terminal Railway Company, for many years have reached where they now do, in St. Louis and East St. Louis, Madison, and Granite City? A. I have not been connected with that phase of the trans-

portation department for a great many years. I don't know where they are, honestly.

Q. You know where the depots are, in a general way, don't you—or, I will get at it in another way: the Terminal Railroad Association does a transportation business across the river here, between Illinois and Missouri, of the same general class as your Company does, but carried on by rail? A. Yes, sir.

Q. Is there any difference in the cost of carriage, between the method employed by your Company, and the method employed by the Terminal Railroad Association, for similar lines of goods? A. I don't like to go into a side issue on this proposition, but a great many years ago a most prominent railroad man of that time, whom you probably knew, Col. McKissock, called my attention to the fact that the most expensive mode of transportation was a wagon on a dirt road, and the easiest was a sail-boat on the water. I do not think you can draw a parallel as to the cost of operation between cars on rails and wagons on a dirt road, or over cobble-stones.

Q. In other words, the wagon is much more expensive? A. Yes, sir.

Q. On the question of time a similar shipment of goods started to be handled by your Company and handled by the Terminal Railroad Association, which would be the more paid, between the two states? A. There is only one answer. We are the more rapid of the two.

Q. You are the more rapid of the two? A. Unquestionably.

Q. And that is the reason, from a business standpoint, why your Company is so largely used by the shippers? A. Yes, sir.

Q. I believe you stated you were the Auditor of your Company? A. Yes, sir.

Q. When your Company finishes up a shipment that is routed through to St. Louis, say from New York, is there

anybody connected with your company that gets a way-bill or memorandum of any kind, that you have gotten that shipment and delivered it? A. I will give the modus operandi: for every shipment that is delivered by a railroad at East St. Louis to the St. Louis Transfer Company, a wagon-ticket, indicating and describing the shipment, giving the consignee's name, and a description of the consignment, is furnished to the driver. There is also furnished and sent to the office of the Transfer Company for that consignment, an expense bill, which is only an extract of the way-bill, giving the name of the consignee, a description of the consignment, the weight, and the railroad charges.

Q. Who retains the way-bill? A. The railroad company retains the way-bill. At the end of the quarter, that is four times a month, a recapitulation of such expense bills is made to the Transfer Company by the railroad companies, and on its face the charge is collected.

Q. Do you know to whom, if any one, the bill of lading is sent after shipment to St. Louis? A. I simply infer that the consignee will get the expense bill, not the way-bill.

Q. The bill of lading? A. He is supposed to get the bill of lading, and he will get the expense bill when the bill is presented for the carrying of the goods.

Q. What official of your Company did you say had charge of your stock-book? A. The Secretary.

Q. And that is Mr. Wall? A. Yes, sir.

Q. I believe you gave me his address this morning? A. Yes, sir.

Q. Your officials are all located in St. Louis? A. Yes, sir.

Q. You have your offices here? A. Yes, sir.

Q. What is the capital stock of your Company, if you know? A. $850,292.00.

CROSS-EXAMINATION, BY MR. F. W. LEHMANN.

Q. I show you what has been marked here as "Exhibit

Ward Receipt," and call your attention to the stamp imprint upon the face of it, and ask if that is the stamp of the St. Louis Transfer Company? A. (After examining paper). Yes, sir.

Q. Take that paper, and what does that indicate to you, as a man engaged in transportation here—taking the whole paper? A. That indicates that some time in September, the 27th, there was delivered to the general depot of the St. Louis Transfer Company, at Fourth and Spruce Streets, a consignment consisting of one box weighing thirty-seven pounds, shipped by Morris A. Heimann Mfg. Co., to G. F. M. Ward, at Mt. Vernon, Illinois, routed over the Louisville & Nashville Railroad.

Q. Speaking from your knowledge, in connection with shipments of that kind, what would be done with that box after it was delivered to your general station or depot on Fourth and Spruce? A. In the natural order of business, this box would be loaded on to one of the wagons of the St. Louis Transfer Company, billed by the Bill Office in accordance with the instructions of the shipper, as before stated, and delivered to the L. & N. Railroad Company at East St. Louis.

Q. How would that delivery be made by you? How would you get it over there? A. By means of the wagons in operation on that day, or at that time, crossing the Mississippi River, either via the ferries or the upper roadway of the bridge.

Q. Would the Terminal Railroad Association have anything to do with that shipment, or any shipment of that kind, billed as that is, and handled as that was to be handled? A. No, sir.

Q. The great bulk of the business passing between St. Louis and East St. Louis, in both directions, either beginning here or ending here or passing through here, is done

by means of the Terminal Railroad Association rather than by means of transfer companies, isn't it? A. Yes, sir.

Q. Would you be able to approximate something of the percentage of traffic that is done across the river by wagons, as compared with that done in the other way—or could you say any more than that the overwhelming portion of it is done by rail? A. The overwhelming portion is done by rail, because we do very little. I know how little we do.

Q. I think you stated that your Company did about four hundred thousand tons per annum? A. Yes, sir.

Q. And you were not able to state what proportion that bore to the entire business done by all teams that might be engaged in traffic across the river? A. No, sir.

Q. Your Company is, I believe, the largest of them—the largest of the companies engaged in such business? A. Yes, sir.

Q. I mean by that that you have more teams and more facilities for handling goods? A. Yes, sir; and better facilities.

Q. Your Company is used, as I understand your testimony, by the railroad companies, as a means of getting into and out of St. Louis? A. Yes, sir.

Q. And is used for some business preferably to the Terminal Railroad Association? A. Yes, sir.

Q. You can make deliveries sometimes quicker than the Terminal Railroad Association? A. At all times.

Q. And sometimes the convenience is greater, through the medium of the Transfer Company? A. Yes, sir.

Q. Your business deals more with the higher class freights? A. Yes, sir.

Q. Almost exclusively with the higher class freights? A. Yes, sir.

Q. You don't handle such things as coal, to any extent? A. No, sir, we don't handle it at all.

Q. You haul for merchants, or any person who is in the

attitude of a shipper or a receiver of freight, without regard to any arrangement of the railroad company, don't you? A. Yes, sir.

Q. In other words, a shipment coming in here for me, not a merchant, if I call your attention to it, you will haul it? A. Yes, sir.

Q. And for any one in the town? A. Yes, sir.

Q. And a considerable volume of your business is made up of that kind of hauling? A. Yes, sir.

Q. I believe you stated you do all of the hauling for the Carleton Dry Goods Company? A. I think we do, yes, sir.

Q. That is by voluntary arrangement between you and that company? A. Yes, sir.

Q. I think you stated that the other leading dry goods companies of this city did their own hauling, or at least most of it? A. Yes, sir.

Q. And that is because they prefer to do so? A. Yes, sir.

Q. They either own their own teams, or else they make arrangements with persons who do own teams? A. Yes, sir.

Q. You spoke of some shipments into this territory from what is called the "Green Line Territory?" A. Yes, sir.

Q. Being a territory that lies south of the Ohio, west of the Carolinas, and east of the Mississippi River? A. Yes, sir.

Q. And they undertake to carry into the City of St. Louis? A. Yes, sir.

Q. And also there is some territory to the north? A. Yes, sir.

Q. Where the railroads have been in the habit of carrying the freight into the City of St. Louis? A. Yes, sir.

Q. In those cases they had to compete with carriers that had terminal facilities in the City of St. Louis? A. Yes, sir.

Q. And in order to compete with them, they must get

their shipments into the city upon the same terms that these other carriers do? A. Yes, sir.

Q. And if they employed you as the agency across the river, they were required, necessarily, to absorb your charges? A. Yes, sir.

Q. You haul from any of the stations, either in St. Louis or East St. Louis? A. Yes, sir.

Q. You do hauling for both sides: you haul from across the river, and you haul from this side? A. Yes, sir.

Q. And hauling from this side you haul to stations in this city and also to stations in East St. Louis? A. Yes, sir.

Q. While St. Louis and East St. Louis are distinct cities, in different States, and separated by the Mississippi River, there is a very close relationship between the two, from an industrial and commercial point of view? A. Yes, sir.

Q. So that the local station for many St. Louis shipments will be on the east side of the river? A. Yes, sir.

Q. In some cases where shipments are east-bound, you deliver to the railroads at a station in East St. Louis instead of St. Louis? A. Yes, sir.

REDIRECT EXAMINATION, BY MR. CROW.

Q. What do you get for hauling first-class in-bound freight, from the termini in East St. Louis, either to the store-door, or to your own freight depots in St. Louis? A. I think about five cents a hundred.

Q. And what do you get for hauling the same class of freight the other way? A. The same rate, five cents per hundred.

G. A. MADDEN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW.

Q. Please state your name and business? A. G. A. Madden; general dry goods business, shoes and clothing.

Q. Where do you live? A. Mount Sterling, Ill.

Q. How far is that from St. Louis? A. That is about one hundred and thirty-seven miles.

Q. How far is it from Chicago? A. Two hundred and fifty-two miles.

Q. On what road? A. On the Wabash.

Q. You buy goods at wholesale in both cities? A. Yes, sir.

Q. Will you tell us whether or not you have any delays in getting shipments from St. Louis?

Objected to by counsel for defendants as irrelevant.

A. It takes longer to get freight from St. Louis than from Chicago, if that is what you have reference to.

Q. What time does it take to get goods from Chicago? A. From Chicago, generally, one day.

Q. What time does it usually take to get them from St. Louis? A. Four days.

Q. What different lines of goods do you buy in the two cities? A. Dry goods, shoes and clothing.

Q. How long have you been in business over there? A. Five years this fall.

CROSS-EXAMINATION, BY MR. LEHMANN.

Q. Do you buy the same line of goods in both cities? A. Yes, sir.

Q. That is to say, you buy dry goods and shoes in Chicago? A. Yes, sir.

Q. And you buy dry goods and shoes in St. Louis? A. Yes, sir.

Q. And it requires uniformly one day to get shipments from Chicago to your place, and uniformly four days to get goods from St. Louis to your place? A. Yes, sir.

Q. And that has been true for how long? A. Ever since I have been in business.

Q. And that is how long? A. Five years.

Q. And that is not exceptional, but is the rule? A. That is the rule, yes, sir.

Q. And how are prices in Chicago, as compared with those in St. Louis? A. There is very little difference, in my estimation.

Q. Are they a little lower in Chicago? A. On some lines of goods they are, but on other lines they are a little lower in St. Louis, if there is any difference.

Q. In which city do you do most of your buying? A. In Chicago.

Q. You do most of it in Chicago? A. Yes, sir.

Q. About what proportion? A. I should think, probably, two-thirds at least.

Q. And always have? A. Always have; yes, sir.

Q. And that is because you find it cheaper to buy there? A. No, sir. The reason of that is that I was formerly located near Chicago, and I was more familiar with that market, until I located in Mt. Sterling.

Q. So it was your intimacy and acquaintance with people in Chicago, and the fact that you had personal relations with the wholesale merchants there, that led you to deal more with Chicago than St. Louis? A. Yes, sir.

Q. You were a sort of a natural customer of Chicago, except when you moved nearer to St. Louis you got to buying some here? A. Yes, sir.

Q. What is the difference in rates between Chicago and Mt. Sterling, and between St. Louis and Mt. Sterling? A.

The rate is the same, with the exception of the bridge charges.

Q. The rates are the same? A. Yes, sir.

Q. And you are on what line? A. The Wabash.

Q. And is the total rate higher from St. Louis to Mt. Sterling than it is from Chicago to Mt. Sterling? A. It has been until quite recently. Recently the bridge transfer has been abolished and done away with.

Q. And now the rates are the same? A. Yes, sir; the same.

Q. The Company hauls in either direction, to either terminus, at the same rate? A. Yes, sir.

Q. You say you get goods from Chicago in one day; does that mean from the time your order gets there? A. No, sir, it is from the time shipment is made. If the goods are delivered to the freight depots before six o'clock p. m. they reach us the next day at 3:15.

Q. How are shipments made to you, principally, in car-load lots or less than car-load lots? A. In broken lots.

Q. Do you know what the course of shipment is from a house here in St. Louis to yours? A. No, sir.

Q. Do you know what different agencies are employed to handle your goods from the door of the wholesale merchant or manufacturer in St. Louis to the railroad company on the east side of the river? A. No, sir, the freight bills simply read "East St. Louis to Mt. Sterling."

Q. And they are issued by the Wabash Railroad Company? A. Yes, sir.

Q. And so far as you know, and so far as any way-bill or any means of knowledge you have, the shipment is handled entirely by the Wabash? A. Yes, sir; with the exception that there are payments advanced here, or have been until quite recently, advanced charges on the freight bill, and that would indicate it had been handled by some other company previous to reaching the Wabash.

Q. You have been present here at this hearing, Mr. Madden? A. Yes, sir.

Q. And you heard the statement with respect to handling the shipment here for the Heimann Mfg. Co., and whether yours was handled in that same way or not you cannot state? A. No, sir.

Q. You say it takes three days, on an average, to receive goods from St. Louis? A. Four days.

Q. How do you figure those four days, from what time: from the time you order? A. No, no; from the time the shipment is made.

Q. How do you ascertain that fact? A. From our invoices.

Q. That is the invoice which is sent to you by the merchant? A. Yes, sir.

Q. How about the bill of lading or way-bill? A. The bill of lading, when there is one—they do not always send us a bill of lading, in fact they seldom send us a bill of lading.

Q. You would not be able to state whether the date of delivery to the carrier in St. Louis was the same date as the invoice or not? A. No, sir.

Q. You predicate this upon the date of the invoice you receive from the merchant? A. Yes, sir.

Q. And that is invariably four days between the date of that invoice and the receipt of the goods by you? A. Yes—excuse me one moment, but I would like to qualify that last statement in reference to the four days, and say that I got that statement more definitely from the Wabash agent at Mt. Sterling than from the invoice.

Q. Who are your consignors here? Whom do you buy from? A. Rice-Stix, Ely & Walker, Roberts, Johnson & Rand, O. J. Lewis, and others.

Q. Can you give us any particular instance, and the details of some instance, of a shipment that required four

days from the time it was delivered into the hands of the initial carrier in St. Louis until it reached you? A. No, sir; that has been the rule to such an extent that when we require goods in a hurry we always order them from Chicago, and not from St. Louis, for that simple reason.

Q. When you say "the rule," you mean by that that some shipments require four days after they get into the hands of the carrier, but others come in less time? A. Yes, sir.

Q. So you count on four days as a regular thing, in your business? A. Yes, sir.

Q. And have you ever made complaint to Rice-Stix & Co. about that? A. I have discussed the matter with them, but made no formal complaint.

Q. Or Roberts, Johnson & Rand? A. No, sir. I have never made any complaint, but simply in talking with some of their men I have stated that they would find it a beneficial thing if that delay could be remedied.

Q. How are the prices in Chicago on dry goods, generally, as compared with prices in St. Louis? A. Why, on cotton goods my judgment is that the St. Louis market is a little lower, but on other classes of goods I don't think there is very much difference, if any.

Q. The difference is in favor of Chicago, what there is? A. I cannot say it is.

Q. Wherever you have had a bill of lading, it has been a Wabash bill of lading, for goods from St. Louis? A. I cannot say about that. In fact, I don't know that we have ever had a bill of lading.

Q. Or a way-bill? A. The expense bill is always a Wabash bill.

Q. In other words, everything you have got indicate that it comes over the Wabash? A. Yes, sir.

Q. And nothing to indicate any other railroad company

handling it? A. I have no means of knowing how a shipment made from St. Louis reaches the Wabash.

Q. And the only means you have of knowing how it gets to you, is knowing that it gets there over the Wabash? A. Yes, sir.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. The advanced charges, or bridge charges, as you have stated, have been absorbed only this year, haven't they? A. Yes, sir; it is more recent than that.

Q. Sir? A. It is more recent than this year.

Q. What time of the year? A. I haven't noticed that they appear on the freight bills at all within the last three months.

Q. Up to that time, the bridge charge appeared? A. Yes, sir.

RE-CROSS EXAMINATION, BY MR. LEHMANN:

Q. Do you mean by that the bridge charge, or some kind of charge? A. I mean an advanced charge.

Q. The nature of which you could not state? A. No, sir.

Q. It might have been the St. Louis Transfer Company charge. A. Oh, yes, it was a charge for getting it over to East St. Louis.

Mr. Crow: Q. Did you ever make any inquiry of anybody about it? A. I never could get any satisfactory information. I wrote to Hargadine-McKittrick about it.

JAMES CLAUSEN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW.

Q. State your name, residence, and occupation? A.

James Clausen; 2801 North Broadway; shoe polish manufacturer.

Q. How long have you been in business there? A. Eleven years.

Q. No. 2801 N. Broadway is your place of business? A. Yes, sir.

Q. Do you ship goods in and out of St. Louis, across the Mississippi River? A. Yes, sir.

Q. What is the character, whether or not they are car-load or less than car-load lots? A. Less than car-load lots.

Q. Do you deliver goods on this side of the river that go out, or on the other side? A. We deliver goods on this side of the river.

Q. To whom do you deliver them? A. Sometimes to the St. Louis Transfer Company, and sometimes to the Terminal Railroad Association.

Q. Your in-bound shipments, where do you receive them, on this side or the other side of the river? A. On this side.

Q. By what means? A. By either the St. Louis Transfer Company or the Terminal Railroad Association.

Q. Is there any difference between the time it takes to get them in or out, by the St. Louis Transfer Company, or the Terminal Railroad Association? A. I believe it is about the same. I believe the St. Louis Transfer Company is a little quicker. We don't figure that there is any difference between the two.

Q. Have you experienced any difficulty in getting your goods in and out? A. Many times.

Q. What is the cause of that? A. It is very hard to say what is the cause. We know that the goods were in East St. Louis, and when we telephoned that we were in a hurry they would say that they had delivered them to the St. Louis Transfer Company or the Terminal Railroad Association, as the case might be, and then when we would telephone to the St. Louis Transfer Company or to the Terminal Rail-

road Association, they would say they had not yet received them from the railroad company. We knew one was lying, but which one it was impossible to say.

Q. Did that happen often? A. Very often. It has happened of course, that that was owing to a condition—possibly that is not germane to the subject here—to conditions existing at the time of the flood. We had goods over there, we knew—we had to have the goods, and we had to send to New York and have them sent here by express, and they got here long before the goods that were already delivered here in St. Louis. But, of course, that was unusual.

Q. Did that delay ever happen at any time except during a flood? A. Oh, yes, it happened.

Q. That you had delays? A. Oh, yes, sir; we have had delays for several days when we couldn't get freight over, but of course not so much as that.

Q. How much delay have you had? A. Three or four days. One would blame the other. The Transfer Company and the Terminal Railroad Company would blame the railroad companies, and the railroad companies would say they had delivered the goods, and we could absolutely get no satisfaction from either of them.

Q. Have you had any delays since last year, 1905? A. Yes, sir; but I will admit there has been some improvement since the free bridge agitation came up. There has been a decided improvement. They began to realize that they had to do something. That they couldn't fool people all that time—that is my idea—and there has been some improvement in the facilities.

Q. Prior to what you call the free bridge agitation, October, 1905, did you experience any of these delays? A. Yes, sir.

Q. Did you experience any delays in getting goods out? A. Well, only the complaints we got from our customers.

That is all we know. We do not complain so much about the delay in getting out our goods, as we do about the shipments to us. You see our goods are glass, principally, and being re-shipped after getting to the other side, there is a great deal of breakage that would not occur if the terminals were on this side. If there is breakage, the customer writes us, and they deduct so much for broken goods. We tell them that after we have delivered the goods to the railroad company, all our responsibility ceases. But, you know, what it is to say "Write to the railroad company." They say, "We will deduct it from you, and you can get it from the railroad company."

Q. Have you delivered to the St. Louis Transfer Company to take cars across the river to deliver to some connecting line on the East side? I will get you to state whether or not those goods are re-handled on the other side of the river? A. I don't understand you.

Q. If you deliver a shipment of your goods in less than car-load lots on this side of the river, to the Terminal Railroad Association, destined to a point on the Pennsylvania Railroad, are those goods re-handled in East St. Louis? A. That I do not know.

Q. The goods you talk about re-handling are goods sent by the Transfer Company? A. Mostly.

C. I. MILLARD, a witness of lawful age, being duly produced, sworn and examined on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW.

Q. State your name, residence, and occupation? A. C. I. Millard; St. Louis, Mo.; lumber business.

Q. With what company are you connected? A. The Chicago Lumber & Coal Company.

Q. Where are their general offices? A. St. Louis, Mo.

Q. Have you any mills anywhere? A. Yes, sir.

Q. Where? A. Mississippi, Louisiana, Arkansas, Wisconsin and Oregon.

Q. Do you have any offices in other places than St. Louis? A. We have one hundred offices.

Q. Do you have yards? A. Yes, sir.

Q. What is the capital stock of your concern? A. $4,000,000.

Q. How much business do you do in a year, generally, gross amount? A. About $7,000,000.

Q. Are you familiar with the shipments of lumber into St. Louis, and through St. Louis, across the Mississippi River? A. Yes, sir.

Q. Have you any idea as to the volume of that business, in and out-bound, at St. Louis, per month? A. The lumber business?

Q. Yes. A. I should think that lumber and forest products would run twelve to fifteen thousand cars a month.

Q. Have you any idea as to whether or not there is any delay in the handling of that class of freight, in-bound and out-bound, over the tracks of the Merchants' Bridge Terminal Railway Company and the Terminal Railroad Association? A. The situation is better than it was before the Thebes Bridge was opened.

Q. When was that opened? A. I think it was about a year ago. That has relieved the situation very much, because a great deal of the traffic passes over that bridge and avoids the St. Louis terminals. Before that, the congestion was very marked at times, and the delays were very frequent and annoying.

Q. And how is it now? A. The situation is improved.

Q. Do you still have any delays here? A. Occasionally, yes, sir.

Q. This improvement comes from the use of the Thebes Bridge? A. That would be my theory of it.

Q. There is nothing else in sight, is there, to account for that? No improvement in the terminal service, is there? A. Not that I know of, the volume of business has largely increased.

CROSS-EXAMINATION, BY MR. LEHMANN.

Q. The Thebes Bridge has been the means of doing some of the business that before that time was handled through St. Louis? A. Yes, sir.

Q. So, in a measure, it might be considered as an addition to the facilities at St. Louis, or, rather, an addition to the facilities for handling business that, formerly came through St. Louis? A. It is an additional bridge over the Mississippi River.

Q. And it has relieved the situation here? A. Yes, sir.

Q. And the difficulties here, the fact that you are in a large city, with an enormous volume of business, and with terminals restricted in number and amount— A. Well, I cannot say what the difficulty is.

Q. You know the physical condition in the city here, Mr. Millard? A. Yes, sir.

Q. Our terminals, in fact, most all of our railroads, are congested into the Mill Creek Valley? A. Yes, sir, a great number of our cars of lumber that came from Louisiana crossed the Conlogue, and all the rest came here. The great difficulty we had was to get the Terminal Railroad Association to receive and handle the freight.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. The great number of forest and lumber products that pass through this gate-way of St. Louis come from the territory in the South and West, Louisiana and Arkansas? A. Louisiana, Arkansas and Texas.

Q. And the Thebes Bridge is located where? A. It is

a short distance above Cairo, connecting the station called Illmo on the West with Thebes on the East side.

Q. How far below St. Louis is it? A. About one hundred and thirty miles.

Q. It is on the line of the Cotton Belt road that runs from St. Louis to Texas? A. The Cotton Belt is the western connection.

Q. Who built that bridge? A. My general information is that it is owned jointly by the Cotton Belt, the Iron Mountain, and the Frisco, who also connect with it on the west, and the Chicago & Eastern Illinois.

JESSE FRENCH, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW.

Q. State your name, residence, and occupation? A. Jesse French; St. Louis; President of the St. Louis Motor Car Company.

Q. Is there any other business you are connected with? A. Yes, sir; President of the Krell-French Piano Co.

Q. Any other business? A. Yes, sir; I am interested in the mining business, president of one or two mining companies.

Q. How long have you lived in St. Louis? A. About fifteen years.

Q. Where is the St. Louis Motor Car Company located now? A. At Peoria, Illinois.

Q. What line of goods did the St. Louis Motor Car Co. manufacture? A. Automobiles.

Q. Are they still engaged in that industry? A. Yes, sir.

Q. Were they ever located in St. Louis? A. Yes, sir.

Q. When did they leave St. Louis? A. A little over a year ago.

Q. I will get you to state, if you know, what the primary cause of their leaving St. Louis was?

Objected to by counsel for defendant as immaterial.

A. One main objection was the trouble we had in receiving and delivering our goods.

Q. At what point? A. East St. Louis.

Q. I believe you stated when they left here? A. Yes, sir; a year and a half ago.

Q. Was that trouble with terminal and railroad facilities? A. Yes, sir.

CROSS-EXAMINATION, BY MR. LEHMANN.

Q. Because you couldn't get them delivered in time? A. Couldn't get them delivered, and couldn't get our goods. We had to go over the bridge, and it cost us from six to eight dollars to deliver a machine. Frequently, we would deliver the machine over there, and we couldn't get the cars, and we would have to bring it back, paying toll both ways.

Q. Where was your factory located? A. No. 1211 Vandeventer Avenue.

Q. You couldn't get the cars from the railroad companies, is that it? A. Yes, sir.

F. ERNEST CRAMER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW.

Q. State your name, residence, and occupation? A. F. Ernest Kramer; St. Louis; Vice-President of the G. Kramer Dry Plate Company.

Q. Where is your plant located? A. Shenandoah and Lemp Avenue.

Q. What city? A. St. Louis.

Q. How long have you been in business here? A. About twenty-three years.

Q. Do you hold any official position in this city? A. Yes, sir; I am a member of the City Council.

Q. Do you ship goods into St. Louis for use in your factory? A. No, sir; we do not ship them ourselves; we receive them.

Q. You receive them? A. Yes, sir.

Q. Where do they come from, principally, from the East? A. From Antwerp, Belgium, and Liverpool, England.

Q. They are imported goods? A. Yes, sir.

Q. Have you experienced any difficulty in getting those shipments into St. Louis? A. Yes, sir; quite a good deal.

Q. Where did the difficulty arise? A. Principally in bringing them from East St. Louis across the river.

Q. Was the delay extended at all? A. Yes, sir; it would extend all the way from a week to four and five weeks.

Q. After the arrival of the goods in East St. Louis? A. Yes, sir.

Q. Did you make any investigation to find out why that condition of affairs existed? A. We would take it up with the Terminal Railroad Association, but we could never get any satisfaction. They would tell us they would bring the goods over just as soon as they could.

Q. Did you undertake to solve the problem in any manner, for the benefit of your business? A. Yes, sir.

Q. What did you do? A. We put on two additional teams and got the goods ourselves in East St. Louis.

CROSS-EXAMINATION, BY MR. LEHMANN.

Q. How many car-loads would you get in the course of a year? A. I should say about eighty or ninety.

Q. Was your business mainly less than car-load lots? A. No, sir; it all came in car-load lots.

Q. It would be on an average a little more than a car a week? A. Yes, sir.

Mr. Crow: It would be almost two.

A. Yes, it would be almost two a week; between eighty and ninety a year.

Mr. Lehmann: Q. You had the greatest difficulty at times like the flood? A. Yes, sir; and also afterwards.

Q. But chiefly then? A. We had more trouble then than any other time, but we always had trouble.

Q. But those delays of three or four weeks was where there was trouble of some kind with the elements? A. Yes, sir; but it would never take less than a week or ten days, in ordinaary times, to bring the goods over.

Q. Your goods came from what direction? A. From the East. They generally come from some Atlantic port, Boston, Philadelphia, or Newport-News.

At this point, the usual hour of adjournment having arrived, by consent of counsel, I adjourn the further hearing of testimony herein until to-morrow, Tuesday, October 2, 1906, at ten o'clock, a. m., then to be continued at the same place.

R. E. Rombauer,
Special Commissioner.

St. Louis, Mo., Oct. 2, 1906.

Met pursuant to adjournment as above on Tuesday, Oct. 2, 1906, at ten o'clock a. m., in the Federal Building, in the city of St. Louis, Mo.

The following proceedings were had:

OSCAR HERMANN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW.

Q. State your name, residence, and occupation? A. Oscar Hermann; St. Louis, Mo.; Secretary of the B. W. Clark Grocer Company.

Q. Where is your place of business? A. No. 307 to 311 North Second Street.

Q. How long have you been in business there? A. About seventeen years.

Q. Does your firm receive and ship goods across the the Mississippi River into Illnois, and into other Eastern and Southern territory? A. Yes, sir.

Q. How is the delivery of your out-bound stuff going to points on Eastern roads, made? A. Most of the shipments were delivered to East St. Louis by teams.

Q. Whose teams? A. An independent drayage company.

Q. What drayage company? A. It was formerly the Tobin Drayage Company, and recently has changed the name to the Western Drayage Company.

Q. Who pays that drayage? A. The Benjamin W. Clark Grocer Co.

Q. What is the reason that the goods are transferred by a team across the river?

Objected to by counsel for defendants as totally irrelevant.

The Commissioner: It is better to note that objection is preserved to all this class of testimony.

Mr. Priest: If it is the purpose of these gentlemen to fill this record with that sort of trash, we might as well help fill the record by reiterating our objections.

We object to it as totally irrelevant, as frivolous, as a waste of time, and as an insult to the Court called upon to try the case.

Mr. Krum: We suggest that counsel be provided with some more air, so he can enlarge his objections.

A. For two reasons: one is that it saves time, and secondly, that it is not as expensive.

Q. In what way is it less expensive? A. You mean you want the figures we pay?

Q. Yes. A. Why, until recently, until the differentials between East St. Louis and St. Louis have been reduced, the transfer was two cents per hundred on car-load freight, and we had to haul it from the depot at an additional expense of two cents per hundred, making the total four cents; and the drayage company hauled it for three and a half cents from East St. Louis, which was a saving of one-half cent per hundred, and a saving of considerable time in the transfer.

Q. I will get you to state whether or not the transfer of the goods could be made by the teams as speedily as it could be made by the terminal service? A. We have found it so.

Q. How about your in-bound shipments? How do you get them in from East St. Louis? A. Until recently we hauled nearly all of them from East St. Louis, but since the differentials have been reduced we have car-load shipments delivered to this side by the Terminal Railroad Association, and we haul them from the Terminal's depot.

Q. Prior to that time, whose teams hauled your goods? A. Before then the Tobin Transfer Company.

Q. What was the reason of your hauling from East St. Louis?

Mr. Priest: The question is manifestly objectionable, because it calls for a reason, and a reason must be adduced from a statement of the facts. The testimony is totally irrelevant for any purpose or any issue in the case.

A. The same as the out-bound.

Q. State the reason. A. There are two reasons: one is, it saves time; and the other is, that it is less expensive.

No cross-examination.

JOHN WULFING, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW:

Q. Please state your name and occupation? A. John Wulfing; grocery business on Second Street.

Q. How long have you been in the grocery business? A. About twenty-five years.

Q. Are you in the wholesale business? A. Yes, sir.

Q. Your firm handles goods in and out of St. Louis across the Mississippi River? A. Yes, sir.

Q. Please state in what manner you get the goods in and out of St. Louis to points on the other side of the river? A. We get them either—or we used to get them—by team from East St. Louis, to a great extent, but now we get them either from the St. Louis Transfer Company or from the Terminal Railroad Association warehouses.

Q. When did you stop teaming from East St. Louis? A. At the time when they changed the charges.

Q. When was that—this year? A. I don't know when; a couple of months ago; at the time the Wabash first got their depot on this side.

Q. Whose teams did you use? A. A boss teamster by the name of Sutz; he had several teams.

Q. What was the reason for your hauling the goods across the river? A. We did not always haul them across the river. We sometimes had them sent by the Terminal Railroad Association. But whenever we were in a hurry for the goods, we got them by team from East St. Louis.

Q. What is the method of your transfer now? A. Now we have them delivered to the Terminal Railroad Association, or delivered to the St. Louis Transfer Company; the rates are now the same, whether delivered to the Terminal, or to the Transfer Company. In former times they were higher when delivered to the Transfer Company; that is, for service from St. Louis to East St. Louis.

Q. Since when has it been the case that the rates are the same? A. Since the Wabash opened its freight depot on the west side of the river.

Q. When was that? A. Six or eight months ago; I cannot recall the exact date.

Q. This year? A. Yes, sir, I think it was.

Q. How much of the transfer charges do you pay when you send the goods across the river by team? A. I believe that varies on different roads. Some roads, like the Chicago & Alton, have the same rate from St. Louis and East St. Louis, so on account of getting goods rapidly to destination, we haul them across the river, and we pay the whole transfer charge, four or five cents per hundred, I think it is—five cents, I believe it is.

Q. And in other cases—Suppose it goes to the Illinois Central? A. Practically, that does not apply at present. We cannot deliver goods to East St. Louis now, because, as I stated, they cost us with our teams four cents a hundred, and we can haul it to this side for two cents, and the rates being the same now, we haul it to this side.

Q. Does that apply to all the transfer companies? A.

I think the St. Louis Transfer Company is in a class by itself. That seems to be much more favored than any other transfer company.

Q. In what way is it favored? A. It is considered a part of either the Terminal Railroad Association, or the railroad companies.

Q. Are the rates different, if you use the St. Louis Transfer Company, or if you use the Weber Transfer Company, for instance? A. I am not familiar with the Weber Transfer Company.

Q. Well, any other transfer company? A. Formerly the charges of the St. Louis Transfer Company were considered as constituting a part of the rate; whereas, if we delivered goods to some smaller transfer company, they would put on it "Advanced charges," and the consignees would have to pay both the transfer charge and the drayage charge, too. There is one matter—

Mr. Priest: You were going to suggest that Gen. Crow had omitted something? A. I was thinking, speaking about the time. We have always found the Terminal Association to be quite a help to us, when we are not in a hurry for goods, and are looking for free storage; then we would order the gods routed by the Terminal Railroad Association, and then it would take some ten days to two weeks to St. Louis, and we would have no storage to pay.

Mr. Crow: Q. That was when goods were detained on the Terminal Railroad Association tracks? A. We always figure that it takes from ten to fifteen days for goods to come from East St. Louis to St. Louis—at least quite frequently it does.

CROSS EXAMINATION, BY MR. PRIEST:

Q. You adopted that method of getting free warehousing? A. You might say so. When we were in a hurry, we had the goods hauled by the St. Louis Transfer Com-

pany, and when we were looking for free storage we had them sent to the Terminal Railroad Association.

Q. Reverting for a moment to the difference you have described between the St. Louis Transfer Company and the other transfer companies with which you are familiar, you say the St. Louis Transfer Company made a through billing on goods shipped from St. Louis? A. As I understood it, their charges were considered part of the railroads', part of the rates; for instance, if the rate from here to—

Q. Let us see if your construction of that proposition is correct or not: what are the facts? Did not the St. Louis Transfer Company make an independent charge from St. Louis to East St. Louis, or from East St. Louis to St. Louis? A. Take, for instance, the rates from St. Louis to Fulton. I had occasion to look into that some time ago. I think the rate from either St. Louis or East St. Louis is, on fourth class or fiifth class goods, twenty-one cents. Now we can deliver those goods to the St. Louis Transfer Company, and out of that twenty-one cent rate the Transfer Company gets its four or five cents from the C. & A. But if, in order to expedite matters, we get the goods over to East St. Louis quickly, by some other independent transfer company taking the goods over to East St. Louis, we have to pay them four or five cents per hundred, and that would be added to the rate; and the rate in that way, from St. Louis to Fulton, would be five cents more than if we delivered the freight to the St. Louis Transfer Company.

Q. Fulton is in what State? A. Missouri.

Q. You would ship by way of the Chicago & Alton? A. Yes, sir. Now I might mention, I don't know if any—

Q. The Chicago & Alton rate between St. Louis and Kansas City is the same as that of the Missouri Pacific and Wabash, that have a direct line, not passing over a bridge, or the terminals at St. Louis, isn't it? A. I am

not personally familiar with those facts, because we do not sell any goods in Kansas City. I am referring now to local points on the C. & A.

Q. Are you familiar with the tariffs of the Chicago & Alton Company? A. I am familiar, to this extent: that I know that the rates apply from the St. Louis Transfer Company the same as from East St. Louis, but if delivered by those transfer companies I have done business with, the rates would be so much higher. In other words, the Chicago & Alton was considered as constituting a part of that—

Q. Part of the line? A. Yes, sir.

Q. But, nevertheless, the St. Louis Transfer Company made an independent charge for the services it rendered? A. To us. I frequently noticed on expense bills that the transfer charge is separated from the other charge. In other words, the charge would be twenty-one cents.

Q. What does that indicate? That there was a separate charge made for that transfer, but that the St. Louis Transfer Company advanced it? A. It is not billed as "Advanced charge." Say the rate is twenty-one cents, and the Transfer Company gets its pro rata out of that. You have any other company haul the goods, and they do not get their pro rata.

Q. So the only difference is, to separate it into items in the original billing? A. The difference is the rate we pay some smaller transfer company to bring the goods to East St. Louis. We pay that in addition to the gross rate to destination.

Q. To St. Louis? A. Not to St. Louis. We were speaking of Fulton, Mo., just now.

Q. Mr. Wulfing, are you talking exclusively with respect to the charges of the Chicago & Alton Railroad? A. Well, those are the only ones that are fresh in my mind, because I made some inquiry recently on those rates.

Q. You say you are not familiar. Now take your ship-

ment of goods to Fulton, in Missouri, in the western half of the State of Missouri— A. I think it is the eastern half, but that is immaterial, I suppose.

Q. It is west of St. Louis? A. Yes, but it still might be in the eastern part of the State.

Q. It is about ten or twelve miles north of the Missouri River, in Callaway County? A. Yes, sir, it is in Callaway County.

Q. The Missouri Pacific and the Wabash compete for the trade of Fulton, don't they,—and the M. K. & T.? A. Practically, not; because the C. & A. would get the local rate from Cedar City, say, or from Mexico down; so it would have to be re-loaded. I never heard of any goods going to Fulton except by the C. & A. But, take Slater, which is only on the C. & A., and the same conditions prevail there.

Q. The rates on the Chicago & Alton are the same either from St. Louis or East St. Louis, to either one of those points, aren't they? A. Yes, sir.

Q. So the charge for transferring from St. Louis to East St. Louis is absorbed by the railroad tariff, isn't it? A. If it is hauled by the St. Louis Transfer Company; if it is hauled by any other company, it is not.

Q. If it is delivered to the Terminal Railroad Association at East St. Louis, it is? A. Yes, sir.

Q. If it is delivered either to the Terminal Railroad Association, or the St. Louis Transfer Company, it is absorbed? A. I don't know. We haven't tried that. We have delivered either to the railroad company, or to the Transfer Company.

Q. You know it is absorbed if it is delivered to the Terminal Railroad Association? You know the transfer rate from St. Louis to East St. Louis is absorbed in that charge? A. I think so; the rate being the same from St. Louis.

Q. If you employ, for the purpose of expediting your

shipment, some other company that has no arrangement with the Chicago & Alton Railroad Company to transfer your freight from St. Louis to East St. Louis, you pay the charge of that transfer company; isn't that what you mean? A. Yes, sir, I mean that. The other transfer companies are not able to have that rate absorbed.

Q. The Terminal Railroad Association absorbs it. It is absorbed by the Chicago & Alton Railroad Company, if you deliver it to the Terminal Railroad Association? A. I don't know if that would be considered a transfer charge. When they deliver to the Terminal Railroad Association, I don't think the goods go to East St. Louis.

Q. The goods go whichever way you route them, don't they? Suppose you deliver them to the Terminal Railroad Association, to be delivered to the Chicago & Alton, doesn't it go that way? A. Yes, sir, I think so.

Q. So the goods go whichever way you route them? A. Either by the Terminal Railroad Association, or the St. Louis Transfer Company.

Q. The rate is absorbed? A. Yes, sir.

Q. You know of no arrangement made between the Chicago & Alton Railroad Company, and the St. Louis Transfer Company, do you? A. I have no knowledge of any. I read of it in the papers, occasionally, but, of course, I don't know how reliable that is. Some years ago they had some considerable controversy about other transfer companies trying to get that same arrangement.

Q. I am not asking about that. I am asking for your personal knowledge. A. No, sir, I do not.

Q. Do you belong to the Free Bridge Committee? A. No, sir, I do not.

Q. Aren't you taking a conspicuous part in that? A. No, sir; not at all.

Q. Do you know what the volume of freight coming in and going out of St. Louis is? A. No sir, I do not.

Q. Annually? A. No, sir.

Q. Do you know how much it has increased in the last five or six years? A. I haven't the data—no, sir. But the general volume is a great deal more.

Q. You know, Mr. Wulfing, that the Terminal Railroad Association endeavored to increase its terminal facilities down on the levee, near where you are doing business, some three or four years ago? A. You refer to the property they bought down there?

Q. I refer to the property, and I refer to the fact that an ordinance was introduced into the Municipal Assembly. A. Some people were of the opinion that that property was bought to hedge off another bridge going up there.

Q. I am asking if it is not true there was an ordinance introduced, and if you don't know, as a matter of public information, that an ordinance was introduced, just preceding the World's Fair, to increase the terminal facilities there? A. Yes, sir, such a one was introduced.

Q. Did you favor or oppose that ordinance? A. As a party interested in that part of town, I was rather in favor of it.

Q. Did you appear in advocacy of it? A. No, sir; I never did.

Q. Why were you in favor of it? A. We owned some property down there, and thought it would be an advantage to us, and also an advantage to the City at large, to increase those terminal facilities.

Q. Why an advantage to the City at large? A. The more terminal facilities we can get the better it will be. Of course, if they could be independent, it would be even more desirable; but even so, it would be desirable to have the terminal facilities.

Q. We will debate that question with you later on. Let us settle the facts first, and then we will take up theories. Then you think the City needed the terminal facilities asked

of the City at that time? And you know, as a citizen, don't you, that the terminals could not be increased in the manner proposed in that ordinance, without the sanction of the Municipal Assembly? A. I am not familiar with the ordinance now. It has been several years ago. I don't know what the terms of the ordinance were, and I could hardly answer that question, without knowing. It would be mere guess-work on my part to attempt to do so.

Q. Do you know where the Terminal Railroad Association's terminals are located? A. I know where some are located.

Q. Do you know where all of them are located? A. No, sir.

Q. Have you been over the terminals? A. That is rather a broad question. I have seen some of their terminals. I am familiar with the Mill Creek Valley terminals, more or less, but I am not so familiar with the northern terminals.

Q. Don't you know that the reason for whatever delay is occasioned in the handling of freight in and out of St. Louis, is for want of room, terminal room? A. I have always ascribed it partly to the fact that the Wiggins Ferry Company owned all the property in East St. Louis, so that no independent ferry lines could give us relief. If there were independent lines of ferries, a great part of the heavy freight would be hauled from East St. Louis. Now you have to go to the Terminal, or haul over the bridge, also a part of the Terminal Association; or get them hauled by car from East St. Louis, also a part of the Terminal Association; so there is no escaping them at all.

Q. But that still is not in response to my question. My question was, if you do not know that the delay in handling the freight, whatever delay there is, is occasioned by want of terminal room in St. Louis? A. And by the want of competition, possibly.

Q. I still insist upon your answering my question.

The Commissioner: He has answered it, hasn't he? His answer includes both.

A. If the Terminal Association would increase its facilities, I suppose there would be less delay.

Q. Then the delay, you think, is partly occasioned by want of facilities: facilities of what kind? A. Possibly more engines, more cars, or things of that kind. I don't know if it is permitted, but I would like to mention a little incident, to show the rather independent position that the Terminal Association has. For instance, all the other railroad companies that come to St. Louis are extremely courteous, and also very prompt—I want to modify that: I will say, give attention to freight claims, and adjust them rather promptly. I have never had a fair freight claim that was not settled by a railroad company, except the Terminal Railroad Association.

Some years ago—I don't know whether this is germane to the subject or not—but some years ago we delivered a shipment of hams to the Terminal Railroad Association, on June 6th, 1903. On June 28th they arrived at destination, a point over in Illinois; they were utterly spoiled. We made a claim for them— In the meantime it was found that the goods were delayed two or three weeks at the Terminal Railroad Association's depot in East St. Louis. Our claim was declined by Mr. Webster, who I think is the attorney for the Terminal Association, with the statement that if the goods had been promptly handled they would have been caught in the flood, on June 9th or 10th, as the flood was the act of God, it made no difference to us anyhow, as the flood was the act of God, and if the goods had been handled promptly they would have been caught in it. So the claim was declined.

Now, no road would do that that had any competition to

fear—even the Pennsylvania, or the Illinois Central would not dispose of a claim in that manner.

Q. Did you sue? A. No, sir. I offered to arbitrate. I offered to have Mr. Webster appoint any Freight Claim Agent to act as arbitrator, but the amount involved being only $14.00 or $15.00, of course I couldn't get any attorney competent to cope with the Terminal Railroad Association's attorneys.

Q. You didn't sue? And that claim remains unadjusted and you have made this statement here without giving the other side an opportunity to state their views? A. I think I have the letter from Mr. Webster stating their view.

Q. I have no doubt it would be quite as competent as a great deal of the testimony offered by the Government in this case. I have indulged you, because you seemed to want to talk, but it is far off from my question.

Do you know, or have you investigated to ascertain, whether during the past year a larger volume of freight than ever before has been passing through the City of St. Louis? A. You mean passing through without stopping here?

Q. Yes, sir, and entering into the City? A. Coming into the city, unquestionably. The city has grown a great deal during the last four or five years.

Q. Don't you know that the improvements made by the Terminal Railroad Association in 1902, 1903, 1904 and 1905, have enabled that Company to handle that freight with a great deal more dispatch than it had been hitherto? A. I don't know. I have an expense bill here (indicating) of a shipment that seems to have arrived in East St. Louis on Sept. 11th, and they gradually floated it over here by September 24th. It arrived here, and then three days afterwards it was unloaded, on September 27th. You can see that for yourself, if you want to look at that.

Q. Is this one of the free storage lots? A. This was, unfortunately, a lot we were in urgent need of, and we did

a great deal of telephoning about it. We did not have a choice of routing on that. This was routed by the American Tobacco Company.

Q. Where was this shipped from? A. From Durham, North Carolina, on September 5th, and, from the expense bill, I think it reached East St. Louis six days later. I think the re-billing there reads "September 11th."

Q. That came via the Illinois Central? A. I don't know. It came via the Durham & Southern Railroad. Here is the bill of lading (indicating).

Q. This is simply your expense bill? A. Yes, sir, that is the expense bill, but here is the bill of lading. It says here "9-11;" that was the time it was re-billed; and here it says, "Durham, 9/5."

Q. But this expense bill does not show when it was delivered to the Terminal Railroad Association, does it? A. It is usually supposed, where it says "9/11," that is the biling at East St. Louis, and that is supposed to show the date when it is delivered to the Terminal Association. I am not familiar with their custom. It may be that was the date when it was received at East St. Louis.

Q. Who was the re-billing to be done by? A. It would be re-billed by the Terminal Railroad Association. I understand that the billing goes only to East St. Louis, and then it is re-billed when the goods go to the Terminal Company.

Q. That re-billing is done by the Illinois Central, the original line carrying the freight to East St. Louis? A. I don't know. The re-billing is supposed to be done when the stuff arrives at East St. Louis, or about that time.

Q. So far as you know this shipment, the memorandum of which you have given here, may have laid in the warehouse of the Illinois Central Railroad Company for several days? A. The only thing that is evident on the expense bill is that it was unloaded on September 24th, and the notice to us is dated September 27th. There are three days

there that nobody but the Terminal Association can be responsible for. The Terminal Association's stamp is on the expense bill, unloaded September 24th, and delivered to us on the 27th.

Q. When did you get the notice of the unloading? A. It is dated there the 27th or the 28th.

Q. That is the day it was unloaded? A. Yes, sir, that is right, it was unloaded on the 27th.

Q. You got the notice from the Terminal Association on the very day it was unloaded? A. Possibly the next day. If you look at the expense bill, it is dated September 24th, and unloaded September 27th. There are three days between the dates, when the expense bill is made out at St. Louis, and when it was unloaded.

Q. I don't believe you understand any more about this item of expense than I do. A. That wouldn't be saying much, would it?

Q. No. From whom did you receive that memorandum which you have handed me? A. I think our cashier handed it to me, or the shipping clerk. You will note this is dated "St. Louis, September 24th," and it then says "Unloaded September 27th." Now, as I said before, I don't know much about where it says, "September 11th," but I took that to be the time it arrived at East St. Louis. I don't know what else it could be except the date it was rebilled here. But this date September 24th is plain, and September 27th shows when it was unloaded.

Q. Would this bill be made out, in the ordinary course of business, before the freight was unloaded? A. Yes—Well, I don't know. Please repeat that question.

Q. I say, would that bill be dated before the freight was unloaded? A. That I do not know.

Q. This bears the date of the re-billing, don't it? A. That date is the date the expense bill was made out at St. Louis; and that date below there is the record of it over at

East St. Louis. Isn't there some railroad man here who can give us exact information?

Q. You are predicating your criticism upon this memorandum, and I want to see how much you know about this memorandum. A. All I know is that it was dated "St. Louis, September 24th."

Q. Do you know whether that date refers to the date when the shipment arrived at East St. Louis, or whether it refers to the date when it arrived in St. Louis? A. That September 24th, it is self-evident, is dated in St. Louis, when that was made.

Q. Do you know whether that was made in St. Louis by the Terminal Railroad Association, or made at the time in East St. Louis? A. It is dated St. Louis, and not East St. Louis. The expense bill was made out in East St. Louis, or rather it is dated East St. Louis, and this (indicating) is dated St. Louis.

Q. I find up here, in the right-hand corner, the words "Freight notice," printed in large type, but erased; and over that is written "Consignee's ticket": what does that mean? A. I don't know. I haven't any idea. It is put there by the railroad company. There are a great many things on there, probably, that are not known to us. You will find a lot of numbers on there, "Pro Number," for instance.

Q. What does "Pro Number" mean? A. I don't know exactly. That is a detail of the railroad business I am not familiar with.

Q. And what do the figures following the words "yard," underenath, mean? A. That is the yard where the goods were delivered.

Q. What yard is that? A. (After examining paper) That is written so it is not legible.

Q. What does that indicate, if it were legible? A. The Terminal Railroad Association has various yards. They

have the so-called Twelfth Street yards, and they have the Carr Street yards, and various yards, at which delivery is made according to request.

Q. And the yard at which delivery is made would be indicated opposite that printed word "yard": is that it? A. Of course, I haven't paid much attention to that. It is the drayman who knows where the various yards are.

Q. Where did you receive these goods from the Terminal Railroad Association? A. I don't know.

Q. All that you know about this particular shipment is that this memorandum was given to you by the cashier of your Company? A. Yes, sir, and that I have been endeavoring to get hold of that shipment for a few days, because it had been out from September 5th to September 26th or 27th.

Q. When did you receive it from the Terminal Association? A. I think it was last Saturday, the 29th.

Q. Did you bring your notice? Was this paper the notice which you received of the arrival of the shipment? A. No, sir, I think not. I think they get a notice, and then the driver takes the notice out to the station, and in exchange gets this paid expense bill. A freight notice is a different thing.

Q. I find stamped in red ink, about the middle of this paper, "Sept. 28, 1906": what does that indicate? A. I presume that is the date on which the goods were called for.

Q. They were called for on the 28th of September? A. I presume so.

Q. That is a day earlier than the date you stated you received them? A. The 28th or the 29th. (After examining paper.) That is some private memorandum of the yard clerk out there, I presume.

Q. How large a package was this? A. Eight boxes of

Durham smoking tobacco, I think about twenty-five pounds net to the case—three or four hundred pounds.

Q. Have you any other claim of this character? A. Yes, sir, we get these every few days.

Q. Why did you bring this one in your pocket? A. It was particularly fresh in my mind. It just came in, you see, last Friday or Saturday, and I thought it might interest the gentlemen.

Q. Had you been requested to bring it? A. No, sir.

Q. And is this the only one you have at hand, of this character? A. All I have here, yes, sir.

Q. What volume of business do you do in and out of St. Louis, annually? A. I don't know that we have ever added it up. I haven't any idea.

Q. How many cars a year, or a month? A. It varies very much. Last month we probably—or in August, when the sugar business is very large, we handled probably from twenty to twenty-five cars.

Q. Last month? A. In August.

Q. How many cars do you handle annually? A. That is very hard to tell. I wouldn't guess. I should say five or six cars a week.

Q. What is the total of your sales annually, out in the country, from St. Louis? A. I don't know. I couldn't tell you.

Q Approximately? A. I wouldn't have the slightest idea. The nearest guess I could make would be about five cars a week.

Q. You make returns for your merchant's license, don't you? You make it upon your annual sales? A. In dollars, not pounds.

Q. How many dollars—what is the volume of your sales, in dollars? A. Well, now, that is something that Mr. Gilderhouse attends to.

Q. How recently did you make that return? A. I did not make the return.

Q. You know of its being made? A. Yes, sir.

Q. How recently have you made the return? A. Some time in July.

Q. What return did you make, on your merchant's license? A. Really, I cannot say—I should think it was somewhere in the neighborhood of $500,000.

Q. Is that the total amount of your sales during that fiscal year? A. With the exception of a certain allowance, or possibly goods that were returned.

Q. I mean, is that the total amount now of your sales made during that year? A. I should think so, yes.

Q. As shown by the books of your company? A. Yes, sir. As I said before, I am not thoroughly familiar with it.

Q. You were not as hesitating when you were criticising the Terminal Railroad Association; you were more free in calling upon your memory? A. Yes, sir, but that was partly due to the fact that I was prepared as to what—or I had an idea what testimony was expected, what the subject was about. I knew what the subject was.

Q. That is a more difficult subject to cover, a period of several years in your dealings with the Terminal Railroad Association, that one single transaction made last July, and you didn't have to do with the handling of these freight transactions, either; you got that from your clerk, or manager, etc., didn't you? A. No, sir, I— All the shipments that come in I am more or less familiar with, because I keep the foreign invoice ledger; I attend to that myself. All the invoices that come in pass through my hands, so I can usually tell you how promptly or how slowly the shipments arrive.

Q. What amount of goods did you receive, or invoice, during the past year—What amount of goods did you re-

ceive in dollars, in value? A. I should think about $450,000 worth.

Q. So last year you sold $50,000 worth more goods than you received? A. No, sir, I suppose that difference would be accounted for by the gross profit, and other items.

Q. You say you received $500,000 of goods? A. I said $450,000.

Q. And you sold $500,000 worth of goods? A. Yes, sir.

Q. How much did you receive year before last? A. The year before last, I think it was slightly more, but the difference was not very great.

Q. How many did you sell the year before last? A. About the same.

Q. And how many the year before that? A. I think that was about the same also.

Q. So your business, in the past three years, has neither increased nor decreased? A. It has decreased in some parts, and increased in others.

Q. Your returns as a merchant to the taxing department of the City are the same for each of the three years? A. Approximately. There may be a difference of five or ten per cent. I don't remember that now.

Q. How about the year before that, 1903? A. I really don't recall that now. I could get you the information, if you desire it, but I cannot recall that now, off-hand.

Q. You are not able to compete with points east of the Mississippi River, with the merchants of Chicago, are you, because of the slowness of the delivery of your goods from St. Louis? A. It makes competition difficult in some territories, not so with Chicago, as with some of the smaller towns.

Q. If Chicago can receive orders from a point fifty miles over in Illinois, and deliver the freight the next day or the day afterwards, at the same price and at the same freight

rates as goods from St. Louis, and orders from St. Louis are detained some ten to fifteen days, it would not be possible for a merchant in St. Louis to compete with Chicago, would it? A. We have had a great deal of complaint since we have been compelled to quit delivering goods at East St. Louis. We have had a great deal of complaint, not from Chicago but towns like Centralia, and Springfield, Ill., and a great many of these towns where formerly when we were in a position to bring the goods to East St. Louis they would go out the following morning and reach their destination within two days, whereas now we have numerous complaints that the goods do not arrive in seven, or eight, or ten days.

Q. So you lose customers, and cannot extend your business in Illinois, and that is the reason your business has not increased in volume during the last two or three years? A. I cannot say that is the reason.

Q. Why hasn't your business increased? The whole country has been more prosperous in the last two or three years, the city of St. Louis has grown immensely, and traffic has grown two, three and four-fold; why haven't you increased your business in the last three or four years? A. Conditions have changed. There are a great many more jobbing towns now. People that were formerly customers, and bought goods at wholesale in St. Louis, are now jobbers. The country is settling up now. In southern Illinois, fifty or sixty miles from St. Louis, there are four or five wholesale grocery establishments started within the last year or two.

Q. Where is the great volume of your sales? Where do you do the largest business? A. In Missouri.

Q. What part of Missouri? A. The southern part, south of the Missouri River.

Q. Do you do any business in Arkansas, or Kansas? A. Not Kansas. In Arkansas we do some.

Q. Any other States in the Southwest? A. No, sir, only Arkansas, Missouri and Illinois.

Q. So the great bulk of your shipments do not pass east of the Mississippi River? A. Only in-bound, not out-bound.

Q. Your out-bound shipments nearly all go to the Southwest, and do not cross the Mississippi River? A. I should say about two-thirds. I think one-third or one-fourth would go over to Illinois.

Q. So one-third, or one-fourth of your business is over in Illinois? A. I should say so, off-hand.

Q. Do the Chicago grocery houses sell in the same territory in Illinois that you do? A. Not as a regular thing. Maybe a few special orders, come in there from Chicago.

Q. You sell in the back-woods, and to the poorest merchants over there? A. Yes, sir.

Q. And give Chicago the fat of the trade? A. Oh, no, sir; it is the territory, and not the quality of the merchants in the towns. It is the territory, say south of Decatur.

F. P. CRUNDEN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW.

Q. Please state your name, residence, and occupation? A. F. P. Crunden; St. Louis; President of the Crunden-Martin Woodenware Company.

Q. Where is your place of business? A. On Second and Gratiot Street.

Q. You ship your class of goods in and out of St. Louis, across the Mississippi River? A. I might say, to facilitate matters, that we ship nearly altogether in car-loads, both in and out, and our business is principally with the wholesale merchants rather than the retail.

Q. Your goods are bulky? A. Yes, sir.

Q. Are you familiar with the conditions with reference to less than car-load lots, in the past several years, with shipments across the river here? A. We have very little local business.

Q. You are not familiar with that? A. Like any other merchant, I am familiar with it.

Q. Do you know what the method had been of getting goods across the river, in less than car-load lots? A. We have delivered them either to the Terminal Railroad Association or the St. Louis Transfer Company.

Q. You haven't any teams of your own which you use for that service? A. We have our own teams, and have quite a good many of them, but have never found it profitable to haul to East St. Louis, because we do not care to haul anything back, and a single trip over there would not pay.

Q. What is the reason that any goods you did haul to East St. Louis were hauled over there? A. We never hauled any goods to East St. Louis.

Q. Have you hauled goods from there? A. On one or two occasions we have hauled several car-loads from East St. Louis. But it was at a time of congestion over there, which I understood at the time, and it was liable, I think, to occur with any railroad or any terminal company. We did the best we could, and sent our teams over, and regardless of expense got the goods over, in order to take care of our trade.

Q. Are your car-load lots handled on trains or ferry-boats, mostly? A. Our goods now come by the Wiggins Ferry, and are delivered to the Iron Mountain, and are unloaded on the Iron Mountain Switch, and so they are handled direct.

Q. They do not come over the bridge at all? A. No, sir; not at all.

CROSS-EXAMINATION, BY MR. LEHMANN.

Q. How long have you been engaged in your business as a dealer in woodware? A. About twenty-two or twenty-three years.

Q. And how long has your present company been in business? A. About fifteen years.

Q. You are located down on what might be called the levee, in a general way? A. Yes, sir, we run from Main to Second, and Cedar to Gratiot.

Q. How long have you been down there? A. We moved there about a year ago.

Q. That gives you the facilities of the ferry more directly? A. Yes, sir.

Q. Can you, in a general way, approximate the volume of your business, when you started in the wooden-ware business, fifteen years ago? A. We did about $300,000 or $400,000 a year.

Q. In an approximate way, what do you do now? A $3,000,000 or $4,000,000.

Q. There has been a steady growth in your business during those fifteen years? A. Yes, sir.

Q. You spoke of congestion occurring sometimes over in the yards in East St. Louis, due to the fact that the terminals were contracted, and there was a great influx of freight at one time? A. Yes, sir, that was it.

Q. And that would be especially true, when there were any disturbances of the elements, floods, and so on? A. I think this was an exceptional rush of freight.

Q. In your judgment, ought there be an extension and an enlargement of the terminal facilities here in this community, St. Louis and East St. Louis? A. Well, really, it is a question in my mind whether they ought to be extended in St. Louis and East St. Louis.

Q. I say, as a whole? A. They should be extended, very decidedly, one place or the other.

Q. I am taking the two as one industrial community. A. Yes, sir, I think they should be.

Q. The volume of your business has increased, if I bear correctly in mind what you have stated, about one thousand per cent.—about ten times? A. Yes, sir.

Q. From so many hundred thousand dollars to as many millions? A. Yes, sir.

Q. And taking your observation, as a resident here, and as a man who is engaged in business, and familiar with that business, hasn't there been a very general increase in the volume of all kinds of business? A. Undoubtedly, yes.

Q. And there has not been a corresponding extension of terminal room—meaning now ground room? A. No, sir, I don't think so.

Q. You are familiar with the situation, in a general way? A. Yes, sir.

Q. The majority of the railroads and the terminals are in what is known as the Mill Creek Valley? A. Yes, sir.

Q. And that valley is closely restricted on each side, north and south, isn't it, by property which is built up? A. Yes, sir.

Q. Will you be so good as to give a general description of the Mill Creek Valley, what you mean by that? Locate it, and so on. A. The Mill Creek Valley, as I understand it, runs from Poplar Street over to about Papin Street, possibly four or five blocks. And it runs from, say, Seventh Street, out to, oh, say Twenty-first Street, or something like that, and then it begins to widen.

Q. It was, apparently, originally the bed of a little stream? A. Yes, sir, I used to play baseball there.

Q. And, strictly speaking, it would really extend east of Seventh Street to the river, wouldn't it? A. I don't remember that it ever did.

Q. The valley itself? A. Possibly so, but I don't remember that.

Q. But east of Seventh Street it is not occupied by railroads, as it is west of Seventh Street? A. No, sir.

Q. In fact, there is but a single track east of Seventh Street, and that is known as the Poplar Street track? A. Yes, sir..

Q. Now, Mr. Crunden, the property upon each side of the Mill Creek Valley is quite expensive property, isn't it? A. Yes, sir, I think so.

Q. Of course, not the most expensive, but you are entirely familiar with the south side of the Mill Creek Valley—you used to live over there? A. Yes, sir.

Q. And the railroads themselves, or the Terminal Railroad Association, have encroached right upon the factories and breweries, and other industries on the south side of the valley? A. Yes, sir.

Q. And they have encroached right on the factories and industries on the north side of the valley? A. Yes, sir.

Q. And you would have to remove a great many of the industries, both on the north and the south side of the valley, in order to get more room in there for railroad tracks?

A. I don't know that you would have to remove so many, but you would have to pay an exorbitant price. There is some property, I believe—I know there is an old row of houses on Poplar Street, where I used to live, that they want five hundred to a thousand dollars a foot for.

Q. That is a front foot? A. Yes, sir, and it is very shallow.

FESTUS J. WADE, a witness of lawful age, being produced, sworn and examined, testified in behalf of complainant as folows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence and occupation. A. Festus J. Wade; St. Louis, Mo.

Q. You are president of the Mercantile Trust Company of this city? A. Yes, sir.

Q. I will get you to state if you remember a recent sale, two or three years ago, of what is known as the Wiggins Ferry property in St. Louis and East St. Louis? A. Yes, sir.

Q. Were you interested in any manner in the sale of that property? A. Yes, sir. The company of which I am president was employed to buy the stock.

Q. Who employed you to buy that stock? A. The Chicago, Rock Island & Pacific Railroad Co.

Q. What official of that company gave you that employment? A. It was practically the Executive Committee. I think it was signed by the president.

Q. You had had communications with the company before the action of the Executive Committee, had you? A. Yes, sir, but not with the Company. I had all my negotiations directly with the Executive Committee.

Q. Please state the circumstances, how you came to be in communication with the Executive Committee for the purchase of that stock? A. Negotiations were opened up by some of the gentlemen interested in the Rock Island Railroad.

Q. Where were they located? A. New York. These negotiations were opened with Mr. John Scullin, President of the Wiggins Ferry Company, at that time, and they arrived at a point where they concluded they would be willing to buy the stock; and Mr. Scullin arrived at the point where he concluded he would sell his own stock, and recommend to the stockholders to sell their stock. It then required some one to act as the purchasing agent for them, and they employed us, at Mr. Scullin's suggestion.

Q. How long prior to the sale was the communication entered into between Mr. Scullin and the Rock Island officials? A. I have no knowledge of that whatever.

Q. How much of that stock did you purchase? A. We purchased, as near as I can remember, six thousand shares.

Q. Of the total ten thousand? A. Yes, sir.

Q. Were they all delivered to you? A. No, sir.

Q. Why? A. The Mississippi Valley Trust Company, representing some one—I don't know whom it represented—bid more for the stock than we were bidding at times, and received some of the stock that was contracted to be sold to us; probably as much as five or six hundred, or maybe a thousand shares.

Q. Do ou know how much of the stock that you bought was delivered to you? A. I don't remember now. That is three or four years ago.

Q. Have you the data in your office? A. Yes, sir.

Q. Can you look it up and furnish that information? A. Yes, sir.

Q. Do you know what was the average price you paid per share for what was delivered? A. No, sir, I do not. I don't remember those details. But that is all accessible.

Q. You can get those details, can you? A. Yes, sir.

Q. Who furnished the money that was paid for the stock you bought? A. The Chicago, Rock Island & Pacific Railroad Co.

Q. That was paid to your company here in St. Louis? A. Yes, sir.

Q. By what official of the Rock Island was it paid? A. I don't know who paid the money. The bulk of it was paid to our bankers in New York.

Q. It was paid in New York? I understood you to say it was paid in St. Louis? A. It was paid to their bankers in New York, and their bankers transferred it to us in St. Louis.

Q. By draft? A. I don't know; but I presume it was transfered by telegraph. In fact, it must have been trans-

fered by telegraph. They fixed up their own credits; that we were not concerned with.

Q. As I understand it, then, no Rock Island official in this city had charge of this matter? A. No, sir, there was no Rock Island official in the city at the time, that I remember.

Q. Do you remember the names of the Executive Committee that you dealt with? A. Yes, sir.

Q. Please state them. A. W. H. and J. H. Moore; W. B. Leeds; D. G. Reid; I think those are all the members of the Committee.

Q. You had conferences with the Committee, did you? A. Two.

Q. Where? A. At No. 71 Broadway, New York.

Q. Did those conferences take place prior or subsequent to the purchase of the stock? A. Prior.

Q. How long prior? A. Well, there was one conference about the 26th of April, in the afternoon, that lasted about an hour and a half; and the next one was the following day, when the Mercantile Trust Company was employed to buy the stock.

Q. How long after that employment was it before you proceeded to purchase the stock? A. Immediately—that is, within thirty-six hours. Just the time necessary to get back to St. Louis.

Q. When was the matter consummated, the purchase, so far as you were able to purchase? A. Well, we were given orders to cease operations, about the 5th or 6th of May, I should say.

Q. Do you remember the year these transactions occurred? A. I think it was 1902, but I am not sure.

Q. Was the stock that you purchased delivered to your company? A. Yes, sir.

Q. To whom did you deliver it? A. I delivered it to

some of the officials of the Chicago, Rock Island & Pacific Railroad Company.

Q. What official? A. I dont' remember. We rendered an accounting, of course, and turned over our certificates.

Q. Was the delivery made in St. Louis or elsewhere? A. I think the delivery was made in St. Louis; I am almost sure it was.

Q. Have you any data or memoranda that will enable you to refresh your memory, and state to what person or persons you delivered that stock, actually? A. I don't know that I have. The record would show that we have delivered it, and possibly we might have a receipt for it.

Q. Have you any independent recollection of the Rock Island officials who came here, after the contest for control was over? A. Yes, sir, during the controversy the matter was immediately in charge of Mr. Robert L. Mather.

Q. And who was he? A. He is the present president of the Chicago, Rock Island & Pacific.

Q. What position did he occupy at that time? A. He was then the General Counsel of the Company, I believe.

Q. Where did he live? A. He resided at that time in Chicago, but had his office between Chicago and New York.

Q. Where does he reside now? A. I presume his residence is still in Chicago, but he spends most of his time in New York.

Q. Did any other officials of the Rock Island come here? A. Yes, sir, Mr. A. M. Low, who was also one of the attorneys.

Q. Of Topeka, Kansas? A. Yes, sir.

Q. Any other official or representative of the road? A. Yes, sir, Mr. W. F. Evans.

Q. That is the attorney here in St. Louis? A. Yes, sir.

Q. Any one else? A. That is all I can remember coming here at that time.

Q. Did Mr. Mather remain here until the matter was finally closed up? A. I don't remember exactly whether he did or not. He was here for quite a time.

Q. Have you any recollection as to whom you rendered the account showing your operations? A. No, sir, that was a detail I would not attend to, and I did not charge my memory with it.

Q. Would your records at the Trust Company show those facts? A. Oh, yes.

Q. Will you produce those? A. Yes, if you will give me an idea what you want.

Q. I will do that. Was the amount of money your Company advanced for this stock, all immediately repaid to the company? A. We did not advance any money. The money was deposited with us before we made any payments.

Q. You had the money before you began to purchase? A. We always had more money on hand than we had purchases outstanding.

Q. In this deal? A. Yes, in this deal.

Q. You had some money to return, them? A. Yes, sir.

Q. Are you familiar with the subsequent events that led up to the two interests that were contending for the control of the Wiggins Ferry Company at that time? A. No, sir, I know nothing about them.

Q. You have no knowledge of those details? A. None whatever.

CROSS-EXAMINATION, BY MR. F. W. LEHMANN.

Q. I understood you to say that the money for this purpose was transferred to you by telegraph? A. Well, it occurred about this way: When the controversy arose—

before the controversy arose—we were entering into contracts for the purchase of the stock. We delivered it, if I remember rightly, on the 5th of May. When the controversy arose, and the Mississippi Valley Trust Company increased the bid we were making, and on which we were buying the stock, of course I notified our principals of that fact, and they ordered me to take up all the stock we had under contract.

Q. I was inquiring into the transfer of the money. A. I am going to explain that to you. I then told them we would have to have two million dollars, I think it was, to start with. They had the First National Bank of New York to say that they had that to our credit. We wired them: "Tell the First National Bank to pay that to our credit in St. Louis;" that we couldn't use New York funds.

Q. What I want to get at is, through what company was that telegram sent, the Western Union, or the Postal? A. I could tell you that if I saw the telegram.

Q. And was it a day or a night message? A. I could tell you that if I knew the hour.

Q. I understood you to say there was money left after the transaction was closed? A. That is my recollection.

Q. And do I understand you to say you let go of that, turned that back? A. Unfortunately, yes.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. Was that money deposited in a bank in St. Louis to your credit? A. Yes, sir.

Q. What bank? A. The Third National, I am almost sure.

Q. Your records will disclose that? A. Yes, sir.

Q. I believe you stated, in answer to my question, that you did not remember the average sum paid for the shares delivered to you? A. No, sir, I did not.

Q. I will get you to state if you know whether or not

any other company than the Rock Island was interested in the purchase of that stock, or interested with the Rock Island in the purchase of that stock? A. Not so far as I know.

Q. If there was, you have no knowledge of it? A. None whatever.

JOSEPH RAMSAY, JR.

CROSS-EXAMINATION, BY MR. H. S. PRIEST.

Q. Do you know Mr. Robert Moore. A. I do.

Q. Who is he? A. Robert Moore is a very prominent citizen of St. Louis, a noted railroad and expert engineer, and a man of high character, generally. He lives in St. Louis.

Q. Do you know Mr. Albert Perkins? A. I do.

Q. Who is he? A. Mr. Perkins is a railroad man, and was connected for a number of years with the Burlington road as Superitendent, and in different positions, and is now connected with the Terminal Commission, I believe it is called, as their Railroad expert—he and Mr. Moore.

Q. That is the Commission appointed pursuant to an ordinance of the City of St. Louis? A. I believe so.

Q. Have you seen the preliminary report made by them as the experts employed by the Railroad Commission, appointed as you have indicated? A. Yes, sir, I have. I have read it very carefully. Mr. Moore sent me a copy of it.

Q. I observe first in that report that it is stated that the freight tonnage received and forwarded at St. Louis and East St. Louis, has practically doubled in the past seven years? A. That is, the seven years preceding 1905.

Q. To your knowledge, are you able to state whether that is approximately correct or not? A. I think it is absoltuely correct. The growth of the traffic across the river

here, and in and out of St. Louis east and west, since 1893, since my first connection with the Terminal Company, has been enormous.

Q. I observe secondly this statement made in that report:

"While the best possible facilities for freight traffic should be provided for the various sections for the corporate area of St. Louis, that area is limited; and the two sides of the river are so inter-dependent as to form in fact a single traffic and manufacturing district; a district covering a radius of twenty miles from the St. Louis Court House, of which St. Louis is the business heart and head."

What have you to say about that sentiment which is expressed in that report? Is it true or not, in your opinion?

A. I think it covers the situation admirably. In fact the whole report of the Messrs. Moore and Perkins is as complete a statement and as admirable a lay-out of what is required here in St. Louis, as could be prepared by any one. It is fair to all parties. The suggestions are worthy of very serious consideration.

Q. They are men eminently competent to investigate, and with experienced judgment to determine after investigation, the needs of the railroad situation, such as confronts the business interests of St. Louis, are they? A. In my opinion they have shown that by their report. They are capable, experienced men, and their report is a broad one.

Q. I haven't that report now, I believe, in a form to introduce it at this point, Mr. Ramsay. I think it was published in only one of the St. Louis papers, the "Republic"— A. Pardon me, but they have printed a pamphlet, which is now out, with maps, illustrations, and so on.

Q. I will call your attention to some prominent features of the report, and ask your opinion as to the truth of them: I find this sentiment expressed in the report, to which I will ask your attention:

"As under Government control the full action of Railroad Companies is becoming more and more limited to the manufacture and sale of transportation, as the room in the large cities for the manufacture of railroad properties becomes more and more limited and costly, and as the total cost, direct and incidental, of transportation and commodities from the point of production to the point of destination, it is desirable that friction in handling terminal work, and duplication in any one section, should be reduced to the minimum.

"On the other hand, efforts should be directed to secure facilities in those portions of the city where the commercial and manufacturing interests center, where our people may deal with all the railroads, in the least burdensome and most economical manner."

Mr. Ramsay, what have you to say about that sentiment? Does it agree with your opinion, as an experienced railroad man, and one familiar with the situation in St. Louis? A. I endorse that very heartily, and think that every railroad man will.

Q. To that they have added the following:

What have you to say in respect of that sentiment? A. I think that is all right, and correct, as a general enunciation of the proposition.

Q. Mr. Ramsay, the St. Louis Terminal Association does not do a business directly for profit, does it? A. No, sir, not in a sense that it endeavors to make a profit for the purpose of paying dividends on stocks, and so on.

Q. It is simply the agent of all of the railroads that enter into St. Louis. Is that true? A. That is correct, in general principles.

Q. And it acts for and represents, as a terminal, each one of the railroads that enter into St. Louis? A. It acts for all of them, and handles the traffic of all of them.

Q. You have noticed the suggestions made with respect

to the character of improvements to be made in the terminals in St. Louis, and the reason why those improvements should be made, as set forth in the report to which you have adverted? A. I have read the whole report carefully.

Q. And you think it is a clear, impartial and just and candid exposition of the situation here in St. Louis, and with respect to the terminal situation here in St. Louis? A. I think so, yes; and of the business requirements of the city.

Q. You were a Director of the Terminal Railroad Association at the time there was an effort made to extend the terminal facilities of the Association on the Levee, were you not? A. You mean prior to the Exposition, when an ordinance was sought for what was called "the Loop," and other improvements?

Q. Yes. A. I was.

Q. You are familiar to a certain extent with the improvements proposed to be made at that time? A. Yes, sir, I was familiar with all the plans proposed.

Q. Will you indicate the territory in which those improvements were to be located, and the extent of them, as contemplated by the ordinance submitted to the Municipal Assembly of the City of St. Louis? A. The principal portion of those plans proposed at that time—

Mr. Crow: Q. What year was that? A. 1902 and 1903, preparatory to the World's Fair. The ordinance I think was finally killed in the early part of 1904, after the World's Fair opened, is my recollection of it. The principal element of those improvements at that time was what was called "The Loop," a track proposed to leave the west end of the Eads Bridge, just at the mouth of the tunnel, on the south side, and curving around to the southward, connecting down through the property between the Levee and Second Street— I think they took some Second Street

property, but I am not sure about that—but certainly between First and Second Streets; running on a descending grade until it became parallel with the Merchants' Bridge tracks, as now constructed, and running parallel with those tracks in Mill Creek Valley to Union Station, making four tracks from Poplar Street to the Union Station connection, and bringing all passenger business on that new line down and around into the station, avoiding the tunnel.

Then it contemplated very extensive improvements and additions to the team tracks, yard tracks, and tunnel properties west of the Union Station, requiring the railroads to lay tracks on Atlantic Avenue, and other Avenues there, clear on out practically to beyond the Grand Avenue Bridge, is my recollection. It ran clear out to the main track of the Missouri Pacific and Frisco Railroads, out to Grand Avenue, up the Mill Creek Valley.

Of course the plan contemplated the revision of the Union Station tracks, so as to make double their former capacity. Fortunately, that could be done without any new ordinance, and that work was done.

But the other work could not be done—although there was some eight hundred thousand dollars worth of property bought by the Terminal Railroad Association, which it still holds.

Q. It has been suggested, I believe, by a witness this morning, that that purchase was not made in good faith, for the purpose of extending the facilities of the Terminal Railroad Association, but for the purpose of holding out a competitor? A. That idea was not ever thought of for a moment, and it would not have kept out a competitor, because it certainly did not block First or Second Street, or any of the tunnels. Any other railroad could have passed over, under or through the streets. That idea was never

thought of by any of the Terminal Railroad Association Directors.

Q. The property was bought in good faith, for extending the facilities? A. The object for that purchase was for that purpose and that purpose alone.

Q. If that ordinance had been passed by the Municipal Assembly, and that work constructed, wouldn't it practically have doubled the carrying capacity of the two bridges? A. Not in my opinion. I always opposed the plan—to be frank with you. In my opinion it would not improve the capacity of the Eads Bridge, except for passenger trains. And I think it was not a misfortune to either the Terminal Railroad Association, or to the City, that that plan fell through.

What should be done, is to build a third bridge, as proposed in the plan of Messrs. Moore and Perkins, opposite Poplar Street, and which I suggested at that time. But it would have largely increased the carrying capacity of the lines, for passenger purposes; and also the capacity for freight in the Mill Creek Valley, by furnishing additional yards, team-tracks, warehouse facilities, and so on, which would not have been furnished on that account.

Q. And which could not be furnished without the ordinance? A. Not without a proper ordinance. The St. Louis Terminal Railroad Association owns large tracts of land on both sides, and cannot get the right to lay the tracks, where it owns the property, the abutting property on both sides. They spent several million dollars in purchasing properties at that time. Their good faith was evidenced by their having made contracts, and they had the steel delivered for the work, for all that elevated work, down to Poplar Street. They had to get rid of that afterwards.

Q. Isn't it a fact that obstructions, both legislative and by legal proceedings, against the St. Louis Terminal Railroad Association, have retarded the development of the ter-

minal facilities in the City of St. Louis? A. Very seriously. It would be absolutely impossible, practically, for the St. Louis Terminal Railroad Association to raise additional money to-day for terminal properties, and so on, and to get other people to put money in, as long as the thing is in the condition it is, as to their rights to do business.

Q. Isn't it true that about the time—I speak, of course, with respect to the period during which you were connected with the Terminal Railroad Association as a director—isn't it true that about the time you were making preparations to borrow large sums of money to extend the terminal facilities here, that through the instigation of some one, or perhaps of his own motion, Mr. Crow, then Attorney General of the State of Missouri, instituted a quo warranto proceeding against the Terminal Railroad Association for the purpose of forfeiting its charter? A. All I know is that such proceedings were instituted.

Q. Didn't that retard you in getting financial aid? A. It certainly made it extremely difficult, and if it had not been for the railroads themselves furnishing aid at that time, I doubt if the facilities for the World's Fair would have been completed in time.

Q. Afterwards, that proceeding resulted adversely to the contention of the Attorney General, in the Supreme Court? A. I am not sure about that. In the Missouri State Court, it did.

Q. After the proceeding was decided adversely by the Supreme Court of Missouri, they then asked a hearing before the Secretary of War, and tried to induce him to forfeit the charter of the Merchants' Bridge? A. I know of such proceedings.

Q. And all those proceedings embarrassed the Terminal Railroad Association, in its plan to develop this property? A. Of course, all those proceedings caused very serious

questions in the minds of those who were to advance the money.

Q. You made some suggestion as to a bridge at the foot of Poplar Street: you had formed an opinion, you say, that that bridge would have been more of a relief than the making of the loop, which you have described, as proposed by the Ordinance. Is it your idea that that bridge should be an independent bridge, or a bridge coupled with the ownership of the Terminal Railroad Association? A. An independent bridge would be worthless for any railroad purposes, without proper connection with all the terminals on both sides of the river.

I certainly agree with Messrs. Moore and Perkins in the statement that one terminal by itself, a terminal operated by one management, practically, and in the interests of all the railroads, is better for the city of St. Louis, better for the railroad companies, and better for the development and handling of their traffic, than a half dozen independent operations, one covering one portion of the town, and another covering another portion of the town, and so on; requiring a duplication of switching and a duplication of charges.

In my opinion, as a railroad man, and without the slightest interest, personally, officially, or otherwise, to-day, in St. Louis terminals, that is the best sort of terminal facilities for the City of St. Louis, open to all, under one general management, with proper charges, and plenty of facilities for the handling of the traffic promptly and rapidly.

St. Louis is and will be the greatest gate-way between the East and the West, and all it requires is proper terminal facilities.

Q. It will not, however, if all these improvements you think so beneficial, are opposed at every point by parties who have no interest in the City, or its development, would it?

Judge Krum: You mean the Congress of the United States?

Mr. Crow: You mean myself? A. Of course, opposition to any matter is harmful to that project, and harmful to the development of traffic, and so on.

I became connected with the terminals and with the railroads entering St. Louis, at the very inauguration of the St. Louis Terminal Railroad Association, January 1st, 1890— The company was really organized, I believe, in December, 1889, or about that time; and I know from my own direct connection with it, and I think I had considerable to do with the matter from that time on, that the sole objects of the railroads interested was to furnish terminal facilities for themselves and all the lines in St. Louis, that would develop, aid and foster their traffic in and around St. Louis; and they could only secure traffic here by treating it properly, furnishing it proper facilities, and by encouraging the movement of traffic through St. Louis from the East and West.

Q. And you think the proper location for the third bridge would be as proposed by the experts under the Municipal Commission? A. For a railroad third bridge, yes, for this reason: It is a direct open-air passage by the Terminal Railroad Association to the Union Station, from all the railroads coming in from the east and south of East St. Louis. The northern lines, like the Wabash, Big Four, Chicago & Alton, Burlington & Frisco, can come, and do come in over the Merchants' Bridge by direct line from Granite City right here into the station, but the Vandalia, and the other roads from the south and east, now have to make a big detour down to the Merchants' Bridge, and over the elevated, to avoid the tunnel. With a bridge here (indicating on map) it furnishes a direct line, cutting off some six or seven miles of a round-about loop, prevents a congestion on the Merchants' elevated tracks, and would

leave the tunnel and Eads Bridge open entirely for freight traffic during every moment of the twenty-four hours, while now it is shut out every morning and evening, by reason of the fact that the passenger traffic from these roads, from six-thirty to nine o'clock, completely occupies those tracks, to the complete exclusion of the freight traffic.

Q. You state that, notwithstanding this ordinance which proposed the improvement of the Loop, and the extension of the yards along the Mill Creek Valley, was not granted, a great many improvements were made after that. Describe in a general way, the amount of those improvements that were made? A. You mean in dollars and cents, or the improvements?

Q. The character of the improvements, and their location. A. You are referring now solely to the Terminal Railroad Association, and not the Merchants' Terminal, or the others?

Q. Yes. A. Well, the Terminal Railroad Association, of course, at East St. Louis, was on their own property, where they were not hampered by requiring an Ordinance, and so on, and they largely increased their facilities there, in fact, doubled them by additions to their general yards, revising them, and putting in increased facilities for switching and handling the business properly and promptly, and with additional connections. They built an East-side Belt around the City of East St. Louis, connecting all the railroads with the Terminal properties.

In Mill Creek Valley, the additions and tracks that they put in there—well, in fact, they covered all the property they could with additional tracks, and a revision of their old tracks, without an ordinance. They did all they could.

Q. They constructed sub-ways, too, didn't they? A. Oh, yes, the sub-ways at the Union Station. That doubled the capacity for handling baggage and all that.

Q. What did those sub-ways cost? A. Nearly one mil-

lion dollars. The total improvements and the amounts they expended during the year preceding the World's Fair, the year of the World's Fair, and since, have amounted approximately to five or six million dollars, on the Mill Creek Valley improvements, including the Union Station.

Q. Do you know how much the motive power has been increased? A. No, sir, I cannot say as to the exact amount. I know they have practically doubled their motive power in the last four years.

Q. Now how about the charges for the work done? A. In what way?

Q. I will get at that in this way; has there ever been any dividend paid to the shareholders of the St. Louis Terminal Railroad Association? A. No, sir, not a cent.

Q. Has it been contemplated that there ever will be? A. It never has been expected, in any manner.

Q. In other words, the Terminal Railroad Association operates its property for the cost of making improvements and extensions; the earnings are devoted to that? A. Whatever surplus earnings they have, of course goes back into the property. But the proprietary, or associated lines, the stockholders, the railroads I mean that own the Terminal Railroad Association, are always putting in money themselves, or borrowing more money to pay for the improvements. The Terminal Railroad Association cannot, out of those earnings it may have, take care of the growth that is required of its facilities, from year to year. The railroads interested in the original agreement had to guarantee to pay themselves enough to meet all the fixed charges, if the Terminal Association did not earn enough to do that.

Q. Do you know whether any of the railroad companies who are members of the Terminal Railroad Association, or stockholders, own any of the bonds that have been issued against the property, or if they have been sold to the

general public? A. I don't know of one that owns a bond. They have all been sold to the general public.

Q. And the money used to increase the facilities? A. Yes, sir. The railroads simply had to give their guaranty on those bonds.

Q. I think when you were a witness before that you testified that the Merchants' Bridge Terminal Railway Company, and the Terminal Railroad Association lines, segregated, do not reach any common point? A. Yes, sir, I did testify to that.

Q. That is true? A. That was true—as separate lines, yes.

Q. Before the connection was constructed at Cerre and Fourth Streets? A. This connection here (indicating on map) on Poplar and Seventh Streets.

Mr. Crow: Q. When was that constructed? A. That was completed in 1894, when the Union Station was opened. The Merchants' Terminal Association, prior to the arrangement between it and the Terminal Railroad Association, terminated at Seventh and Gratiot Streets, and was unable to reach the Station, or to get across the Missouri Pacific or Frisco tracks. But after the arrangement was made, we built a connecting elevated track, passing over the Missouri Pacific and the Frisco tracks, and bringing them down to the Union Station, as they are now operated.

Q. Would it be practical to have two terminal systems in the City of St. Louis, and in the business vicinity, including East St. Louis, covering precisely the same territory, and reaching the same field? A. You mean both of them reaching exactly the same points and all?

Q. Yes. A. No, sir. That is impossible in any city, whether St. Louis, or any other place. I don't know of any two terminals that reach exactly the same territory in any

city. Sometimes they reach common points, and then again they reach other points that are not common.

At this point the further hearing of testimony was adjourned to Wednesday, October 3rd, 1906, at 10 o'clock, a. m.

St. Louis, October 3rd, 1906.

Met pursuant to adjournment as above, on Wednesday, October 3rd, 1906, at 10 o'clock a. m., at the Federal Building, in the City of St. Louis, Mo.

Present: Hon. R. E. Rombauer, Special Commissioner.

Messrs. E. C. Crow and Chester H. Krum appeared in behalf of the complainant.

Messrs. M. F. Watts, H. S. Priest and F. W. Lehmann appeared in behalf of the defendants.

The following proceedings were had:

CROSS-EXAMINATION OF JOSEPH RAMSAY, JR., CONTINUED, BY MR. F. W. LEHMANN:

Q. In the case of shipments coming to St. Louis from without, and passing over the Terminal, where there has been delay in making the delivery, against whom is the complaint usually made? A. The complaint is made to and against the line making the final delivery. For instance, if it is to be delivered in St. Louis from the east side the complaint would naturally be made to the Terminal Railroad Association.

Q. So, for that reason, the great majority of complaints are made against the Terminal Railroad Association? A. The Terminal is the one that receives all the complaints and kicks, generally, if there is any delay on either side of the river, whether due to the original company failing to deliver promptly, or the final company on this side failing

to take it and deliver promptly; for instance in the case of freight going to the Wabash, the Missouri Pacific, or some other connecting tracks; the Terminal is the delivering company, and generally receives all the complaints.

Q. Regardless of whether it is responsible or not? A. They don't know whether they are responsible or not, until it is investigated.

Q. Taking your experience as manager of the terminals here in years gone by, what is the fact, usually, as to the responsibility? A. Well, it is very frequently on the other line, the line bringing in from the East, North or South, and delivering to the Terminal Company. Sometimes it is on the Terminal.

Q. Mr. Ramsay, what portion of the revenues of the Terminal Railroad Association is paid by the railroad companies themselves? A. The railroad companies pay fully sixty to sixty-five per cent. of all the Terminal charges, on account of the handling of their traffic. And they pay the same charges and the same tolls that are paid by individual shippers.

Q. The charges are in every case the same for the same service? A. The same for the same service.

Q. Whether made to a railroad company, which is a proprietor, or whether made to an outside shipper? A. Whether absorbed or paid by the railroad companies, or paid by the shipper. There is but one tariff.

Q. There has been something said in the testimony here as to the absorption of Terminal charges in some cases, as for example, say, in a shipment from St. Louis over the Alton, to points west, in Missouri? A. The Alton makes the same rates to all points west of the river that are made by the western lines, which have no bridge charges to pay. Therefore, the Alton absorbs the bridge charges, or transfer charges they are called—that is, the amount paid for getting the business from the industry, side track, or ware-

house, in St. Louis, to East St. Louis; they absorb all those charges, and make the same rate to destination which the western roads would make, which handle directly. For instance, the Wabash reaches Mexico, Mo., over its own line. If the Wabash was to have a shipment from an industry on its own line, where there would be no switching charge, the Alton would take that business and pay the switching charge, and also the Terminal Association for the transfer charges, in order to get the traffic, and would deliver it to the shipper or consignee at Mexico at the same rate that the Wabash would. It is the same way with wagons transferring it across the bridge, when made by one of their recognized transfer agencies.

Q. The Wabash has a line from St. Louis through Missouri, to Kansas City? A. Yes, sir, practically all Missouri points, through connections.

Q. And that line begins at St. Louis, on the west side of the river, and takes, substantially speaking, a westerly course from St. Louis? A. Yes, sir.

Q. And that same thing is true of the Missouri Pacific? A. Yes, sir.

Q. It has a line from St. Louis to Kansas City, and that takes, substantially, a western course through the State? A. Yes, sir, and the Rock Island has the same.

Q. And the Frisco the same? A. Yes, sir. And the M., K. & T. the same. And the Burlington has the same, from North St. Louis.

Q. Now the Chicago & Alton has a line from St. Louis to Kansas City also? A. Yes, sir, but it crosses the river in order to get there.

Q. In other words, when it sets out for Kansas City it begins its journey by going directly away from Kansas City? A. By going directly east, and then north, and crossing the river, and then back west.

Q. The Alton must make the same rate on its shipments

to Kansas City from St. Louis that it makes on its shipments to Kansas City from East St. Louis? A. Yes, if it wants any business.

Q. On shipments over the Alton, from East St. Louis to Kansas City, is the shorter haul included within the longer haul from St. Louis to Kansas City? A. Yes; therefore it must make the same rate from East St. Louis that it would from St. Louis.

Q. Does that physical situation compel the Alton to absorb the charges from St. Louis to East St. Louis, when it is shipping from St. Louis to Kansas City? A. Yes, sir; and the same sitaution, the fact that the Alton must make the same charge from East St. Louis to Kansas City that it does from St. Louis, forces the western roads to also meet the Alton's charge from East St. Louis, and absorb the transfers across the river, to get any traffic from East St. Louis to Kansas City and western points.

That shows the reason why through traffic, as it is called, over the river, is absorbed by the railroad companies, in competition with each other, to get business.

Q. Do similar conditions exist with reference to business that comes to St. Louis from the Southeast? There has been some reference made in this testimony, to a territory designated as "Green Line Territory." A. Yes, sir. That is common teritory with the Louisville & Nashville, the Mobile & Ohio, the Iron Mountain line on the west side of the river, through Memphis and via Cairo, to that territory. That makes common territory, competitive territory, the same as the competitive territory that the Alton and the lines west of St. Louis have.

The lines to the "Green Line Territory" do the same thing exactly with transfer charges, that is, they absorb them, in order to get traffic to the west by this eastern outlet.

RE-DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. It is a fact that it is the competition which causes the Chicago & Alton to absorb this bridge arbitrary from St. Louis? A. Competition in reaching the same points as the other roads.

Q. If an independent line, the Terminal Railroad Association, would make free delivery, free of the bridge arbitrary, all other lines would be compelled to meet that? A. No, sir. The Alton would simply save paying the arbitrary, but the shippers would pay the same.

Q. If a line from the Atlantic seaport had terminals in St. Louis, and a bridge and ferry of its own, and made St. Louis deliveries at the regular St. Louis rate, regardless of anything for transferring across the river—except the matter of haul and distance—then wouldn't the other lines be obliged to absorb the arbitrary in order to meet the competition? A. You mean for local business in St. Louis?

Q. For business destined to St. Louis. A. Of course, if any road made a lower rate to St. Louis, for any reason, whether on account of not paying bridge charges, or any other reason, then the other roads would have to reduce their rates correspondingly; for no matter what rate any road makes, the other roads will meet it immediately, no matter what the reasons or conditions are.

Q. Regardless of the arbitrary, competition fixes the rate? A. Competition fixes the rates, as a rule. That is, under the old conditions. Under the new rate law, I don't know whether competition, or the local conditions in some communities, will fix them. The Commission has that power, I believe.

Q. You made the statement that the railroads paid sixty-five per cent. of the charge for transferring freight across the river, backwards and forwards? A. Sixty to sixty-five is paid by the railroad companies direct.

Q. Do they have that repaid to them? A. In no way.

Q. How do you figure they pay that? Will you explain that? A. If the Wabash has a car of freight coming from its eastern lines—

Q. Take some road that hasn't any west side terminal. A. What road shall I take?

Mr. Lehmann: Let him finish his answer first.

Mr. Crow: I am asking the question.

Mr. Lehmann: The witness is answering, and I submit it is not proper to cut him off in the middle of his answer.

Mr. Crow: I have a right to ask a question, and after he answers it, he can modify it if he chooses.

Mr. Priest: Whatever answer the witness chooses to make should go down in the record.

The Commissioner: General Crow wishes to modify the question originally put.

Mr. Priest: Then he can put his modified question.

Mr. Crow: I have already done that.

Mr. Priest: That does not preclude the witness from making his answer.

A. Take the Big Four, which has no terminal in St. Louis. When it brings a car to East St. Louis, destined to the Missouri Pacific, we will say, for Kansas City, it has performed its portion service when it reaches East St. Louis, and delivers it to the Wiggins Ferry Company, the Merchants' Bridge Company, or delivers it to the Missouri Pacific Railroad. The Missouri Pacific receives that car, and pays all the transfer charges from East St. Louis to the delivery to the Missouri Pacific, and absorbs that in its through rate from New York to Kansas City.

The Wabash, I think, will show an illustration clearer for what I think you wanted, Mr. Crow. The Wabash has a lot of terminals on this side of the river; therefore, when the Transfer Company performs service for the Wabash, it performs a great deal less service than it would do for the

other roads. It would bring this freight over the Merchants' Bridge, deliver it right to the Wabash in North St. Louis. The Wabash receives and handles it in its own yards and terminals.

Or, take the Frisco, which performs all its own service, runs its own freight cars, with its own engines, over the Merchants' Bridge; but it pays exactly the same for that as the Missouri Pacific, where the Terminal Association performs all the service.

In other words, no road gets any advantage for its own service to itself. The charge is the same to all of them.

Q. Upon your statement, I understand that when you say sixty to sixty-five per cent., that amount is confined to freight destined to points beyond St. Louis? A. Fully sixty-five per cent. of the traffic through St. Louis is through business. Then, of course, in addition to the freight, the railroad companies pay all the charges and tolls on the passenger service, and have done so for a number of years. The Terminal Railroad Association makes no charge for that.

Q. That is added in the cost of the ticket? A. Not on local service. If you have not a through ticket to St. Louis that is added on the charges.

For instance, coming over the Merchants' Terminal Railway, they would deduct twelve miles on mileage ticket if you were using a mileage book. You would pay the usual number of miles to Granite City, and then twelve miles to St. Louis. The actual mileage on that bridge is nine miles, which would entitle them to take but nine miles.

Q. According to your statement, forty to forty-five per cent. of the business crossing the river at St. Louis is local business? A. No, sir, from thirty-five to forty per cent. is local, and general switching business. Not all transfer business. There is a good deal of internal switching around the terminals, between roads on this side of the

river? A. It is the movement of cars and freight backward and forward across the river? A. Yes, sir, and passenger business.

Mr. Priest: Q. He did not say backward and forward across the river. A. A good deal of the switching is local, here in the city of St. Louis, and not crossing the river. Of course, statistics would show that clearly, but I should say that twenty-five to thirty per cent. of the Terminal earnings is due to what we would call local transfers across the river and local switching in the city.

Q. The local business, however, that comes to St. Louis from points in the East, and that destined to points east of St. Louis, originating at St. Louis, the railroad companies do not pay that arbitrary except in territory south of the "Green Line?" A. Not on that consigned to East St. Louis for St. Louis delivery.

Q. On St. Louis business, then, the railroads, as a rule, do not pay that charge of transfer? A. No, sir, it is not absorbed.

Q. It is paid by some one other than the railroad companies? A. Yes, sir; either the consignee or the consignor.

Q. The passenger business is in the same condition as the freight business, originating in or destined to St. Louis? A. No sir, the Terminal Railroad Association has nothing to do with those charges. They simply get so much per car from the railroads for hauling a train across.

Q. What is that charge? A. It ranges, I think, from $1.50 on a baggage car, to $3.00 on a passenger car.

Q. Regardless of the number of persons in the cars? A. Yes, sir, regardless of the number of persons in the cars. It is a charge against the roads, and the roads pay it.

Q. Take a ticket from Pittsburg to St. Louis over the Vandalia; how much is added to that? A. Nothing more. I happen to know that, as I pay my fare nowadays. I tried

to get them to knock off mileage over the bridge, and they wouldn't do it. It is the same rate.

Q. Then there is mileage added? A. No, sir, it is the same rate to East St. Louis.

Q. To what points is this collection of fare applied? A. To what points?

Q. Yes, for transferring across the river? A. The railroads pay that.

Q. Don't they charge it back to the customer in the ticket? A. Not on business that has any length of haul on it. They do, I think, on local business, make some charge; to points in Illinois, and probably in Indiana, but not I think to Indianapolis— But I would rather you would have some passenger man on that.

Q. They formerly made a charge for passenger service? A. The Terminal formerly made a charge ranging from three or four cents up to twenty-five cents, commuters from East St. Louis and Alton, collections that they made themselves; they had their own collectors on.

Q. When did that cease? A. About five years ago-five or six. I don't remember exactly.

Q. You have not had any immediate connection with the operations of the Terminal Railroad Association since about 1895, have you? A. I have had no physical connection, or direct control of it, except as a director of the Terminal Association; and, of course, being fully conversant with all the charges, rules, and regulations, and so on. And as the President of a paying line—paying very heavily, too —the Wabash Company. The Wabash pays, next to the Missouri Pacific, the heaviest. The Missouri Pacific and Iron Mountain pay the heaviest of all the lines, and the Wabash comes next.

Q. Is that because of the fact that they handle more business across the river? A. Yes, sir. The Wabash handles a great deal of business, having lines on both sides

of the river, and it pays in each direction—well, they both pay in each direction.

Q. Do you know where what used to be called the "Conlogue Road" is located? A. Yes, sir.

Q. Where is that? A. That ran from the stock-yards at East St. Louis, south through the Relay, to a point down on the river opposite the old Iron Mountain, below and opposite Carondelet. That was the Vandalia Line.

Q. Do you know about the length of it? A. Well, it was five or six miles.

Q. It was part of the system of roads used in the East side yards, was it? A. It was a property leased or owned by the Vandalia, and formerly was operated as a separate, independent switching arrangement, making its own charges, in addition to what charges the Terminal made. I believe they are operated now on one switching charge.

Q. Who owns it now, do you know? A. Well, I don't know whether it was sold to the Terminal properties, or leased by them; but it is operated in the Terminal system.

Q. Didn't it pass into the hands of the Southern road first? A. Conlogue's? Not to my knowledge. I cannot say as to that.

Q. I believe you stated the other day that there were only two roads on the other side of the river that were not members of the Terminal Railroad Association? A. Two of the long lines.

Q. What two are those? A. The Clover Leaf, and the Chicago, Peoria & St. Louis.

Q. Where do they run? A. The Clover Leaf runs to Toledo, Ohio, and the Chicago, Peoria & St. Louis as far north as Peoria.

Q. How many lines are there on this side of the river that do not belong to the Terminal Railroad Association? A. I want to correct my statement as to the East side. I stated also that the Mobile & Ohio, while not directly a

member of the Association, as it was supposed to be under the Southern Railroad, is practically a member.

The Commissioner: You stated that before.

Mr. Crow: Q. How many of the west side roads are there that do not belong to the St. Louis Terminal Railroad Association? A. I don't know of any.

Q. And I believe you stated that the Terminal Railroad Association was composed of these proprietary lines? A. The proprietary lines are the members of the Terminal Railroad Association. That is, they are the owners and fill the same position that stockholders would in any other company, and they are, in this company. They are stockholders in the Terminal Railroad Association. There are fourteen railroads, all told, that hold an equal amount of stock in the Terminal Railroad Association.

Q. Can you define where the line east of St. Louis is, that marks the beginning of what is known as "Trunk Line Territory?" A. The western limits of the "Trunk Line Territory" are Buffalo, Pittsburg—a line drawn practically between Buffalo and Pittsburg. That is the western limit of the Trunk Line territory. Then west of Pittsburg, of course, comes in the Central traffic—what used to be the "Central Traffic Territory"—and that extends to Chicago and to St. Louis, and a line folowing pretty closely along the Mississippi River and the Illinois River up to Chicago.

Q. Taking the line from Pittsburg south to the Gulf States, that would include the Central Traffic territory? A. No, sir. North of the Ohio River, east of the Mississippi River, and a line drawn, I think, from Hannibal—I think it is—from there towards Chicago, passing through Peoria, and south of the northern limits of the United States. That is, taking in Michigan and the Lakes, as the northern border, and Buffalo and Pittsburg as the eastern border. All included in that territory was called "Central Traffic Territory." While the Central Traffic system ex-

tends to Buffalo, and really to St. Louis, there are so many other lines, cross lines, and independent lines, in that territory, that it is known as a separate group, and I think it is the same as the group of the Interstate Commerce Commission in which earnings are given.

Q. On shipments originating in Central Traffic territory, and destined to Kansas City or the West, do the railroad companies absorb the arbitrary, if they go through the gateway of St. Louis? A. They do.

Q. What is the point east of St. Louis, if there is any, where they do not absorb it? A. I don't know of any. They absorb it from East St. Louis. It is absorbed by the roads that pass directly through St. Louis, in order, as I stated, to meet the competition of the Chicago & Alton, and the Burlington, which will take it up on the west side of the river.

Q. There is also a territory called "Green Line Territory," I believe? A. Yes, sir.

Q. Do you know the eastern and southern limits of that territory? A. I think it extends to Savannah on the east, and also takes in the Gulf ports.

Q. It goes to tide-water? A. It runs west to the river, down to Memphis, crosses the river there, and gets into the same territory there.

Q. It is the competition of the Memphis bridge that destroys the arbitrary in the Green Line territory, is it? A. It is the competition of the railroads that reach that territory, in one way or another, and the lines that reach it direct. There is another reason, which I think is the primary reason why the railroad companies absorb the bridge arbitrary, and that is because via Chicago and the gateways south of Chicago, Peoria, for instance, they pass over western lines to this same territory. East from St. Louis would be the same as Chicago, or Peoria, or via any of those connecting lines, up there.

Q. On shipments in that territory, originating at Missouri River points, and routed via roads north of St. Louis, the bridges at Hannibal, and up the river, carry it without any charge? A. No, sir, there is a charge at Hannibal, and the charge at Hannibal is the same as the charge at St. Louis; that is absorbed by the roads that use it. They absorb it, the same as at St. Louis.

Q. Do they charge at Hannibal? A. That is used only by the Chicago & Alton, it is owned by the Chicago & Alton, and it is all in the rate. It is practically the same charge to the shipper, but the Chicago & Alton would simply pay it back to itself.

Q. What is the territory that lies east of Pittsburg and on to tide-water, called? A. Trunk line territory.

Q. That is all Trunk Line territory? A. Yes, sir. It is practically Pennsylvania territory.

Q. Pennsylvania Railroad Company territory? A. Pennsylvania and New York Central—yes.

Q. I believe you said yesterday that the Terminal Railroad Association spent three or four million dollars here for terminals; within what period of time have they spent that? A. I think I said they had spent five or six millions.

Q. That may be; five or six million dollars, then. A. That was during the two years preparatory to the Exposition. They have spent altogether here over thirty to thirty-five million dollars, actual cost.

Q. Most of the moneys you speak of being spent preparatory to the World's Fair period, or at least a great deal of it ,was put into the betterment of already existing terminals, like improvements at the Union Station? A. Well, it was practically doubling the capacity of that. Of course, it was putting in money where it would not bring in any direct returns to anybody, except the convenience of St. Louis travel.

Q. But the great big end of it was put into improvements of properties they already had? A. Yes, sir.

Q. And not in the acquisition of additional terminals? A. There was a great deal put in for additional terminals. I should say that the expenses at the Union Station did not exceed $2,000,000, if that much; while the balance was paid for additional terminals, and yards, and property, and—

Q. By the Terminal Railroad Association? A. By the Terminal Railroad Association.

Q. Whereabouts? A. In the Mill Creek Valley, and on the levee.

Q. You include in that the property that the Terminal Realty Company purchased, anticipating the loop? A. Yes, sir, that was part of the loop.

Q. What was the outlay there? A. $800,000 to $1,000,000.

Q. That has never been utilized for terminal facilities? A. Not yet.

Q. At what other place did they purchase property? A. They purchased property all along the Mill Creek Valley, but I cannot give you the details of that. During that period I was not a director. While I attended all the Presidents' meetings, in order to authorize the expenditures of the money, and so on, I was not one of the directors, but was thoroughly in touch with all the details of that deal.

Q. How long prior to the World's Fair period did that cover? A. That began early in 1903, or the latter end of 1902.

Q. Do you know how much money the Wabash Railroad Company expended in acquiring its terminal facilities at Pittsburg? A. They expended it building a line of railroad into Pittsburg, and securing four hundred and sixty miles of railroad through Ohio, the Wheeling & Lake Erie, with all its terminals in Cleveland and Toledo, on Lake

Erie. The Wabash itself expended only $10,000,000 of common stock, and got control of it. The Wabash-Pittsburg Terminal Company, which I suppose you mean, expended about $30,000,000. That was in building its line of railway, sixty miles long, with a double track, in a very heavy country. In Pittsburg alone it did not spend over $5,000,000 for passenger and freight stations.

RECROSS-EXAMINATION, BY MR. LEHMANN.

Q. You had something to do about the Wabash Railroad Co. getting into Pittsburg, didn't you, and with the acquisition of the Wheeling & Lake Erie Road? A. Yes, sir, I had a great deal to do with it.

Q. Suppose there had been at Pittsburg a terminal arrangement like that which exists in St. Louis, would it have facilitated, or would it have hindered your getting into the city? A. It would not only have facilitated our getting into the city, but when we did get into the city it would have furnished facilities to every industry and shipper in Pittsburg. To-day, practically, there is not one out of sixty industries there that can ship over the Wabash. The Pennsylvania, the B. & O., and the Lake Erie, decline to switch for any shipper except over their own roads. The Pennsylvania Road is very outspoken about that. They gave notice that they will not take a car except over certain routes; they prefer to haul it over the long line.

The St. Louis shipper is very independent as compared with the Pittsburg shipper, and the shipper in other places where the railroads own their own terminals, and thereby practically control every shipper on those terminals.

Q. The line of road that the Wabash acquired into Pittsburg, where does that extend, to and from? A. It extends from Pittsburg along on the Wheeling & Lake Erie, sixty miles to Pittsburg.

Q. I thought you spoke of four hundred miles? A. That is the Wheeling & Lake Erie.

Q. Does that make a continuous line? A. From Toledo to Pittsburg, and Toledo to Cleveland, and also to all points reached by the Wabash west of Toledo.

Q. I wished to inquire more particularly whether any of those lines that the Wabash acquired go through Pittsburg? A. None of them go through Pittsburg.

Q. Taking the lines you have there, and considering the matter of making them as useful and efficient as possible, in their capacity of common carriers, what is the comparative effect of such terminals as the Wabash did acquire at Pittsburg and such terminal arrangements as it has in the city of St. Louis? Which is the better for the efficiency of the railroad, as a carrier? A. Why, general terminals, such as are at St. Louis, are far better for the railroad. And—

Q. How about the shipper? A. Not only that, but it keeps an open door to all railroads.

I am interested to-day in projects that look to Pittsburg, and the very first objection raised by everybody is, "Why, you can't get into Pittsburg when you get there." I am also interested in another project looking toward St. Louis, and that question is not raised at all. They say, "The minute you get to St. Louis it is not a question of the expenditure of ten to fifteen million dollars to get in, but the minute you get in you can reach all industries." And to-day, St. Louis could get a dozen roads sooner than Pittsburg could get one.

Q. You are to-day more interested in the construction of new lines than the operation of old ones? A. I have nothing to do with the old lines to-day.

Q. What is the great difficulty in the construction of a new line, where it has relation to any large city? A. The question of terminals, of course, is the one question.

Anybody has the ability to build a railroad between two common points, but the question always is, "When you do that you are up against it because you can't get terminals any more."

Pittsburg originates and terminates to-day over 110,000,000 tons of traffic per year. That is, the Pittsburg district, just as the St. Louis district was outlined in Mr. Moore's plan, at about twenty miles. The Pittsburg district covers about the same distance.

Q. And that through system of independent terminals is largely monopolized by one or two roads that own the terminals? A. Well, the complaint made by the St. Louis shippers about delay in getting their traffic handled is nothing as compared with that made by the Pittsburg men. There have been months there when they have been absolutely tied down, could not get coke or anything else, and had to shut down their mills in all directions.

It is due to the enormous amount of traffic, as compared with the facilities of the railroads handling it. And at the same time no new railroad can get in there without an expenditure that would almost stagger anybody who did not know what the enormous traffic would be after they got in.

I am a strong advocate of general terminals, open to all the railroads.

Q. Each one of the railroads having the use of what you speak of as "general terminals," would be interested in case of any delay, assuming that delay was due to the Terminal company, or the terminal arrangement. The railroads would be interested to look after it, and do what they could toward having the evil remedied? A. Certainly. They lose their business if they don't.

Q. Where you have a general terminal system, each railroad company which uses that terminal has its own distinctive interest to have those terminals as efficient as possible? A. Undoubtedly.

Q. You were inquired of about property bought by the Terminal Railroad Association here in St. Louis just preceding and in connection with the World's Fair; some down at the river front. And you say that was not utilized. Why was it not utilized? A. Because the ordinance permitting the Terminal Railroad Association to construct its line there, and utilize it, was not passed by the city.

Q. In connection with the utilization of that property, it would be necessary to cross with your elevated structure some streets of the city? A. A number of streets—yes, several streets.

Q. And that you were unable to do in this city without the consent of the Municipal Assembly, expressed by ordinance. Y. Yes, sir, I believe that is the law, and they declined to give that consent.

Q. That projected change down on the river front was for the purpose of relieving the tunnel from passenger traffic, I believe? A. Yes, sir—or relieving the passenger traffic from the tunnel, is the way I would put it.

Q. The tunnel has been highly objectionable for carrying passengers through it? A. Very objectionable. And, of course, the newspapers for years made a very loud howl against it, and the people did, also.

Q. When a train enters the tunnel, the windows of the cars are all closed up, and so on? A. It is very unpleasant and disagreeable, particularly in the summer time.

Q. And the Terminal Railroad Association proposed to remedy that, and acquired property for that purpose? A. Yes, sir.

Q. Did it go so far as to get its structural steel? A. Practically all of the contracts were made. That is, for the structure. And a large quantity, several thousand tons, at least, of the steel was delivered.

Q. And you were prevented from utilizing it? A. Yes, sir.

Q. I believe you stated also that property had been acquired along the Mill Creek Valley, in order to make more room for terminals there, and that property has not been utilized—or at least a great part of it has not? A. A great deal of it has not been, and cannot be, without permission to lay the tracks upon certain streets.

Q. In other words, it involves the construction of tracks across streets? A. Yes, sir.

Q. And the Municipal Assembly of St. Louis has not given its consent to such construction; is that correct? A. Yes, sir, that is correct.

Q. And for that reason, and that reason only, that property lies idle and unused? A. Yes, sir.

Q. You referred to the gateway of St. Louis; the larger the city which serves as a gateway for traffic is, the more expensive it is, as a rule, to pass through it? I mean, the actual expense of doing it, without regard to who bears the expense? A. Certainly.

Q. That is because property is usually expensive in proportion to the density of the population? A. Yes, sir.

Q. And as the demands upon it grow, the price rises? A. Yes, sir.

Q. It would be, for that reason, cheaper to pass through a smaller town, where that could be done, than through a larger town—as far as the mere matter of passing through is concerned? A. Yes, sir.

Q. But the attraction to a large city is because of the large volume of business it offers? A. Yes, sir, and the roads all concentrate at a large city, and that of course brings a great many of them together, and gives them a common point of interchange from one line to the other. If they could avoid the large cities for their through traffic, it would be a much more economical way of handling it.

Q. The distinctive interest of a road like the Wabash, is with St. Louis, isn't it? A. St. Louis is the most impor-

tant and valuable territory that the Wabash has. It is its natural headquarters.

Q. Isn't it the effort, and also the interest, of the St. Louis roads, to make St. Louis, you might call it, as easy a gateway as possible, between the East and the West, the North and the South? A. It is of those roads which are more properly St. Louis roads. Of course, some of the lines reach Chicago from Kansas City and Omaha more directly, which probably gives Chicago the preference; but the bulk of the roads in St. Louis are interested in building up traffic in St. Louis, as against all other points.

I would like to just reiterate; the enormous growth of the traffic through St. Louis, particularly since 1903, with the increased facilities which have been given by all of the terminals here, not only the Terminal Railroad Association, but the Merchants' Bridge Terminal Railway Company, and the other lines, and the new belt lines, and all that, have enormousy increased the through traffic through St. Louis. And, of course, the more through traffic that goes through St. Louis the more it becomes known, and the more its local traffic will grow. If St. Louis becomes known as a gateway, that helps it locally.

Q. Reference was made to the Conlogue road, which was originally, I believe, a distinct and separate road, and so operated. And then I think you said it was acquired afterwards by some other company, and now has passed under the control of the Terminal Railroad Association? A. Yes, sir.

Q. Now it did switching on its own account, originally? A. Yes, sir.

Q. And now it has been absorbed and assimilated as part of the Terminal system here; what is the result of that, as to the number of switching charges which would be made, where the Conlogue tracks were employed as part of the loop? A. It has, of course, reduced the switching

charge, and made one charge where there were two before. Because Conlogue's did not reach all roads, and had to deliver to the Terminal Association, and others, to reach some other roads. Then it has made easier access to the bridge for passenger trains from the southern roads than it used to be.

Q. The substantial effect of the acquisition of the Conlogue road by the Terminal Railroad Association, was to extend the facilities and tracks of the Terminal Railroad Association to that extent? A. Yes, sir, and to permit all other roads to use the Conlogue road instead of simply having the Vandalia itself use it.

Q. I am not sure but one matter was left a little in doubt, as the result of questions asked by General Crow and myself. Business from the West, terminating here at St. Louis, local business from the West to St. Louis, the Chicago & Alton, if it handles the business, absorbs the charges in every case? A. Yes, sir.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. The Terminal Railroad Association, through your suggestion, purchased about 5,700 shares of the Wiggins Ferry Company stock, being a majority, for the purpose of keeping the Rock Island, I believe you said, from acquiring independent terminals on this side of the river?

Mr. Watts: We object to counsel putting into the mouth of the witness something he did not say at all.

A. I did not so testify. The Terminal Railroad Association, to my knowledge, never bought a share of Wiggins Ferry Company stock. I did testify it was bought by all of the roads interested.

Q. And then turned over to the Terminal Railroad Association? A. No, sir, I did not make that statement. Still, I believe it is owned by those roads. Of course, I don't know what has been done in the past year or so, and

it was not bought to keep the Rock Island out of St. Louis.

Practically, I was responsible for the purchase of the Wiggins Ferry Company stock by the other lines. But the only argument I used in regard to that with the other lines was that the Wiggins Ferry property could be kept open for the use of all the railroads reaching St. Louis, and should not be kept open for only the Wabash, or the Missouri Pacific, although I did say to Mr. Gould that it would be worth every cent it would cost, at those prices, if the other roads would not come in, for the Missouri Pacific and the Wabash, because it would give us practically control of the river fronts of St. Louis and East St. Louis. But I did not think any one railroad should have that. That was the sole reason for it.

Q. It was to prevent the control of it by the Rock Island at that time, that the purchase was suggested? A. Yes, sir, to prevent the control of it by the Rock Island at that time.

Q. The object of preventing that control, according to your statement, is, to compel the Rock Island as well as all the other railroads to use the same common terminals? A. No, sir, not to force the Rock Island to use the same common terminals, but to prevent any one road from having control of the most extensive terminals in St. Louis and East St. Louis. The Wabash was directly interested, because it connects with the Wiggins Ferry on the north. It was the only road at that time that did so, except the Burlington; and the Wiggins was a very valuable connection of ours to all industries reached by it. I objected to seeing it go into the hands of a competitor, nominally open to us, but practically, by way of slow switching, obstructed for our use—you know how those things work.

Q. It had been previously open to all? A. Yes, sir, and no one thought of buying it. In fact, it had been offered to other railroads, and they declined to purchase it because it

was open to all. If it had remained that way, they never would have paid any money for it.

ABRAHAM FRIEDMANN, a witness of lawful age, being duly produced, sworn and examined on the part of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. What is your name? A. Abraham Friedmann.

Q. What is your business? A. Shoe business.

Q. What kind of shoe business do you carry on? A. Wholesale manufacture.

Q. How long has your firm been in business in St. Louis? A. Fifteen years.

Q. Is that the length of time your firm has existed? A. It has been in existence fifty-two years.

Q. Do you manufacture goods for the wholesale trade? A. Yes, sir.

Q. How do you get your shipments that are outbound, for points in Illinois, across the river? A. We deliver some to the Terminal Railroad Association.

Q. Where do you make that delivery? A. On this side of the river to the Terminal Railroad Association.

Q. Do you deliver to anybody else? A. Yes, sir, to the St. Louis Transfer Company.

Q. Where do you make your deliveries to the Transfer Company? A. They call for the shipments.

Q. How long has that been in vogue? A. A great many years.

Q. With the St. Louis Transfer Company? A. Yes, sir.

Q. Do you make deliveries in any other way? A. No, sir.

Q. How is the majority of your stuff shipped out—by the Transfer Company or by the Terminal Railroad Association? A. I imagine it is half and half.

Q. Is there any reason for that division? A. No, sir, no special reason.

Q. What is the comparative cost? A. It is no cost to us at all.

Q. To send the goods out? A. The St. Louis Transfer Company, as I understand it, adds their charge to the regular railroad charges.

Q. What is done with it then? Who pays it? A. The consignee.

Q. The man to whom the goods are shipped pays it? A. Yes, sir.

Q. Do you know what that charge is, for taking your line of goods across the river? A. I think about 65 cents per hundred.

Q. In the event that you deliver it to the Terminal depot in St. Louis, is there any charge for taking it across the river? A. Yes, sir.

Q. Who pays that charge? A. The consignee.

Q. Does that follow the goods as an advance charge? A. I think so.

Q. Have you any teams of your own employed? A. Yes, sir.

Q. For what purpose do you use those? A. To deliver goods to the west side lines.

Q. For any other purpose? A. And also hauling the inbound freight to our place of business.

Q. Inbound from where? A. From all directions.

Q. Do you haul it from the east side? A. No, sir.

Q. How do you get your stuff that comes from lines across the river? A. A great deal comes from the Terminal Association.

Q. How does the rest of it come? A. It is scattered over various lines, but a great deal of it over the Wabash.

Q. Prior to the time the Wabash made deliveries in St. Louis, during the last year, how did you get it? A. It

was all carried by the St. Louis Terminal Railroad Association; that is, for about two years. Prior to that time, it was brought in by the St. Louis Transfer Company.

Q. And what did it cost you to get it over here? A. At one time 4 cents, and at another time 5 cents.

Q. Per hundred pounds? A. Per hundred pounds.

Q. Is that delivery a prompt one? A. No, sir.

Q. What was the difficulty? A. There were unusual delays between East St. Louis and St. Louis.

Q. How long a period did those delays cover? A. Sometimes a week, and I believe it has been longer.

CROSS EXAMINATION, BY MR. F. W. LEHMANN:

Q. Those delays were unusual and exceptional? A. We thought so, but they were frequent anyhow.

Q. But you don't know to what that was chargeable, and where the responsibility for it would lie? A. I could not state positively.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. Do you know whether or not they were on the Terminal lines, those delays? A. We have blamed it.

Q. Did you investigate it? A. Yes, sir.

Q. Did you locate it on the Terminal Railroad Association line then? A. We have found the freight arrived at East St. Louis on a certain date, and that it was delivered to us a week later or even longer.

RE-CROSS EXAMINATION, BY MR. LEHMANN:

Q. But would you know when it was delivered to the Terminal Railroad Association? A. Yes, sir, we have traced it. We have a man in East St. Louis investigating it, and we had our way-bills teling us when it was delivered at East St. Louis.

Q. That is not my question, Mr. Friedmann. When was it received by the Terminal Railroad Association? You

see it is not a question of when it reached East St. Louis, but when did the Terminal Railroad Association get it? A. I don't know whether I can answer that.

Counsel for defendants state that they wish it noted on the record, that they are making a general objection to all this class of testimony, on the ground that it is irrelevant and immaterial.

CARL H. SCHLAPP, a witness of lawful age, being duly produced, sworn and examined on the part of complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence and occupation. A. Carl H. Schlapp, wholesale grocer; President of the Krenning Grocery Company.

Q. Are you familiar with the conditions that surround the shipment of freight in and out of St. Louis to points in Illinois and east of the Mississippi River, on your line of goods? A. Yes, sir.

Q. Prior to the first of January, 1906, will you please state how you got goods in and out of St. Louis, that come from or are destined to, points beyond the Mississippi river, east? A. Prior to January we practically hauled everything across the river with our own teams, shipments into Illinois. And on inbound freight, we hauled part of it into St. Louis. The great majority of our business we hauled in.

Q. What was the reason you did your own hauling in handling goods between East St. Louis and St. Louis? A. In order to save time. We needed the goods quickly, and we had to haul them. Our experience is that it takes the Terminal Railroad Association three or four days to get a carload of goods from East St. Louis to St. Louis.

Q. Under present conditions, to whom do you deliver the goods for east side shipment? A. We practically haul almost everything, still, to the east side.

Q. How about inbound shipments? A. We receive those from the Terminal Railroad Association on account of the fact that it costs us less money to get the goods delivered to St. Louis via the Terminal Association, than it does to haul them over by wagon.

Q. That is at the present time? Since about what period did that begin? A. Some time in the summer—the early part of the year.

Q. What has reduced the cost of getting the goods over by the Terminal Association? A. Formerly the charge was made by the Terminal Company at the rate of about two cents per hundred, and now some commodities come over at one cent per hundred.

Q. Your class of goods comes at what price? A. One cent, and one-half cent.

Q. Are there any conditions surrounding the handling of goods in order to get that rate? A. I think not.

Q. Is there any difference at this time in the sending of the goods out, if they are sent by the St. Louis Terminal Association, or taken by your own teams—in cost? A. The St. Louis Transfer Company has established warehouses on this side for the receiving of freight for shipment into Illinois. If we use these warehouses on this side, the cost of getting those goods to the freight houses on the east side, is seven cents per hundred. If we use our own wagons, the cost is four cents per hundred.

Q. That is the reason you use your own wagons? A. Yes, sir. It costs us more money to do business in Illinois than in Missouri.

THOMAS A. PULLEN, a witness of lawful age, being duly produced, sworn and examined on the part of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name? A. Thomas A. Pullen.

Q. What is your business? A. I am a director of the Rinehart Grocery Company.

Q. Where are you located? A. 19 to 21 South Main Street.

Q. Do you know anything about the conditions surrounding the shipment of goods in your line into the State of Illinois from St. Louis, and the reception of goods from points east of the Mississippi River into St. Louis? A. Yes, sir.

Q. How do you get your outbound shipments to East St. Louis? A. Now, we are delivering them sometimes to the St. Louis Transfer Company, and sometimes to the Terminal Railroad Association.

Q. When did that commence? A. I think it is about six months ago.

Q. Prior to that, how did you get the goods over there? A. We hauled them from this side of the river.

Q. By your own teams or other people's teams? A. By our own teams.

Q. What was the reason for hauling them by your own teams? A. Well, it expedited shipment, caused less delay, and one reason we hauled to East St. Louis, the outbound shipments at least, is that it did not necessitate the appearing on our customers' expense bills of any back charges, to which they object very seriously.

Q. What were those back charges? A. If we delivered them to the Terminal Railroad Association on this side, there would have been a charge of, I think, two cents a

hundred, which would have appeared on the customer's expense bill as a back charge.

Q. And what was that two cents per hundred for? A. I suppose for carrying the goods across the river.

Q. And that went forward as an item of expense to be collected from the consignee? A. Yes, sir.

Q. Now at this time why do you deliver goods to the Terminal Association or to the St. Louis Transfer Company? A. Because recently we have been having all our inbound stuff brought to the west side, and our teamster—we could not make arrangements with him to haul goods across the river, because he had nothing to haul back.

Q. You mean from the east side? A. Yes, sir.

Q. Why couldn't he haul your goods back? A. Because the goods were being brought—most of our shipments originate in the east, and they are brought to St. Louis at the same rate as they would be to East St. Louis. That causes greater expense than it would be to have them brought to this side.

Q. Why do you deliver goods to the Transfer Company now, the goods going out? A. For the reason that we could not make a satisfactory arrangement with our head teamster to haul our stuff over the river. He wanted too much money.

Q. Before this time, what was the method of getting the goods across the river, that came into East St. Louis for you? A. Oh, he hauled them, our head teamster, the man we hired the teams from, hauled them all in and hauled everything across the river that was going out.

Q. Why couldn't he haul the same way now, your goods in and out? A. He could, but you understand that formerly all the rates were made to East St. Louis, and if we wanted any goods delivered over here by the Terminal Association, there was a charge, I think of two cents per hundred for that service; and in smaller lots it amounted

to more than that. There was a minimum, I think, of ten cents a lot, whatever the weight happened to be. Now, we give most of our freight to the Wabash, because they bring it to this side for the same rate that they do to the other side.

Q. Do you give any goods to the St. Louis Transfer Company to be delivered across the river, now? A. Yes, sir.

Q. Why can they afford to haul any cheaper than the man you hired before? A. Because probably they haul goods both ways.

Q. Do you know whether the railroad company pays a charge for hauling? A. Yes, sir.

Q. Do you pay the charge to the St. Louis Transfer Company if you deliver freight to them? A. No, sir; they do not deliver any of our goods at all, except what we ship out.

Q. I am talking about the goods you ship out. A. Those charges appear on the customers' expense bill.

Q. You do not pay them? A. No, sir.

Q. What is that rate, two cents per hundred? A. Well, I really couldn't tell. I think in some cases, 65 cents per hundred pounds.

Q. Have you experienced any delay in the handling of your goods? A. Yes, sir, we have had quite a good deal of complaint.

Q. Do you know where the delays originate? A. It must be, if we deliver the goods to them of course, they must be slow in getting them over the river, or else they are slow in handling them on the other side. But we had no such complaints when we delivered to the roads on the east side, so it must lie with the St. Louis Transfer Company.

Q. Have you made any complaints? A. Oh, yes, I

have traced the goods, but I never could get any satisfaction.

Q. Have you had any delays recently? A. Yes, sir.

Q. What did it consist of? A. I remember one case quite recently. You know we have a branch house at Carbondale. (This is on an inbound shipment.) We found they had about a carload of fruit jars that they could not sell, and we had quite an active demand for them up here. We instructed them to ship that carload of jars to us. They arrived in East St. Louis the morning after they were shipped, and the Illinois Central Railroad called us up and wanted to know where we wanted that car placed. We told them to send it to this side, I think to the Carr Street yard —that is the place we usually have our stuff sent. It must have been a week or ten days before we finally got that car, and by that time the fruit jar season was all over.

Q. Did you ever do business at Cupples Station, in your line? A. I was in the employ of a firm that did business down there.

Q. What firm? A. James Scudder & Co.

Q. Do you know whethere there was any delay in goods that came over the Terminal Railroad Association, in and out of the Cupples Station, for points in Illinois? A. Yes, sir, we had a great deal of delay on in-bound cars. They were delayed all the way from six to ten days. And outgoing shipments were always delayed six to twenty-four hours.

Q. If you delivered your out-bound goods to any other than the St. Louis Transfer Company, or the Columbia Transfer Company, I will ask you to state how much it costs you to get them to East St. Louis? A. We do so little business in Illinois, I don't really keep track of that. I think the Terminal Company charged two cents per hundred, and the St. Louis Transfer Company the same rate—I think it is the same, but there is a difference be-

tween what different roads charge. The Illinois Central, I believe, pays the St. Louis Transfer Company five cents a hundred for the transfer across the river. That is what appears on the expense bill, at least.

CROSS EXAMINATION, BY MR. LEHMANN:

Q. You are situated on Main Street, No. 19 South Main? A. Yes, sir.

Q. That is just below Market Street? A. Yes, sir.

Q. And your place is convenient to the ferries? A. Yes, sir.

Q. Formerly you used to deliver and receive freight with your own teams? A. Yes, sir.

Q. And now you do it through either the St. Louis Transfer Company or the Terminal Railroad Association? A. Yes, sir.

Q. Because you can do that cheaper than you can with your own teams now? A. Yes, sir, because we could not make a satisfactory arrangement, we receive and ship that way now.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. Do you know any reason why the teamster you had could not get loads both ways? A. I do not know. I could not say about that. I know that he cut out hauling everything to the east side, because, he said, he didn't get a load back.

F. B. HORNBY, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence, and occupation? A. F. B. Hornby; St. Louis, Mo.; I am with the Haas, Lieber & Coste Grocery Co.

Q. Does your company receive and ship goods to Illinois? A. Yes, sir.

Q. Prior to the 1st of January, 1906, what method did your company use to get shipments that were destined to your house from points east of the Mississippi River? A. We hauled all goods to and from East St. Louis with our own wagons.

Q. How about goods that were outward bound? A. We hauled them to East St. Louis.

Q. What was the reason for that? A. The principal reason was that we could save time, and it was just as cheap at that time to haul with our own wagons to East St. Louis as it was to deliver the goods to the Terminal Association or the recognized transfer companies.

Q. When you say you could save time, what do you mean? You could haul them quicker than the Terminal Association could take them across? A. Yes, sir, we could get goods to destination quicker by hauling them to East St. Louis with our own wagons.

Q. Did the same thing apply to inbound shipments. A. Yes, sir.

Q. What is the method you use now? A. About six months ago, at the time the rate was reduced across the river, we changed, and delivered all our goods on this side either to the Terminal Railroad Association, or to the transfer companies. That was on out-bound shipments. But in-bound shipments we had all goods routed to St. Louis.

Q. What was the reason for that change? A. On account of the fact that on the inbound shipments the rate was reduced.

Q. What rate? The railroad rate? A. Yes, sir, across the river.

Q. What was the reduction in your line? A. Before that time the rate was two cents a hundred, and now it is one-half a cent.

Q. From East St. Louis to St. Louis? A. Yes, sir.

Q. Do you still continue to handle your goods in that way? A. To haul from the east side?

Q. No, by the method you have just outlined? A. Yes, sir, we continue to handle our inbound freight that way.

Q. How about outbound? A. We found the shipments were delayed so much, and we were having so many complaints, that we started again hauling the goods to East St. Louis with our own wagons.

Q. What is the comparative cost of that, compared with the rate the Terminal company put in about six months ago? A. It is greater.

Q. Have you any idea how much more a year it costs you to do business that way in Illinois? A. The different railroads refunded to us between $100 and $140 a month—of course that varies.

Q. What would that refund come from, from what source? A. That was two cents per hundred across the river, and a minimum charge of fifteen cents.

Q. Who paid that money to the railroad companies? A. The consignees.

Q. Was it money you had advanced when the goods were delivered? A. On our dray-ticket, showing that the goods were delivered to the railroad company, we stamp "Transfer—so much"—at the rate of two cents per hundred or a fifteen cent minimum charge. The railroad companies would put that on the expense bill to the consignee, and refund it to us.

Q. Under present conditions, it renders it more expensive for you to handle the business over there than under the old arangement? A. Yes, sir, between $100 and $140 a month. I will say this much, that recently we have been delivering some shipments to the Columbia Transfer Company, and have not had so many complaints.

Q. Those are outbound shipments? A. Yes, sir.

Q. Those goods have been hauled direct to the door in East St. Louis? A. Yes, sir.

Q. If you deliver goods to the Terminal Railroad Association, do you have to haul them from your place in St. Louis to their station? A. Yes, sir, to the Terminal station, or their warehouse on this side.

Q. If you deliver to the St. Louis Transfer Company, is the same haul made by your company with your teams? A. Yes, sir.

Q. And then are the goods re-hauled by the Transfer Company to East St. Louis? A. Yes, sir.

CROSS EXAMINATION, BY MR. LEHMANN:

Q. Is your business in car-load lots, or broken lots, chiefly? A. Outbound freight is almost all of it broken lots. Inbound freight, a great deal of it, is in carloads, and some not.

Q. What would you say was the volume of your business annually? A. We do a little over a million a year.

Q. You say you formerly hauled by your own teams to East St. Louis and from East St. Louis? A. Yes, sir.

Q. How many teams did you have? A. We have about six.

Q. How many did you have at that time? A. Prior to this reduction in the rate?

Q. Yes, when you were handling your own freight between St. Louis and East St. Louis? A. I don't remember whether it was five, six or seven.

Q. You still have as many teams, substantially? A. Recently we have changed; a drayage company of this city is hauling our freight, and they furnish us as many teams as we require.

Q. The five or six teams you have now are the drayage or transfer company's teams, is that it? A. Yes, sir.

Q. And they are not your own? A. We do not own the teams at present.

Q. You say that under the old or former system, when you were handling it through your own teams, you would put on the bill of lading or way-bill, a charge for taking it across the river; is that it? A. Yes, sir.

Q. And then that would acompany the bill of lading as a part of the general freight charge for taking the commodity from St. Louis to the point of destination? A. Yes, it appears on the expense bill as an advanced charge.

Q. And the railroad company collected that from the consignee, and then refunded it to you? A. Yes, sir.

Q. And by reason of that refund, it made the shipment cheaper than it is now? A. Yes, sir.

Q. In other words, the hauling across the river was done for nothing, under the old system—so far as you were concerned? A. No, sir, it cost us four cents a hundred to haul the goods to the east side, and we got back two cents.

Q. How do you make it that it cost you four cents for the hauling? A. Because there is not any transfer company, or bridge company, that wil haul goods to the east side for less than four cents a hundred—at least, we were unable to find any, from our store door.

Q. Or any other teamster? A. No other teamster.

Q. And that was a charge you put upon your customer as an equitable charge for the haul? A. Yes, sir, that was what any firm was charging. It cost us that.

Q. It virtually cost you that? A. In other words, we could have delivered those gods on this side to the St. Louis Transfer Company or the Terminal Railroad Association, and its charges for that work would appear upon the expense bill.

Q. And it cost you practically that much? A. Yes, sir.

Q. You found that charge was a reasonable charge for the service? A. Yes.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. The two cents per hundred you had to pay under the old system, and you got back two cents? A. We paid two cents and got back two cents.

Mr. Lehmann: But the customer paid four cents? A. Yes, sir, the customer paid four cents.

Mr. Crow: Q. Who got the other two cents under the old system?

Mr. Lehmann: The witness stated that the customer paid four cents.

A. The four cents was paid to the drayman. You understand it cost four cents a hundred to get goods from our store door to East St. Louis, and the railroad company refunded to us two cents per hundred. Consequently, we were out two cents per hundred, or we paid two cents to get those goods to East St. Louis.

Mr. Lehmann: But the customer was charged four cents for that. That went forward to him as four cents? A. I believe I did make that statement, but that is incorrect. The customer paid two cents per hundred, or the amount we put on the dray ticket.

Q. What amount did you put on the dray ticket? A. Two cents per hundred, or a minimum of fifteen cents.

Q. I thought you said four cents? A. I did, but that was incorrect.

JOHN HENNEBERGER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence, and occupation? A. John Henneberger, St. Louis, Mo.

Q. What house are you with? A. The Wulfing Grocery Company.

Q. What business are they in? A. Wholesale grocers.

Q. Does your house handle any goods, inbound and outbound, crossing the river at St. Louis? A. Considerably.

Q. Prior to last year, 1905, what was the method of getting goods that were inbound from across the river? A. We had all our hauling done by a drayman. All inbound freight from the East we brought over from East St. Louis, and eastbound freight for local points in Illinois, shipping out, we hauled over to East St. Louis. In other words, we done the receiving and shipping all by way of East St. Louis.

Q. What was the reason for that? A. The reason was on account of the time and delay in getting the goods.

Q. Getting the goods from where? A. By consigning —in fact we had all our goods consigned to East St. Louis.

Q. If there were any delays, do you know why they occurred? A. After we consigned them to East St. Louis, we would haul them, because we could get them quicker than we could from the Terminal Company.

Q. Have you in the past experienced any delays in the terminal service between St. Louis and East St. Louis? A. Yes, sir, we have.

Q. State some instances of such delay? A. Take our Illinois business, when they changed the terminal to the western side, we tried shipping from the west side for about three or four weeks, and we got so many complaints that we again adopted the old way of taking all our goods over to East St. Louis.

Q. When did that change occur that you speak of? A. Right after the change was made from the terminals in East St. Louis to this side, I suppose now about three or four months ago.

Q. Was there any change in the rate to St. Louis at that

time? A. Yes, sir, it would be cheaper to have the goods consigned to St. Louis than to East St. Louis. In other words, it cost us more money to get the goods from East St. Louis than if we had them brought to this side.

Q. By rail or team do you mean? A. By getting them by team it cost more. By rail it would, of course, cost less money.

Q. I believe you say you do your business now by team, as formerly? A. On outbound eastern freight, but not all of the inbound. In fact, some of the inbound we do. I remember within the last three or four weeks we hauled three carloads of fruit jars from East St. Louis, that we had ordered on the wagon track. Those goods are seasonable, and by turning them over to the Terminal Association there might have been a delay of a week or ten days, which we have experienced with other goods.

Q. I will get you to state if it is not more difficult and expensive to carry on business in the manner you have indicated, hauling your goods by team over to East St. Louis, and back from East St. Louis to St. Louis? A. Yes, sir, it costs us a great deal more money. Referring to those three carloads of fruit jars it cost us two cents per hundred more than if we could have had them transfered on this side. On local freight for eastern points it costs us about one cent a hundred more.

CROSS EXAMINATION, BY MR. LEHMANN:

Q. Where is your place of business? A. No. 406-8 North Second Street.

Q. That is down near the levee? A. Yes, sir.

Q. Convenient to the ferries across the river at that point? A. It is just as convenient to the bridge.

Q. It is really convenient to both, isn't it? A. Yes, sir.

Q. And you have an extremely convenient location to the east side stations? A. Well, I don't know.

Q. About as convenient as you could have in St. Louis? A. Take Second Street, by loading your wagon it is quite hilly, and we have sometimes, probably, to drive away down to Elm or Walnut, by taking the bridge. Our teamster mostly takes the bridge on account of the heavy pulling on the east side.

Q. The bridge is on Washington Avenue, and the ferries are nearer than that? A. We would be just as close to the Terminal. In fact, it would suit us better to haul our goods from Eighth and Gratiot Street, or either Second and Carr. That would suit us just as well, because we have no hill.

Q. But your deliveries for outbound freight are mainly parcel deliveries, aren't they? A. Mostly small lots.

Q. And not carload lots? A. No, sir, not carloads.

Q. If you use the St. Louis Transfer Company, for example, you would haul down to Fourth and Spruce—A. Yes, yes, we have tried that.

Q. I am speaking now of what the course would be; you would haul down to Fourth and Spruce? A. Yes, sir, to Fourth and Spruce.

Q. Where is the other warehouse? A. It is on Twelfth Street, the Terminal depot.

Q. But shiping east? A. Sometimes we have taken—most of the goods, current business, you see that is all taken to East St. Louis.

Q. But I am speaking now of what the course would be; you would take, for example, to Fourth and Spruce, and unload the freight from your wagon into the warehouse of the Transfer Company? A. Yes, sir.

Q. They would have to reload from the warehouse those parcels into one of their wagons? A. Yes, sir.

Q. Of course, they would want to make up a load for the wagon? A. Yes, sir.

Q. They would haul across the river, and deliver this

freight to the proper station on the other side? A. I don't know whether that is the way they are shipping their goods, or whether that is their way of doing business.

Q. Isn't it practically the way they would have to do it? A. If they do do it, they are not in a position to get their goods to East St. Louis as quick as we are.

Q. Exactly; because in the first place, you make a trip down to their warehouse and unload their goods? A. Yes, sir.

Q. And then they have to load, or wait until they get a load sufficient to go across the river, while you would go by the direct and easiest route from your own store door to the station at which the goods were to be started on the way to the consignee? A. I don't know how they transact their business; I only know what we are doing. I don't know how they handle their goods. I am not in a position to know that.

Q. You handle yours from the easiest route from your store to the station? A. The very fact of the success of our business is to see that the consignee gets his goods as quick as possible. Because, in a great many instances, it is not only a matter of price, which is probably a secondary consideration—

Q. I am just asking you about the way you do things? A. We have our dray come in front of our store, load the goods, and take them over to East St. Louis.

Q. And that operates as to your business and your business alone? A. Yes, sir.

Q. The moment you get ready, you have your own dray there? A. It is not our own dray, but we have the control of it.

Q. It comes to the same thing; it is there exclusively in your service? A. Yes, sir.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. If the depots of the roads you haul to on the east side were located on this side of the river, the haul would be less expensive? A. A great deal less expensive.

RE-CROSS EXAMINATION, BY MR. LEHMANN:

Q. If the depot were next door to you, it would be still cheaper? A. No, sir, because we are paying so much a hundred for all the freight delivered on this side; and so much per hundred for that delivered at the depots on the other side.

Q. If the depot were next door it would be a delivery? A. It would be saving to our drayman, but not to us. We pay him two cents a hundred whether he hauls two miles, one mile, or the next block. He has to take the bitter with the sweet. We pay him for a long or a short haul.

Q. You would pay as much on a one-block haul as for two miles? A. Where one man did all the hauling for us, yes, sir. Of course, if all our hauling was but one block, we would probably get a lower rate.

Q. The nearer the station lies, the less the cost of the haul; isn't that obvious? A. I dont' know. The class of goods that are being hauled is the most difference in the cost. In other words, it would pay a drayman much better to haul a wagon-load of sugar twenty blocks at two cents a hundred, than a load of splint baskets half a block at two cents a hundred. The weight of the goods has an influence.

Q. What I wanted to suggest to you was, that other things being equal, the shorter the haul the less the cost of the haul? A. Yes, certainly.

Q. Does your drayman haul from your store to East St. Louis in less than dray-lots? A. You mean less than a wagon-load?

Q. Less than a wagon will reasonably carry. A. As a rule we have probably two or three loads go over every day

to East St. Louis. And he also hauls for Libbey-Williams Paper Company, and several other concerns, and if he didn't have a load for us he could fill up with the goods of other parties.

Q. But he waits until he has a reasonable load to carry over? A. He doesn't have to wait. As soon as we are ready to ship, we order his team brought to the store, and he loads it.

Q. He is paid by the hundred? A. Yes, sir.

Q. And that is based upon his hauling reasonable drayloads. He wouldn't take just a box occasionally from your place over to East St. Louis? A. We wouldn't expect him to do so.

Q. In other words, you consult in that respect the convenience of the business of draying, and he hauls in draylots? A. No, sir, the object is not the convenience of draying over to East St. Louis. The object is to haul our freight, promptly over to East St. Louis, in order to hold our trade. For instance, at points like Pinckneyville, and Dequoin, the consignee wil have the goods the next morning; but if the goods are consigned on this side, it will take a day or two days longer.

Q. You are rather getting away from the matters I am inquiring about. You have an arrangement with your drayman, and pay him so much per hundred pounds. A. Yes, sir.

Q. And that charge is based, and is reached, by you and him agreeing upon it? That is not on the idea that if you have a box or ten or fifty pounds that he shall put it on his wagon and take it right over to the east side. He couldn't afford to do that, could he? A. No, sir, certainly not.

Q. It is based on the idea that he will haul what his dray can reasonably carry, isn't it? A. Provided there is enough for him to haul. If not, he will have to take the load, even if it is not full.

Q. If he does not get it from you, he gets it from some other grocers with whom you co-operate in the matter of drayage? A. He may.

Q. Generally speaking, you make up drayload lots for him? A. Yes, sir.

Q. That is the usage of the business? A. Yes, sir.

Q. So, he does not haul each parcel or each consignment, but he hauls drayload lots? A. Yes, sir.

Q. And he uses the same dray to go from your store to some of the others you mentioned, and make up his load? A. That occurs very seldom, but it does sometimes.

Q. Usually you have a load for him, and you don't call him until you have that load? A. Yes, sir.

Q. How many teams does your firm operate—I mean this drayman? A. I think about twenty to twenty-five.

Q. What is his name? A. Stahlmann.

Q. For whom else does he haul? A. Libbey & Williams, and the Pocohontas Company, a flour concern—I don't know the name of the miller; and the Standard School Book Company.

Q. Is that a large concern? A. Of course their hauling wouldn't amount to much, because it is not bulky.

Q. How about Libbey & Williams? A. That is a paper business, and an extensive business, and they have quite a lot of hauling. There may be some others that I don't know of.

Q. But you do know that he does a good deal of hauling for others than yourself? A. Yes, sir.

WILLIAM ROSS, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A.

Wiliam Ross; St. Louis; Traffic Manager with the Garnett-Allen Paper Company.

Q. Where is their place of business? A. No. 417-19 North Third Street.

Q. Does your house do business backward and forward across the river? A. I own the teams, and do the hauling for them by contract, on a tonnage basis.

Q. How many teams do you operate? A. At present I work eight of my own, and work a number beside.

Q. Are you the traffic man of that house? A. Yes, sir.

Q. How long have you been hauling goods backwards and forwards across the river? A. About three years.

Q. Are all shipments outbound hauled to East St. Louis? A. Both ways.

Q. What is the reason for that? A. You make better time in hauling them to the east side and taking them from there.

Q. I will get you to state if there has been any reduction in the freight rates? A. Since about February 1st there has been a reduction from one cent to one and a half or two cents.

Q. Your house did not avail itself of that reduction? A. No, sir.

Q. Has there been any change in the method of handling traffic across the river on the surface, of the right-of-way where teams travel? A. Formerly, the Terminal Association maintained what they called "pull up teams," to assist the draymen at the incline at the eastern terminus of the bridge, and those were taken off. About the time they were taken off, the Wiggins Ferry Company issued a circular saying that teams would not be permitted on the boats that were loaded with more than the team could handle itself. In other words, they would not be permitted to use "pull up teams." That reduced my earning capacity in this way, that when the "pull up teams" were in service I could

haul ten thousand pounds, and to-day I can only haul 7,500 to 8,000 pounds.

Q. Up the incline, you mean? A. Yes, sir.

Q. Where is that incline? A. At the eastern part of the bridge.

Q. It is part of the bridge right of way? A. Yes, sir.

CROSS EXAMINATION, BY MR. LEHMANN:

Q. Are you interested in the company, otherwise than as handling its freight? A. In no way.

Q. You have no other connection with it, of any kind? A. Absolutely none. I earn what I make out of my teams only; except that I control the routing of their business; I handle the routing of their traffic.

Q. Do you maintain a warehouse in connection with your your teams? A. No, sir.

Q. Under what name do you do this drayage business? A. The Ross Transfer Company.

Q. Is it an incorporated company? A. No, sir, it is not. It is my own, individually.

Q. That is just the designation under which you transact your business? A. Yes, sir.

Q. What is your charge per hundred for delivering freight either to or from East St. Louis? A. Three cents to East St. Louis, and three and a half cents from the other side this way.

Q. Are you exclusively in the service of the paper company—do you haul exclusively for them? A. No, sir, I haul for the Syracuse Paper & Pulp Co., and for a wall-paper concern.

Q. Exclusively for those two? A. Yes, sir.

Q. Is there quite an extensive business, of the kind you are engaged in, here in the city. Are there a great many drayage concerns? A. I presume there are a number of them.

Q. I presume you would know, and so I was asking you about the extent of the business done. A. I presume it is very heavy. There are several transfer companies here.

Q. And men who operate as you do? A. Quite a number.

Q. How many would you say? A. I am not in a position to say.

Q. Is there an association? A. There is, but I am not a member of it.

Q. That is called the Team Owners' Association? A. I believe that is the name.

Q. Do you know what the others charge for this kind of service that you render? A. No, sir.

Q. Do you know whether it is uniform? A. I do not.

Q. Formerly you say that the Terminal Railroad Association maintained at the east end of the bridge "pull up teams?" A. Yes, sir.

Q. Do you mean to say they would pull up for anybody? A. Yes, sir.

Q. Without any charge? A. Yes, sir.

Q. They would pull up for your team? A. They did, yes, sir.

Q. And they stopped that? A. Yes, sir.

Q. There is nothing to prevent you maintaining a "pull up team," is there? A. Lack of funds is about all. I guess there is no law preventing me doing that—but as to that I have not inquired.

Q. But they did formerly maintain "pull up teams" there, gratuitously? A. Before the Wiggins Ferry Company and the bridge was consolidated, combined, or whatever it may be termed.

Q. And now they have ceased to do that? A. Yes, sir.

Q. That was not done simply for the St. Louis Transfer Company? A. I don't know what it was done for. They

pulled up my teams, I know, and did it for others, without any charge, and they don't do it at the present time.

Q. These teams that you spoke of formerly hauling ten thousand pounds, how much of a team was that, two or four horses? A. Two horses.

Q. Two horses hauling five tons? A. Yes, sir.

Q. And they now haul 7,500 to 8,000? A. Coming this way I haul ten thousand pounds, because they haven't the bridge approach to pull up.

Q. You haul that now east bound? A. Yes, sir.

Q. With two horses? A. Yes, sir.

Q. And west bound you haul 7,500 to 8,000 pounds, with two horses? A. Yes, sir.

Q. And now you say the Wiggins Ferry Company won't let you put on more than that? A. They issued a circular which I presume can be produced, saying that on and after a certain date teams requiring a "pull up team" would not be permitted to go on the boats—something to that effect.

Q. Didn't they simply require the "pull up team?" A. I don't know. I don't use the ferry much, I use the bridge.

Q. Had they been in the habit of using "pull up teams?" A. That I cannot say. I had not been in the habit of using the ferry.

Q. Aren't other transfer companies using "pull up teams" on both sides of the river to-day? A. I presume they are, for themselves.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. On the bridge? A. I don't believe the St. Louis Transfer Company uses the bridge. I think they use the ferry altogether, except when the river is tied up in the winter.

Q. Do you know whether there are any transfer companies that furnish "pull up teams" at any point? A.

The Columbia Company uses "pull up teams," but whether it uses them for outsiders or not, I do not know.

Q. At the points there is necessity of having pull up teams on the bridge property? A. Yes, sir.

Q. And in the absence of their consent, you cannot do that?

Objected to by counsel for the defendants.

A. No, sir, and as a matter of fact, I believe they will not permit you to use one.

Q. When did this change take place, when they ceased using them? A. I cannot recall the date, but I believe about a year ago.

Q. How much loss has it made to you? A. About 70 cents on each load, practically.

Q. How much would that amount to per annum? A. I haven't gone that far.

Q. Several hundred dollars? A. Several thousand, I believe.

Mr. Lehmann: Q. Do you know of any prohibition against a "pull up team" on the bridge? A. I cannot say as to that positively.

Q. Don't other companies have "pull up teams" on the bridge? A. I cannot answer as to that.

Mr. Crow: Q. You go backward and forward there? A. Yes, sir.

Q. Have you seen any "pull up teams?" A. I haven't noticed any there for quite a while.

JOHN HENNEBERGER, Recalled.

RE-DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. I wil ask you if after the reduction of the railroad rate was made on your line of goods, on shipments into St. Louis, if you tried delivering the goods to the St. Louis

Transfer Company for delivery to the east side? A. Yes, sir, we did, for about thirty days.

Q. What was the result of that? A. The reason we delivered to the St. Louis Transfer Company is that it costs us less. It costs us two cents, or rather it costs three cents in less than carload lots; while to transfer it to East St. Louis costs four cents. It really costs us one cent per hundred more by our taking the goods over to East St. Louis ourselves.

Q. If you discontinued that delivery to the St. Louis Transfer Company, after the reduction in the rates you have mentioned, why did you do so? A. I should say, because we got too many complaints on account of delay in goods reaching their destination, and it was either do that or feel satisfied that a good deal of our trade would have gone elsewhere, probably gone to the many interior jobbers that have sprung up, and to some other points.

RE-CROSS EXAMINATION, BY MR. LEHMANN:

Q. You could get quicker service by using your own teams and making your own deliveries than by using those of the St. Louis Transfer Company? A. Yes, sir.

At this point recess was taken until 2 o'clock p. m.

After recess, the following proceedings were had:

CHARLES HOPPER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A. Charles Hopper; Jacksonville, Illinois; boot and shoe business.

Q. Have you bought any goods in the last year or two, and if so, what class, here in St. Louis, for shipment to and sale at your store? A. Yes, sir, considerable.

Q. Have you bought any rubber goods? A. Yes, sir.

Q. How far is Jacksonville from St. Louis? A. Just about one hundred miles.

Q. How far is it from Chicago? A. It is about, pretty near, two hundred miles.

Q. What road are you on? A. The Chicago & Alton.

Q. Have you had any delays in shipments out of St. Louis, with the kind of gods you have bought here? A. Yes, sir, they are longer coming from St. Louis than they are from Chicago.

CROSS EXAMINATION, BY MR. LEHMANN:

Q. The Alton handles them both ways? A. Yes, sir.

S. R. HAINES, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A. S. R. Haines; Tamaroa, Illinois; merchant.

Q. Do you buy any goods at wholesale at St. Louis? A. Yes, sir.

Q. Are they shipped over any road that crosses the Mississippi at St. Louis, to go to your place? A. Yes, sir.

Q. What road? A. We get most of them by the Illinois Central.

Q. How far is it from your place to St. Louis? A. About seventy-five miles, I think.

Q. How far is it to Chicago? A. Two hundred and eighty miles.

Q. I will get you to state if you have any delay in getting goods from St. Louis? A. Yes, sir, we have had

quite a litle trouble getting them. They are delayed quite often. I have writen to the wholesale houses time and again, and wanted to know why they were so slow getting them out.

Q. To what extent has that delay been? A. Oh, sometimes it would be all the way from three to six days, and sometimes longer than that—but about that.

Q. How about shipments from Chicago? A. We get them sooner than we would from here, quite often. A bill of goods shipped out on Monday we would get on Tuesday, usually, most always—or by Wednesday any way.

Q. From Chicago? A. Yes, sir, I meant to say from Chicago.

CROSS-XAMINATION, BY MR. LEHMANN.

Q. Do you receive in car-load lots, or less? A. Both ways. I have got both.

Q. But mainly in less than car-load lots? A. Yes, sir, most all of it is less than car-load lots.

Q. And whether you get your goods from Chicago, or from St. Louis, you get them over the Illinois Central? A. Over the Illinois Central, both from Chicago and St. Louis.

W. B. CAIN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A. W. B. Cain; Canton, Ill.

Q. How far is Canton from St. Louis? A. One hundred and seventy-five miles.

Q. How far is it from Chicago? A. One hundred and ninety-two miles.

Q. On what road? A. On the Burlington.

Q. Do you buy any goods at wholesale at St. Louis, to be

shipped over the Burlington road? A. Do you have any delay in getting goods from St. Louis? A. About four to ten days.

Q. How about your shipments from Chicago? A. About two days.

Q. Did you ever make any inquiry to find out the cause of that delay? A. Yes, sir.

Q. What was it? A. I asked the agent of the Burlington Road what was the cause, and— Shall I use his language?

Q. Yes, anything short of profanity. A. He said "It was the damn Terminal."

Mr. Lehmann: That is a little remote.

A. The agent of the Burlington made that statement to me.

CROSS-EXAMINATION, BY MR. WATTS:

Q. Do you know whether or not the Burlington has its own terminals in the City of St. Louis? A. I don't know, no, sir.

Q. You don't know that the Burlington Railroad has its own terminals a little north of Franklin Avenue? A. No, sir, I do not.

Q. And that all goods consigned to you are delivered direct to the Burlington at that terminal? A. No, sir; I do not.

LOUIS LANDAU, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, and residence, and occupation? A. Louis Landau; St. Louis, Mo.; wholesale grocer.

Q. How long have you been in business here? A. Since 1892.

Q. Where are you located? A. No. 317 North Second Street.

Q. What volume of business do you do in a year? A. About half a million dollars' worth.

Q. Do you ship goods in and out of St. Louis, across the river? A. Yes, sir.

Q. Prior to January 1, 1906, how did you get your goods across the river? A. We used to have our goods in carload lots remain in East St. Louis, and we would haul them with our own teams from East St. Louis to St. Louis, because the railroad companies would allow us two cents per hundred difference in the bridge arbitrary between East St. Louis and St. Louis, and we would get our goods quicker that way than if they would come over by the Terminal Railroad Association—

Q. You mean by rail? A. Yes, sir.

Q. At that time, how did you get your goods out of St. Louis for Illinois territory? A. At the beginning of the year we started to deliver our goods to East St. Louis for Illinois points, to the different railroads at East St. Louis, and we would have our draymen put down on the bottom of the bill of lading, "Transfer charges, so much"—because the rates from East St. Louis and St. Louis are four cents per hundred difference. The railroad company would invariably put on their expense bill, at the other end, "Advanced charges, so much;" and when our customers would remit, they would deduct that, and say, "We don't pay any drayage charge, or transfer charge." Our competition is very heavy, on account of the wholesale grocers being all over the State of Illinois; so we would have to lose that four cents per hundred. I took the matter up with the different railroads, and asked them if they couldn't put the four cents into the rate, and not have it show as "advanced charges." They wrote me back that they couldn't do that. In order to avoid that, we deliver our goods now to the St.

Louis Transfer Company, at Fifth and Spruce, and they take it across the river, and we don't have that trouble any more, and we don't have to allow those charges.

There is only one complaint about the delivery to the Transfer Company, and that is that the goods get delayed. Sometimes they are two or three days behind time. We often have complaints over in Illinois, about delays in shipment, and why it takes so long.

Q. Do you know why that delay occurs? A. I think sometimes it is blocked with the St. Louis Transfer Company having more freight than they can handle. I cannot account for it in any other way.

Q. Prior to January 1st, 1906, how did you handle your shipments that were going out of St. Louis? A. This is out of St. Louis that I am speaking of.

Q. Prior to the 1st of January, did you handle them that way? A. Prior to the 1st of January my business was in a different locality than it is this year. My business, prior to January, 1906, was all southern business, and the rates to St. Louis and East St. Louis were alike, and it didn't pay me to go to East St. Louis.

Q. In what territory was your business? A. South of the Ohio River.

Q. In Green Line territory? A. Yes, sir.

Q. Have you had any delays or trouble in handling goods in and out of St. Louis, prior to, say, a year ago this month? A. Not as much as we have now. We have sometimes had a delay, but this year the delay is something fierce. I just checked up before I came up here, and I had a carload of soap shipped from Pittsburg, that was in East St. Louis on September 12th, and I ordered it over to the Terminal, either to the Carr Street Terminal track, or to Eighth and Gratiot Streets, and we got it on the 24th. I had to write the party an explanation of why we did not remit for that soap earlier, on account of the delay in get-

ting it. I have some goods, some car-loads of tomatoes, that I ordered ten days ago, over from East St. Louis, and I don't know where they are, and I don't know when I am going to get them.

Q. When you ship goods to points in Illinois, and haul them over to East St. Louis, and deliver them to the railroad company over there, I will ask you to state whether or not the railroad company will now allow you anything for the hauling? A. If you put on their advanced charged, four cents per hundred, they will pay it to the driver, and put it on their expense bill, and the party at the other end has to pay it.

Q. And if you deliver the goods to the St. Louis Transfer Company, under the present conditions here, how is it? A. We don't pay anything. We pay only our teamster to haul from our place of business to the St. Louis Transfer Company.

Q. And who pays the St. Louis Transfer Company? A. I suppose the railroad company.

Q. How do they collect their money? A. I suppose they make a bill against them.

Q. I say, how does the railroad company collect its money? A. At the other end, from the customer.

Q. From the consignee? A. Yes, sir.

Q. And that was the trouble when you put it on your expense account? A. Yes, sir, they deducted it.

Q. You have been in business here twenty-three or twenty-four years? A. I have been in business here thirty-four years.

Q. In this line? A. I am connected with an old line of business that I pay no attention to now, but my old business was hides, wool, and fur.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. The Railroad Company includes now what you might call the transfer charge in the whole rate—practically one

rate, and it includes the transfer charge? A. You mean for getting across the river, or bringing goods this way?

Q. For shipping out? A. I suppose they do, but I don't know. I had a car-load of goods here the other day that came in from Madison, Indiana. In paying the freight bill from the Terminal Railroad Association, I noticed the freight was one price, and the transfer charge so much. I have been informed that the transfer charge on that class of goods would be only one-half a cent, so I asked, "How do you charge here, two cents, when I understood the rate was one-half a cent a hundred?" He said it was a mistake on the part of the Terminal Company in putting two cents on that expense bill. The rate from Madison to St. Louis is fifteen and a half cents. The rate from Madison to East St. Louis is fifteen cents a hundred. In other words, the railroad company pays the Terminal Railroad Association an additional one and a half cents per hundred, but they will not allow it to us.

Now, if this delay in shipments would not occur, and the railroads treated us in the same manner as they treat the Terminal Association, and allowed us the two cents off, there would not be such congestion as at present. But we can't afford to haul goods across the river at a half a cent a hundred.

Q. Why would there not be congestion? A. Because we would haul our goods to East St. Louis, and go over and get them. If they would give us the two cents per hundred, we would not give it to the Terminal Railroad Association, because the Terminal Railroad Association is too long in getting it.

Q. You would want a two-cent less rate to St. Louis than East St. Louis? A. Yes, sir; that's the way it was formerly, but now they don't.

Q. They now make it the same rate? A. One-half a cent

on canned goods, half a cent less to St. Louis than East St. Louis.

Q. You think the rate to St. Louis ought to be less than to East St. Louis? A. No, sir; there ought to be two cents difference between the two rates, as formerly.

Q. You think the rate should be raised to St. Louis? A. No, sir; not raised.

Q. You think they should be lowered? A. There is only half a cent difference now.

Q. You think it would help if they would raise the rate? A. No, sir, leave the rate as it is, but give us the two cents off.

Q. Make it two cents higher than to East St. Louis? A. Yes, sir.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. You think the railroad companies, to relieve the congestion, should allow the shippers two cents for doing the hauling? A. Yes, sir.

Q. And let them do their own hauling? A. Yes, sir.

Q. Is there any difference now if you do business with the St. Louis Transfer Company, or any other company, in sending out freight? A. There is no difference. The railroads recognize the St. Louis Transfer Company to a larger extent than they do private companies.

Q. If you deliver freight to any other transfer company than the St. Louis Transfer Company, they will not pay the transfer charges? A. They do.

Q. What company? A. If the driver doesn't ask for it, the party in the country pays the rate only from East St. Louis. But if the driver asks for the transfer they give it to him, and they put it on the expense bill.

Q. The consignee pays it? A. Yes, sir, the consignee pays it.

Q. The railroad company doesn't pay it? A. No, sir.

JAMES A. McCONNELL, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence, and occupation? A. James A. McConnell; St. Louis, Mo.; credit man for Marx & Haas Clothing Co.

Q. Where is their place of business? A. Thirteenth and Washington Avenue, St. Louis.

Q. What class of goods do they manufacture? A. Clothing.

Q. Do you ship goods to Illinois? A. Yes, sir.

Q. Do you receive goods from the other side of the river? A. Yes, sir.

Q. Have you had any trouble in receiving and shipping goods? A. We have had a good deal of delay, on both incoming and outgoing freight.

Q. To what extent? A. All the way from a day up to months.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. A day up to months? A. Yes, sir.

Q. When did you have a delay amounting to months? A. On a shipment to Garland, Tennessee. The way-bill date is "4-23," which is April 23rd; "Delivered Sept. 13th," to the consignee, and as a consequence we had to accept the return of the goods.

Q. Did you look that up, to see what was the cause of that delay? A. It is impossible to say what that is due to. There was delay somewhere on the line.

Q. But you don't know where that was? A. No, sir, it is impossible to say where that was.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. Have you had any trouble with your inbound shipments? A. Quite a good deal.

Q. Have you located those? A. Very often we find the difference in time between when the goods arrive in East St. Louis and the time they get over here.

Q. How long? A. All the way from days to a week.

Q. How far is it from here to Garland, Tennessee? A. I cannot say. I am not posted on that subject.

EUGENE SARBER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence, and occupation? A. Eugene Sarber; St. Louis, Mo.; Representative of the International Association of Machinists.

Q. How long have you lived in St. Louis? A. Twenty-five years.

Q. Are you acquainted with the location of Madison and Granite City, Illinois? A. Yes, sir.

Q. Do you know whether or not those towns are on the Merchants' Bridge Terminal Railway? A. Yes, sir, they are.

Q. Are there any manufacturing plants located at Granite City and Madison? A. Quite a number of them.

Q. What are they? Name them. A. The American Steel Foundries; Commonwealth Steel Foundries; National Enamelling and Stamping Company's stamping plant and tin plant; The Hoyt Metal Company; The St. Louis Metal & Preserving Company; and a number of smaller plants.

Q. Have you any idea as to about how many men are employed in those different industries you have mentioned,

at these two towns of Madison & Granite City? A. From six to ten thousand, depending upon the way the plants are operated. Of course the steel plants and mills at certain seasons of the year close down.

Q. Do you know where the majority of these men that work in these shops live? A. The majority of them live in St. Louis.

Q. Do you know how they get backward and forward to their work? A. I can say that most of them use the Terminal train.

Q. When you say "Terminal," do you mean the Merchants Bridge Railway Terminal? A. Yes, sir; the Merchants' Bridge & Terminal, I believe it is called.

Q. What points do they start from, and which one of the bridges do they go over? A. The one that goes to Granite City, the Terminal train, starts from the Union Station, and Seventh & Gratiot, and goes across the Merchants' Bridge, stopping at Washington Avenue, North Market Street, Bremen Avenue, Cass Avenue, and at Madison.

Q. Do you know anything about the size of these morning trains, as to the number of coaches? A. Which train do you mean? One train goes at 4:30 in the morning.

Q. I will show you a time-card of the Merchants' Bridge Terminal Railway Company, and ask you if you can indicate on that the trains that carry the greater number of passenger coaches to and from Madison and Granite City, Ill., and St. Louis, Mo. A. The 6:10 a. m. train, and the 6:15 —there are two of them. There is another one at 7:05 a. m. Those are the heaviest trains. They carry the help to the steel plants, the stamping company, and to the glucose works in the mornings.

Q. These plants are not under the control of any railroad? A. As to that I cannot answer.

Q. They are not run, so far as you know, by the Merchants' Bridge Terminal Railway Company, or the Terminal

Railroad Association of St. Louis? A. The business I have transacted with them would indicate that the steel foundries are run by the American Steel Foundries Company, consolidated. The Stamping Company's general office is in New York. They operate the stamping foundry and the rolling mill. The glucose company is now owned by the American Refining Company.

Q. What other trains besides the ones you mentioned, are run? A. I have ridden on trains from half-past four in the morning up until seven in the evening. They run along about two or three hours apart. The regular work trains carrying the men go from half-past six to eight in the morning, and going back, run from half-past four to seven o'clock in the evening.

Q. Did you pay any fare on these trains? A. I paid cash fare on the train, and also bought a ticket at the ticket office at Third and Washington Avenue.

Q. What is the fare from St. Louis to Madison? A. The cash fare on the train is fifteen to twenty-five cents, whichever the conductor feels disposed to charge you. They claim the right to charge you the full fare of twenty-five cents, if you have not a ticket. Sometimes I have not had a ticket, and they collected only fifteen cents.

Q. If you buy a ticket, what does it cost? A. Fifteen cents for single fare, twenty-five cents for round trip, and if you buy a ten-ride ticket it is one dollar.

Q. If you buy a one-way ticket how much is it? A. Fifteen cents.

Q. Is any reduction ever given to any one? A. The workingmen pay three dollars a month, or virtually five cents a ride from St. Louis to Madison.

Q. Are these passenger trains? A. They are the same as any other passenger trains, but not of very fine texture.

Q. Is there anything on the cars to indicate what road

they belong to? A. Yes, sir, the tickets read "Merchants' Bridge Terminal Railway Company."

Q. Is there anything on the cars to indicate what road they belong to? A. Yes, sir; so far as I have seen they say, "Terminal," and some are marked "Terminal Railway Company," and some "Merchants' Bridge Terminal Railway Company."

Q. Do you know what locomotives haul these trains? A. The Merchants' Bridge locomotives, or the East St. Louis Connecting Railway Company's locomotives. The reason I say that is because I have made agreements for the employment of machinists who repaired locomotives for that company.

Q. Are there any other cars besides passenger coaches attached to these trains? A. Yes, sir; there is what is called a combination passenger and baggage coach.

Q. Is there anything other than passengers carried on these trains—freight or express, for instance? A. Yes, sir, I have seen express and freight carried on them.

Q. Broken packages? A. Yes, sir; broken packages.

Q. In what car would that be carried? A. In the combination baggage and passenger coach.

Q. Do you recognize this as the time-card of the Merchants' Bridge Terminal Railway Company? A. (After examining paper) Yes, sir.

Q. What is the date of it? A. There is no date on it. It is the same as I have in my office for reference when I want to catch a train.

Q. I will ask you if that is a schedule of the trains now, and has been for some months? A. I don't know whether it is the schedule to-day, it might have been changed. But it was Friday, and also on Monday of this week, because I went over on the 12:08, and came back on the 1:15 train on Monday; and I see those trains are scheduled on this time-card.

Q. Do you know whether anybody but workmen living in St. Louis ride backward and forward on those trains? A. Yes, sir, residents and merchants in Granite City, and Madison.

Q. Anybody can buy tickets for that train? A. Yes, sir, they have a ticket office and agents.

Q. Do you know whether there is any freight shipped in and out of Madison and Granite City, and those points there, to St. Louis, by this road? A. I know several merchants there, and I have met them and seen them down at the station getting their freight. I presume it came over that road.

Q. I will ask you if the Merchants' Bridge Terminal Railway Company has a depot in Granite City and Madison? A. There is a station there in which they have an office. Whether it is theirs or not I do not know.

Q. Have they a freight depot besides the passenger station? A. On this side?

Q. On the other side? A. I don't know. It is all one station. They put the freight on the platform, what freight I have seen there is put on the platform.

Q. Have they a passenger station on this side? A. All I know of is what is at Third and Washington Avenue, or the Union Station.

Q. Is there any up north of the Merchants' Bridge? A. There is one on North Market Street, and one on Bremen Avenue, used for passengers on that train.

Q. Do they carry passengers between stations on their road, other than Madison, Granite City and St. Louis? A. Yes, sir, they carry passengers from Madison to Granite City, and they carry passengers to any of those way stations; you can get on and off the trains.

Q. Do you know whether or not the Terminal Railroad Association has any freight station in this city? A. At Twelfth and Poplar Streets.

Q. Do you know anything about the extent of that station? Have you seen it? A. Just casually.

Q. Generally speaking, is it large or small? A. Oh, I think it is considered a small station, speaking of railroad freight stations.

Q. Would you consider it small? A. Yes, sir, for a railroad company.

Q. Have they any others? A. Not to my knowledge.

Q. Do you know whether the Terminal Railroad Association has any machine shops, such as railroads frequently or usually have? A. Yes, sir; they have one.

Q. Where is it located? A. It lies between Brooklyn and East St. Louis; the post-office address is Lovejoy post-office.

Q. Is it on the tracks of the Merchants' Bridge Terminal Railway Company, or the Terminal Railroad Association? A. I don't know. I wouldn't know where their tracks start. But is is not on the road that goes to Granite City and Madison.

Q. It is between the two bridges? A. Yes, sir, between the two bridges. It is between the Merchants' Bridge and the Eads' Bridge, and is reached by going over the Eads' Bridge, and over the Terminal tracks up through the stock-yards.

Q. How far north of the Eads' Bridge would you judge that plant is located? A. About two and a half or two miles—about two and a half miles.

Q. Do you know anything about the size and extent of those machine shops of the Terminal Railroad Association, which you have mentioned? A. Yes, sir; they have what I consider—Well, they have the largest and best equipped machine shops of any railroad in this locality.

Q. Larger than any in St. Louis? A. Yes, sir.

Q. How many men do they employ in the machine shops? A. Seventy-five to one hundred.

Q. Do you know what class of work they do there? A. Exclusively the maintaining and rebuilding of locomotives, passenger and freight locomotives.

Q. For themselves alone, or for their road and other roads? A. Well, extensively for their own road. I wouldn't say but what they don't do, sometimes, in an emergency, running repairs for other roads.

Q. What do you mean by "running repairs?" A. In case they have a broken down engine, the engine dies, or something happens to it, when it has to make a trip, and it wants to return to the train, and the shops of the road to which the engine belongs are in some other locality—it doesn't hold up the engine, but will repair it, or something like that they do.

Q. What about the equipment of that shop? A. I think it is the best equipped shop in this part of the country. It is what is known as an individually equipped shop, each machine being equipped with an individual motor. It is an up-to-date shop.

Q. Are you a practical machinist? A. Yes, sir.

Q. You understand, then, what would be a good shop? A. Yes, sir.

Q. Do you know where those men live who work in this shop at Brooklyn? A. I should say ninety per cent of them live in St. Louis, and ten per cent in East St. Louis.

Q. How do they get to St. Louis, if you know? A. On a train operated by the company, known as "The work-train."

Q. A train of the Terminal Railroad Association? A. Yes, sir.

Q. Over what bridge does that train go backward and forward? A. Over the Eads' Bridge.

Q. Do you know whether that train carries any one else beside those workmen? A. Yes, sir, it carries, I guess, anybody that will get on it.

Q. Have you ridden on it? A. Yes, sir, I have ridden on it.

Q. Did you pay fare? A. Yes, sir.

Q. Do you know whether it runs to any other point besides these shops? A. It stops right back of the stockyards, and takes on and lets off passengers for the stockyards, at a place known as "Black Bridge."

Q. Do you know whether or not there are many men employed at the stock yards who live at St. Louis? A. Quite a number.

Q. Do they ride on that train? A. A few do.

Q. Do they pay fare? A. I presume they do.

Q. Do you know whether the Terminal Railroad Association runs any other train over the Eads' Bridge? A. You mean a train of their own?

Q. Yes. A. They run one to the stock yards. They run a train called the "Bull train," in the morning.

Q. What do you mean by that term, "Bull train?" A. I don't know. It is just known as that.

Q. What kind of a train is it, freight or passenger? A. It is a passenger train.

Q. What class of people does it haul? A. It carries employees of the stock yards, mostly, but other people, too.

Q. Do they pay fare? A. Yes, sir; they pay fifteen cents a round trip. That is what I pay. I don't know what they pay, but I presume the same amount.

CROSS EXAMINATION, BY MR. F. W. LEHMANN:

Q. You say you are the representative of the International Association of Machinists? A. Yes, sir.

Q. What is that organization? A. It is a labor organization, an association of machinists throughout the United States, Canada, Mexico, and all the possessions.

Q. The craftsmen? A. Yes, sir.

Q. Who make machinery? A. Yes, sir.

Q. How comprehensive is that, as to the classes of mechanics into which it enters? A. It prohibits—

Q. What does it embrace? A. It embraces all men who are employed in the making or repairing of machinery, or metal parts thereof.

Q. You were about to say what it prohibits? A. Nobody except a competent machinist will be admitted to membership.

Q. Can you tell us how far it is from Union Station to Granite City? A. Well, I don't know the exact mileage.

Q. Not exactly, but approximately? A. I consider it about five miles.

Q. And it is across from the northern part of the city of St. Louis, on the east side of the river? A. Yes, sir.

Q. It is practically a suburb of St. Louis—I am speaking generally? A. Yes, sir, I would so consider it.

Q. Not in a municipal sense, but in a practical sense? A. Yes, sir.

Q. How far would you say it is from the Merchants' Bridge to Union Station? A. I guess that is about three miles.

Q. You spoke of Madison, also: how far is it from Madison to Granite City? A. Well, from Madison to Granite City, I should not consider it over a mile or a mile and a half; it is a four-minutes' run.

Q. Which is the farthest away from St. Louis, taking it on the line of the Merchants' Bridge Terminal Railway? A. From St. Louis?

Q. Yes. A. Do you mean Madison or Granite City?

Q. Yes. A. Granite City is.

Q. You have mentioned the number of industries which are in those two cities: now there are industries throughout the whole of what might be called the East St. Louis territory, aren't there, all along, up and down the river? A.

You mean by "East St. Louis," dividing it where Venice starts?

Q. By East St. Louis I mean the different communities that are grouped on the other side of the Mississippi River, and are opposite the City of St. Louis? A. In Madison there is only one—well, there are two—one virtually. That is the St. Louis Car Company, or the Missouri Car and Foundry Company's extensive plant. That includes the car plant, and the old Helmsbacher Rolling Mill, which they purchased and transferred to that side of the river, making it a part of their plant. That is the only industry I know of in Madison.

Venice has none since the glucose works were closed up there. There are some cooperage works there, I don't know the name, but lying some place between Madison and Granite City. Of course, in East St. Louis there are a number.

Q. There are mills, and elevators, over there? A. Yes, sir.

Q. Cotton compresses? A. Yes, sir.

Q. And industries of various kinds? A. Yes, sir, in East St. Louis.

Q. You spoke of Brooklyn: that is a little village on the east side? A. Yes, sir.

Q. And closer to St. Louis than Granite City or Madison? A. Yes, sir.

Q. You were speaking about a shop, and I missed just a few words of what you said: was that a shop of the Terminal Railroad Association, the one you spoke of as being up-to-date? A. Yes, sir, that is their machine shop.

Q. That is the machine shop of the Terminal Railroad Association? A. I know it by its full title, in making contracts with them: The St. Louis Merchants' Bridge and East St. Louis Connecting Railway.

Q. That is the shop of the Merchants' Bridge Terminal

Railway Company? A. Yes sir, the Terminal Railway Company, of all their rolling stock.

Q. You have identified a time-card of the St. Louis Merchants' Bridge Terminal Railway Company, which gives the trains running over that road, substantially speaking, at the present time, unless there has been a change very recently? A. Yes, sir.

Q. And you say the charge on that is fifteen cents when the collection is made on the train? A. That is, that is the fare; yau can buy a ticket for fifteen cents; or, if you pay your fare on the train, they reserve the right to charge the full fare. But I never paid over fifteen cents.

Q. Is that paid, regardless of the distance traveled? A. You can ride from the bridge to North Market Street, or from the bridge to Bremen Avenue, for five cents.

Q. They make between here and Granite City, counting up here on this time-card—there are ten stations as I count them on this time-card? A. Yes, sir. Some of the trains originate from Union Station, and some originate from Seventh and Gratiot Streets, and do not enter the Station at all.

Q. These trains do practically a suburban service? A. Considering Madison and Granite City suburban towns, yes, sir. They do not go any further, to my knowledge.

Q. And the country on the east side of the river, until you go back several miles, is low, flat country, isn't it—Mississippi River bottom lands? A. After you cross the Merchants' Bridge?

Q. Yes. And the country on the west side is high and roiling, compared to that on the east side? A. Well, it would depend upon what locality you take it.

Q. Take this city here, the main part. A. Yes, sir.

Q. And these people prefer to live on the west side of the river, although working on the east side? A. I presume so.

Q. And these trains are run for their convenience? A.

I believe they are run for the convenience of those people there, yes, sir.

Q. And the Brooklyn train is a train substantially like one of these noted on this time-card? A. Well, no, I wouldn't say that. The Brooklyn train was put on, virtually, at the suggestion of our organization; the men not wanting to work there unless means of transportation were furnished them. The shops were formerly on this side of the river, and they transferred them to the other side, and the men would not pay the extra carfare it would cost them to go to those shops; and that train didn't operate, to my knowledge, until the shops were put on that side of the river.

Q. So the inducement to that train was the existence of the shops on the other side of the river? A. Yes, sir, I guess the existence of the shops depended on the putting on of that train, because the men wouldn't work there otherwise.

Q. And so, in pursuance of a request of your association, on behalf of your members working there, and essentially for their convenience, this train was put on? A. We never made any formal request for it. Before the necessity arose for that, they put it on, realizing that they could not get the men to go there without it.

Q. There are street car facilities of some kind between Granite City and St. Louis, aren't there? A. Yes, sir.

Q. But this service rendered by the St. Louis Merchants' Bridge Terminal Railway Company, between Granite City and Madison to St. Louis, is rather better and cheaper than the street car service? A. It is no cheaper, but it is better and quicker.

Q. Isn't it really cheaper? A. For the workmen, yes. I don' think they can get the same fare on the street cars.

Q. I understood you to say that where they bought a monthly ticket, it was five cents a trip? A. Yes, sir.

Q. Then they have a ticket that is good for a ride each

way, each day, for the thirty days in the month, for three dollars? A. Yes, sir, that is it.

Q. And if they take the street cars, they would have to make a number of— Could they go on one line from St. Louis? A. No, sir, they have to transfer.

Q. On the east side there would be a transfer, and they would have to pay for the transfer? A. Yes, sir.

Q. It is not a free transfer, I mean? A. No, sir.

Q. The same thing is true of the Brooklyn station; that is, that there are street car connections there, but not so good? A. Not so good. They would have to walk some.

Q. Then you say there is another train that goes to the stock-yards, called the "Bull train." I presume it is called the "bull train" because it runs to the stock-yards? A. I presume so.

Q. There is street car connections also between St. Louis and the stock yards? A. Yes, sir.

Q. But, again, this train furnishes rather better facilities and cheaper, than the street cars? A. Yes, sir, it is cheaper than the street cars.

Q. And the East St. Louis line, approximately speaking, would run along at the east end of the bridge? A. You mean the street car?

Q. Yes. A. No, sir, they take you clear to the stock yards for ten cents.

Q. And coming from the stock yards? A. They land them on the east side of the bridge.

Q. And then they would have to transfer there and take the car across to this side, that is, starting from the stock yards? A. The street cars take you from the stock yards clear across the bridge to the Missouri side.

Q. Would that require two fares? A. One fare of ten cents.

Q. While on this "bull train," it would be a single fare

of five cents, provided you had a monthly ticket? A. A single trip is seven and a half cents, and a round trip fare fifteen cents.

Q. Then that would bring them further into the city than the East St. Louis lines do? A. I don't know whether that train goes into Union Station or not. I always take it at Washington Avenue, and most all these people get off both those trains there.

Q. On the elevated? A. No, sir, on the Eads Bridge; at the Washington Avenue station of the Terminal Railroad Association.

Q. It goes through the tunnel? A. Yes, sir.

Q. It must have a terminus further into the city; it must go through the tunnel? A. Yes, sir, I suppose so.

Q. I notice on this time-card that they give the rates for a single trip at fifteen cents; round trip twenty-five cents; ten rides, one dollar; saying nothing about the monthly ticket. But you have knowledge of the fact that they do issue a ticket of that kind? A. Yes, sir, I have knowledge of the fact that they do issue a ticket of that kind.

Q. And that is issued to whomsoever chooses to get it? A. I won't say about that. I think it is issued through an order from these companies, if you say you are an employe of these companies. Although I do know that they issue a six months or yearly ticket in Granite City. I believe that is even cheaper, but I am not positive on that point.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. Mr. Sarber, I will get you to state if you know how long the condition you have described relative to the running of trains on the Merchants' Bridge Terminal Railway Company has existed? A. You mean where to?

Q. To Granite City. A. Oh, about fifteen years, to my knowledge.

Q. I will get you to state if you know about the time

that the old Madison race tracks ran in the State of Illinois, outside East St. Louis? A. Yes, sir.

Q. Do you know whether the Merchants' Bridge Terminal Railway Company ran trains carrying passengers to those grounds in that city? A. Yes, sir, they ran trains over there at that time, and to Madison when the pool-rooms were at Madison.

Q. Was fare charged? A. Yes, sir.

Q. How long did that continue—do you know? A. It continued as long as the pool-roms lasted over there.

Q. A month or a year? A. I don't know. I have no knowledge; but for a month anyway.

Q. Where did those trains come from? A. The Union Station, St. Louis, Mo.

Q. And they went where? A. To Madison and Granite City, Illinois.

GEORGE T. McCLURE, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name, residence and occupation? A. George T. McClure; St. Louis, Mo.; Traffic Manager for the Rice-Stix Dry Goods Company.

Q. What is your business as traffic manager of the Rice-Stix Dry Goods Company? A. I handle all traffic matters, and matters pertaining to the railroads.

Q. Prior to a year ago this month, October, 1906, did your firm handle goods in and out of St. Louis from points across the Mississippi River, eastward? A. Yes, sir.

Q. Take your outbound shipments, at that period of time, and describe the method you followed in getting them over there? A. At that time we hauled to East St. Louis a majority of our business, with the exception of the time

of the year we stored for future delivery, and then we tried to store with the St. Louis Transfer Company, to save the charges.

Q. You mean you hauled by team? A. Yes, sir, generally.

Q. At that period of time, how did you get your inbound stuff? A. The inbound for the last two years, I believe it is, has come by the Terminal Railroad Association, almost exclusively.

Q. Prior to that time, how did you get it? A. Prior to that time we hauled it. That is, we have a boss drayman who does all our hauling, and he hauled from East St. Louis— No, the Weber Company hauled it at that time.

Q. What was the reason for hauling it? A. It was an old custom, is really all the reason, at that time.

Q. Did you make any time by it? A. The time was good for awhile, and then they allowed forty-eight hours' free time, and we began taking that, before storage started, and I switched it to the Terminal Railroad Association, on that account. It is really cheaper than what we paid Weber.

Q. Have you ever experienced any delays in your inbound and outbound shipments? A. We have, both on inbound and outbound.

Q. Do you know where those delays originated? A. Yes, sir; I investigated personally a great number of them.

Q. And what did you find? A. I found the Terminal was at fault in many instances; and in many instances the railroad on the east side was at fault. The average time to get goods across the river for us is two or three days. Sometimes we get it on the same day; that is, out of ten cases I investigated recently there was one made it on one day—I believe it was ten or twelve cases—but one made it

in one day, and several made it in two days, and quite a number made it in three.

Q. After its arrival in East St. Louis? A. Yes, sir.

Q. I will get you to state whether or not your house ever kept a man over in the yards to help get your cars out? A. No, sir. When I went there first I was really hired for that purpose, but not exclusively. I was to give other matters my attention, but I was to get the goods across the river.

Q. Did you spend part of your time in the yards? A. I spent about three hours a day, I should judge.

Q. What were your duties? A. I would get after some shipment we were after, and have it brought over.

Q. What would you do? A. If I could get it brought over promptly, in such condition to have it loaded immediately, I would have it loaded into the car, and, if it was necessary to have it hauled, I would have it hauled over.

Q. Did it cost you anything to have it set around? A. Most of our freight is in less than carload lots. I have most of our goods concentrated at Newport News. This would be from points like, say, Chicago, or any place where we didn't have carload shipments.

Q. What business do you do here? A. Eight or ten cars a day, at this time of year. Then we have a large amount of pick-up freight on the platforms, consigned from various roads on the other side of the river.

Q. Less than carload lots? A. Yes, sir.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. You say you made it your business to go over there and facilitate the transmission of freight from the other side to this side of the river? A. Yes, sir.

Q. The situation over there is that there are miles and miles of side tracks there in East St. Louis? A. Yes, sir.

Q. And thousands of cars over there all the time, I take it? A. Yes, sir.

Q. And a car may be on a track, shut in by a great many other cars, and you found you could render service by locating the car, and thus get your shipments in quicker? A. Yes, sir, when in carload lots. Or I might find it on the platform—I might find the missing shipment I was after on the platform.

Q. You would find a shipment had been delayed, and when you came to look it up it was on the platform of the railroad company? A. Yes, sir.

Q. What is the annual volume of business of Rice-Stix & Company? A. That is very hard to determine. At this season of the year we receive from five to six hundred packages a day. We receive in the busy season as high as twelve hundred—or even a larger number, at certain rush times.

Q. I am not sure I understood what you said; you say most of your freight comes in packages, less than carload lots? A. It originates in less than carload lots, and I try to have that concentrated in carload lots at Newport News, to save the delay at East St. Louis, of rehandling.

Q. The result of your efforts there, in concentrating at Newport News, is to make most of your shipments in here carload shipments? A. We try to do that.

Q. Is that the result? A. Yes, sir.

Q. How long has the Rice-Stix Dry Goods Company been in business here? A. I am not sure of that. I have been with them about four years. They have been here for ten or fifteen years before that.

Q. The volume of business during the time you have had opportunity to observe it has been constantly increasing? A. Yes, sir, every year.

Q. And it is a larger volume this year than ever before? A. Yes, sir, larger this year. There were two thousand

more packages in the warehouse this year than last year. I would like to say that the Terminal Railroad Association officials have always done everything they could possibly do to facilitate everything, and the friendliest feelings have always existed.

Q. I was about to ask you to explain in detail just what occurs in the matter of getting freight over from East St. Louis to your warehouse, or wherever you may choose to have it go, after the car arrives in East St. Louis, on the railroad bringing it in. Start there where the railroad ends—not the Terminal Railroad, but the shipping company. A. Our business when coming in on the L. & N.—we try to use a west side line exclusively if we can.

Q. But take the shipment that comes into East St. Louis — Well, go on with the L. & N. Give us the detail of that. A. The L. & N., when the car gets to East St. Louis, a card is put on each side saying, "Rush freight for Rice-Stix, St. Louis, Mo., to be delivered to Track No. 6." That is down here on 11th & Poplar Streets.

Q. Who puts those cards on there? A. The L. & N. Railroad Company. That should facilitate the handling of it very materially. Mr. Johnson has promised to look after that specially.

Q. What happens? That car gets there with that card on it? A. That car is taken out and sent up to the Terminal Railroad Association tracks, placed where the Terminal Railroad Association's engine can come and get it.

Q. Who does the first service? A. The L. & N. puts it on the connecting track.

Q. Connecting track of the Terminal Railroad? A. Yes, sir; that is all the further you want to go?

Q. No, sir, I want to get to your warehouse. A. The Terminal Railroad Association takes it off that track, and I believe puts it in a train that goes to the Cupples Station—that is the way they used to handle it when I investigated it.

It is taken off there, and placed on Track No. 6, if it is not full. If it is full they unload it in the freight warehouse at Twelfth & Spruce; and we haul it from one of those places to our warehouse.

Q. And your warehouse is where? A. Tenth & Spruce. That is about half a block from track No. 6.

Q. It is about half a block from the tracks of the Terminal Railroad Association? A. Yes, sir.

Q. Now take a parcel coming in, and follow it in the same way, if you please? A. Take a case from Chicago, where we use the Illinois Central, a package woud come down to East St. Louis, and they would load that into a Twelfth Street car.

Q. Where would that be loaded? A. That would be loaded in East St. Louis, in some car that was to go to the Twelfth Street warehouse.

Q. But first, when the Illinois Central brings it in? A. They would unload it, of course, at their depot on the levee.

Q. Then what would be done? A. Then they would reload it again.

Q. But somebody has to know it is there: how does anybody know it is there, aside from the carrier that brings it in? A. Nobody would know.

Q. Don't they send out some notice? A. No, sir, they have standing instructions to send all our freight to St. Louis over the Terminal road.

Q. To whom are those instructions given? A. To R. L. Wells, agent of the Illinois Central.

Q. Then it is unloaded by the Illinois Central? A. It is unloaded at the local platform, and reloaded into a car that is to come to Twelfth Street. It is unloaded at Twelfth Street. And then, of course, freight makes very bad time; that is, not car-load lots; and it takes frequently four or five days. I don't know that I ought to say four or five

days all the time, for sometimes it gets here on the second day.

Q. It is unloaded at Twelfth Street; and is that the end of the handling by the railroads? A. Yes, sir. Then we come down there every day, and clean the platform up; take everything that is on the platform. They send us a notice, but we don't pay much attention to that, because we take everything that is there every day.

Q. You would go, independently of any notice? A. Yes, sir.

Q. Now, taking parcel freight out of St. Louis, from Rice-Stix & Company— A. Via the Terminal Railroad Association?

Q. Yes, and sending it east. I assume you do business to the eastward? A. Well, we only go to Indiana and Illinois. I believe we haven't an account east of there— and the Ohio River.

Q. Follow a parcel from your store, or warehouse, across the river, until the carrier that is to take it to its destination gets it? A. We have been a little unfortunate with that lately. Part of that is due to ourselves, the way we would get the shipment out of the packing room, getting it out too late. We sent a package to Murphysboro, to the Young Dry Goods Co.; they want their goods the next day, and must have them. If we deliver that shipment to the Terminal Association at 4:45, the Young Dry Goods Company will never get it under four days. The reason for that is, that the Illinois Central have quite a number of cars on track No. 8, I believe it is called, and they load Murphysboro freight into the local car—that is, local from Murphysboro to Belleville; that is freight is put in there for points between those places. If we happen to miss that car, they won't allow us to load it into another car, but it is put on the platform of the Terminal Company, and they load it local to East St. Louis, because they would have to take it

out of the car, and across the tracks, in order to get it on the Illinois Central. They have a noonday pull, and a four o'clock pull, but we do not always catch that. It generally takes four days, then, to get to destination. The Illinois Central is the only road that has those through cars, except the C. & A. They have a Chicago and a Kansas City car, if the tonnage justifies it. But I don't believe there is another road that has a through car, that does not break bulk at East St. Louis.

Q. The difficulty you suggest there is created by the railroad company, rather than by the Terminal Association, isn't it? A. Well, I believe the Illinois Central, if they would hold that car open a little longer—I have that up with Mr. P— now.

Q. That is an Illinois Central proposition? A. Yes, you might say it is. But if the Terminal would load that from their warehouse, and keep those cars there until five o'clock, which they could do—they could then load it, and if you happened to miss that car it would go out the next day.

Q. But they couldn't hold the Illinois Central longer? A. They could ten minutes, because it takes ten minutes longer to switch it from there than from the warehouse, on account of Simmons Hardware Company being in there.

Q. But the Illinois Central Company determines how long its cars may stay upon the Terminal Association's tracks? A. Yes, sir, they have that privilege.

Q. You were speaking of this Murphysboro shipment: how far is Murphysboro from here? A. I cannot say exactly.

Q. Approximately? A. As a rough guess, I should judge about ninety-seven miles, or something like that—But that is a mere guess.

Q. And the people you ship to there you say want their goods the next day? A. Yes, sir.

Q. By "next day," what is it you mean? The next day

after they send in their order? They send in their order one day, and want the goods the next day? A. I get at it the same day, yes, sir; get it out.

Q. If I understood you correctly, if you get the goods down there in time for that Illinois Central car, then you could meet their expectations and get the goods down the next day? A. I believe, generally, that would have been a fact, although we have had packages that have been delayed outside of that, and the Illinois Central claimed that the Terminal Company missed their connection on three separate days, one after another—But that is an exception.

Q. I presume accidents will occur, everywhere? A. sir.

Q. But, taking the thing as it usually occurs: If you get your shipments to this loading place in time to get it in the car, it will reach Murphysboro the next day? A. Yes, sir, I believe generally it will reach there.

Q. You made some remarks there with reference to switching: that is in the terminals on the west side here, that the Simmons Hardware Company is? A. Yes, sir.

Q. Conditions on the west side with respect to railroads, terminals, and switches, are very much crowded? A. Yes, sir; very much.

Q. Isn't there distinctly a lack of room? A. Very decidedly.

Q. So that conditions would be very much aided if there were more switching tracks, and more yards, where you could load and unload? A. Yes, sir, there should be. But that would not prevent— We could not meet Chicago competition, or cities of that kind, anyhow, if you have to load cars here and have them break bulk at East St. Louis. The only thing that will ever help up there is to load the cars here just as in East St. Louis, and have them break bulk at their furthest ultimate destination.

Q. That is, have the initial point here? But that would

require more room on this side. A. Very, very much more.

Q. That would not be possible, under present conditions, as to room? A. It would not be possible.

Q. It would require considerable extension of yard room? A. Yes, sir, and of freight houses.

Q. And you have to have room to plant your freight houses? A. Yes, sir. The freight house is very large now. The Twelfth Street house is two blocks long. And next to that, Number Four, I believe they call it, is nearly a block long; rather a short block, but it is nearly a block long.

Q. And these cases where you say there has been trouble, sometimes the fault is with the railroad company and sometimes with the Terminal Association, hasn't it been due to accidental conditions that result from the crowding in this city, primarily? A. Yes, sir, I think it is due entirely to the congestion. Well, there may have been some more trouble; cars were short; and at other times something was the matter with the tunnel. They have a wreck there pretty nearly every other day. Then our outbound business is delayed materially. It is delayed by anything that would choke the tunnel, of course.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. If the Terminal Association would hold their cars an hour or two later, the next day any way would see those shipments out on the Illinois Central? A. Yes, sir, but they would have to get permission of the Illinois Central to hold them. But if they would hold them until five o'clock it would obviate a great deal of delay to southern Illinois shipments on the Illinois Central.

Q. Chicago and other cities larger than this, have the initial loading of cars, where they are shipped to ultimate points of destination, without breaking bulk, don't they? A. Yes, sir.

RE-CROSS EXAMINATION, BY MR. LEHMANN:

Q. The longer a car is held on the tracks, the less number of cars that track can accommodate? A. They would not need so many.

Q. Suppose, for example, you let a car stay on a track two days for loading, you can't get another one in? A. If you let it stay there, you wouldn't need another, because the car wouldn't be full.

Q. Doesn't that depend on how many cars you have to have pass through your yard? A. If they would hold a car over one day— They never do that for loading purposes; it goes that night anyway.

Q. The quicker the car is moved, the more cars you can handle over the same track? A. Yes, sir.

Q. It is true, to your knowledge, that the passenger business is done in the mornings and evenings in this city? A. Yes, sir, that is true.

Q. And this is what might be called "a terminal point," that is to say, trains do not run through St. Louis; they run into St. Louis and out of St. Louis? A. Yes, sir; they do not go through at all, hardly.

Q. I don't recall any that do. A. I don't believe there is a single train that goes through St. Louis without breaking up. Even the Wabash changes.

Q. The Union Station here is what is called "a pocket station?" A. Yes, sir.

Q. That is to say— A. It goes in this way (indicating), and comes out again.

Q. It is set in a pocket? A. You cannot go through it, is what you mean, from one end to the other.

Q. Yes, that is just what I mean. And all the passenger trains are first brought in there empty—those leaving St. Louis? A. Yes, sir, they are backed in there.

Q. They are set on the track, and then pulled out? A. Yes, sir.

Q. And then the trains that come into St. Louis back in full, and when the passengers are discharged they are taken out into the yards? A. Yes sir, broken up and different equipment placed upon the proper tracks.

ROBERT W. POMMER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name and residence? A. Robert W. Pommer; St. Louis, Mo.

Q. What is your business? A. The seed business.

Q. What firm? A. G. R. Bushnell & Co.

Q. Your house does what kind of a business? A. Jobbing seeds, wholesale.

Q. In what territory? A. All over the country.

Q. How long have you been in business here? A. Thirty years.

Q. What volume of business do you do a year, how many cars a year? A. Oh, we handle from two thousand to two hundred thousand pounds a day. Our business is a "season" business.

Q. Do you do business backward and forward across the river, on inbound and outbound stuff? A. Yes, sir.

Q. Have you had any delays to your goods coming in or going out, across the river? A. Yes, sir, on the Terminal we have, but not on the L. & N. or the St. Louis Transfer Company. They handle our goods all right, but the Terminal Railroad Company is very slow—I won't say that it is the Terminal Railroad Company—it may be the other companies that deliver to the Terminal that are slow.

Q. Have you ever traced it up to see where the trouble is located? A. If we telephone, one always puts the blame on to the other, and we never can tell where to locate the blame.

Q. How extensive have been the delays? A. Sometimes as much as ten days, but that happens very seldom.

A. E. BAKER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROWS

Q. Please state your name, and residence? A. A. E. Baker; St. Louis, Mo.

Q. What business are you in? A. Trunks.

Q. With what firm? A. The P. C. Murphy Trunk Co.

Q. Where are they located? A. No. 504-6 North Third Street. Third and St. Charles.

Q. How long have they been in business here? A. About forty years.

Q. How large a volume of business a year do they do? A. In dollars and cents?

Q. Yes sir, or in cars, or both? A. About half a million, or close to it.

Q. Are your goods handled in broken lots, or car-load lots, or both? A. Both.

Q. Mostly which? A. We mostly ship out in small lots.

Q. And mostly in car-load lots, in-bound? A. Both ways.

Q. Do you handle much of your goods, either in or out, across the river from East St. Louis? A. Recently, we have been having it come in on this side, but formerly we had all of it come to East St. Louis, and haul it across.

Q. Say, a year ago this month, October, 1905, how were you doing your business then? A. From East St. Louis; having it hauled.

Q. Why did you have it hauled? A. We were having the St. Louis Transfer Company haul it.

Q. If you wanted to send goods out, how would you get

the goods out? A. We would send them to the St. Louis Transfer Company, possibly we might send a few to the Terminal Railroad— We wouldn't have a wagon load at a time, and it is so far out of the way, we would send them to the St. Louis Transfer Company, and they would re-haul them.

Q. To East St. Louis? A. Yes, sir.

Q. And that was your practice for years? A. Most of the goods went that way.

Q. Did you have any trouble with your business in that way? A. Yes, sir, the customers complained about the drayage charge.

Q. What was the drayage charge from here to East St. Louis? A. They charged ten cents per hundred on trunks.

Q. Ten cents per hundred pounds? A. Yes, sir. That was in less than car-load lots.

Q. What was the charge in car-load lots? A. They have no car-load rate—no car-load rate on trunks.

Q. Is there none coming in? A. No, sir, the only car-load rate on trunks is to coast points. The railroads don't make a car-load rate. Q. Did that drayage charge affect your business in any way? A. Some of the customers got very indignant about it—about tacking on a drayage charge. The amounts would not be very much, on account of the shipments being small.

JULIUS S. WALSH, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROWS

Q. Please state your name and residence? A. Julius S. Walsh; St. Louis, Mo.

Q. What business are you engaged in, Mr. Walsh? A.

I am chairman of the Directors of the Terminal Railroad Association.

Q. What other business are you engaged in? A. Chairman Board of Directors of the Mississippi Valley Trust Company.

Q. How long have you been connected with the Mississippi Valley Trust Company? A. About seventeen years.

Q. Since its organization, practically? A. Yes, sir.

Q. How long have you been connected with the Terminal Railroad Association of St. Louis? A. Since 1895.

Q. In what capacity were you first associated with the Terminal Railroad Association? A. My association extends beyond that, because I was Vice-President for two or three years before I went into the Presidency; but about 1895 I went into the Presidency of the Association.

Q. Were you connected with it before you were Vice-President? A. Yes, sir.

Q. In what capacity? A. Not the Terminal Railroad Association, but I was connected with the Bridge Company.

Q. The old St. Louis Bridge Company? A. Yes, sir.

Q. When did you first become connected with it? A. I think I became a director there in 1874 or 1875.

Q. You had a connection, in one way or another, with these various corporations, connected with the transferring of cars across the river, since that period, have you, Mr. Walsh? A. Yes, sir.

Q. And you have been familiar with the growth of this business? A. Yes, with some interruption; not an uninterrupted connection.

Q. What was the extent of the interruption? A. Oh, possibly three or four years.

Q. Can you fix the period at which it occurred? A. Well, the Bridge Company went into the hands of a receiver.

Q. That was in 1878? A. I think J. P. Morgan and Solon Humphreys were the receivers. I acted as their

agent, and later on I passed out of the property, and it went into the hands of Dr. Taussig.

Q. Were you a director of the St. Louis Bridge, known as the Eads Bridge, when it was first opened? A. I don't recall that.

Q. Soon afterwards? A. Yes, soon afterwards, and maybe before—I don't remember.

Q. After you ceased to be agent of Messrs. Morgan and Humphreys, at the end of the receivership, your connection was severed for some two or three years? A. Possibly.

Q. Then in what capacity did you again become connected with these properties? A. I think when the properties came out of the hands of the Court, I was either the President or the Vice-President of the St. Louis Bridge Company, the re-organized property.

Q. Do you know the date of that? A. No, sir.

Q. Whatever date it was, do you know what properties the re-organized bridge company controlled? A. I don't believe they controlled any property except the Bridge and the tunnel.

Q. The bridge and the tunnel? A. Yes, sir.

Q. Do you know in what manner they controlled the tunnel—by ownership or by lease? A. By lease.

Q. By lease from whom? A. From the owners of the tunnel.

Q. The Tunnel Railway Company? A. Yes, sir.

Q. Now, at that time, do you know whether there were any railroads on either side of the river that were operated in connection with the bridge and the tunnel, but corporations independent of the bridge and the tunnel? A. Yes, sir.

Q. What were the names of those roads? A. I think the East St. Louis Terminal Railroad Company, and the St. Louis Terminal Railroad Company, and then the Union Depot Company.

Q. Do you know a company known as the Union Railway & Transit Company? A. Yes, sir, that was the operating company.

Q. Was that on this side of the river? A. I cannot answer that.

Q. It was a Missouri corporation, wasn't it? A. I don't know about that.

Q. As a matter of fact, it was. What properties at that time did the Union Railway & Transit Company operate? A. They were the operating company between the terminals on both sides of the river.

Q. Over the Eads Bridge? A. Over the Eads Bridge.

Q Then these various companies, the Tunnel Railway Co., the Bridge Company, the Union Railway & Transit Company, and the company you mentioned on the east side, the Illinois corporation, had rails that connected with each other in such a manner as to form a continuous line across the bridge, to what point in Missouri? A. I don't know whether it was to Twelfth Street or Twenty-third Street, at that time.

Q. The old Union Station? A. Yes, sir; the old Union Station.

Q. That is on what street? A. About Twelfth Street.

Q. About Twelfth Street.

Q. A few blocks west of the mouth of the tunnel? A. Yes, sir.

Q. Did you have any official connection with the Union Railway & Transit Company? A. No, sir.

Q. Or any of these corporations, except the Bridge Company? A. That is all, the Bridge Company.

Q. Do you know when the Terminal Railroad Company —not the Terminal Railroad Association, but the Terminal Railroad Company was formed? A. No, sir, I do not.

Q. Do you know when the Terminal Railroad Association of St. Louis was formed? A. In 1889 or 1890.

Q. Do you know in what manner it was created? A. I think it was created largely through the agency of Mr. Jay Gould. He agreed, for a certain price in bonds, to buy these properties and put them together.

Q. With whom did he make that agreement? A. The Terminal Railroad Association.

Q. That was before the organization of the Terminal Railroad Association? A. No, sir.

Q. After the Terminal Railroad Association was organized? A. That was the basis of the organization.

Q. Who promoted that proposition, so to speak—Mr. Gould? A. I don't think I was connected with the properties just at that time, but Mr. Gould agreed, for a certain price, to accomplish the acquisition of certain properties.

Q. Do you know what those properties were, in a general way? A. Yes, sir. The properties we have mentioned here.

Q. The Union Railway & Transit Company, the tunnel property, and the Eads Bridge? A. The lease of the Eads Bridge.

Q. I say the control of it? A. Yes, sir, and the old Union Station property.

Q. And whatever tracks that connected between the Eads Bridge and the Union Station? A. Yes, sir.

Q. Was a lease made at that time by your bridge company to Mr. Gould?

Mr. Priest: The best evidence of all this is the papers themselves, and they are already introduced in evidence, so there is no use in trying to tax the witness' memory with these details, all the papers being already in evidence.

Mr. Crow: Q. State the fact, if you know, whether there was a lease made at that time by the Bridge Company, or Mr. Gould, or some corporation he controlled? A. At that time the bridge was leased to the Missouri Pacific, and

the Wabash, and that lease was assigned to the Terminal Railroad Association.

Q. And then Mr. Gould carried out the contract agreement you mentioned? A. Yes, sir.

Q. And that was the basis of the Terminal Railroad Association of St. Louis? A. Yes, sir.

Q. Then did you become connected with it? A. I think there was a lapse there of a few years.

Q. Along about 1893 or 1894 you became connected with it? A. Yes, sir.

Q. Whatever time it was that you became a director of the Terminal Railroad Association of St. Louis? A. Yes, sir.

Q. And then Vice-President? A. Yes, sir.

Q. And subsequently President? A. Yes, sir.

Q. How long did you remain as President? A. I think up to 1902 or 1903.

Q. Do you know anything about the price that was paid to Mr. Gould, or the corporations of which he controlled the stocks for the interest in these properties that went to make up the Terminal Railroad Association? A. I don't recall now.

Q. Do you know where that information could be obtained? A. I do not know.

Mr. Priest: Didn't we furnish you the contract? It discloses the consideration.

Mr. Crow: Not all of them.

Mr. Priest: This particular one to which you refer does, and we furnished you a copy of it.

Mr. Crow: That is not my recollection, but if it does, it will disclose it.

Q. Mr. Walsh, as President of the Terminal Railroad Association, did you have occasion to inspect the records and examine the reports made by the officials of the Ter-

minal Railroad Association? A. I never was in charge of operation.

Q. You never were in charge of that? A. No, sir.

Q. Who was in charge of the operation there, during your incumbency as President? A. I am not sure that Mr. Ramsay was, but if so, it was for a few months.

Q. He went out in 1895? A. I think Mr. E. T. Bryan.

Q. He is now in New York? A. Yes, sir. He was Vice-President and General Manager and was in charge of the operation of the property.

Q. And how long did he remain there? A. Four years, or something like that.

Q. About 1899 or 1900 he left? A. Something like that.

Q. And he was succeeded by whom? A. By Mr. W. S. McChesney, Jr.

Q. And he is still President? A. Yes, sir.

Q. He is President now? A. Yes, sir.

Q. He was Vice-President and General Manager? A. Yes, sir.

Q. Since what time have you been Chairman of the Board—I believe you said two or three years? A. 1903, I think.

Q. As Chairman of the Board of Directors, is it your duty to examine the accounts and reports of the Company? A. No, sir.

Q. What official of the Company, during all these years, and now, keeps the records which would disclose the income and outlays of that Company, and show the purposes for which expenditures were made? A. I suppose the Auditor's office would be the proper place.

Q. Would the Auditor's books disclose those facts? A. I should think so.

Q. And the Treasurer's books would not disclose all of them? A. The Auditor's office would be the better place.

Q. Who is Auditor now? A. Mr. C. E. Vinnedge.

Q. Where is his office? A. At the Union Station.

Q. And you have no personal knowledge of the income or outlay of that Company, from year to year? A. I am not charged with it.

Q. You have no personal knowledge of it? A. No, sir.

Q. Is there any officer, beside the Auditor of the Company, who would have that general knowledge? A. The operating officer ought to.

Q. Whom do you call the operating officer? A. Mr. McChesney.

Q. What department of the road will show the amount of freight moved, and the number of cars and passengers moved? A. The General Manager's office; that is the General Superintendent's office, I mean.

Q. And who is he? A. Mr. Burlinghame.

Q. What are his initials? A. A. H., I think.

Q. Is there an annual report of the company made, which would show these facts, or do you know? A. I don't know.

Q. You were connected with the company, as President of it, at the time the Wiggins Ferry Company property was sold, some years ago? A. Yes, sir.

Q. Did you have any connection with the sale and the purchase? A. Yes, sir. I advised the proprietary lines to buy the property.

Q. Was that advice given before or after the purchase of stock began by the Mississippi Valley Trust Company? A. The Mississippi Valley Trust Company was authorized to make the purchase.

Q. Before you had advised it? A. No, sir; upon the advice of three of the proprietary lines, we started in with that.

Q. Were you connected with the closing up of that deal, in a personal way, or would you have personal knowledge of

what took place in the way of closing up that deal, between your company and the railroad companies? A. Yes, sir.

Q. Do you know whether or not the money was all repaid in cash to the company? A. It was paid in.

Mr. Priest: Do you mean the Mississippi Valley Trust Company?

Mr. Crow: We are talking about the Mississippi Valley Trust Company in this connection.

Q. When and where were those payments made? A. I couldn't tell you that, except the general fact.

Q. That year of the purchase, and in St. Louis? A. Yes, sir.

Q. Do you know who made those payments? A. No, sir, I don't recall.

Q. Are there any records of the Mississippi Valley Trust Company that would show who made those payments? A. I couldn't say that.

Q. Who would know about that? A. Mr. Jones ought to know.

Q. Or some official connected with your Company? A. Yes, sir.

Q. Do you know whether or not the loan was floated by the proprietary lines to pay part of the purchase price of the Wiggins Ferry Company stock? A. I don't think so.

Q. Have you any reason to know that that was not the case? A. My recollection is that when this money was called, it was paid in.

Q. But subsequently there was a loan made to cover that expenditure, and the proprietary railroad companies reimbursed? A. I think not.

Q. You would know, as President of the Terminal Railroad Association, if that had happened? A. I ought to.

Q. It would not have happened unless you knew of it, so you are safe in saying it did not occur. The reason I ask

you that is that Mr. Ramsay said something of that sort. I hadn't any information of that sort from Mr. Jones.

Do you know who owns the stock of the Wiggins Ferry Company at this time? A. Yes, sir.

Q. Who is it? A. The thirteen of the proprietary lines; and the Pennsylvania Railroad, the Vandalia, belongs to the Association.

Q. Do they own the entire issue of ten thousand shares? A. Yes, sir, every share.

Q. Ninety-five hundred shares of which are deposited with the trust company in New York, under a general mortgage bond? A. Yes, sir. I think subsequently the entire amount was deposited there.

Q. Now at the time the 9,500 shares were deposited, who owned the other 500—the Vandalia people? A. No, sir. I couldn't say now. It must have been in dispute, about the ownership and purchase.

Q. Do you know the relative proportion of ownership of the various lines, of this stock of the Wiggins Ferry Company? A. Equal.

Q. That is, fourteen equal parts? A. Fourteen equal parts.

Q. When was that arrangement made? After the purchase? A. After the purchase.

Q. Do you know whether there was any contract or agreement between the Terminal Railroad Association of St. Louis and the Rock Island system when that railroad came into the Association? A. What kind of a contract?

Q. I don't know. That's what I want to find out. As to the uses of the Terminal tracks, and on what terms they would come in and use it? A. The Rock Island came into St. Louis about the time of the Wiggins Ferry Company purchase.

Q. They subsequently came into the Terminal Railroad Association? A. Yes, sir.

Q. And are members of it now? A. Yes, sir.

Q. Was there any contract made when they came in, with reference to what they owned of the Wiggins Ferry Company, and what the other railroad companies owned? A. They came in precisely on the same basis as the others.

Q. What did they do about the stock they had purchased? A. The stock was all put together.

Q. And each road paid, wherever they had not paid, a proportionate share; so that each road now has invested one-fourteenth of the cost of that Wiggins Ferry Company stock? Is that correct? A. Yes, sir.

Q. The Wiggins Ferry Company owned very extensive real estate interests on the east bank of the Mississippi River, opposite the City of St. Louis? A. Yes, sir.

Q. Have you an idea, in a general way, what the extent of that is? A. I think at that time it was six or seven hundred acres.

Q. How far up and down the river did it extend? A. About a couple of miles.

Q. Was there anything upon that land? A. Oh, yes, the Wiggins Ferry Company had its tracks upon some portions of it, and it had leases out for other portions. A great deal of it was vacant.

Q. It was about the only available property left on the east side, opposite the City of St. Louis, adjacent to the Eads Bridge? A. Yes, sir.

Q. Of course, I don't mean it covered the entire river front. What is the distance between the northern limits of the Wiggins Ferry Company property on the east side, and the Merchants' Bridge approach, if you know? A. I couldn't say. I don't know.

Q. How far south of the Eads Bridge does the Wiggins Ferry Company property extend? A. I couldn't answer that. I know they have property, but just the extent of it I couldn't answer.

Q. Are you familiar with the location of the terminals of the Wiggins Ferry Company on this side? A. No, sir.

Q. Do you know how many hundred acres of land they owned altogether at the time of the purchase? A. Oh, I should say between eight and nine hundred acres.

Q. On both sides of the river? A. On both sides of the river.

Q. Have you any idea as to how those eight or nine hundred acres were divided, on the two sides of the river? A. The bulk of it was on the other side.

Q. Whereabouts on this side was their land located? A. They had a piece of property down in South St. Louis, quite a large piece, and then they had some property in North St. Louis.

Q. What is the extent in mileage of the trackage of the Terminal Railroad Association, and its controlled and operated properties, now? A. I do not know.

Q. Have you any idea? A. No, sir.

Q. Do you know what it was two or three years ago, after the purchase of the Wiggins' Ferry Company? A. I couldn't answer that.

Q. I will get you to state whether or not the Terminal Railroad Association has a double track from the Union Station in St. Louis, Missouri, at Eighteenth to Twentieth Streets, through the city eastward and northward, and over the Eads Bridge to East St. Louis? A. Yes, sir.

Q. I will get you to state what tracks, if any, the Merchants' Bridge Terminal Railway Company has from the Union Station in St. Louis, Missouri, into the State of Illinois, and what course or direction they follow? A. I think the Merchants' Bridge Terminal Railway Company's tracks go in at Seventh or Eighth and Gratiot, and they extend down along the river bank, and across the Merchants' Bridge, up to Carrie Avenue.

Q. From where they strike the river, the Merchants'

Bridge Railway tracks going eastward, do they run along the river front, northward to the Merchants' Bridge? A. They are on the elevated, but on the river front.

Q. Their structure runs adjacent to the river? A. Yes, sir.

Q. At Eighth and Gratiot Streets what connection is made with the Merchants' Bridge Terminal Railway Company, and other tracks? A. It is made there with the Terminal Railroad Association, for Union Station entrance.

Q. What belt lines, if any, does the Terminal Railroad Association control, on this side of the river? A. They have two; an inner and an outer belt.

Q. Describe the location of that inner belt? A. The inner belt comes off the river bottom, I think about Bircher Street, and goes across the country.

Q. That is north, above the Merchants' Bridge? A. Yes, sir, and it connects out on the Wabash tracks, on Page Avenue.

Q. In this city? A. Yes, sir, in this city.

Q. That is the end of the inner belt? A. Yes, sir.

Q. And where does the outer belt extend? A. The outer belt extends from the junction with the Missouri Pacific and Frisco tracks, down south, and then it runs north, and comes through the M— Valley, where it crosses the Wabash, and it was intended to go down to a junction with the Burlington Railroad at Prospect Hill.

Q. How much has been built? A. I should say half of it.

Q. Then it does not make the connection north? A. No, sir.

Q. Has the Terminal Railroad Association freight and passenger depots in the City of St. Louis? A. Yes, sir.

Q. What passenger stations has it it? A. Union Station.

Q. And what other? A. One down on Washington Avenue.

Q. At the west approach of the Eads Bridge? A. Yes, sir.

Q. Any other? A. Not in St. Louis, I believe.

Q. Now, what freight stations have they? A. They have those warehouses down on Poplar Street, between Seventh and Eighth, I believe it is.

Q. They are extensive? A. Quite extensive.

Q. Do you know the size of them? A. No sir.

Q. They are for the receiving, loading and unloading of freight? A. Yes, sir.

Q. What other real estate has the St. Louis Terminal Railroad Association in this City? A. They own some property between Grand Avenue and Twenty-third Street.

Q. What is the character of that? A. Well, it is not being fully utilized. It was intended for yard room. One portion was bought from the Pullman Company, and was intended to be the repository of the passenger coaches. But the Company failed in securing legislation to enable it to cross Atlantic Avenue, and has never been able to utlize that property.

Further west it has some property, near Grand Avenue, which it has been able to only partly utilize, on account of defective entrance.

Q. It is all located in the Mill Creek Valley? A. Yes, sir, in the Mill Creek Valley.

Q. Is there any other real estate that the Company owns in this City? A. I don't recall any; except, possibly, down there at the Washington Avenue entrance. I think we own some property there, on both sides of the entrance to the bridge.

Q. Does the company own the stock of any real estate corporation that owns real estate in the City? A. Yes, sir. In order to perfect the right-of-way, when the plan was to run off the elevated to the Eads Bridge, a company was

formed called the "Terminal Realty Company," which went to work and bought this right-of-way.

Q. How much of that stock is owned by the Terminal Railroad Association? A. It is all owned by it.

Q. How much property did they purchase then? A. About one million dollars' worth.

Q. In front feet, about how much did it cover, if you have any idea? A. Oh, fifteen hundred to two thousand front feet.

Q. On the levee on Main Street? A. Some on the levee, and some on Main.

Q. Some on both streets? A. Yes, sir, both.

Q. Now with reference to the Union Station, what is the character of that station, in a general way—large or small? A. It is a very large station.

Q. One of the largest in the country, isn't it? A. Yes, sir.

Q. It is controlled by a corporation known as the Union Station Company? A. No, sir, it is part of the Terminal Railroad Association.

Q. No independent corporation? A. No, sir.

Q. I thought there was a Union Station Company, and the Terminal Railroad Association owned stock in it? A. No, sir.

Q. It is simply owned by the Terminal Railroad Association? A. Yes, sir.

Q. How is that station operated? Upon what basis do the roads use it? A. I think they pay the cost of maintenance, and then a percentage on the cost of the station and property.

Q. A percentage on the cost of the station? A. And the property.

Q. As a rental for it? A. As a rental.

Q. And the cost of maintenance? A. Yes, sir.

Q. Do you know what it is valued at, in that calculation?

A. I don't know, since all of these improvements have been made.

Q. What was it prior to that? A. Six and a half million dollars.

Q. Did that include the station alone, or the station and the sheds? A. The ground, everything.

Q. Out to the mouth of the station, where you strike the tracks? A. Yes, sir.

Q. And the railroad companies, respectively, paid on a wheelage basis, their proportion of that? A. Yes, sir, on a wheelage basis.

Q. Please explain what you mean by a "wheelage basis?" A. Per car, instead of per capita.

Q. They pay in proportion to the number of cars they run in? A. Yes, sir.

Q. Do you know the amount of the bonded indebtedness on the Terminal property at this time? A. About $35,000,000.

Q. That is authorized or issued? A. That is outstanding.

Q. Issued? A. Yes, sir, issued.

Q. How much is authorized as bonded indebtedness? A. $50,000,000.

Q. Of that $50,000,000, you say about $35,000,000 have been issued? A. Yes, sir.

Q. This issue of $50,000,000, is it a first mortgage upon all property owned, leased, or controlled by the Terminal Railroad Association of St. Louis? A. No, sir.

Q. How much prior lien is there held of this $50,000,000? A. About $17,500,000.

Q. What does that $17,500,000 represent? What kind of indebtedness? Is it on all the properties of the Terminal Railroad Association, as it existed prior to the issue of the $50,000,000, or is it indebtedness with the subsidiary companies that go to make up the present Association, at the

time their ownership or control was acquired by the Terminal Railroad Association? A. I think that includes indebtedness of every kind. That is, the original indebtedness, and the underlying indebtedness.

Q. Please explain what you mean by "original indebtedness?" A. For instance, our present bond issue is $50,000,000; now we have an underlying indebtedness of $17,500,000—

Q. That means a prior indebtedness? A. Yes, sir. And a reservation is made of this $50,000,000 issue, of a sufficient amount to protect the underlying indebtedness.

Q. You reserve $17,500,000? A. Yes.

Q. If you have reserved that, there would not be but $35,000,000 issued? A. Yes, practically.

Q. Some of the $17,500,000 must have been retired? A. Where you make that reservation you cannot use it for any other purpose. Of course, you wouldn't have to pay both series of bonds, the underlying and the reservation, too. The reservation will take care of the underlying.

Q. But I understood you to say there were $35,000,000 already outstanding? A. I mean by that, some of that is reserved.

Q. Some of the $35,000,000? A. Yes, sir. To protect the underlying indebtedness, but not available for the purposes of the company.

Q. Is the $17,500,000 reserved out of the $35,000,000 issued? A. Yes, sir.

Q. Have there been $35,000,00 of bonds sold? A. Yes, sir. I am using that figure approximately. Of course, the underlying bonds have not been sold. That would leave us about $18,000,000 of bonds that have been sold.

Q. The difference between whatever the underlying bonds are, and the amount that have been sold? A. Yes, sir.

At this point the further hearing of testimony was by consent of counsel adjourned to Friday, October 5, 1906, at ten o'clock, a. m.

St. Louis, Mo., Oct. 5, 1906.

Met pursuant to adjournment as above on Friday, Oct. 5, 1906, at ten o'clock a. m., in the Federal Building, in the city of St. Louis, Mo.

Present parties as before.

The following proceedings were had:

A F. BUENTE, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROWS

Q. State your name, residence, and occupation? A. A. F. Buente; Granite City, Illinois.

Q. What is your business? A. Dry goods, furnishing goods, and shoes.

Q. How long have you lived over there? A. In Granite City?

Q. Yes. A. It will soon be ten years.

Q. How far are you from the down-town business district in St. Louis? A. I think they call it six miles to St. Louis.

Q. Do you buy any goods at wholesale in St. Louis? A. Yes, sir.

Q. How do you get them over to Granite City? A. Some I haul myself; some I send by the Merchants' Terminal; some by the St. Louis & East St. Louis Express; and some by the Star Express—different ways.

Q. Do you ship any quantity of goods on the railroads? A. Sometimes as high as fifteen or twenty cases of shoes, and sometimes less.

Q. Is there a schedule of rates, freight charges, on the

railroads? A. Yes, sir, I think they charge five cents per hundred.

Q. Is there any minimum charge, regardless of the rate? A. I cannot say. I never have had such a package sent by the Merchants' Bridge Terminal Railway Company.

Q. Have you any expense bills with you? A. Yes, sir, I have two of them here. I have more, but not here.

The expense bills produced by the witness are hereto attached, and marked "Expense Bills of A. F. Buente."

A. J. KAHLE, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROWS

Q. State your name, residence, and occupation? A. A. J. Kahle; Granite City, Illinois; paint, paper and hardware business.

Q. Do you buy goods at wholesale in St. Louis? A. Yes, sir.

Q. How do you get your goods to your place of business in Granite City? A. Mainly by the Merchants' Bridge Terminal Railway Company, and some few by the Electric Express, on urgent orders.

Q. Where are those goods billed from and to? A. From St. Louis, here, to Granite City.

Q. St. Louis, Missouri? A. Yes sir, from St. Louis, Mo., to Granite City, Ill.

Q. Do you know anything about what the rates are? A. On just a single package, the smallest package is twenty-five cents, and over that it is five cents a hundred.

Q. Have you any of your expense bills? A. I have. Some of the opening of stock, and some of recent date. Here are some for the latter part of last year (producing papers), and here are some for this last month.

CROSS-EXAMINATION, BY MR. WATTS:

Q. On what class of merchandise would the five cent rate apply? A. If you have a single package, some one small—

Q. I said the five cent rate. A. As near as I can figure it, when we get a bunch of hardware, paper, paint, lead or oil, it is figured at five cents per hundred.

Q. That is on general merchandise? A. Yes, sir, I think that is what it is figured at.

The expense bills produced by the witness are hereto attached, marked "Exhibit Kahle Expense Bills."

MAX STERN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A. Max Stern; St. Louis, Mo.; wholesale hat business.

Q. Where is your place of business? A. Eleventh and Washington Avenue, the Rothschild Hat Co.

Q. How long have you been in business here? A. Over forty years—that is, the concern has.

Q. Does your house handle goods in and out of East St. Louis from and to St. Louis? A. Yes, sir.

Q. What method do you have for getting your goods across from East St. Louis? A. We have been employing one teamster for a great many years.

Q. What is the reason for that? A. Simply to facilitate delivery, I suppose.

Q. Is there any question of time in the matter? A. Time may have been originally involved, but we have been hauling our freight across for something like fifteen years, or

more, possibly. Of course, it is a matter strictly of convenience and economy to ourselves.

Q. Do you know whether or not the facilities for delivering goods, and shipping them out of St. Louis, has in any way affected the trade territory in your line in the State of Illinois? A. You mean on outgoing shipments?

Q. Yes, I said outgoing shipments. A. Yes, sir, I think it has, very materially.

DIRECT EXAMINATION OF JULIUS S. WALSH, CONTINUED, BY MR. CROW:

Q. I believe you stated Wednesday, Mr. Walsh, that you first became connected with the Bridge Company sometime about the year 1875, in the neighborhood of that time? A. Yes, sir.

Q. Do you remember the purchase of the stocks of the subsidiary companies, that had been organized between 1875, the year of the opening of the bridge, and 1881, by Mr. Jay Gould—the Union Railway & Transit Company on this side of the river, and the two Terminal Railway Companies—or maybe it was a little later.

Mr. Watts: The question assumes that Mr. Gould bought those stocks between those times, and, as a matter of fact, the witness did not so testify.

Mr. Crow: He did not so testify. Perhaps he did not purchase them so early. He purchased those stocks, and there were $7,000,000 of bonds.

Q. Regardless of the dates, do you remember the acquisition by Mr. Gould of those subsidiary companies that operated in connection with the bridge? A. Those properties were secured by Mr. Gould, and turned into the Terminal Railroad Association.

Q. Do you remember about the time that happened? It was prior to the consolidation in 1889? A. I could not state that with any degree of accuracy.

Q. Without being accurate about the date, it was about that time? A. About that time.

Q. About that time, or prior thereto? A. Yes, sir.

Q. As a matter of fact, I think it was in 1886 he purchased, and then in 1889 the consolidation occurred.

Q. Do you know to whom those stocks were transferred by Mr. Gould? A. No, sir.

Q. I will ask you if those stocks were not put into the Terminal Railroad Association when it was formed in 1889—the property? A. I don't think I was connected with the property when the Terminal Railroad Association was formed.

Q. Weren't you connected with the Tunnel Company at that time? A. That was just simply a formal organization.

Q. The Tunnel Company proper is still in existence, isn't it? A. Yes, sir.

Q. Nothing but a lease has ever enabled the railroad companies to control the Tunnel, and that was one of the constituent properties that went into the consolidation—that is, the lease on that? A. Yes, sir; the lease on that.

Q. Do you know what railroad companies promoted that consolidation that form the Terminal Railroad Association of St. Louis? A. I think there were six at that time.

Q. Do you remember their names? A. The Wabash, Missouri Pacific, Iron Mountain, Louisville & Nashville, Ohio & Mississippi, and the Big Four.

Q. Under what name does the Ohio and Mississippi operate now? A. The Baltimore, Ohio & Southwestern.

Q. It was part of that system? A. Yes, sir.

Q. The Vandalia, or the Pennsylvania, as it is generally known, did not go into that consolidation? A. They declined. They expected to go in, but for reasons of their own they declined.

Q. Do you know why? A. No, sir.

Q. Did you afterwards learn why? A. No, sir.

Q. Do you know whether they had formed an arrangement with the Merchants' Bridge Terminal Railway Company? A. I do not.

Q. Do you know what official of the Pennsylvania Railroad Company represented that company in the negotiations prior to the consolidation? A. No, sir, I don't recall.

Q. After this consolidation, you became connected again with the Terminal Railroad Association, in 1892, or 1893? A. Yes, sir.

Q. And in what capacity, then, as a director? A. I think I was Vice-President, without being a director.

Q. Do you know whether or not the Terminal Railroad Association, through purchase, lease or otherwise, in the year 1893, acquired control of the Merchants' Bridge Terminal Railway, or any interest in it? A. Yes, sir.

Q. Will you please state the extent of that control, and the manner in which they acquired it? A. They bought a majority of its capital stock, and then entered into an agreement, I believe they called it the "modus vivendi," whereby each company had the right to use the tracks of the other, and the Terminal Association was to build into the Union Station, from Eighth and Gratiot Streets, so as to permit trains coming over the Merchants' Bridge to enter the station.

Q. Up to that time, how had trains coming over that bridge entered the Union Station? A. They hadn't entered it at all. There were some physical obstructions there. They had to go over the warehouses of the Missouri Pacific and Frisco.

Q. They had been prevented from coming in? A. I presume so.

Q. Who controls the majority of the stock of the Merchants' Bridge Terminal Railway Company now? A. The Terminal Railroad Association.

Q. Is it in the physical possession of the Terminal Rail-

road Association? A. I don't know whether it is or not, or whether it was deposited with the Central Trust Company.

Q. As part of the collateral on the general mortgage? A. I am not sure of that.

Q. You have been President of the Terminal Railroad Association, or were, for some years? A. Yes, sir; I was.

Q. Did the Terminal Railroad Association vote the stock at the meetings, through representatives of the Merchants' Bridge Terminal Railway Company? A. I don't know that.

Q. The Merchants' Bridge Terminal Railway Company and the Terminal Railroad Association of St. Louis had had a common traffic officer in the person of Mr. Penney, for a good many years? A. Yes, sir.

Q. And the rates have been the same for the same service, on both roads? A. Under similar conditions. The conditions are not similar on both properties.

Q. Not similar? What is the dissimilarity? A. The Merchants' Bridge Terminal Railway Company extends to Granite City, and they haul six to eight miles further than the Terminal Railroad Association proper.

Q. Freight is routed, isn't it, from St. Louis, over either bridge, bound into Illinois territory, at the same rates? A. The same rates, yes, sir.

Q. Coming on down now to the year 1902, at the time of the contest for the control of the Wiggins Ferry Company, I will ask you to state if you remember from whom you first acquired the knowledge that the Rock Island officials were attempting to obtain control of that company? A. Well, I heard rumors on the street, and shortly after hearing those rumors, Mr. Alonzo C. Church and Mr. Philip C. Scanlon, who are sons of Mrs. Mary Scanlon, came into my office and stated that the Wiggins Ferry Company was about to be sold at, I think, five hundred dollars a share, and that they were very much dissatisfied with the arrange-

ment, and wanted to prevent the sale, if they could; and if they couldn't prevent the sale, they wanted a higher price for their stock; they didn't think five hundred dollars a share was sufficient.

I asked them how much stock they could get together, and they told me, I think, a little over one quarter of it. I told them I would let them know in a very few hours what I could do with it.

So I immediately took up, by telegraph or wire, the question with the various proprietary lines, and having received sufficient assurances to warrant me in going ahead, then I got the Mississippi Valley Trust Company, as agent of the proprietary lines, to go into the field and buy the stock.

Q. Did you communicate with all of the proprietary lines? A. Yes, sir.

Q. How many were there at that time? A. Eight.

Q. What two had been added besides the six you mentioned awhile ago? A. The Frisco and the Vandalia.

Q. Do you know the respective dates at which the Frisco and the Vandalia came into the Terminal Railroad Association? A. No, sir.

Q. Will your records disclose that? A. Yes, sir.

Mr. Watts: I will give you those dates, General Crow, if you wish them.

Mr. Crow: Q. Did you receive responses from all of the proprietary lines, eight in number, authorizing you to go forward? A. Yes, sir.

Q. At that time? A. I got enough to go ahead, and the balance came in later—that is, within a few days.

Q. What was the first line that directed you to go forward? A. The Missouri Pacific, Iron Mountain, and Wabash. Mr. Ramsay happened to be in New York at the time, was familiar with the situation out here, and under his advice Mr. Gould telegraphed us to go ahead and make the purchase.

Q. You purchased the stock; and was delivery made to you in St. Louis of the stock? A. It was made to the Mississippi Valley Trust Company.

Q. Do you know about the number of shares that were delivered? A. You mean that we bought for these lines?

Q. Yes. A. I think it was about fifty-seven hundred shares.

Q. A little over a majority? A. Yes, a little over a majority.

Q. Was that stock delivered in a bunch to somebody by the Mississippi Valley Trust Company? A. I couldn't answer that.

Q. You don't know? A. No, sir.

Q. Who would know about that, Mr. Walsh? A. I think Mr. Jones would know about that.

Q. Breckenridge C. Jones? A. Yes, sir.

Q. Before the matter was closed up with your company, wasn't there a meeting of the executive officials, or some one of them, of the interested roads, here in St. Louis? A. Yes, sir, I think there were several meetings.

Q. Were those meetings held at your place of business, the Mississippi Valley Trust Company? A. Yes, sir.

Q. Did you attend those meetings? A. Yes, sir.

Q. You attended as the President of the Terminal Railroad Association? A. I attended as the Mississippi Valley Trust Company man.

Q. You attended as President of the Mississippi Valley Trust Company? A. Yes, sir, acting as agent of these roads.

Q. What officials, representing what roads, attended the first of these meetings? A. Well, this transaction, you know, was spread over some time, and railroad men are not very long in one place, so at different times— Well, Mr. Harding, Mr. Ramsay, Harry I. Miller—

Q. Whom did Mr. Miller represent? A. He represented

the Burlington—No, not the Burlington, the Pennsylvania Road, the Vandalia.

Mr. Watts: That is not Mr. Henry Miller.

Mr. Crow: He said Harry I. Miller.

Q. Did anybody else attend that first meeting? A. I think Major Warner came to a few of those meetings.

Q. Where does Mr. Miller live? A. Mr. Miller is now the General Manager of the Chicago & Eastern Illinois Railroad Company, with headquarters in Chicago.

Q. What was the subject of consideration at that meeting? A. Well, the main thing was to acquire the stock.

Q. Was that before the stock had been purchased? A. I am speaking about the meetings that were held while this trade was on.

Q. While the contest was on for the control of the Wiggins Ferry Company? A. Yes, sir.

Q. Did you have any more meetings before the controversy was settled, as to who had acquired the majority? A. I think after the purchase was over, the meetings were transferred to New York, a point more convenient for the convenience of the executive officials of the various roads.

Q. Did you attend those meetings? A. Yes, sir.

Q. Who attended, and what was the date of, the first meeting of the executives in New York? A. I cannot give you the date.

Q. Just approximately? A. It was along the early summer and autumn of 1902, I think.

Q. What officials of what roads attended that first meeting? A. Well, there was Mr. Ingalls of the Big Four; Mr. Jeffreys was the representative of the Missouri Pacific and Iron Mountain; and I think Mr. Ledger also attended in conjunction with Mr. Ingalls. And Mr. Milton H. Smith of the Louisville & Nashville.

Mr. Watts: Your question is prior to the acquisition of the Wiggins Ferry Company stock?

Mr. Crow: No, sir, he said afterwards.

A. (Continued) Mr. E. S. Rouse of the M. K. & T. After that purchase, there was an effort made to bring in all of the lines coming into St. Louis, and I think leading up to that the other roads attended these meetings.

Q. The six other roads that subsequently came in? A. Yes, sir.

Q. Can you tell me who represented those roads at those meetings? A. I mentioned some of them; Rouse of the M. K. & T.; Mr. Yoakum of the St. Louis & San Francisco; Mr. McCrea of the Pennsylvania; Mr. Millott, of Indianapolis, of the Vandalia.

Mr. Watts: Mr. Crow, would you like me to refresh Mr. Walsh's memory?

Mr. Crow: Yes, sir.

Mr. Watts: Mr. Spencer of the Southern? A. Yes.

Q. Mr. Felton of the Chicago & Alton? A. Yes.

Q. Mr. Fish of the Illinois Central? A. Yes.

Q. Mr. Harris of the Burlington? A. Yes.

Mr. Crow: Q. Well, representatives of all the roads that now form the St. Louis Terminal Association, attended those meetings? A. Yes, sir.

Q. What was the subject of consideration there? A. It was the admission of what was known as "tenant lines" into the Terminal Association; and then about that time the St. Louis Exposition was on, and it was important and necessary that the Terminal Railroad Association should increase its facilities, and in order to do that we had to raise some money. Those were about the subjects that came up.

Q. Who represented the Rock Island at those meetings? A. Mr. Leeds.

Q. Was the subject of the disposition of the Wiggins' Ferry Company stock, that had been purchased by the Mississippi Valley Trust Company, considered? A. Yes, sir.

Q. Was the disposition of that stock settled at that meet-

ing, or subsequent meetings? A. At some of those meetings it was settled. The Terminal Railroad Association, at that time, had an indebtedness of about $17,500,000, and in order to raise enough money to provide for the future, they thought they would authorize a mortgage for $50,000,000. Of course, all the properties of the Terminal Railroad Association were subject to the lien of the two mortgages ahead of this consolidated mortgage, and those mortgages provided for the lien of subsequently acquired property. So, in order to make this $50,000,000 issue, make it attractive to the public and purchasers, the discussion was had there about the Wiggins Ferry Company; and it was agreed among them that all of that stock should be deposited as additional security for this consolidated mortgage.

Q. That was deposited with the trustee, then, in order to relieve it from becoming subject to the terms of the older mortgages? A. Yes, sir.

Q. As "afterwards acquired property?" A. Yes, sir.

Q. The agreement had been reached between these fourteen roads as to the disposition of the stock among the roads, prior to the time this arrangement had been made? A. Yes, sir, the fourteen roads each took one-fourteenth of the Wiggins Ferry Company stock, and deposited it with the Central Trust Comany.

Q. Then the stock really became a part of the Terminal Railroad Association property—that is, it was utilized as an asset of the Terminal Railroad Association? A. It does not go to the Terminal Railroad Association on the expiration of the mortgage.

Q. No, but it was utilized as an asset of the Terminal Railroad Association, in getting the money? A. Yes, sir, as an additional security.

Q. There are some other corporations whose stock was a first lien, whose mortgage was a first lien, the East St.

Louis & Carondelet Railroad Company? A. That is the old Conlogue road, I believe.

Q. Where does that run to and from? A. That runs from the stockyards, down to a point opposite the town of Carondelet.

Q. The stockyards north of East St. Louis? A. Yes, sir.

Q. Do you know about the length of that road? A. I should say fourteen to fifteen miles. It has a branch over towards what is called Falling Springs.

Q. That is a short line? A. Yes, sir.

Q. Does that road intersect any connecting carriers on main lines of road? A. Yes, sir, I think it does.

Q. It crosses most of those lines, doesn't it? A. It would be only the lines on the south side of the bridge—No, it would intersect lines on the north side of the bridge, too.

Q. It is practically a belt around a portion of East St. Louis? A. Yes, sir.

Q. And it has practically connection with the lines that cross it? A. Yes, sir.

Q. You don't know the exact lines it touches, do you? A. No, sir; I couldn't say.

Q. Do you know the capital stock of that road?

Mr. Watts: I think it is $1,200,000.

Mr. Crow: Q. Who owns that stock now? A. The Terminal Railroad Association.

Q. Do you know when they acquired it? A. I think in 1902, or thereabouts.

Q. Prior to the purchase of the Wiggins Ferry Company stock? A. I think it was acquired at the time the Pennsylvania Road came into the Terminal Association—I mean the Vandalia. The Vandalia coming into the Terminal Railroad Association, thought it best that that subdivision of their railroad should dispose of this property, and the Terminal Association bought it.

Q. They had owned it? A. Yes, sir.

Q. Do you know how the Terminal Railroad Association paid for that property? A. They paid for it in money.

Q. Where did they acquire that money? A. Out of the proceeds of the sale of bonds.

Q. Was there a new issue of bonds? A. That was this $50,000,000.

Q. That was the $50,000,000? A. Yes, sir.

Q. Do you know how much was paid for it in bonds? A. It was paid for in money.

Q. How much money was paid for it? A. $1,250,000.

Q. Do you know where the Illinois Transfer Company is located? A. Yes, sir.

Q. Whereabouts? A. It is one of the belt lines of the Terminal Railroad Association, in East St. Louis.

Q. Do you know what points it reaches, and in what general direction it runs? A. I think it runs from a connection with the Illinois Central on the south.

Q. South of East St. Louis? A. In East St. Louis; the southern terminus of this Transfer Company; and it belts around the city of East St. Louis, and joins the property of the Merchants' Bridge Terminal Railway Company.

Q. On the north of East St. Louis? A. Yes, sir.

Q. Do you know about the length of it, approximately? A. Six or eight miles.

Q. Has it any branches? A. No branches. It has its switches, of course.

Q. It is also an east side belt line, is it? A. Yes, sir.

Q. Do you know the amount of the capital stock of that company? A. No, sir, I do not.

Q. Do you know when your company acquired it, if they did acquire it? A. They built it.

Q. Do you know the time it was built? A. Oh, along about 1900.

Q. Do you know the approximate cost of it? A. I cannot recall now; but enough to construct it.

Q. Do you know where the Madison & East St. Louis Belt Railroad is located? A. Yes, sir.

Q. Where is that? A. That is a belt into the Niedringhause factory, in Granite City, and comes out to a connection with the Merchants' Terminal.

Q. At what points does it connect with the Merchants' Terminal? A. At or near Granite City.

Q. It doesn't go up to the east approach of the Merchants' Bridge? A. No, sir.

Q. Do you know the length of that property? A. Two or three miles.

Q. Do you know who built it? A. Niedringhaus built it.

Q. Do you know who operates it now? A. The Terminal Railroad Association.

Q. When did they acquire it? A. Oh, about that same time, 1900, around there—or maybe a little later.

Q. Do you know what they paid for that? A. It was not a very large amount.

Q. Did the Niedringhaus Company operate it at any time? A. I think they did at one time.

Q. Did any one else operate it before that? A. No, sir.

Q. It had just the two owners, the Terminal Railroad Association, and the Niedringhaus Company? A. Yes, sir.

Q. Do you know who built, and when it was built, the St. Louis Belt & Terminal Railway Company? A. That is the outer belt, in this city?

Q. I think it is. A. We acquired that by purchase.

Q. From whom did you purchase it? A. We purchased it from the Interstate Car & Transit Company, and from the St. Louis & San Francisco Railroad Co., and the Missouri Pacific Railroad Company.

Q. It was a union of different properties? A. Well, it was intended to serve those three interests.

Q. Was it owned separately by those three interests? I mean, was it disconnected pieces of property? A. It was an independent piece of property.

Q. What I mean is, was the ownership joint in the three interests you have mentioned? A. Their ownership was represented by stock, but in just what proportions I do not recall.

Q. The road reached from where to where when you purchased it? A. It was in course of construction.

Q. How much of it was built? A. I think they had graded pretty much the whole of it, and track was laid in some places.

Q. It was intended to go around, and reach the river up about the Merchants' Bridge? A. Yes, sir.

Q. Was that connection ever made? A. No, sir.

Q. Did you do any work on it after you acquired it? A. they are doing some work on it now.

Q. Whereabouts, in the county? A. Yes, sir, in the county.

Q. That was in 1902? A. Yes, sir, I think about that time.

Q. You ceased operations on that for two or three years, didn't you? A. Well, it never was put into operation.

Q. I mean, in the way of building it; you ceased building it? A. Yes, sir.

Q. When did you begin again? A. In the last few months.

Q. Was it your purpose to complete the road? A. Not as originally planned, possibly.

Q. What is the change of plan? A. Well, they left off the north end.

Q. That is, to connect with the Merchants' Bridge? A.

Yes, sir. The building of the inner belt made the north end of it useless.

Q. Where does the inner belt reach from and to? A. The inner belt leaves the Merchants' Bridge Terminal's tracks at Carrie Avenue, and then crosses through the city of Granite City and the City of St. Louis to a point of junction with the Wabash Railroad at Page Avenue.

Q. In the City of St. Louis? A. No, sir, I think it is just outside the city.

Q. And there it stops? A. Yes, sir, and uses the Wabash Railroad tracks in.

Q. What is the extent of that mileage? A. Eight or ten miles.

Q. How much mileage has been constructed and is operated on the outer belt of the St. Louis & Terminal Railroad? A. That is taking shape now. We didn't think there was any business there to warrant any large expenditures, until recently the establishment of some industries, and everything, brought it into new life. The Evans-Howard Company, I believe, are going to move their fire-clay plant there, and they handle a large amount of material; and that may lead to the establishment of other industries; and the chances now are that they will complete it.

Q. After you purchased it, you ceased to build it? A. No, sir, we went on with the operation of it.

Q. But you didn't extend the building of it? A. The road was graded, and we continued laying ties and rails.

Q. Up to what points? A. That I cannot tell you.

Q. Then, recently, you began the completion of it to some particular point? A. Yes, sir.

Q. Who owns the stock of the Terminal Realty Company? A. The Terminal Railroad Association.

Q. That is a real estate corporation? A. Yes, sir.

Q. Are its real estate holdings entirely in the City of St. Louis? A. Yes, sir, entirely.

Q. What is the capital stock of that company? A. It is somewhere, I think, about a hundred thousand dollars, or less.

Q. The company owns very extensive real estate interests? A. Yes, sir.

Q. As you said yesterday, principally on the waterfront, and adjacent thereto, in this city, below the Eads Bridge? A. Yes, sir.

Q. On the companies you have mentioned, Madison & East St. Louis Belt Railroad, St. Louis Belt & Terminal Railway Co., Terminal Realty Company, and the Illinois Transfer Company—the $50,000,000 of bonds were a first mortgage? A. Yes, sir, a first mortgage.

Q. And all of the other property, then owned, or subsequently to be acquired, the $50,000,000 was subject to the prior lien of $17,500,000? A. Yes, sir.

Q. Do you know whether or not there was any record kept of the proceedings of the meetings of these various railroads, when these various arrangements were made, with reference to the depositing of the stock of the Wiggins Ferry Company with the Central Trust Company of New York, and the agreements entered into concerning the use and operation of this property? A. I think there was a record of it.

Q. Do you know who would have possession of that record? A. No, sir.

Q. Do you know who kept it at the time? A. Well, at those meetings you know there are various secretaries appointed. Some one of our number would keep it.

Q. Do you know whether those proceedings, or a copy of them, are in the possession of your company—that is, the Terminal Railroad Association? A. No, sir.

Q. Do you know whether or not there was any written agreement between these proprietary lines, with reference to the depositing of the ten thousand shares of the Wiggins

Ferry Company stock with the Central Trust Company of New York? A. Yes, sir.

Q. Do you know who signed that agreement? A. I believe it is part of the record, isn't it?

Q. It is not a part of the record here.

Mr. Watts: I will furnish General Crow with a copy of that agreement.

Mr. Crow: It was signed by all of the proprietary lines, and also by the Central Trust Company of New York?

Mr. Watts: I think so.

Mr. Crow: Q. You were not a party to that agreement, officially? A. No, sir.

Q. And the Terminal Railroad Association was not a party?

Mr. Watts: I don't recall whether it was or not. It will appear on the title page if it is.

Mr. Crow: Q. You said there were $17,500,000 of prior liens: Could you enumerate what those liens represent? A. There was a first mortgage of $5,000,000.

Q. Made by what company? A. Made by the Terminal Railroad Association.

Q. Wasn't that $7,000,000? A. Possibly it was $7,000,000. Including $5,000,000 to Mr. Gould.

Q. And $2,000,000 to pay for improvements? A. Yes, sir. I was coming to the second mortgage, where reservation was made as to this first one. And then, I think, $2,000,000 for the Merchante' Bridge, and $3,500,000 for the Merchants' Terminal.

Q. First, there was $7,000,000 issued by the Terminal Railroad Association upon its organization, or soon thereafter, in 1889? A. Yes, sir.

Mr. Watts: If you have no objection, General Crow, I should like to have Mr. Walsh state the date of that mortgage, October 1, 1889.

Mr. Crow: That was the $7,000,000?

Mr. Watts: Yes.

Mr. Crow: Q. $5,000,000 of those bonds were turned over to Mr. Jay Gould for money he had advanced in taking up the stock of the five subsidiary companies who had been operating the bridge? A. Yes, sir.

Q. And $2,000,000 retained for the purpose of the new corporation, the Terminal Railroad Association? A. Yes, sir.

Q. What is the date of the $1,200,000 mortgage?

Mr. Watts: November 10, 1894.

Mr. Crow: Q. What did that represent? A. You mean?

Q. $7,000,000 represented the prior loan? A. Yes, sir.

Q. And was retained to take that up? A. You mean how that was expended?

Q. Yes. A. In the acquisition and purchase of property.

Q. $5,000,000? A. Yes, sir.

Q. What property was purchased with that, if you remember? A. I think that includes the Union Station.

Q. The St. Louis Union Station? A. Yes, sir.

Q. The ground and the building: and does it include the trackage appurtenant to it, up to the mouth of the shed? A. Yes, sir.

Q. That covered that expense, did it? A. Yes, sir.

Q. When was the next mortgage issued? A. The next mortgage of the Terminal Railroad Association was in 1902. That was the $50,000,000.

Q. What goes to make up the difference between the $12,000,000 and the $17,500,000? A. The $17,500,000 includes $2,000,000 on the Merchants' Bridge and $3,500,000 on the Merchants' Terminal.

Q. $2,000,000 of bonds that have been guaranteed by the Terminal Railroad Association, under the terms of the contract of 1893? A. Yes, sir.

Q. And $3,500,000 on the Merchants' Terminal Railway Company? A. Yes, sir.

Q. Making $17,500,000? A. Yes, sir.

Q. Do you know the rate of interest that these bonds drew, the bonds of the various issues? A. I think the rate on the Merchants' Bridge is six per cent; the Merchants' Terminal is five per cent; and, then, our Terminal Railroad Association, I think that is five per cent, also.

Mr. Watts: The first is four and a half. A. The second would be five, then.

Mr. Crow: Q. And the Merchants' Terminal five and six? A. Yes, sir.

Q. And the $50,000,000 is four per cent? A. Yes, sir.

Q. You stated yesterday that $35,000,000 had been issued of the $50,000,000? A. Yes, sir.

Q. Of course, you include in that the $17,500,000, or whatever sum you still retain of that $35,000,000, to take care of the prior lien? A. Yes, sir.

Q. That would leave about $17,500,000 that has been expended? A. Yes, sir.

Q. And what does that expenditure represent? A. That represents the purchase of some of the properties you mentioned here to-day.

Q. The Conlogue road? A. Yes, sir. And then the changes in the Union Station, and the large purchases of property for yard room.

Q. Your records will show the details of that? A. Yes, sir.

Mr. Crow: Mr. Watts, will you furnish me that, if I require it? You can furnish that better and more accurate than the witness.

Mr. Watts: Very gladly.

Mr. Crow: Q. Do you know whether or not freight from, say, the Atlantic seacoast, if routed to St. Louis over

the Terminal Railroad Association property, to points west of St. Louis— A. Do I know anything about it?

Q. Do you know whether freight is shipped that way? A. I am not up in traffic matters. None of the traffic men have ever reported to me.

Q. What official of your road, aside from your traffic manager, would have that knowledge? The traffic manager seems to be out of town at present. A. He would be the proper one.

Q. There is no other official in the department who would have that information?

Mr. Watts: The General Superintendent would probably have the information. A. Yes, sir.

Mr. Watts: And he is in town? A. Yes, sir; but the proper man would be the traffic manager.

Q. But Mr. Burlinghame would probably have that information? A. Yes, sir.

Mr. Crow: Q. Have you any idea of the volume of traffic that is handled over the Terminal Railroad Association? A. Not in cars.

Q. Have you in tons? A. No, sir.

Q. Have you in dollars? A. Yes, sir, the receipts.

Q. What are they, approximately? A. I think last year, three million dollars, or less than three millions.

Q. Do you include in that receipts from the Merchants' Bridge Terminal Railway Company? A. No, sir, they are not in that. That is the Terminal Railroad Association proper.

Q. That does not include the Wiggins' Ferry Company? A. No, sir.

Q. Do you know what the receipts from the Merchants' Bridge Terminal Railway Company were? A. I know the aggregate receipts were about six million.

Q. From the three properties? A. From all the properties.

Q. About six million dollars? A. Yes, sir.

Q. Do you know whether or not the Interstate Car & Transfer Company is engaged now in the business of transferring freight across the river at St. Louis? A. I do not.

Q. You don't know anything about that? A. No, sir.

Q. Do you know who owns the stock of that corporation? A. Yes, sir.

Q. Who? A. The Terminal Railroad Association.

Q. Was it acquired at the time the Belt Railroad was acquired? A. I think I was mistaken about that. I think the Interstate Car & Transfer Company is owned by the proprietary lines— Well, I would rather not answer that.

Q. Who would have the information as to who owns that stock? A. The auditor.

Q. The auditor of your company? A. Yes, sir.

Q. And what is his name? A. Mr.—

Q. You don't know whether that company is operating or not? A. I believe it is, since you ask that question.

Q. Do you know if it is operated in connection with the Terminal Railroad Association property? A. It is operated in conjunction with it.

Q. Do you know whether or not there is any other property, beside the Wiggins Ferry Company, the Merchants' Bridge Railway Company, the Terminal Railroad Association, and the Interstate Car & Transfer Company—if that is the proper name for it—that are now engaged in the transporting of loaded or unloaded cars across the Mississippi River, between Illinois and Missouri? A. No, sir.

Q. You have no knowledge upon that subject? A. No, sir.

Mr. Crow: That is all I wish to ask Mr. Walsh now, but I will recall him later.

R. L. CONNER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A. R. L. Conner; St. Louis, Mo.; Traffic Agent of the Hoyt Metal Company.

Q. In what business is the Hoyt Metal Company engaged? A. The manufacture of mixed metals.

Q. Where is your plant located? A. Granite City.

Q. How long have you been traffic manager of the Hoyt Metal Company? A. Seventeen years.

Q. How many cars a day does that company handle, inbound and outbound freight, at its plant—just approximately? A. Ten or fifteen.

Q. Were they formerly located on this side of the river? A. Yes, sir.

Q. How much coal will this company use a day? A. About two hundred tons.

Q. How is that coal delivered over at your plant in Granite City? At what price? A. I don't know.

Q. You don't know anything about that? A. No, sir.

Q. When did you move the plant from St. Louis? A. About three years ago.

Q. I will get you to state if what is known as the "arbitrary bridge charge" had anything to do with the removal of that plant? A. It did somewhat, at that time.

CROSS-EXAMINATION, BY MR. WATTS:

Q. Where were you located on this side? A. On Clayton Avenue, on the Wabash track.

Q. And the charge for transportation across the river had something to do with your removal to the east side? A. Yes, sir.

E. O. STANARD, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A. E. O. Stanard; St. Louis, Mo.; flour manufacturer.

Q. Where is your plant located? A. Our largest plant is at Alton, Ill.

Q. What is your output there? A. About eighteen hundred barrels a day; and then we have quite a large plant at Dallas, Texas.

Q. Was your plant formerly in St. Louis? A. Yes, sir, it was at the corner of Main and B— street.

Q. When was it removed from there? A. Well, I bought a moderate sized mill in Alton—I guess it was twenty-five years ago—and I finally concluded to enlarge that Alton mill, put it up to seventeen or eighteen hundred barrels, and discontinue milling here in St. Louis. I had an opportunity of leasing, merely the mill itself, to a creamery company, and I could still use the warehouse in connection with my city trade. The flour we needed for this city was all manufactured in Alton, and shipped down here. We sell six thousand barrels a month, and it is all made in Alton instead of here.

Q. Did what is known as the "bridge arbitrary" have anything to do with the removal of your plant from St. Louis? A. Yes, sir, it had a good deal to do with my determination to do my manufacturing on the other side of the river, as perhaps eighty-five or ninety per cent of our flour went east and abroad; and when I took into account the bridge arbitrary, and the fact that I could lease my old mill here at a fair price, I concluded to enlarge the Alton mill to

about eighteen hundred barrels a day, and do my manufacturing there, both for my eastern trade, and city trade here.

Q. Because it was more profitable? A. Yes, sir, it was more profitable.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. Mr. Stanard, you say you bought the Alton mill? A. I bought a comparatively small mill at Alton.

Q. About twenty-five years ago? A. About twenty-five years ago. I don't know exactly the number of years, but in that neighborhood.

Q. When did you begin to enlarge it? A. I haven't the figures exactly, but I think we discontinued manufacturing flour here about ten years ago, or perhaps a little longer than that, and about that time we enlarged the mill at Alton, and put it up to its present capacity.

Q. When you leased your milling property here, in the city, did you lease it to another milling company? A. No, sir, to a creamery company; and the warehouse connected with it we retained for a warehouse here, to bring our Alton flour here.

Q. The coal you use for fuel, comes also from the East? A. Yes, sir.

Q. From Illinois? A. Yes, sir.

Q. The wheat that you use as the staple of your flour comes from practically every direction? A. Every direction. But years ago it used to come more from Illinois than anywhere else, and the transfer across the river was one of the items that made me conclude I would try to avoid it, you know, by having the mill on the other side of the river.

Q. At the time you concluded to enlarge the mill at Alton, you were drawing the principal part of your wheat from the east side? A. Yes, sir; I think the majority of the wheat came from the east side.

Q. And you were drawing all of your coal which you used as fuel from Illinois? A. Yes, sir.

Q. And about eighty-five per cent. of your manufactured product west East? A. At least that, and perhaps more.

Q. Perhaps even more? A. Yes, sir.

Q. Therefore, you concluded that the east would be the place for you to do your manufacturing? A. Yes, sir, that is it.

V. W. FISHER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A. V. W. Fisher; St. Louis, Mo.; General passenger and ticket agent of the Terminal Railroad Association.

Q. How long have you been with the Terminal Railroad Association? A. Since 1889.

Q. Since its organization? A. Yes, sir.

Q. What company were you with prior to that? A. With the lessees, the Wabash and the Missouri Pacific.

Q. The lessees of the Eads Bridge? A. Yes, sir.

Q. And prior to 1881 you were with the Eads Bridge? A. With the Eads Bridge.

Q. And have you been with the Eads Bridge since its opening? A. No, sir, I came to the Eads Bridge in 1878.

Q. What official position with the Terminal Railroad Association do you now occupy? A. The same.

Q. You mean you are the city passenger agent? A. Yes, sir.

Q. Where is your office? A. On the bridge, at Third and Washington Avenue.

Q. Do you have charge of the sale of tickets on the surface of the bridge, and also the Terminal Company, and the

Merchants' Bridge Terminal Railway Company? A. I have not charge of the sale of any tickets; I issue the tickets to the agents that sell.

Q. That is your duty, is it? A. Yes, sir.

Q. You issue tickets for what lines? A. To our ticket agents.

Q. Whom do you call your ticket agents—just simply the Terminal Railroad Association? A. Yes, sir.

Q. Do you issue tickets for the Merchants' Bridge Terminal Railway Company? A. Yes, sir.

Q. Do you issue tickets for Granite City and Madison? A. I do.

Q. And East St. Louis? A. Yes, sir.

Q. What do you call your stock-yards station? A. We call that "The National Stock Yards."

Q. And on this side of the river, do you issue any tickets for points on this side? A. We have no points on this side.

Q. You do not issue tickets from the bridge around to the Union Station, or to any of the lines from the Merchants' Bridge Terminal Railway to the station? A. From the Merchants' Bridge Terminal Railway to Union Station —yes, sir. All tickets are issued the same on the return trip as on the going trip.

Q. Take North Market Street. Is that a station on the Merchants' Bridge Terminal Railway? A. Yes, sir.

Q. Is there a ticket issued from there to the Union Station? A. No, sir.

Q. They use the ticket, coming back from the other side, but there are no tickets issued to points on this side? A. On this side of the river, to the Union Station—No, sir. But there are tickets issued from Granite City and Madison to Union Station, but not on this side of the bridge.

Q. Do you have charge of the issuance of these tickets, from Granite City and Madison to Union Station? A. Yes, sir.

Q. Do your records show the sale of passenger tickets to the various points on the roads? A. No, sir.

Q. What record of the Terminal Railroad Association would show that? A. The auditor's office.

Q. The auditor's office of the Terminal Railroad Association? A. Yes, sir.

Q. Is the auditor of the Terminal Railroad Association, and the Auditor of the Merchants' Bridge Terminal Railway Company, the same—or do you know? A. I cannot say positively.

Q. You don't know about that? A. No, sir.

Q. You have no records, and no knowledge, as to the extent of the ticket sales, in dollars and cents? A. Well, not exactly.

Q. Those tickets you deliver to those agents, they have to account for? A. Yes, sir.

Q. And the tickets they return, together with those they do not return, would aggregate the sales of tickets, wouldn't they? A. Yes, sir.

Q. In that way your records would show? A. I notify the auditor of what I issue to the different agents, and the agents report to the auditor. What they do not sell, and return to him, of course they get credit for.

Q. You are a director in the Terminal Railroad Association? A. No, sir.

Q. You are Inspector of Elections? A. Yes, sir.

Q. And in that capacity, you participate in their meetings? A. Yes, sir.

Q. And have done so for many years? A. A few years, two or three—not longer.

CROSS-EXAMINATION, BY MR. WATTS:

Q. You can state approximately, I think, the amount of sales? I suppose that will be satisfactory to Mr. Crow. A. On the Merchants' Bridge?

Q. Yes. A. I think it is approximately $8,000 a month.

Q. And on the Eads Bridge? A. I couldn't tell you that, because we get no returns for that, except from the stock yards train. The roads take the money for any other ticket that is issued.

Q. The revenue from the stock-yards train goes direct to the Terminal Railroad Association? A. Yes, sir.

Q. What is the revenue from that train? A. $12.50 a day.

Q. How many trains are there? A. There is one train in the morning to the stock-yards, and one in the evening back from the stock-yards to the Station.

Q. Does that train stop at any point between Washington Avenue, on this side of the river, and the stock-yards? A. No, sir; not to take on or leave off passengers. It might be stopped on account of something being in the way.

Q. The train you refer to now is what was referred to in the testimony the other day as "the bull train" to the stock-yards? A. Yes, sir.

Q. And that is operated by the Terminal Railroad Association of St. Louis? A. Yes, sir.

Q. You have been asked about trains of the Merchants' Bridge Terminal Railway Company; those trains run from the Union Station, in the City of St. Louis, to Granite City? A. Some of them.

Q. And others to what points? A. They run from Eighth and Gratiot Streets.

Q. On the west side? A. Yes, sir.

Q. The objective terminal point on the other side is what place? A. Granite City.

Q. For all of those trains? A. Yes, sir.

Q. Are there any intermediate stops? A. Yes, sir.

Q. At what points? A. Washington Avenue, North Market Street, Bremen Avenue, Madison, and then Granite City.

Q. Brooklyn? A. We don't touch Brooklyn.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. Do you have anything to do with the tickets for the surface travel on the Eads Bridge? A. Yes, sir.

Q. Do you issue the ticket for the electric line? A. No, sir.

Q. Just simply for pedestrians and wagons? A. Yes, sir.

Q. Have you any idea what that traffic amounts to? A. Approximately $325 or $350 a day, excepting Sundays and holidays.

Q. It is greater on Sundays? A. It is smaller on Sundays.

Q. And smaller on holidays? A. Yes, sir.

Q. Have you any idea of what proportion of that sum you mentioned would be represented by the wagon and vehicle traffic? A. Well, yes, pretty close.

Q. Just approximately? A. Probably one hundred dollars will cover the foot passenger business, and the balance is wagon traffic.

Q. The majority of people that pass over the bridge, other than in their own conveyances, go on the street-car, don't they? A. Yes, sir.

Q. Have you any idea of the amount of that travel? A. I haven't any idea.

Q. Who could tell about that? A. Of our earnings from that?

Mr. Watts: You mean, the traffic on the street-cars?

Mr. Crow: Yes.

A. The auditor will be able to give those figures. All those figures go to the auditor's office.

Q. That report is made to him? A. Yes, sir.

Q. Do you know who operates the electric line on the bridge, now? A. The East St. Louis & Suburban Railway Company.

Q. Is that the same company that has always operated it? A. What do you mean by "always?"

Q. Since the beginning? A. No, sir.

Q. When did they begin to operate it, the East St. Louis & Suburban Company? A. I don't know exactly; three or four years ago.

Q. Do you know what the fare is across the bridge on the street car? A. From St. Louis to East St. Louis?

Q. Yes. A. No, sir; I don't know the commutation rate, but the regular rates is ten cents, which permits you to go to the city limits.

Q. The city limits of East St. Louis? A. Yes, sir.

Q. Do they issue commutation tickets? A. Yes.

Q. You have nothing at all to do with the freight department of your company? A. I don't know anything about it at all.

GEORGE HENDRICKS, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. George Hendricks.

Q. What is your business? A. Treasurer and cashier of the Wiggins Ferry Company.

Q. How long have you occupied that position? A. As Treasurer, since about 1902.

Q. Did you become treasurer before or after the recent sale of the Wiggins Ferry Company? A. After.

Q. What position did you hold before that? A. Cashier.

Q. How long had you been cashier prior to that time? A. Since about 1885.

Q. What were your duties as cashier? A. Attending to

collecting their freight bills, charges for switching, and transfers.

Q. To whom did you turn in the receipts? A. To the Treasurer.

Q. And who was the treasurer before you were made treasurer? A. Philip C. Scanlon.

Q. Mr. Scanlon was a stockholder in the Wiggins Ferry Company? A. He was, yes, sir.

Q. What are your duties as auditor? A. None at all, I am not auditor.

Q. I mean as treasurer? A. To attend to the receipts and payments of vouchers.

Q. All moneys, drafts and checks pass through your hands? A. Yes, sir.

Q. And the books showing the disbursements and receipts of the Company are supposed to be in your hands? A. Yes, sir, what I handle.

Q. Does anybody else handle it? A. Not moneys. All the money goes through my hands.

Q. And everything that represents money goes through your hands, doesn't it? A. Yes, sir.

Q. Does the St. Louis Transfer Company do business with your company? A. They do, in a way; that is, ferryage business.

Q. Do they do a large and extensive business? A. A pretty extensive business.

Q. Most of the traffic that goes over the line of the St. Louis Transfer Company between Missouri and Illinois passes over on your boats? A. Yes, sir.

Q. How long has that been the case? A. I think since about 1877 or 1878, or somewheres around there.

Q. Do you know whether there is any contract for carriage of the wagons and teams of the St. Louis Transfer Company, between your company and that company? A. I think there is.

Q. Do you know when it was made? A. I don't know the date.

Q. Do you know the year? A. No, sir, I am not in possession of those records. Those records are in the possession of the Auditor.

Q. I will get you to state whether or not the contract gives to the St. Louis Transfer Company any lower or different rate from that given to the ordinary team for a load? A. I believe it does.

Q. What is the difference? A. About seventeen per cent.

Q. How long has that been operative? A. Ever since this agreement or contract was in force.

Q. Do you know how long that has been? A. No, sir, I don't know the date of it.

Q. Was it in operation prior to the sale of a majority of the stock of the Wiggins Ferry Company, in 1902? A. Oh, yes.

Q. Do you know when those settlements are made with the St. Louis Transfer Company? A. They are made monthly.

Q. Are settlements made by the St. Louis Transfer Company with you, as treasurer of the Wiggins Ferry Company? A. Indirectly. The voucher comes in in an indirect way. I handle the check.

Q. Is there a voucher allowing them this seventeen per cent. and passing that to their credit? A. Not exactly a voucher. There is a form of statement that the St. Louis Transfer Company makes up, of the number of tickets they use, to and from; that is in the form of a letter-head; so many tickets used at such a price, less seventeen per cent.

Q. I believe you state that was in operation prior to the sale of the Wiggins Ferry Company stock? A. Yes, sir.

CROSS-EXAMINATION, BY MR. M. F. WATTS:

Q. How long have you been treasurer? A. I cannot say exactly.

Q. How long have you been with the company? A. Since 1881.

Q. And, so far as you know, it was in effect ever since you have been with the company, since 1881? A. Yes, sir, so far as I know.

L. W. PUTNAM, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. State your name, residence, and occupation? A. L. W. Putnam; St. Louis, Mo.; Commercial Agent of the Wiggins Ferry Company.

Q. You have been with the Wiggins Ferry Company how long? A. About thirteen months.

Q. With whom were you before that? A. The Terminal Railroad Association.

Q. What position did you occupy with that company? A. I had several positions.

Q. Enumerate them, please? A. I was general freight agent, collector, assistant cashier, and contracting agent.

Q. Did you leave their employment to go with the Wiggins Ferry Company? A. Yes, sir.

Q. What are your duties as commercial agent? A. To take care of and look after traffic handled by the Wiggins Ferry Company.

Q. Do the records in your possession enable you to form an idea of the amount of traffic that the Wiggins Ferry Company carries on? A. No, sir, I have no records of that kind in my office.

Q. Have you an idea, from your knowledge of the busi-

ness, what it is? A. Yes, I should say approximately the Wiggins Ferry Company will transfer in the neighborhood of twelve or thirteen thousand cars a month, loaded cars.

Q. And then it does a large team traffic? A. There is quite an extensive team traffic. I don't know very much about the wagon portion of it.

Q. Do you know whether or not the Interstate Car & Transfer Company formerly used the landings of the Wiggins Ferry Company? A. I cannot say that positively. I believe they have, though.

Q. Do you know whether the Interstate Car & Transfer Company is now doing business? A. They are.

Q. Do you know who is operating that company? A. No, sir, I do not.

Q. What is the character of the business they carry on? A. A strictly car-load business, and they have nothing else but their transfer boats, tugs and barges. They have no rails of their own on either side of the river.

Q. They transfer cars across the river? A. Yes, sir.

Q. To and from what points? A. To and from the Burlington to what they call the "upper incline," north of the Merchants' Bridge, or to and from the Burlington, to what they call the "dike incline," on the east side of the river; and to and from the Iron Mountain incline on the west side to the dike incline on the east side of the river.

Q. Do you know Mr. J. L. Penney? A. Yes, sir.

Q. What position does he hold? A. He is the traffic manager of the Terminal Railroad Association.

Q. Do you and he have conferences about rates for traffic across the river? A. Not very often. Occasionaliy. If he puts in a rate, I ask him why it was put in, and the reasons for putting it in. And he may ask me that, if there is a rate made by the Wiggins Ferry Company. But I make all the freight rates for the Wiggins Ferry Company.

At this point further taking of testimony herein was, by consent of counsel, adjourned to Monday, October 8th 1906, then to be resumed at the same place, at 10 o'clock a. m.

R. E. Rombauer,
Special Commissioner.

Counsel for the compiainant filed application for Subpoena Duces Tecum, directing R. M. Fraser, Secretary of the St. Louis Coal Traffic Bureau, to appear and produce the records of meetings of said St. Louis Coal Traffic Bureau, from the year of 1900 to 1905, inclusive, and all circular letters issued for information of members by said Bureau from the year 1897 to the year 1905, inclusive; which subpoena duces tecum was accordingly issued by the Special Commissioner.

St. Louis, Mo., October 8th, 1906.

Met pursuant to adjournment as above on Monday, October 1st, 1906, at ten o'clock, a. m., in the Federal Building, in the City of St. Louis, Missouri.

Present: Hon. R. E. Rombauer, Special Commissioner; Messrs. E. C. Crow, Chester Krum and Charles Nagel, in behalf of the complainant; and Messrs. H. S. Priest, M. F. Watts and F. W. Lehmann, in behalf of the defendants.

The following proceedings were had:

Counsel for the complainant filed application for subpoena duces tecum, directing W. T. Lowden, Superintendent of the Missouri & Illinois Bridge Company, to appear and produce the books of said company, showing the receipts and disbursements thereof, for the years 1900 to 1906, inclusive; which subpoena duces tecum was accordingly issued by the Special Commissioner

CHARLES E. McEWING, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. Charles E. McEwing.

Q. What is your business? A. I am in the brick business, fire brick, and face brick.

Q. How long have you been in that business? A. About twenty years, I guess.

Q. What is the character of the brick business that you carry on? A. We manufacture fire brick, and face and front brick.

Q. What part of the country do you furnish? A. We ship all over the country. We are shipping now from Winnepeg, Canada to Mexico, and from Santa Fe, New Mexico, to New England.

Q. What is the gross amount of business that you do in a year? A. I couldn't say, off-hand.

Q. Just approximately? A. We not only handle our own business,—that is, the brick that we manufacture, but we also ship under contract. Sometimes it is twenty millions, sometimes it is ten millions, and sometimes thirty millions, a year.

Q. Where is your plant located now? A. Calhoun County, Illinois.

Q. How far is that from St. Louis? A. Forty-three miles—that is, by rail.

Q. Where were you formerly located? A. St. Louis, Mo.

Q. What part of the city? A. Grand Avenue and Broadway.

Q. When did you remove from the city? A. About twelve or fourteen years ago; somewhere in there.

Q. What was the cause of your removing your plant? A. Well, we thought at that time—and we are still of the

same opinion—that we had a better location, in point of quality of clay, cheaper coal, and better facilities. The business being a shipping business, we can get cars more readily and promptly, on just one line at that time, that we could here. We were located on the Burlington, or rather we made a connection with the Burlington to our brick business. We made the transfer, and got our brick plant, with the C. P. & St. L. at Grafton, and the C. & A. and Burlington at ....., Missouri.

Q. Have you any means of transporting it at that point? A. Yes, sir.

Q. What have you? A. We own the Calhoun Connty Railway & Transfer Company, which is a little transfer proposition—$50,000 capital.

Q. Have you been doing any business here in St. Louis for the last few years? A. In the last few years we have not. But we have undertaken to do a little here recently.

Q. What experience have you had with it? A. Right now we are trying to furnish the brick for a building down at Broadway and Poplar, next to the Bemis Bag Company; and on account of lack of track room we are unable to get car space on the Terminal tracks.

Q. Have you experienced any difficulty in getting goods into the city? A. You mean over the Burlington? No, not at all. We can get it in in five or six hours.

Q. To what point? A. North St. Louis.

Q. Have you experienced any difficulty from that point on? A. Yes, sir, right now. I was speaking to Mr. Johnson over here. The yards are blocked in there. They have more business than they have tracks to handle it with.

CROSS-EXAMINATION, BY MR. M. F. WATTS:

Q. Mr. McEwing, you say that, in a general way, the difficulty with the prompt handling of the freight into St. Louis is due to the want of track room? A. Well, that is

merely my opinion. I would not pose as an expert. I was at Eighth and Gratiot Streets on Saturday, and walked all through the yards, and we simply couldn't get a car in. We have cars tied up at East St. Louis and North St. Louis. Our cars come in, and they bunch them on us, and then we have to unload eight or ten cars in twenty-four hours. In fact, under the present facilities, it makes it simply impossible to ship in.

Q. That is due to want of track room, is it? A. I don't know as to general conditions, but at Eighth and Gratiot there is no question but that is the trouble.

Q. That is the extent of your familiarity with the conditions? A. That has been my experience. It has been lack of facilities.

Q. That is, lack of track room? That is what you mean by lack of facilities? A. Yes, sir.

Q. You moved from St. Louis to Calhoun County, Ill., because you got better clay for your purpose, and cheaper coal? A. Well, Calhoun County, you know, has the reputation of being isolated, out in the world. But, isolated as it is, it is an actual fact that we can reach Canada, Winnipeg, Duluth, Minnesota, and St. Paul, quicker and better than out of St. Louis.

Q. On what line? A. The Burlington.

Q. So you deal only with one road? A. We did when we first went there; but during the last two years we have connected with the C., P. & St. L., on account of coal. But when we first located in Calhoun County we were on the Burlington Road. For instance, we had an order for eight or ten cars; we order them in the morning, and get them in the afternoon. They are very prompt. In fact, I don't know that we had any trouble at all.

Q. You have direct connection with the railroads? A. Yes, sir.

Q. Have your own tracks? A. Yes, sir.

RE-DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Do you know whether or not the Burlington has its own terminals in North St. Louis? A. Yes, sir, it has.

Q. Do you know what the charge was, prior to the sale of the Alton bridge, for sending cars across over that bridge? A. We paid four-tenths of a cent.

Q. For what? A. One hundred pounds.

Q. How long ago was that? A. I don't remember exactly. It was several years ago. Three or four years, I should say. But I guess the records would show that.

Q. Do you know what the charge is now? A. The same as the St. Louis bridges. They charge us one cent a hundred. But we don't bring coal that way.

Q. Do you know when that increase was made? A. About six months after the reported sale of the Alton bridge to the Terminal Railroad Association.

Q. Have you ever had any experience in sending goods into St. Louis over the Terminal lines, by way of East St. Louis? A. Right now we are in that position. We are shipping goods that way on this same job. We are playing it both ways, as they say. We are delivering it on the East side and the West side. It is six of one and half a dozen of the other. In both cases, it is held up.

Q. Any delays on the other side? A. Yes, sir, there are from time to time, but not any more than what you would expect in handling the business.

Q. Do you find any difference in trying to do business in St. Louis, and in doing business in other cities? A. In what respect?

Q. The delivery of goods? A. Well, we don't seem to have much trouble in Kansas City, Chicago, Minneapolis, or St. Paul. But I guess that is due, largely, to the fact that it goes in on a direct track, without being switched—a main line.

GEORGE S. RHODES, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your full name? A. George S. Rhodes.

Q. What is your business? A. President of the Rhodes Transfer Company.

Q. What business does that Transfer Company carry on? A. Transferring freight from this side to East St. Louis for different business houses on this side.

Q. I will get you to state whether or not there is any difference in the conditions under which your Transfer Company is permitted to handle freight by the railroad companies on the east side, coming into St. Louis, and that of any other company? A. They are allowed a differential over us. About two cents a hundred. That practically puts us out of business.

Q. What do you mean by that? Explain that. A. We have a certain rate from East St. Louis to this city. Other transfer companies—some of them—will get an allowance from the railroad, I think of two cents on something and maybe more on other things.

Q. In addition to what is paid? A. In addition to what is paid by the consignee.

Q. What companies, if any, are allowed that? A. I understand that the St. Louis Transfer Company is; also the Columbia Transfer Company, I believe.

Q. What is the effect of that on your business on freight coming from East St. Louis to St. Louis? A. In fact, it puts us out of the business, as far as East St. Louis business is concerned.

Q. If all transfer companies were allowed to haul to and from East St. Louis on terms of equality by the east side lines, what effect would that have on the handling of freight

between St. Louis and East St. Louis? A. Well, it would relieve the situation in East St. Louis to a certain extent. There would be more teams hauling from there.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. Mr. Rhodes, do you maintain a warehouse for storing freight? A. Yes, a small one.

Q. Where is it? A. Nineteenth and Maiden Lane.

Q. Nineteenth and Maiden Lane? A. Yes, sir.

Q. That is on this side? A. Yes, sir.

Q. And where else? A. Nowhere else.

Q. How large is your warehouse? A. I cannot say just what the dimensions are. We put goods in there at night, take them out of the wagons and put them in there.

Q. Do you do a regular storage business? A. No, sir.

Q. Merchants shipping to the east side do not deliver goods to your warehouse? A. No, sir. Our customers don't want any warehouse. If we had a warehouse we would go out of business.

Q. You call at the stores for the goods? A. Yes, sir.

Q. And deliver them over there? A. Yes, sir.

Q. And you deliver from the stations, either on this side or the other, to the store? A. Yes, sir.

Q. You have this little warehouse; where you simply run in over night, where night overtakes you and you cannot get unloaded that same day; is that it? A. Yes, sir.

Q. The St. Louis Transfer Company maintains regular warehouses to which freight is delivered, does it not? A. Yes, sir.

Q. That two-cent concession you understand is made by the railroad companies? A. I suppose it is. I don't know. I know we don't get it.

Q. Well, do you know anything about it? A. Yes, sir.

Q. I understood you to say that the railroad companies made a concession of two cents? A. Yes, sir.

Q. That is, the east side lines? A. Yes, sir.

ERNEST STOHLMAN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your full name? A. Ernest Stohlman.

Q. What is your business? A. Drayman.

Q. How long have you been in that business? A. Since 1888, I think; 1887 or 1888.

Q. Do you haul goods backwards and forwards across the river? A. I have been doing it, and I am doing some of it now, yet.

Q. Are you able to state whether or not the business backwards and forwards across the river, in transferring goods from St. Louis, Missouri, to East St. Louis, Illinois, would be affected if all transfer companies were allowed to haul by the railroad companies under the same conditions? A. It affects me a whole lot. I have been losing a whole lot of business through it.

Q. You did not catch my question. What I am asking is, if the business would be affected, the freight business in and out of St. Louis, the handling of the freight, if all the transfer companies were permitted to haul on the same terms? Would it be facilitated? A. I guess it is affected a whole lot, on account of the slow handling. If you ship it on this side, it takes so much longer to get it over, and the same case on the other side, for the Terminal's bringing it over. Sometimes it takes two weeks before you get the freight.

Q. Do you haul from the east side on the same terms, so far as the railroads are concerned, all the other companies? A. We have been getting about the same rate. But here

lately, of course, since this combine, or whatever you call it, we cannot do it any more.

Q. Well, what is the reason? Just tell the facts about it. A. We used to get four cents, or three and a half cents. And now, of course, the rate to St. Louis, I believe, that the railroad charges is a cent different Only a cent's difference for bringing the car over. And some two cents, as I understand.

Q. Who pays that? A. I suppose the railroad company must pay it.

Q. Do you get it when you haul? A. No, they won't allow us any.

Q. What has been the effect of that on your business? A. I used to have a whole lot more work, which I haven't got now. Of course I can haul it on this side, but some cars I have to haul so far that there is little money in it, and they don't want to pay enough.

CROSS-EXAMINATION, BY MR. F. W. LEHMANN:

Q. As I understand you, you say that now most of the business is brought over from the east side in cars: is that it? A. In cars, or transferred, I guess. The St. Louis Transfer Company.

Q. I thought you spoke about the railroad company bringing it over on the cars? A. They bring a whole lot of freight over in cars; yes.

Q. And they bring it over cheaper than you can haul it? A. Yes, sir.

Q. And that is what affects your business? A. Yes, sir.

Q. If the railroad companies were to leave it unloaded on the east side, and let it be hauled over by team, then there would be more work for the teams? A. That is the idea.

Q. But those people that brought it over with teams would have to charge more than the railroad company charges for bringing it over on the cars? In other words,

you can't haul as cheap as the railroad companies can haul in cars? A. No, sir.

Q. And that is what affects your business? A. Yes, sir.

Q. And some of the stations on this side, you say, are a long way off, and the haul is long, and the merchants don't want to pay sufficient to make the business profitable from these stations? A. Yes, sir.

T. F. LEHNE, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your full name? A. T. F. Lehne.

Q. Where do you live? A. Alton, Illinois.

Q. What is your business? A. Dry goods.

Q. How long have you been in business there? A. I have personally been connected with the business for seventeen years.

Q. Where do you buy your goods that you retail? A. From the different jobbing houses; from Ely & Walker, Rice-Stix, Ferguson-McKinney, and the Carleton Dry Goods Company, mostly.

Q. Do you buy in any other city than this? A. Yes, sir.

Q. Where? A. I buy in Chicago, New York, Philadelphia, and different eastern points.

Q. How large a store have you up there at Alton? A. I carry a stock in the neighborhood of about fifty thousand dollars.

Q. Do you have any trouble getting shipments of goods ordered in St. Louis? A. I do, yes, sir.

Q. What is the character of that trouble? A. Well, in routing goods out of St. Louis, over either the Big Four or the Chicago & Alton, I have at different times had to wait from three to four days for the shipment to arrive at Alton.

Whereas shipments from Chicago, shipped out in the evening, arrive between 10 and 11 o'clock the next morning. Making a difference in the time from Chicago to Alton, and from St. Louis to Alton, of several days. I have at different times tried to ascertain what the matter was, and I never got any satisfaction from the railroad company at home there. They seem to bring it through for us when they get it. They bring it through promptly—but they don't get it. That is their version of the matter.

Q. How far is it from here to Alton by rail? A. I think the distance is twenty-three miles.

Q. How far is it to Chicago? A. Two hundred and seventy-two miles.

CROSS-EXAMINATION, BY MR. F. W. LEHMANN:

Q. Are you familiar with the way deliveries are made in Chicago to the railroad company? A. I am not, no, sir.

Q. From what house do you buy in Chicago? A. From J. W. Farlin, Marshall Field, Carson, Pirie, Scott, mostly. And Morris, Mann and Riley.

Q. The shipments to you, whether from Chicago or St. Louis, are they chiefly broken lots, meaning by that, not carload lots? A. They are broken lots.

Q. Parcel or package freight? A. Yes, sir.

Q. Now, do you know whether the houses in Chicago have to make delivery to a belt line, or to a terminal company, or whethey they make delivery direct to the railroad company, which in turn delivers to you? A. I do not know.

Q. Here in St. Louis deliveries, shipments are not made direct to the railroad company, are they? A. My bill of lading always reads from East St. Louis.

Q. Your bill of lading reads from East St. Louis? A. Yes, sir.

Q. Do you know whether the merchants here make de-

livery to the railroad company at East St. Louis? A. No, I do not.

Q. Or whether it is handled through the terminals? That you cant' tell? A. It is my understanding that it is handled through the Terminal Association. I am not sure. That is the understanding that is given me.

Q. And that would mean the delivery on this side of the river? A. The only reason I believe it is handled by the Terminal Association is that there is always an advanced charge tacked on to the regular expense bill when I get it.

Q. And that is not the case in your shipments from Chicago? A. No, sir.

Q. So that apparently the deliveries in Chicago are made directly to the railroad company which carries the freight to you? A. Yes, sir, it must be—according to the expense bill.

Q. Well, you have the same reason for believing that the shipment was made direct to the railroad company in Chicago that you have for believing that it is not delivered direct to them here? A. Yes, sir.

Q. And you don't know where the deliveries here are, in fact, made? That is, at what points in the City of St. Louis? A. No, sir, I don't.

FREDERICK W. HOFMANN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. Frederick W. Hofmann.

Q. What is your business? A. Hofmann Brothers' Produce Company. We are in the produce and commission business.

Q. How long have you been in that business in this city? A. Since 1860.

Q. Where is your place located? A. No. 700 and 702 North Second Street.

Q. What volume of business do you carry on in a year? A. We do a business of seven or eight hundred thousand dollars a year.

Q. What is the character of the goods, inbound and outbound, across the Mississippi River, that you handle? A. Is it perishable or not perishable, do you mean?

Q. Just as to the general character. A. A good deal of it is perishable, and all of it fluctuates in price constantly. They are goods that are fluctuating all the time in value.

Q. Are you familiar with the conditions that surround the handling of freight, inbound and outbound, across the river at St. Louis? A. Well, yes; we come in contact with it quite often, because our cars are often delayed, which puts us to expense, if goods don't come in, and prices decline.

Q. Is that on the inbound shipments? A. Both ways.

Q. Do you know where that delay happens? A. Well, it happens largely between St. Louis and East St. Louis, with the Terminal Railroad Association.

Q. Have you any expense bills that show delay? A. No, I have not, but I have data of facts that happened recently.

Mr. Crow: Well, you have already testified to the general fact. I think that is sufficient.

WILLIAM K. KAVANAUGH, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. William K. Kavanaugh.

Q. You live in St. Louis? A. I do.

Q. What business are you engaged in, Mr. Kavanaugh? A. I am connected with the Wiggins Ferry Company, Interstate Car & Transfer Company, and am in the coal business—Southern Coal and Mining Company.

Q. Will you please state what lines of business these companies respectively carry on? A. The Southern Coal & Mining Company conducts a coal business.

Q. Where at? A. In Illinois.

Q. What point? A. Within a radius of thirty-five miles of East St. Louis, on the Southern Railway. The Wiggins Ferry Company conducts a car transfer business across the river. And the Interstate Car & Transfer Company the same character business.

Q. When you speak of "car transfer," you mean the transfer of cars loaded with freight to be unloaded? A. Yes, sir.

Q. How long have you been connected with the coal business? A. About a year, a little over a year.

Q. What did you say the name of the corporation was? A. The Southern Coal & Mining Company.

Q. How long have you been connected with the Wiggins Ferry Company? A. I think it was March, 1903, the first of March—or probably February, 1903.

Q. How long have you been connected with the Interstate Car & Transfer Company? A. Since its organization, about fourteen or fifteen years ago.

Q. You organized that company? A. I organized it, yes, sir.

Q. What position do you occupy with the Wiggins Ferry Company? A. I am President and General Manager.

Q. Who are the directors of that corporation? A. There are five of them. Mr. Henry Miller—

Q. What business is he in? A. He is manager of the Wabash Railroad. Mr. E. B. Pryor, who is one of the Vice-Presidents of the Wabash Railroad.

Q. What business is he in? A. He is one of the Vice-Presidents of the Wabash Railroad. And Mr. Benjamin McKean, General Manager of the Vandalia, an arm of the Pennsylvania Road. Mr. A. M. Dale, one of the General Agents—I believe his title is—of the Illinois Central Railroad. Those are the directors—with myself.

Q. Do you know who owns and controls the stock of the Interstate Car & Transfer Company, at this time? A. I'll declare, I have forgotten whose name the stock is in. There are several shares in the name of the directors, and I believe it is in the name of Mr. Anderson.

Q. Who is Mr. Anderson? A. Mr. F. E. Anderson—he is connected with the Terminal Association.

Q. In an official capacity? Is he the Mr. Anderson who was here as a witness the other day? A. I think so. Yes, sir, I saw him in the room.

Mr. Watts: The Terminal Association owns the stock of the Interstate Car & Transfer Company. It is not necessary to show that by this witness.

Mr. Crow: Mr. Walsh showed that the other day.

The Witness: Your question was, whose name the stock was in. I was answering that question.

Q. Who constitutes the Board of Directors of that corporation? A. I think Mr. Pryor of the Wabash, and Mr. W. K. Bixby, and myself. I think that is the Board of Directors.

Q. You say this corporation was organized in 1893? A. No, sir. I did not say what year. I think it was about fourteen or fifteen years ago.

Q. Well, it was several years ago? A. Yes, sir.

Q. What properties has the Interstate Car & Transfer Company now? A. They own two steamers—that is, a tug and a towboat; and two barges.

Q. Are those barges car transfers? A. They are trans-

fer barges. And they also own an incline on the Burlington property north of the Merchants' Bridge.

Q. On this side of the river? A. Yes, sir, on this side of the river.

Q. Is that all of their property? A. Practically, all of their property. Of course, there is a lot of little stuff.

Q. What was the amount of capital stock of that corporation? A. Three hundred thousand dollars, I believe.

Q. When was it sold to the Terminal Company? A. About four years ago, I think it is. About four years ago the sale was made.

Q. Before or after the sale of the Wiggins Ferry Company? A. I think it was before.

Q. Before the sale? A. I think it was before the sale of the Wiggins Ferry Company.

Q. Do you know the price that was paid for it? A. I do not recall the price.

Q. Do you remember the amount per share that was paid for it? A. My recollection is it was $150 a share, or something like that.

Q. For the $300,000 of stock? A. Yes, sir. I am not positive about that, though.

Q. Was that paid in shares of other corporations, or paid in cash? A. Paid in cash.

Q. Who at that time owned the Interstate Car & Transfer Company? A. There were about six or seven stockholders. Mr. S. M. Kennard; Mr. W. K. Bixby; Mr. John F. Lee; myself, and Mrs. James Y. Lockwood; and some other stockholders that I don't remember now.

Q. What business is Mr. Lockwood in? A. He was Secretary and Treasurer of the Company.

Q. Mr. Kennard of the Kennard Carpet Company? A. He was one of the stockholders—yes, sir.

Q. Mr. Bixby, of the car company? A. The American Car & Foundry Company—yes, sir.

Q. Now, at the time of the sale what property did the Interstate Car & Transfer Company own? A. About the same property that they have now.

Q. That was, two tug boats— A. Two separate outfits for transferring cars. In that company they use one of the largest transfer barges in the country. It holds twenty-six cars on a barge. And they have a tug-boat to tow that. The other barge is a fourteen-car barge, and they have a little tow-boat to tow that.

Q. Do you konw, Mr. Kavanaugh, at the time of this sale, what was the par value of the stock of the Interstate Car & Transfer Company? A. It was held closely, it was not on the market.

Mr. Lehnmann: The par value, is what Mr. Crow said.

A. The par value was $100, to the best of my recollection.

Q. You say it had no market value, that it was not on sale? A. No, sir.

Q. Do you know at what rate per ton the Interstate Car & Transfer Company was transferring coal across the Mississippi River, in 1901? A. I think the rate was thirty cents a ton.

Q. Thirty cents a ton? A. Yes; a cent and a half a hundred.

Q. Was it reduced that year? A. I think it was reduced the same year the Terminal bought it, or the year afterwards. It was shortly after that time.

Q. Did you get the same rate that the Terminal Railroad Association was getting? A. We endeavored to get the same rates charged on all freight across the river.

Q. I will get you to state whether or not you cut the rate on coal in 1901 and 1902? A. I think not.

Q. Do you know? A. I don't recall that we ever did.

Q. You would know if it had happened? A. I presume I would. I don't recall very clearly. I have not been an owner of the property for a long time, although I have re-

tained my connection with it. At the same time, I don't think there has been any rate-cutting.

Q. Were you then in the active management of the company? A. Yes, sir.

Q. Did your company file and publish a tariff with the Interstate Commerce Commission? A. Always; yes, sir.

Q. Did you have any understanding or agreement with the Wiggins Ferry Company and the Terminal Railroad Association, as to the price to be charged for transferring freight across the river? A. We did not.

Q. Did you have any conferences with them concerning this? A. No, sir.

Q. Do you remember a committee from the Terminal railroads, the proprietary lines—waiting upon you, in 1901, with reference to a coal rate across the Mississippi River? A. I don't remember ever meeting such a committee.

Q. Did any other official of your company meet such a committee? A. Not that I know of.

Q. Did you road operate in connection with the Southern Railway? A. It did.

Q. The Southern Railway owned a belt line? A. The Venice & Carondelet Belt Railway.

Q. That ran from where to where? A. It ran from the dike about opposite Chouteau Avenue, around the city of East St. Louis, to a point up in Venice, connecting with all railroads, or practically all.

Q. Now, in 1901 and 1902, the Southern Railway was not a member of the Terminal Railroad Association, was it? A. I think not, at that time.

Q. I will get you to state whether or not the Southern Railway, or its belt line, interchanged traffic with the various roads that were crossed in East St. Louis? A. They do.

Q. Did they at that time? A. They did at that time—whatever business was offered. It was not much. But they did that class of business with that belt.

Q. What other road did your Interstate Car & Transfer Company operate in connection with? A. On the Illinois side, none other, directly. That is, we operated through them with all railroads.

Q. The belt line that you speak of, the Venice & Carondelet Railway, ran direct from a point in the Southern portion of East St. Louis, to a dike down on the river? A. Yes, sir.

Q. Called the American Levee, or the Levee on the American Bottom? A. I think not, sir. It may have been an old part of that levee, but I think this dike is probably older than the levee. It was built there away back in Mr. Mackey's time.

Q. What number of cars, if you recollect, did you handle from the Illinois shore, coming in over those connecting roads? A. It would depend largely upon service by the railroad companies over on this side of the river; but I should say from seventy-five to a hundred and fifty or two hundred cars a day; sometimes more, and sometimes less.

Q. What roads did you operate with on this side of the river? A. We connected with the Iron Mountain at Lesperance Street. We connected with the Burlington over an incline that we built, probably a quarter of a mile north of the Merchants' Bridge, just above the Burlington elevator, on Burlington property.

Q. Just those two roads? A. Just those two roads.

Q. How many cars would you handle from this side of the river to the east side? A. The total I gave you awhile ago meant the transfer both ways. Sometimes it would be more, and sometimes less. Our business was not very large.

Q. Who operates the Interstate Car & Transfer Company at this time? A. Do you mean who are the officers?

Q. Yes, the officials? A. Well, I am still President of the company. It is operated through a superintendent.

Q. In conjunction with the Wiggins Ferry, and other

Terminal properties? A. I think not. It is operated entirely separately. It gives the same service that it used to give—with the same people.

Q. Does it transfer any passengers? A. No passengers.

Q. Have you any idea of the amount of gross receipts of the Interstate Car & Transfer Company at the time of the sale, per annum? A. No, General, I could not recall that offhand. There would be figures you could ascertain, I presume, very easily—but I could not give you the figures offhand at all.

Q. Those figures, I presume, could be secured? A. Oh, yes, you could secure those figures.

Mr. Crow: If I want those figures, Mr. Watts, will you let me have them?

Mr. Watts: Yes, sir, you can have them.

Q. Who fixes the rate now for the transportation of freight backwards and forwards by the Interstate Car & Transfer Company? A. I'll declare, I cannot recall who does that. I think it is fixed, usually, by the Superintendent. It is intended to keep in line with other rates.

Q. What do you mean by that—"keep in line with other rates?" The other rates of the Terminal properties—the Wiggins Ferry, and the bridges? A. It has always been the policy of the Interstate Car & Transfer Company not to cut rates. We always maintain the rates that are made. For instance, on coal, we reduced thirty or forty cents, when the reduction was made.

Q. You mean that the same rate maintains for the transportation of freight by the Interstate Car & Transfer Company that does for the Wiggins Ferry and the bridges? A. You can ascertain that from the tariffs. But I am pretty sure they are all alike.

Q. Who controls that belt line in East St. Louis now? A. The Southern Railway Company.

Q. They still operate it? A. They still own it and operate it.

Q. Does it still interchange traffic with all the roads that cross it? A. All roads that offer—yes, sir.

Q. And I believe you stated that it crossed all of the lines in East St. Louis. A. Practically all of them. I think they have connection with nearly all of them. There might be an exception of some small line—a small electric line, or something of that character.

Q. Have you any idea of the volume of business that it does now? A. I have no definite idea. It is quite a large interchange business. They have a great many industries on their line.

Q. Does the Interstate Car & Transfer Company own any railroad tracks on either side of the river? A. None, except the incline track on the Burlington property, which was put up there by contract with the Burlington.

Q. I believe you stated that you owned only one incline, and that was on this side of the river? A. Yes, sir.

Q. Whose incline did you use on the other side of the river, before the sale? A. The Southern Railway incline —Venice & Carondelet Belt.

Q. It belonged to the Southern Railway Company? A. Yes, sir.

Q. Do you know whether or not the tariffs as published by the Interstate Car & Transfer Company are maintained? A. I am positive they are.

Q. Is the same thing true of the Wiggins Ferry Company? A. Yes, sir.

Q. Have you any idea of the amount of business that the Interstate Car & Transfer Company does now, as compared with what it did before the sale? A. I think it is equally as large, and probably larger. I think it has grown somewhat.

No cross-examination.

545

L. A. MILLER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your full name? A. L. A. Miller.

Q. What is your business? A. General merchandise, in Jerseyville, Illinois.

Q. How far is Jerseyville from St. Louis? A. Forty-five miles.

Q. How long have you been in business there? A. Over ten years.

Q. Do you buy goods at wholesale in St. Louis? A. Yes, sir.

Q. How do you have them shipped, by rail, or how? A. By rail, yes, sir.

Q. Do you have any trouble in getting shipments from St. Louis? A. I have some trouble—yes.

Q. What is the character of that trouble? A. It is delayed a little bit longer than I think it ought to be, in shipping. And then I have them get lost every once in a while.

Q. Is there any difference in time of shipments, if the goods are delivered to the railroad on this side of the river, or delivered to the east side? A. Yes, sir; there is always a day's difference, if not more.

Q. Well, a day how—what way—sooner or later? A. If they are delivered on the other side, it is a day sooner.

CROSS-EXAMINATION, BY MR. M. F. WATTS:

Q. What railroad is Jerseyville on? A. C. P. & St. L.; and the Chicago & Alton.

Q. The rates from St. Louis to Jerseyville are the same by the C. P. & St. L. as by the Chicago & Alton, are they? A. Yes, sir.

Q. The C. P. & St. L. Railroad is not a member of the

Terminal Railroad Association, is it—or do you know? A. I don't know.

Q. But you do know that the rates are the same, both by the C. P. & St. L. and the Chicago & Alton? A. Yes, sir.

At this point a recess was taken until this afternoon, at 2:30 p. m.

After recess, on Monday, October 8th, 1906, the following proceedings were had:

JOHN SCULLIN, recalled, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Mr. Scullin, do you remember the time of the sale of the Interstate Car & Transfer Company to the Terminal Railroad Association—or have you any knowledge of that transaction? A. No, sir, I have none.

Q. You were running the Wiggins' Ferry Company, were you, at the time the Interstate Car & Transfer Company were doing business, or part of that time? A. Yes, sir.

Q. Do you know whether or not the Interstate Car & Transfer Company maintained the published rate for transferring goods? A. That I could not say.

Q. You don't know about that? A. I don't know about that.

Q. Mr. Scullin, do you own any of the St. Louis Transfer Company stock? A. Yes, sir.

Q. How much? A. I suppose I have got two or three hundred shares. I don't know just how much.

Q. Does it stand in your name on the books? A. Yes, sir.

Q. Do you hold any as trustee for anybody else? A. No, sir! I do not.

Q. Do you know whether or not, at the time you sold the

Wiggins' Ferry Company stock that you had, at the time of the sale, the Wiggins' Ferry Company owned any of the St. Louis Transfer Company stock? A. Yes, sir, they did.

Q. How much did they own? A. I don't know how much—quite a little bunch.

Q. Several hundred shares? A. Yes, sir. But I don't remember how much.

Q. Did that go with the shares to the purchasers? A. Yes, sir.

Q. You don't know as to whom it was turned over? A. No, sir, I do not. I don't know what disposition was made of it. All I know is that whatever the Wiggins Ferry Company had, when they acquired it everything followed. And they had considerable stock.

Mr. Priest: You don't mean to infer from the question that that stock passed with the Wiggins' Ferry Company stock otherwise than as an asset of the Wiggins' Ferry Company?

Mr. Crow: As an asset, certainly—it could not pass any other way.

Mr. Priest: That question seemed to show that it was sold as a distinct piece of property.

Mr. Crow: I meant that it was sold with the Wiggins Ferry Company stock.

Mr. Crow: Q. Is it a fact that when the Wiggins Ferry Company stock was sold, that the St. Louis Transfer Company stock that belonged to the Wiggins Ferry Company, went with it, an an asset of the Wiggins Ferry Company stock? A. Yes, sir, it did; as an asset of the Wiggins Ferry Company stock.

Mr. Crow: That is what I meant to ask.

Q. Did you buy the stock of the St. Louis Transfer Company that the Wiggins Ferry Company owned? A. No, sir.

Q. Do you know who did? A. I found it in the possession of the Wiggins Ferry Company when I took possession,

sixteen or seventeen or eighteen years ago. Probably my predecessor, Captain Clubb.

Q. Do you know how long he served? A. No, sir; I do not know.

No cross-examination.

ROBERT M. FRASER was next called upon to produce the documents called for by the subpoena duces tecum issued on October 5th, whereupon, through Mr. R. J. Kramer, counsel, he presented the following objection, which objection was overruled by the Special Commissioner, and the witness ordered to produce the documents on Thursday morning, October 11th.

Said objection is in words and figures following, to-wit:

United States of America.
Eastern District of Missouri. } ss.

In the United States Circuit Court, for the Eastern Division of the Eastern District of the State of Missouri.

United States
vs.
Terminal Railroad Association of St. Louis.

ROBERT M. FRASER, who has been subpoenaed as a witness on behalf of the United States to appear before R. G. ROMBAUER, Special Examiner, in the above entitled suit, and by the subpoena served upon him requested to produce the documentary evidence, in substance as follows:

Information Circulars, Numbers 1 to 8, inclusive, of the St. Louis Coal Traffic Bureau.

All records of meetings held during the year 1905 down to the month of October, of the East Bound Freight Committee.

All records of meetings held during the year 1905 down

to the month of October, by the St. Louis and Belleville Freight Committee.

All records of meetings held during the year 1905 down to the month of October, by the St. Louis & Cincinnati Freight Committee.

All records of meetings of the St. Louis Coal Traffic Bureau from January 1st, 1900, to the 1st of January, 1906, and all circular letters issued for the information of members by said Bureau from the first of January, 1897 to the 1st of January, 1906. Now appears before said Examiner and objects to furnishing said documentary evidence, and each and every part thereof, for the following reasons:

FIRST: Because said testimony is irrelevant and is wholly incompetent under the issues involved in this suit.

SECOND: Because the said documents and evidence called for are the records and proceedings of the St. Louis Coal Traffic Bureau, The St. Louis East-bound Freight Committee, the St. Louis-Cincinnati,Louisville Freight Committee, and the Belleville & St. Louis Traffic Bureau, that each of said Committees and Bureaus are composed of the representatives of various Railroads entering the City of East St. Louis, Illinois, and are maintained for the purpose of discussion of matters interesting the Railroads represented in said Committees and Bureaus and for the purpose of preparing and furnishing statistical information to said Railroads represented in said Committees and Bureaus and their patrons, and said Committees and Bureaus do not pretend to control the actions of any of the Railroads represented in said Committees and Bureaus, that said evidence does not call for any of the statistical information kept by said Committees and Bureaus, but does call for records and papers of said Committees and Bureaus which are of a private nature and do not of themselves show any action taken by any of the Railroad Companies represented in said Committees and Bureaus, and therefore

the attempt to secure said information is in violation of the 4th Amendment to the Constitution of the United States.

And said witness also on behalf of each of said Committees and Bureaus makes the aforesaid objection to the production of said documentary evidence.

Dated this 8th day of October, A. D. 1906.

R. E. Rombauer,
Special Commissioner.

JAMES H. McCABE, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. James H. McCabe.

Q. What is your business? A. Carriage manufacturer.

Q. Where is your place of business? A. No. 1217 North Broadway.

Q. How long have you been in business in this city? A. Thirty-five years.

Q. Do you do any business back and forth over the river here, shipping goods in and sending goods out? A. Yes, sir.

Q. Where do you deliver your goods that are out-bound on lines east of the Mississippi River? A. Now we do it principally on the east side.

Q. What is the reason of that? A. The Terminal people refuse to accept our goods.

Q. Why? A. Because they were too bulky, and they could not handle them.

Q. Now, what particular goods is that? Just describe what goods it is they refuse to accept. A. Ordinary stake wagons, such as freight is hauled in; wagonettes and depot coaches, for carrying passengers to and from depots and hotels; and hearses.

Q. When they are taken to the east side are they loaded in the same character of cars that they would be loaded in here, if accepted? A. Yes, sir.

Q. Has that had any effect on your business, as to cost of shipping? A. It has cost us considerably more.

CROSS-EXAMINATION, BY MR. F. W. LEHMANN:

Q. Are these goods of yours handled already set up? A. No, we knock them down, and crate many of them.

Q. Crate many of them? A. Where it is necessary to crate them, we crate them.

Q. And the Terminal Railroad Association finds it difficult to handle them? A. Yes, sir; I suppose so. They refuse them.

Q. And so you handle them to the other side? A. Yes, sir. In fact, they told us to do that; that it was the only way for us to do it. They couldn't handle them down there.

JAMES Y. LOCKWOOD, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name in full? A. James Y. Lockwood.

Q. What business are you in, Mr. Lockwood? A. Coal mining.

Q. What is the name of your corporation, if you have one? A. Southern Coal and Mining Company.

Q. Where is it located? A. The office? No. 918 Security Bldg.

Q. Where is your mine? A. We have eight or ten of them on the Southern Railway.

Q. In the State of Illinois? A. Yes, sir.

Q. You were formerly connected with the Interstate Car & Transfer Company, were you not? A. Yes, sir.

Q. What connection did you have with this company, in an official way? A. I was secretary and treasurer.

Q. Were you secretary and treasurer of that company in 1901 and 1902? A. If that was the time we sold out—I think it was—I was Secretary and Treasurer the whole time.

Q. Up to the time of the transfer of the property? A. Yes, sir.

Q. Do you remember the circumstance of the rates being cut in 1901, and a committee of the railroads waiting on your organization? A. No, sir, I never heard of it.

Q. You never heard of that? A. No, sir.

Q. Do you know whether or not those rates were cut on commodities, at that time, across the river? A. No, sir, I do not. I don't remember it. I may have known it if it was a fact, but I don't remember.

Q. What official of your company would know it? A. I don't know whether Mr. Kavanaugh would—or Mr. Baulsch; he was traffic manager at that time.

Q. Would he know about it? A. I don't know whether they waited on us. They were fighting us, and we were fighting them, all the time.

Q. Do you know whether those rates were cut? A. I don't know.

Q. You would not know if they were? A. I have no recollection of it at all. I might have known it, and probably would have known it. Five years is a long time for me to remember. My memory is not very good.

Q. But the performance of your duties would not necessarily involve a knowledge of that? A. No, sir.

Q. But it would of Mr. Baulsch? A. I should say so.

Q. He was your superintendent of traffic? A. Yes, sir.

No cross-examination.

At this point the further taking of testimony herein was, by consent of counsel, adjourned to Thursday, October 11th, 1906, at ten o'clock, a. m.

R. E. Rombauer,
Special Commissioner.

St. Louis, Mo., Oct. 11th, 1906.

Met, pursuant to adjournment as above, on Thursday, October 11th, at 10 o'clock, a. m., in the Federal Building, St. Louis, Mo.

Present: Hon. R. E. Rombauer, Special Commissioner. Messrs. E. C. Crow, Chester H. Krum and Charles Nagel appeared in behalf of the complainant. Messrs. H. S. Priest, M. F. Watts and F. W. Lehmann, appeared in behalf of the defendant.

The following proceedings were had:

R. M. FRASER, recalled, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Have you—

Mr. Priest: One moment, please. We think there should be somebody to pass upon the relevancy and competency of questions; and, inasmuch as the Commissioner feels he is not authorized to do so under the present order, unless we can get the consent of the solicitors representing the Government to a modification of the order, empowering the Commissioner to pass upon the relevancy and competency of the testimony, we shall make application to one of the Circuit Judges to so modify the order as to give the Commissioner such power. We should like the Commissioner, unless the solicitors for the Government agree to that, to suspend the taking of testimony until we can have an op-

portunity to make such an application to one of the Circuit Judges.

The Commissioner: I suppose the question is not likely to arise in the examination of some of these witnesses. We might, therefore, proceed until it does arise.

Mr. Priest: I think it is likely to arise now, in regard to the witness who has been recalled to the stand. Your Honor sustained an objection to a question asked this gentleman.

Mr. Crow: I do not recall any objection your Honor sustained to a question asked this witness. He has charge of several Committees. A subpoena duces tecum has been served upon him, directing him to produce the records of those associations. He is represented by his counsel, Judge Kramer, of East St. Louis, who says he has no objection to those records going in.

Mr. Kramer: I say we have filed formal objections. Of course, we claim that under the Fourth Amendment to the Constitution, this examination ought not be made. This is an unreasonable search here for matter, in our view. Of course, I am not pressing it any further, because, as I understood it, the Examiner would not pass upon the question at all. We contend that this is going outside altogether, and it is an unreasonable search for matters. In our view, these records in the possession of Mr. Fraser, of these Bureaus and these Committees, have no bearing upon this case whatever.

The Commissioner: As a matter of course, so far as my ruling is concerned, I cannot change that, because I have no doubt about its correctness. So far as any application to be made to the Court, of course these gentlemen are at liberty to make it.

Mr. Priest: We think the taking of the testimony should be suspended to give us an opportunity to present that to one of the Circuit Judges.

Mr. Kramer: I wish to make the further objection that the Examiner has no power to compel the witness to produce books and papers, and on this account we object to producing them.

The Commissioner: I suppose you have not seen the order which enlarged the Commissioner's power.

Mr. Kramer: The rules of the Supreme Court do not authorize any such enlargement, and we are not a party to it, and are not bound by that. So that this matter may be presented, I will refuse at this time to offer this testimony; we will not submit it at this time.

The Commissioner: You will submit it, I presume. The witness will submit it, and testify to it, whether you desire to submit it or not.

Mr. Kramer: We want to preserve our rights.

The Commissioner: You may decline, and the Commissioner compels you to do it.

Mr. Kramer: That is what we are doing now. We are declining.

Mr. Crow: Q. Please give your name? A. Robert M. Fraser.

Q. Where do you live? A. St. Louis, Mo.

Q. You were sworn and have testified in this case before? A. Yes, sir.

Q. You are the same R. M. Fraser whose testimony appears formerly in this case? A. Yes, sir.

Q. I will ask you, Mr. Fraser, if you have any connection with what is known as the East-bound Freight Committee. A. Yes, sir.

Q. What is your relationship to that Committee? A. Chairman.

Q. Who are the members of that Committee? A. I cannot recall them all.

Q. It is composed of railroads? A. Yes, sir.

Q. What railroads are members of that East-bound

Freight Committee? A. The Baltimore & Ohio Southwestern; Chicago & Alton Railway; Chicago, Peoria & St. Louis Railway, of Illinois; Cleveland, Cincinnati, Chicago & St. Louis Railway; Illinois Central Railroad; Henderson & St. Louis Railway; Chicago & Eastern Illinois Railroad; the Vandalia Railroad; the Wabash Railroad; the Southern Railway (St. Louis-Louisville lines); Terminal Railroad Association of St. Louis.

Q. What territory has that committee jurisdiction over? A. It is a sub-committee of a central freight association.

Q. Where is the central freight association located, and what is it? A. The Central Freight Association is located in Chicago, with headquarters in Chicago.

Q. Of what is it composed? A. It is composed of the railroads in what is known as Central Freight Association Territory. I don't know whether you want me to define the territory?

Q. You may do that, if you like. A. It is the western termini of the trunk lines; that is, Buffalo, Pittsburg, and north of the Ohio river, including Chicago and St. Louis.

Q. When was the Central Freight Association formed? A. Possibly fifteen or twenty years ago, under practically the same name.

Q. And it has been in continuous existence under the same name? A. Not exactly the same name.

Q. But practically so? A. Yes, sir.

Q. When was the East-bound Freight Committee formed? A. I cannot answer that accurately, but I would say fifteen or twenty years ago.

Q. Where are the headquarters of that East-bound Freight Committee? A. Of the St. Louis East-bound Freight Committee?

Q. Yes. A. In the Wainwright Building, at present.

Q. In the City of St. Louis, and State of Missouri? A. Yes, sir.

Q. You are the custodian of its records? A. Yes, sir.

Q. What relation does the East-bound Freight Committee bear, in an organization way, to the Central Freight Association? Is it a subsidiary body? A. It is one of the numerous committees that are located in the different cities, through which the matters connected with the different railroads are discussed, and recommendations, or otherwise, made to the Central Freight Association in Chicago.

Q. What other cities are there in which there are located Committees of this Central Freight Association? A. Louisville, Cincinnati, Pittsburg, Buffalo, Detroit, Toledo, Indianapolis, Chicago, Peoria, and possibly a number of other places. I do not recall them now.

Q. Have you the records of the East-bound Freight Committee, as called for in subpoena duces tecum which was served upon you, here before the Commissioner? A. Yes, sir.

Q. Will you produce them, and let us examine them?

Mr. Kramer: As counsel for the witness, I advise him, for the reasons heretofore stated, not to produce them.

The Commissioner: Do I understand you to refuse to produce them? A. Under instructions of counsel.

Q. Do you mean to say you refuse to produce them? A. Yes, sir.

Q. You are ordered to produce them, and you know the consequences of disobeying that order? A. No, sir, I do not.

Q. I will have to commit you, if you refuse to produce them.

Mr. Kramer: I want to inquire, if, under the rule, the Commissioner is empowered to do that?

The Commissioner: The Commissioner does not want to be advised by counsel as to his powers. He will pass upon that.

Mr. Crow: We ask that the witness produce the records of the proceedings of that Association.

The Witness: What am I to do?

The Commissioner: You have to produce them. You say you object to producing them, but you must produce them or stand the consequences.

Mr. Kramer: I advise the witness not to produce them, for the reasons heretofore stated.

Mr. Crow: It is for the witness to say what he will do.

The Commissioner: Exactly. He can produce them, or not.

The Witness: I think it places the witness in a very peculiar position.

The Commissioner: The Commissioner is placed in a very peculiar position, too, and he is required to take the responsibility of it.

The Witness: Have I the right to ask my counsel whether I shall or not?

The Commissioner: He has advised you not to do so, and you can follow his advice, or the order of the Commissioner; you may take your choice.

A. I will have to refuse to deliver them, under instructions of counsel.

The Commissioner: You may step aside, until I make out the order for your commitment.

Mr. Kramer: I should like to suggest to the Examiner that I think, under the practice, the only thing to do is to refer the disobedience to the Circuit Judge.

The Commissioner: I shall be the judge of that.

Mr. Kramer: If you want to expedite this matter, I shall, of course, sue out a writ of habeas corpus, and we might submit the matter to Judge Finkelnburg at once.

Mr. Krum: The only way to do in such cases is the regular way. Let the commitment be made, and in form.

Thereupon, counsel for defendants made application to

the Hon. G. A. Finkelnburg, Judge of the District Court, for a modification of the order appointing the Commissioner to take testimony in this cause.

Which application is in the words and figures following, to-wit:

In the Circuit Court of the United States in and for the Eastern Division of the Eastern District of Missouri.

The United States of America,
Complainant,
vs.
The Terminal Railroad Association, et al.,
Defendants.

Comes now the defendants and move the Court to modify the order appointing the Commissioner herein, by conferring upon the Commissioner power and authority to pass upon the relevancy, materiality, and competency of the testimony offered by the parties.

(Signed) H. S. Priest,
M. F. Watts,
and F. W. Lehmann,
Attorneys for Defendants.

After hearing argument upon the application, the Court made the following ruling:

Judge Finkelnburg: It has been my understanding all along, that I am not to hear this case ultimately, but it is to be heard by the Circuit Judges, under the provisions of an Act (I do not recall when it was passed); and I would not like to make any ruling which would in any manner forestall the action of the Circuit Judges in this case.

The power to pass upon the relevancy and competency of testimony is a very important one. I have no doubt that the present Commissioner is very competent to pass upon those questions. I supposed that is agreed upon both sides. But, nevertheless, it would be giving to him a power to pass

upon questions that bear upon the vital issues in this case, and would, in that sense, be anticipating, and perhaps in effect curtailing, the power of the tribunal which is ultimately to hear this case. It has been suggested by Mr. Lehmann, or by Mr. Priest, that an offer can be made of testimony, and in that way the question be preserved for the ultimate decision of the Court. But we know that a mere offer would not give to the Court the testimony itself, and the opportunity to pass upon it, if it concluded that the testimony offered ought to have been admitted; and they would be obliged to send it back to the Commissioner to take further testimony.

That, in connection with the fact that the Supreme Court rule contemplates two things only; one the appointment of an Examiner, and the prohibiting that Examiner from passing upon the relevancy or competency of evidence; and the other, the appointment of a Master in Chancery, who not only passes upon the competency and relevancy of the testimony, but also makes a finding of facts and conclusions of law, and makes a report to the Court. Now that is not contemplated in this case, and under those circumstances I think I will over rule the application, and leave the matter as it stands.

At this point recess was taken until half past two o'clock p. m.

After recess, on Thursday, October 11th, the following proceedings were had:

F. G. HAUEISEN, a witness of lawful age, being duly produced sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. F. G. Haueisen.

Q. Where do you live? A. I live at 3109 Rauschenbach Avenue.

Q. How long have you lived in this city? A. Fifty-two years.

Q. What business are you in? A. I am engaged in the produce and commission business.

Q. Where? A. No. 1017 and 1019 North Third Street.

Q. How long have you been in that business? A. Over forty years.

Q. What volume of business do you do a year, in dollars and cents—roughly, an estimate? A. We handle on an average about four carloads of produce a day.

Q. Does any of your goods and produce that you handle have to traverse backwards and forwards over the Mississippi River at St. Louis? A. Yes, sir.

Q. I will get you to state whether or not you have any trouble in getting your goods backwards and forwards across the river, and if so, what it is? A. We have this trouble at this time of the year, that it takes from a day to two days to get a car of produce to this side of the river from the east side.

Q. From East St. Louis? A. Yes, sir.

Q. I will get you to state whether or not you haul your goods across the river? A. We have heretofore, up to probably six or eight months ago, hauled everything from East St. Louis.

Q. Why did you do that? A. Because the rates were then made to East St. Louis and St. Louis; that is, on produce from the north.

Q. What had the making of the rate from East St. Louis to St. Louis to do with the hauling of the goods? A. Now?

Q. Then. A. Because the rate was twenty cents to St. Louis, and eighteen cents to East St. Louis.

Q. I will get you to state whether or not you hauled them because it was cheaper? A. Yes, sir.

CROSS-EXAMINATION, BY MR. WATTS:

Q. Where do you receive your carload freight? A. Where do we receive it at?

Q. I mean at what yards do you receive it? A. It generally comes through the Carr Street yards.

Q. The yards are rather small, aren't they. A. Very small.

Q. And the trouble is largely with the size of the yard, isn't it? A. The yard is small. They have two or three yards up there. They have a yard up there on Florida Street, and a yard up at Mound Street. The produce is scattered all along from Carr Street to Mound Street.

Q. Which yard is most convenient to you? A. The Carr Street yard.

Q. Explain to me, will you please, this change of rate you spoke of; you say formerly the rate to East St. Louis was eighteen cents? A. Yes, sir, on produce from the north.

Q. And to St. Louis twenty cents? A. Yes, sir.

Q. Has there been any change in that rate? A. Yes, sir.

Q. What has been that change? A. The rate to both sides of the river is now the same.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. When was that change made? A. Just as I said, probably six to eight months ago.

Q. This year? A. Yes, sir.

JACOB HANDELMAN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. What is your name? A. Jacob Handelman.

Q. What is your business? A. The clothing commission business.

Q. Whereabouts? A. Twenty-second and Franklin Avenue, St. Louis.

Q. Do you get any goods from across the river that are shipped to you? A. Yes, sir.

Q. From where do your goods come to you? A. All the way from the East, Boston, New York, Philadelphia.

Q. How do you get those goods across the river? A. We always instruct the railroad to give it over to the Big Four Express Company.

Q. What is the Big Four Express Company? A. Transferring and delivering goods to this side.

Q. Where is their place of business? A. Twelfth Street, between Biddle and Carr.

Q. What do they do, run teams? A. Yes, sir.

Q. Who runs that express company? Is it a corporation or an individual? A. I don't exactly know. I couldn't tell you anything about that.

Q. I will get you to state whether any representatives of the east-side railroads reaching into the Atlantic sea-coast territory, have waited upon you with reference to who should do your hauling? And if so, tell the Court what they said, and who it was? A. There was only once a gentleman called upon us, and I don't remember whether he is a B. & O. or a Wabash man; I do not recall his name, but I think it is Bates.

Q. What was his business? A. With one of the railroad companies.

Q. What kind of business? A. To solicit that we should give our business to the railroad he was with, and that the St. Louis Transfer Company should take our freight.

S. B. COUCHMAN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. S. B. Couchman.

Q. Where do you live? A. No. 2743 Russell Avenue, St. Louis.

Q. How long have you lived there? A. Fourteen years.

Q. What is your business? A. Auditor of the Southern Coal & Mining Company.

Q. Where is that company located? A. In the Security Building.

Q. In this city? A. In this city.

Q. What is their business? A. Operating coal mines.

Q. Where? A. In Illinois.

Q. On what road? A. The Southern Railroad.

Q. Entirely on the Southern? A. Yes, sir.

Q. Were you ever in the employ of the Interstate Car & Transfer Company? A. Yes, sir.

Q. When and where? A. Beginning, I think, in April, 1898, up to a year and a month ago.

Q. What position did you occupy with that company? A. Clerk.

Q. What were your duties as clerk? A. General accounting.

Q. Weren't you cashier of the Interstate Car & Transfer Company? A. Not officially.

Q. Were you actively? You handled the cash and accounts? A. Yes, sir.

Q. Did that company publish and file with the Interstate

Commerce Commission, tariffs of the rates between Illinois and Missouri, and points in either State? A. Such tariffs were published, but I don't know of my own knowledge that they were filed with the Interstate Commerce Commission.

Q. What was the character of the business carried on by that company? A. Transferring loaded freight cars.

Q. To and from where? A. Between St. Louis and East St. Louis.

Q. Do you know whether or not, in the years that you were with them, the Interstate Car & Transfer Company performed those services for less rates than the published rates? A. Yes, sir.

Q. For whom? A. For some few business firms. I don't exactly recall all the names now.

Q. Here in this city? A. Yes, sir.

Q. Can you mention some of them? A. I remember one in particular at this time; McReynolds & Company.

Q. In what business are they? A. Grain.

Q. Where are they located? A. I think they are out of business now.

Q. Where were they located? A. They were located, I believe, in the Chamber of Commerce Building.

Q. What other firms? A. I do not recall at the present time.

Q. Did they transport freight for less than the published tariff rates for any railroad company? A. No, sir, not to my knowledge.

Q. Would you have known it, if they had? A. No, sir, not exactly.

Q. Did you ever settle any accounts between the M. K. & T. Railroad and the Interstate Car & Transfer Company, for the transfer of cotton that came from the South, routed to points east, across the river? A. I don't exactly grasp your question.

Q. Did you ever settle or adjust any of those accounts

between the M. K. & T. Railroad and the Interstate Car & Transfer Company, for cotton? A. Yes, sir; I collected transfer charges from the M. K. & T. Railroad.

Q. Do you know whether those charges were made for less than the published tariffs, say in the year 1905? A. I am uncertain as to the year, but there was a period of time when the rate was made for less, although I cannot say positively, of my own knowledge, because I did not handle that part.

Q. For the transportation of coal, was there anything less than the published rates given to any firms or railroad companies? A. In the old days of the company, when competition was strong, there was.

Q. What time was it that the competition was strong? A. About the year 1898.

Q. Who was it given to then? A. I recall one firm was the Berry Coal Company.

Q. Berry-Burg Coal Company.? A. That is the present name of the concern, but I am speaking of the old firm.

The Commissioner: Q. Berry-Horn? A. Yes; that was the name of the concern.

Mr. Crow: Q. Was that coal coming into the city? A. Yes, sir; inbound.

Q. Do you know how much the cut was? A. No, sir, I don't remember.

Q. Any other concern you remember? A. None that I recall now.

Q. Were you with the company at the time of the sale to the Wiggins Ferry Company? A. Well, yes, I was with the company up to about a year ago.

Q. And you were with the company after the sale of the Wiggins Ferry Company to what is called the proprietary lines, the Terminal Railroad Association? A. Yes, sir.

Q. Were the rates maintained after the sale of the Wiggins Ferry Company? A. Yes, sir, so far as I know.

Q. And after the sale to the Terminal Railroad Association, were the rates maintained? A. Yes, sir.

J. J. BAULCH, recalled, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Were you ever in the employ of the Interstate Car & Transfer Company, in any capacity? A. Yes, sir.

Q. What capacity? A. Traffic Manager.

Q. During what years? A. I think 1903—1903, and 1904, if I am not mistaken.

Q. Who was President of the Company at that time? A. W. K. Kavanaugh.

Q. And who was manager? A. Mr. Kavanaugh was President and General Manager.

Q. He ran the business? A. Yes, sir.

Q. What road on the east side, particularly, did the Interstate Car & Transfer Company operate with, so far as the transfer of freight is concerned? A. The Southern.

Q. Did the Southern Railway have a landing or connection down at the river's edge? A. They had an incline down there.

Q. And did the Southern have a belt line around East St. Louis? A. Yes, sir, they controlled it. At that time it was the L., E. & St. L., the present Southern Railroad.

Q. What was known as the Air Line? A. Yes, sir. And the belt line was the Venice & Carondelet Railroad.

Q. That belt line connected that line with most lines in East St. Louis? A. Yes, sir.

Q. And the freight coming from the East that your company transfered across the river into Missouri, came from these connecting lines? A. Yes, sir.

Q. Did your company publish at that time a tariff, in conformity with the requirements of the Interstate Com-

merce Commission, on traffic between States? A. Yes, sir.

Q. Do you know whether during the years you were with them, goods were transferred for less than the published rates? A. Not for less than the rates published with the Interstate Commerce Commission.

Q. But less than the rates agreed upon between the companies? A. There was no agreement between the companies.

Q. Goods were transported only at the published rates? A. At our tariff rates.

Q. And nothing else? A. Not that I know of.

Q. Would you know? A. I would be apt to, yes.

A. M. FIELD, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. What is your name? A. A. M. Field.

Q. What is your business? A. Traffic manager of the Wrought Iron Range Company.

Q. What is the style of that firm? A. Wrought Iron Range Company.

Q. Who owns it? A. The Culver Brothers.

Q. Where are they located? A. Nineteenth and Washington Avenue.

Q. Have you a factory? A. Yes, sir.

Q. Where is it located? A. At Nineteenth and Washington Avenue, and the furnace department at Twenty-first and Wash Streets.

Q. What volume of business, in number of cars, in and out of St. Louis, does your firm handle per month? A. I should judge about fifty cars, in and out.

Q. How long have you been in that business? A. I

have been with the Wrought Iron Range Company a little over a year.

Q. Are you familiar with shipping conditions here in St. Louis? A. Oh, yes.

Q. I will get you to state whether or not you have any trouble in getting inbound and outbound freight across the Mississippi River at this point? A. It takes us between two and four days, as a general average, getting cars across the river; and outbound it takes from twenty-four to forty-eight hours. We generally load everything we can on the west side lines, to avoid any delay in East St. Louis.

Q. Do you mean that time is occupied in getting from one side of the river to the other? A. Yes, sir.

CROSS-EXAMINATION, BY MR. WATTS:

Q. You speak of carload lots, do you? A. Yes, sir, only carload lots.

W. T. LOUDEN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. W. T. Louden.

Q. What is your business? A. Superintendent of the Missouri & Illinois Bridge & Belt Railway, operating the Alton Bridge.

Q. How many miles of track of railway does that company own, and where is it located? A. Practically three miles; about one-half mile of switch tracks in the City of Alton, then the bridge, and about one and eight-tenths miles on the Missouri side. I cannot say that those figures are exactly correct.

Q. Approximately? A. Yes, sir, approximately.

Q. On the west side of the Missouri shore, what railroads

do your tracks connect with? A. With the C. B. & Q., and the M. K. & T.—not the Katy proper, but we can make deliveries there.

Q. By reason of the use by the Katy of the Burlington tracks, takes them into the City? A. Yes, sir.

Q. On the east side, with the tracks of what roads does your road connect? A. The C. & A., the Big Four, the Illinois Terminal, and the C. P. & St. L.

Q. Did all of the roads you have mentioned, on either side of the river, with which your tracks connect, come to the City of St. Louis? A. Yes, sir. The C. P. & St. L., I don't believe gets into the city power. They run trains in.

Q. How near to the city do they come? A. Granite City, Illinois, I believe.

Q. That is opposite St. Louis? A. Yes, sir. It is possible they have tracks into East St. Louis.

Q. What roads of those you have mentioned, operate trains for freight and passenger service, between St. Louis and Chicago? A. All of them— No, the C. & A., and the Big Four.

Q. Is that all? A. That are on the east side—yes.

Q. Which ones on the west side, if any? A. The C. B. & Q.

Q. Do you know who owns the Alton Bridge and tracks now? A. Yes, sir.

Q. Who is it? A. Eleven of the railroads that enter St. Louis. I can name them, I believe, if you wish.

Q. Please do so, if you can. A. The Rock Island, The Frisco; The Missouri Pacific; The Iron Mountain; Missouri, Kansas & Texas; The Wabash; The Vandalia; The Baltimore & Ohio, Southwestern; The Louisville & Nashville; The Big Four; Chicago, Peoria & St. Louis.

Q. Which of those roads you have mentioned, and how many do not reach Alton? A. The Chicago, Peoria and

St. Louis, and the Big Four, are the only ones that reach Alton.

Q. And the Burlington, and the M. K. & T. only reach Alton by connecting over your tracks on the west side of the river? A. Yes, sir.

Q. How long have you been Superitendent of that bridge? A. Since the 1st of May of this year.

Q. Who preceded you as Superintendent? A. Mr. A. Hamilton.

Q. Where is he now? A. With the Jersey Central, at Newark, N. J.

Q. Did he have the same duties to perform as superintendent that you now perform? A. Yes, sir.

Q. Were you with some railroad company before you came to this position you now hold? A. Yes, sir.

Q. What road? A. The C. B. & Q.

Q. Where? A. At Hannibal.

Q. Did you have charge of the Hannibal Bridge. What position did you occupy there? A. I was chief clerk in the motive department.

Q. Did you mention the C. B. & Q. as one of these eleven roads? A. No, sir.

Q. As Superintendent of this bridge, have you custody and control of its books, showing the receipts and expenditures of the bridge? A. Yes, sir.

Q. How far back do the books in your control now show those receipts and expenditures? A. I think the original books are in the office, since the original Bridge Company was formed.

Q. Have you in your office, and under your control, copies of the bridge tariffs that have been filed from time to time, during the past few years? A. Yes, sir.

Q. I believe the subpoena that was sent to you requested you to produce those? A. No, sir, it didn't.

Q. Could you, without referring to the books, tell me

what time the new owners took possession—those that now own it—of this bridge? A. I think I can, practically.

Q. Just approximately. A. May, 1905.

Q. And you went to your position with the Alton bridge in May, 1906? A. Yes, sir.

Q. A year later? A. Yes, sir.

Q. Do you know from whom they bought that bridge? A. They bought it from the St. Clair, Madison and St. Louis Belt Railway.

Q. What line of road, and how many miles of track, did that corporation control, and where was it located? A. Three miles, the same as now.

Q. The same property you have described as being the property of the Illinois and St. Louis Bridge Company? A. Yes, sir.

Q. Is that a Missouri or an Illinois corporation? A. It is now a Missouri corporation.

Q. But the old St. Clair Company? A. I cannot tell you, but I am inclined to think it was an Illinois corporation. But I would not be positive. I know it is a Missouri corporation now.

Q. Do you know who was President of it? A. Of the old corporation?

Q. Yes, of the old corporation? A. No, sir; I do not. I know who was President at one time, but I don't know that he was—

Q. Who was that? A. Mr. E. F. Leonard, I think, was President.

Q. Where does he live? A. I don't know. He was not a resident of either St. Louis or Alton, I don't believe.

Q. Did you know any of the officers of the old road? A. Only the Superintendent. I knew him.

Q. Who was he? A. William Graham.

Q. Was that the man you succeeded? A. No, sir, I succeeded Mr. Hamilton.

Q. He was Superintendent also? A. Yes, sir.

Q. He succeeded Graham? A. Yes, sir, Hamilton succeeded Graham.

Q. And when did that occur? A. I think that was in December, 1905.

Q. And he remained until May, 1906? A. Yes, sir.

Q. And when did Graham go to the Alton Bridge? A. Why, possibly he was there about ten years.

Q. Where is he located at this time? A. I think he is in Chicago.

Q. Do you know what road he is with. A. No, sir. I don't think he is with a railroad, but I cannot say positively.

Q. What are his initials? A. William.

Q. Can you tell me, without referring to your tariffs, what the rates on coal in carload lots were, say in January, February and March, 1905, over your bridge at Alton? A. No, sir, I won't be positive, but I think thirty cents a ton.

Q. It was a lower rate than that before that time, wasn't it? A. I believe the tariffs on file do show lower rates at one time.

Q. Very shortly before that time, it showed a lower rate, didn't it? A. I cannot say positively.

Q. But you have those tariffs? A. Yes, sir, the tariffs are on file.

Q. You keep the books and have charge of the cash, do you? A. I have charge of the accounts, in a general way.

Q. And how many officers have you under you? A. I have just the agent, and an accountant.

Q. To whom do you report? A. To the President.

Q. And who is he? A. Mr. A. J. Davidson.

Q. Of the Frisco Railroad? A. Yes, sir.

Q. What other officials of the present Missouri and Illi-

nois Company are there besides Mr. Davidson, the President? A. Henry Miller is Vice-President.

Q. And who is he? A. General manager of the Wabash.

Q. And what other officers of that corporation are there? A. Why, the President and Vice-President; and they have a Treasurer, Mr. F. H. Hamilton.

Q. Where is he located? A. In the Frisco building.

Q. What is his office? A. He is Treasurer of the Frisco Railroad.

Q. And also Treasurer of the Bridge Company? A. Yes, sir.

Q. You settle with the Treasurer on financial matters? A. Yes, sir.

Q. What other officers of the company are there? A. There is the Secretary.

Q. Who is he? A. Mr. G. L. Ball.

Q. Where is he located? A. In the Frisco Building.

Q. What is his business? A. I think he is the Secretary of the President of the Frisco.

Q. Have you the stock-books of the company under your control? A. No, sir.

Q. Who has them? A. I presume the Secretary has.

Q. He is located here in the city, you say? A. Yes, sir.

Q. How far is your bridge located, from the Merchants' and Eads Bridge, if you can tell? A. I should say twenty-two or twenty-three miles, or possibly twenty-five.

Q. There is no rail connection between the City of St. Louis and the tracks of your road, except the Burlington, is there, on the west side of the river? A. No, sir.

Q. And there are none now being constructed, so far as you know? A. No, sir.

Q. Do you remember what the difference in the rates on carload lots of coal was before the increase, compared with what the present rates are, over your bridge? A. No, sir,

I can only remember a decrease; a decrease from thirty to twenty cents per ton. But I am not familiar with it.

Q. Is the eastern approach of your bridge in the city limits of the city of Alton? A. Yes, sir.

Q. And on the west shore of the Mississippi River, is it within the corporate limits of any town or village? A. No, sir, it is within the county of St. Charles.

Q. How far is it from where your tracks connect with the Burlington tracks to your bridge? A. About a mile and a half, or two miles, possibly.

Q. And there is no town at that place? A. There is a village at West Alton.

Q. An incorporated village? A. I believe it is.

Q. Just a store, isn't it? A. There are two or three stores and a saloon.

Q. From the yards where your tracks connect with the Burlington, westward or southward, is there any other railroad beside the Burlington that connects there? A. No, sir.

Q. The bridge had been sold to the eleven roads when you went to it? A. Yes, sir.

Q. So you know nothing of its history prior to that time, except as a matter of general information? A. That is all. I have no personal knowledge.

Q. How long have you been in the railroad business? A. About twenty years.

Q. Do you know when this bridge was built? A. I think in about 1894 or 1895. It is about twelve or thirteen years ago.

Q. Will you give us some information we desire, without our serving a subpoena upon you to produce those papers? Before answering, you may consult counsel if you wish. A. I am willing to produce them. Please give me a memorandum of what you desire.

Q. I want to get the receipts and disbursements of that bridge annually, from the time it was opened, the tariff rates

and the tonnage? I mean for the bridge, including the railroad? A. That is, the tonnage—

Q. The tonnage going across the bridge each way. A. For each year?

Q. Yes. A. I don't know whether those records show the tonnage for each year for the last twelve years. But they would show receipts and disbursements.

Q. Your records show the tonnage? A. Yes, sir. I know the records of the last few years show the tonnage—Well, I won't say that. They show cars and commodities. It is only since the Interstate Commerce Commission requires the tonnage that that record is kept.

Q. They would show the commodities and the number of cars, and whether loaded or empty? A. Yes, sir.

Q. You know what I want along that line, and do the best you can on it. A. Yes, sir.

Q. You have the tariffs? A. I won't say all the tariffs are on file there, but I think the tariffs for the last four or five years are.

Q. And the receipts and disbursements? A. The general books will show that.

Q. Get that, and bring it down to us, and we will not have to serve you with a subpoena to produce them.

The Commissioner: Give the witness a memorandum of exactly what you want. And he may be excused until Monday, October 15th.

H. D. HEUER, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. H. D. Heuer.

Q. What is your occupation? A. Secretary of the St. Louis Merchants' Bridge Terminal Railway Company, and

Assistant Auditor of the Terminal Railroad Association of St. Louis, and of the Merchants' Terminal, too.

Q. How long have you been connected, in your present position, with the Merchants' Terminal Railroad? A. I was elected Secretary in 1894. I have been with the Company since 1891.

Q. You have been with them in the capacity of Secretary since that time? A. Since 1894.

Q. What position did you occupy with the Company in 1891? A. As general accountant for the Merchants' Terminal.

Q. The Merchants' Terminal Railway Company? A. Yes, sir.

Q. At that time was the Merchants' Terminal Railway Company operating the Merchants' Bridge? A. Yes, sir.

Q. Have they always operated the Merchants' Bridge? A. Yes, sir.

Q. Have the accounts of the Merchants' Bridge been kept by the Merchants' Bridge Terminal Railway Company? A. What accounts there are, yes.

Q. Who keeps the records of the Merchants' Bridge Company? A. Which records do you refer to?

Q. The official records of the Merchants' Bridge Company? A. Their general books?

Q. Their corporate records? A. I keep the corporate records.

Q. Of the Merchants' Bridge Company? A. Not of the Merchants' Bridge Company.

Q. Who is the Secretary? A. W. G. Schofield, is the Secretary of the Company now.

Q. Does he live in St. Louis? A. Yes, sir.

Q. What is his business? A. Lawyer.

Q. Where is his office? A. St. Louis.

Q. How long has he been Secretary? A. A few years, I think.

Q. As accountant of the Merchants' Bridge Terminal Railway Company, what were your duties, in a general way? A. I kept the general books.

Q. Accounts of cash received, disbursements, etc.? A. Yes, sir, that is correct.

Q. Did you handle the vouchers of the company at that time? A. Yes, sir.

Q. With what official of the company did you make your settlements? A. We made settlements with railroad companies and individuals.

Q. I mean, with what official of the Merchants' Bridge Terminal Railway Company did you settle your cash accounts—to whom did you report? A. I did not handle cash. As a general thing we had a secretary and treasurer. I was accountant for awhile.

Q. Your duties were more that of a bookkeeper at that time? A. At that time—yes.

Q. After you became secretary, in 1894—I believe you said you became Secretary? A. Yes, sir.

Q. What were your duties, then? A. I would keep the record of the minutes, in addition to the other work I was doing.

Q. And you still did this work of bookkeeping? A. Yes, sir, I did everything from bookkeeper up to treasurer. That is, I acted in their absence.

Q. The treasurer handled the cash of the company? A. Yes, sir.

Q. Who handled the vouchers? A. I handled everything, at different times.

Q. Whose duty was it to handle the vouchers? A. The Secretary handled the vouchers, and I handled them for him.

Q. In 1894 you became Secretary, and then you handled them? A. That is about right— Well, they had an auditor of the company at that time, about 1894.

Q. Who are the officials, and what are their official titles now, of the Merchants' Bridge Terminal Railway Company? A. C. K. D. Walsh is Vice-President.

Q. Who is Mr. Walsh, and where does he live? A. C. K. D. Walsh is in the grain business in St. Louis, and lives in Vandeventer Place.

Q. Is he any relation to Mr. Walsh, the chairman of the Terminal Association? A. He is a son of Mr. Walsh.

Q. He is not a railroad man? A. I think not.

Q. Who are the other officials? A. F. C. Dobb is Treasurer.

Q. Who is he, and where does he live? A. He lives in St. Louis, and his office is in the Union Station.

Q. He is a railroad man? A. Yes, sir.

Q. How long has he been treasurer? A. Since 1894.

Q. Is he an official of the Terminal Railroad Association? A. Yes, sir, he is Treasurer of the Terminal Railroad Association.

Q. And the Merchants' Terminal Railway and the Terminal Railroad Association, have a common treasurer in the person of Mr. Dobb? A. Yes, sir.

Q. What other officials are there? Mr. Vinnedge—what is he? A. Mr. Vinnedge is auditor of the Terminal Railroad Association, and also auditor of the Merchants' Bridge Terminal Railway.

Q. He is the common auditor of the two roads? A. Yes, sir.

Q. What other officers are there? A. I am the secretary of the Merchants' Bridge Terminal Railway Company, and assistant auditor of that company, and assistant auditor of the Terminal Railroad Association of St. Louis.

Q. Who is secretary of the Terminal Railroad Association? A. Mr. Vinnedge.

Q. Who is the auditor of the Terminal Railroad Association? A. Mr. Vinnedge.

Q. He is secretary and auditor? A. Yes, sir.

Q. Do you perform the active duties of auditor of the Terminal Railroad Association, and also of the Merchants' Bridge Terminal Railway Company? A. During the absence of the auditor—yes.

Q. Who does that work actively—do you do that work, or does he? A. He does his part of the work when he is here, and I do it when he is not here.

Q. Is he here the greater part of the time? A. Yes, sir, he is here all the time except when called away by business or vacation.

Q. As auditor of the Merchants' Bridge Terminal Railway Company, you handle all the papers, receipts and orders that represent cash and money? A. Yes, sir.

Q. Your company publishes tariffs, and files them with the Interstate Commerce Commission, does it? A. I believe so.

Q. From points on your road in Missouri to points on your road in Illinois? A. I believe so. I don't pay any attention to the tariffs.

Q. What official of your company would know of, or have record of, shipments that originated, say in Granite City, at the Niedringhaus Rolling Mills plant, and destined to this side of the river? A. Mr. E. Johnson is the freight agent, and all such records are kept in his office.

Q. His records should show where goods originate, the time shipped, the quantity, and the rates? A. I haven't any doubt of it.

Q. And that is the proper place to look for that information? A. Yes, sir.

Q. Your records wouldn't show that? A. No, sir, they wouldn't show that.

Q. Your records, however, would show the receipts for that, wouldn't they? A. The revenue?

Q. Yes. A. Yes.

Q. That is, your auditor's records? A. Yes, sir.

Q. And if the revenue was less than the amount fixed by the tariff for that shipment, would your record show that? A. If we investigated it, it probably would.

Q. Would your records show that? A. Yes, sir, I think they would.

Q. Do you know whether or not any shipments have come over your line at less than the tariff rates? A. I couldn't say.

Q. Have you ever investigated to find out? A. No, sir.

Q. Wouldn't you know it, if such were the case? A. I would not, personally.

Q. What official would know? A. I suppose Mr. Johnson might know.

Q. Mr. Johnson, or the Traffic Manager, which? A. I wouldn't say who would know. I never asked that question.

Q. Do the records in your Auditor's office show the receipts from passenger traffic? A. Yes, sir.

Q. They show it from all points on the line? A. Yes, sir.

Q. Do you know whether or not your road runs a train or trains out of the Union Station into the State of Illinois, passenger trains? A. There are a couple of trains run out of the Station now—yes, sir.

Q. Where do they go? A. Since they have been running in and out of the Station, I have not paid much attention to their destination. I think one is a "shop train," run out for the shop men.

Q. Where is the shop? A. In Brooklyn, Illinois.

Q. Is that on the Merchants' Bridge Terminal Railway? Isn't that on the Terminal Railroad Association? A. They are on the east side tracks. They are operated by the Terminal Railroad Association.

Q. Where does the other train go? A. I believe there is a "merchants' train," which goes to Granite City, which leaves the Station; but I am not sure of that.

Q. Is that a train open for travel to everybody? A. I cannot say positively.

Q. What is your information on that? A. I have a recollection of a train going out of there, but haven't paid much attention to it. It is but recently it has been running out of there.

Q. Do your records show that tickets have been sold to passengers from Union Station to that point? A. We have on sale in the general ticket office tickets from St. Louis to points in Illinois on our line.

Q. At the Union Station? A. Yes, sir.

Q. Do you know where the Conlogue road is situated? A. The East St. Louis & Carondelet Railroad?

Q. They called it the Conlogue road, I believe; that is the original name. A. I have been over it.

Q. About how long is that? A. About nine miles, according to my recollection.

Q. It runs one branch over to what is called "Falling Spring?" A. Yes, sir.

Q. That is a kind of a resort and picnic grounds, isn't it? A. Yes, sir.

Q. Do you know whether or not there are passenger trains run over that road? A. Operated by our company, you mean?

Q. Yes. A. No, sir.

Q. Is there by any other company? A. I have heard of passenger excursion trains going over there.

Q. What roads run trains over your tracks to that place? A. I think most any line could use the tracks, under an agreement; make application for it.

Q. The track is used for that purpose? A. It has been used, yes, sir.

Q. Lately? A. Yes, sir, this summer there have been excursions over there.

Q. And those trains are operated under agreement with the Terminal Railroad Association? A. Yes, sir.

Q. Who furnishes the motive power? A. I cannot say about that.

Q. Does the Terminal Railroad Association furnish it? A. I couldn't say.

Q. Does the Terminal Railroad Association permit the operation of trains over its tracks by other motive power than its own? A. Yes, indeed.

Q. Is it a fact that the Frisco Railroad is now running their freight trains over the Merchants' Bridge and the Terminal Railroad, with their own engines? A. I think it is.

Q. How long has that been going on? A. I should say about a year or so.

Q. That is under contract with the Terminal Railroad Association? A. Not if they operate over the Merchants' Bridge Terminal Railway.

Q. The contract would be with whom, then? A. The contract would be with the Merchants' Bridge Terminal Railway Company.

At this point the further hearing of testimony in this case is adjourned, until to-morrow, Friday morning, October 12th, 1906, at 10 o'clock, a. m.

R. E. Rombauer,
Special Commissioner.

St. Louis, Oct. 12th, 1906.

Met pursuant to adjournment as above on Friday, October 12th, 1906, at ten o'clock, a. m., in the Federal Building, St. Louis, Mo.

Present: Hon. R. E. Rombauer, Special Commissioner; Messrs. E. C. Crow, Chester H. Krum and Charles Nagel appeared for the complainant; Messrs. H. S. Priest, M. F. Watts and F. W. Lehmann appeared for the defendants.

The following proceedings were had:

HENRY MILLER, recalled, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. What is your name? A. Henry Miller.

Q. In what business are you? A. I am General Manager of the Wabash Railroad.

Q. Are you an officer of the Illinois & Missouri Bridge & Belt Line Railroad Company? A. Yes, Vice-President.

Mr. Watts: Q. What is the exact name of that company? A. Missouri & Illinois Bridge and Terminal Company.

Q. Do you know the date that the present corporation purchased the property now belonging to that company? A. I do not.

Q. Can you approximate it? A. Not closely.

Q. Within a few months? A. I should say about two years.

Q. Are you acquainted with the negotiations that led up to that purchase? A. No, sir.

Q. Do you know what person, or persons are acquainted with the details that led up to that purchase? A. I think Mr. Ramsay handled that.

Q. Anybody else? Who represented your road in the matter? A. He did. He was connected with it at that time.

Q. Do you know who represented the other roads? A. I do not. That was prior to my connection with the bridge, in any way.

Q. When did you become connected with it? A. About six months ago.

Q. After you became connected with the Wabash Railroad? A. Yes, sir.

Q. Did you succeed Mr. Ramsay? A. In the bridge, yes.

Q. Have you ever had any occasion to look into the affairs of the bridge, to determine the volume of business carried on, etc., or has your position been a formal one, entirely? A. I have had nothing to do directly with the operation or details of the bridge.

Q. What persons or officers attend to that matter? A. The Superintendent.

Q. That is the gentleman at Alton, Mr. Louden? A. Yes, sir.

Q. And Mr. Davidson, the President, and the other officials, have nothing to do with the actual management of it? A. Mr. Davidson, being the President, has direct charge of the bridge, but the Superintendent handles the details.

Q. He handles the business, practically? A. Yes, sir.

Q. Do you know the price paid for that bridge? A. I do not.

Q. Do you know where that fact could be ascertained. A. Mr. Davidson could give it to you.

Q. Do you know whether or not the eleven railroads are equally interested in it? A. They are.

Q. Do you know whether or not this corporation you have mentioned as owning the bridge properties, was organized for the purpose of purchasing this bridge? A. I think it was.

W. B. GROSECLOSE, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. W. B. Groseclose.

Q. You are the General Freight Agent of the M. K. & T? A. Yes, sir.

Q. How long have you occupied that position? A. I think since January, 1901.

Q. Were you with the Railroad Company before that time? A. Yes, sir.

Q. In what capacity? A. Assistant General Freight Agent here in St. Louis.

Q. Do you know a corporation known as the Interstate Car & Transfer Company? A. Yes, sir.

Q. Has your road been doing any business with that company in past years? A. We did for awhile, but I don't know whether we are doing any now or not.

Q. In previous years you did? A. Yes, sir.

Q. Did you in 1901? A. I think so, yes.

Q. Do you know who represented the Interstate Car & Transfer Company in traffic arrangements, handling freight across the river? A. I think it was Mr. Baulch. That is my recollection, but I am not quite positive about it.

Q. Do you know Mr. R. A. Campbell of the Mobile & Ohio, the freight agent? A. I know Mr. Campbell, Assistant Freight Agent of the Southern Railway.

Q. Maybe it is the Southern Railway. Did he at any time represent the Interstate Car & Transfer Company in traffic matters? A. I don't know that he ever did.

Q. Do you know whether or not your company had an arrangement with the Interstate Car & Transfer Company, in 1901, by which the Interstate Car & Transfer Company transported commodities and cotton across the river east-

ward, for your company, at less than the published rates? A. We had some arrangement with that concern, covering the transportation across the river of various and sundry commodities. I don't know whether cotton was one of them or not.

Q. On the terms I have suggested—at less than the published tariff rates of the Interstate Car & Transfer Company? A. Yes.

Q. During what years did that arrangement maintain? A. I cannot recall exactly. I should say along about 1900 or 1901. Our arrangement with that concern was not in the matter of rates across the river; it was a division of the through rate.

Q. And a division of the through rate made the reduction in the transfer charge? A. Yes, sir.

Q. It did not affect the rate paid by the shipments from or to East St. Louis, or any destination on the other side of the river; inasmuch as the M. K. & T. absorbed the transfer charge across the river, it was solely a divisional arrangement between the Transfer Company and the M. K. & T., in which the public was not interested.

Q. But when settlement was made between the Interstate Car & Transfer Company and the M. K. & T. Company it was made at less than the regular published tariff rate? A. Less than the regular published tariff rate of the Interstate Car & Transfer Company for transporting cars across the river, between East St. Louis & St. Louis.

Q. With what official of the M. K. & T. Railroad were these settlements made? A. I believe they were made by our agent.

Q. Who was your agent? A. I don't remember who was agent at that time. We have had a number in the last five or six years.

Q. What particular agent do you refer to? A. The local freight agent. I think he settles those accounts.

Q. In this city? A. Yes, sir, I think they were settled through his office.

Q. Can you ascertain and furnish us the name of your freight agent at that time? A. Yes, sir; I could.

Q. If you will do so, I will be much obliged to you. Do you remember the amount of reduction on this traffic across the river, below the published tariff? A. No, sir; I do not. It varied on various commodities, accordingly as the published rates themselves varied.

M. B. HILLIARD, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. M. B. Hilliard.

Q. What is your business? A. Produce commission business.

Q. What is the style of your firm? A. Bosche & Hilliard Produce Company.

Q. Where is your place of business? A. No. 804 North Third Street.

Q. How long have you been in business there? A. This firm has been in existence since the 1st of April of this year.

Q. There was a firm you succeeded, wasn't there? A. Yes, sir.

Q. What was it? A. We were both in business. His company was the George Bosche Produce Company, and mine was the Hilliard Produce Company.

Q. Have you had occasion to handle cars backward and forward across the river, in your line? A. Yes, sir.

Q. Have you experienced any difficulty or delay in getting freight backward and forward across the river? A. Yes, sir, a great deal.

Q. What is the character of that trouble, do you know?

A. Well, it generally takes from three to four days to get a car of stuff from East St. Louis to St. Louis.

CROSS-EXAMINATION, BY MR. H. S. PRIEST:

Q. Where did you say your place of business was? A. No. 804 North Third Street.

Q. How long have you been in business there? A. Well, that building was completed in June, and we moved in there along about the middle of June.

Q. Prior to that time, where were you located? A. At 1109 North Third Street.

Q. How far is your present location from the former? A. About three blocks.

Q. What was the nature of your business? A. Why, we handled produce of all kinds, potatoes, onions, cabbage, apples, everything pertaining to the produce business.

Q. How are they handled, in car-load lots or parcels? A. In car-load lots.

Q. From what points do you generally get them? A. It depends entirely on where the crops are. Sometimes we draw our supplies from Minnesota, Michigan, Missouri or Illinois. It depends on where the crops are. Of course, we handle from all parts of the country. In the early part of the season we get potatoes from Texas and Louisiana, and later from Wisconsin and Michigan.

Q. You have said that the delay was three or four days in getting from East St. Louis to St. Louis? A. Yes, sir.

Q. What routes do you use between St. Louis and East St. Louis? A. All roads; the C. & A., and the Illinois Central. I had a car that got in yesterday that was delivered to the Terminal Association by the I. C. on the 8th; a car of potatoes.

Q. How do you know it was delivered from the I. C. on the 8th? A. Well, the I. C. said so, and the Terminal also

said so. I called them up yesterday, trying to get hold of that car of potatoes.

Q. How do you know—what agent of the I. C. did you talk to? A. I don't know that I spoke to the agent. One of the clerks, the chief clerk, or the inbound car-load clerk, one or the other.

Q. But you don't really know to whom you spoke. To whom did you speak, of the Terminal Association? A. One of the clerks. They have different clerks that take hold of those matters.

Q. At what place? A. At the Terminal office. I called them up by telephone.

Q. You called up the Terminal by telephone? A. Yes, sir.

Q. And talked to one of the clerks? A. Yes, sir.

Q. You did that personally? A. I don't know whether I did it personally yesterday, or not. I think maybe I had the girl do it. I don't remember.

Q. All you know is what the party operating the telephone told you? A. I know when the car of stuff got into East St. Louis.

Q. How do you know that? A. The notice by the I. C. that the car had arrived, and I told them to send it to Main and Carr Streets.

Q. Have you that notice with you? A. No, sir.

Q. What did you do with it? A. I guess it is at the office.

Q. That was the notice from the Illinois Central saying that the goods had arrived at East St. Louis, on its road? A. Yes, sir.

Q. Do you know what course would be pursued in the delivery of that to the Terminal Company, after it had arrived at the Illinois Central freight yards? A. How the Illinois Central would deliver it to the Terminal?

Q. Yes. A. No, sir, I can't say I do.

Q. So the only notice you had from the Illinois Central was that a car had arrived on the Illinois Central, over at East St. Louis in the yards, and was in the possession of the Illinois Central? A. Yes, sir.

Q. Then how did you communicate with respect to that? A. Prior to the arrival of that car, in order to facilitate the delivery of it, I wrote the agent of the Illinois Central at East St. Louis, and told him we had such and such a car coming, and upon arrival to immediately send it to Main & Carr Streets. I done that to have the car caught in what is called the "outer yard," so it would not have to come into the I. C. delivery yard, and then have to be switched out again.

Q. Do you know whether your directions were obeyed? A. I guess they were. The car came over.

Q. You are simply guessing at it? A. I don't know anything else I could do. I cannot say anything but that. I know the car came over to Main and Carr.

Q. The car came over to Main and Carr Streets on this side of the river? A. Yes, sir.

Q. But when it was delivered to the Terminal Association, you don't know? A. Of personal knowledge, I do not know.

Q. Or where it was delivered, you do not know? A. No, sir.

Q. Did you get a notice from the Terminal Association that the car had arrived in St. Louis? A. Yes, sir.

Q. When did you get that notice? A. Yesterday morning.

Q. Yesterday morning? A. Yes, sir.

Q. Was it the same day you had telephoned in regard to it, or had the office girl telephone in regard to it? A. We had been telephoning ever since we started the car.

Q. Now you called my attention to one specific act of telephoning; when was that? You said, yesterday. A. It

couldn't have been yesterday; it must have been the day before yesterday.

Q. Didn't you say it was yesterday? A. I said the car arrived yesterday.

Q. Didn't you say you telephoned in regard to it yesterday? A. I don't think so.

Q. If you did, you are mistaken in that? A. I couldn't have telephoned yesterday. I was in the yards at 7 o'clock, and I know the girl wasn't down there.

Q. Did you telephone the day before? A. Yes, sir.

Q. Are you sure of that? A. Yes, sir.

Q. Did you telephone yourself? A. I don't know whether I did or not.

Q. I wish you would differentiate between what you did and what somebody else did at your suggestion; did you telephone at all yourself, about that particular car? A. That particular car, I do not know.

Q. Do you know of any one else who did? A. Yes, sir.

Q. Who? A. The young lady in the office.

Q. When? A. Two or three times.

Q. Mention a specific time? A. I don't know that I can.

Q. Certainly within two or three days of an incident, you ought to have memory enough to locate the time. A. I can explain the situation—

Q. I don't want you to explain the situation. I want you to answer my questions. I don't want you to testify to anything that you have no personal knowledge of. I dont' want you to indulge in guesses or conjectures about the matter. I want to know who telephoned, and when? A. I cannot say just exactly when.

Q. Can you say who? A. Miss Clara Bosche telephoned.

Q. Do you know whether she telephoned yesterday, the day before yesterday, or the day before that? A. I feel

pretty safe in saying she telephoned every day since the car left.

Q. Left where? A. Since it arrived in East St. Louis.

Q. How do you know when it arrived in East St. Louis? A. I know what the I. C. agent told me.

Q. You don't know when it left the I. C.? All you know is what the I. C. agent told you? A. That is all.

Q. Did the Illinois Central talk to you personally? A. The Illinois Central?

Q. Yes. A. One of their clerks talked. I don't know whether they talked to me personally, or not.

Q. Do you remember whether they talked to you personally? Do you remember that you have had a single conversation, by telephone, or personally, with any one connected with the Illinois Central? A. Did I ever have?

Q. With respect to this car. A. I cannot say positively with respect to this car.

Q. You told me awhile ago that you did talk to one of the clerks. A. I don't remember it, but I don't think I did.

Q. Don't you remember what you said five minutes ago? A. We have cars arriving every day, and I cannot impress upon my mind whether I called up to find out about that car, or if one of the people in the office called up.

Q. Didn't you tell me, less than five minutes ago, that you talked to a clerk in the I. C., and in the Terminal office? A. No, sir, I don't think I did. I said the I. C. told us when they delivered the car to the Terminal.

Q. Did the Terminal tell you when the car was received by it? A. I don't remember whether they did or not.

Q. That occurred less than two days ago? A. Yes, I know, but I am handling this stuff all the time, and when the car is in I don't remember who tells me it is in.

Q. You say you are handling these shipments every day? A. Yes, sir.

Q. What other shipment, besides this car, have you received within the last two or three days? A. I can mention probably ten to fifteen carloads of apples that came in over the C. & A.

Q. Don't guess; be positive. A. I shall have to refer to my books, if they want the car numbers and dates.

Q. I want car numbers and dates. I don't want you to guess about it, and tell me what somebody else told you. A. I can't remember the car numbers and dates. I know the stuff is all the way from one day to a week in getting over here.

Q. From East St. Louis? A. Yes, sir.

Q. Do you know whether it is that long after delivery to the Terminal, and on the Terminal tracks, in East St. Louis? A. I could not say positively.

Q. Can you say it was not detained that long in the yards of the company that brought it to East St. Louis? A. No, sir. I can't go over there and see the car. I have to take their word for it.

Q. You don't know whether that delay was occasioned by the road bringing it in, or by the Terminal? A. I cannot say of my own personal knowledge.

Q. Why, then, did you say it was occasioned by the Terminal? A. I didn't. I cannot say positively it was occasioned by the Terminal. All the information we have is that we call up the railroad company, and ask, "where is such and such a car?" and they say "The Terminal has it." They say, "We delivered it to the Terminal at half past eleven o'clock that night." Then we call up the Terminal, and say, "The I. C. says they delivered you such and such a car at half past eleven. Where is it?" That is all done by telephone.

Q. And is not done by you personally? A. No, sir.

Q. It is done by your clerks? A. Yes, sir.

Q. And all you know is what your clerks tell you? A. Yes, sir.

Q. You have no personal knowledge of it yourself, at all? A. I have done some telephoning myself.

Q. Tell us any instance in which you personally did the telephoning? A. I cannot tell you any particular instance. It comes up so often. Sometimes I telephone, and sometimes the clerks telephone.

Q. What is the volume of your business, annually? A. About three hundred cars.

Q. During what period, a year? A. That is a whole year; inbound, and outbound.

Q. Is that distributed uniformly throughout the year? A. Oh, no, sir.

Q. When is the greatest bulk of your shipments? A. It depends entirely on how the crops are shaped.

Q. On an average, can't you tell me? A. We do the biggest business during the fall of the year.

Q. What months? A. September and October.

Q. How many cars have you received since the first of September, at East St. Louis? A. I couldn't tell you.

Q. About how many? A. Oh, probably thirty, I guess.

Q. Thirty cars? A. Yes.

Q. From the first of September to the present date? A. Yes.

Q. That is less than a car a day? A. Yes, sir.

Q. What is the greatest number you have received in any one day, during that period. A. Five, I guess.

Q. From what points did you receive the cars? A. Most of those came from Missouri.

Q. What point in Missouri? A. Mayfield.

Q. Did they come to East St. Louis in that way? A. Yes, sir.

Q. How did they get to East St. Louis? A. By the C. & A.

Q. What county is Mayfield in? A. Mayview it is. I don't know the county, but about fifty miles this side of Kansas City.

Q. By whom were those cars shipped to you? A. By our man packing apples out there.

Q. Those were five cars of apples? A. Yes, sir.

Q. Do you remember the date when they were shipped? A. No, sir; I do not.

Q. Do you remember the date when they arrived in East St. Louis? A. I do not, no, sir.

Q. What other shipments, besides those five car loads of apples? A. We have had potatoes and onions.

Q. Where from? Let us get the dates a little more definitely. A. We have had onions from Indiana, and Iowa, and Wisconsin.

Q. Take Wisconsin, how many shipments did you receive from Wisconsin? A. Oh, I don't know; probably five or six cars.

Q. You are simply guessing at that? A. Yes, sir; I can't give you a positive number.

Q. From what points in Wisconsin did you receive shipments? A. Most of them from Waupaca.

Q. What road? A. Some on the C. & A., and some on the I. C.

Q. Does the C. & A. extend to Waupaca, Wisconsin? A. Not that I know of.

Q. What was the initial line? A. I don't know.

Q. Did you get way-bills for these cars? A. Yes, sir.

Q. And bills of lading? A. Yes, sir.

Q. Did those way-bills indicate the routing? A. The freight bills we got do not show any routing.

Q. Don't the way-bills? A. We don't get a way-bill. We get a freight notice, and a freight bill. The railroad company keeps the way-bill.

Q. Do you get a bill of lading? A. Yes, sir; we get a bill of lading.

Q. Doesn't your bill of lading indicate the routing? A. No, sir.

Q. You are sure of that? A. In some instances it does. If a car of produce is loaded in a C. & A. car we look for it over the C. & A.; if it is loaded in an I. C. car, we look for it over the I. C.

Q. Do you know what date those potatoes were received in Waupaca? A. No, sir.

Q. Do you know what date they were shipped? A. Only from the bill of lading.

Q. Do you know what date they arrived in East St. Louis? A. No, sir.

Q. Do you know what date they came from East St. Louis to St. Louis? A. No, sir.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. The inquiries that were made by your firm as to these cars, from the Terminal, and from the railroad over which the goods had come, were made in the usual and ordinary course of the conduct of your business? A. Yes, sir.

Q. By your clerks and employees, under your direction? A. Yes, sir.

GEORGE P. SCHOPP, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. George P. Schopp.

Q. What is your business? A. Fruit and produce.

Q. Where is your place of business? A. Nos. 721 and 723 North Third Street.

Q. How long have you been in business? A. About fifteen years, I suppose.

Q. What is the volume of your business annually, gross tonnage, cars, dollars and cents, or whichever way you wish to express it? A. It is hard to say. It all depends upon the season. Sometimes annually as high as four and five hundred cars; and then for years it will be only home-grown products. It all depends on crops, as they vary in the country.

Q. Do you handle any of the goods in your line, inbound and outbound, across the river, between St. Louis and East St. Louis? A. We are trying to handle most of our goods on this side, now.

Q. In former years, did you? Last year, for instance. A. Oh, yes.

Q. Did you experience any trouble in handling them backward and forward across the river? A. Yes, sir, we had considerable trouble.

Q. How do you transport your goods now across the river—by rail? A. As a general rule, we allow our cars to stop in East St. Louis, for the sake of making time.

Q. How do you get the goods over here? A. In our wagons we transfer them across.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. You say that formerly you had a good deal of trouble? A. Yes, sir.

Q. That was when you had deliveries in car-loads to this side? A. Yes, sir.

Q. Are you familiar with the actual course which is pursued in the handling of the cars? A. No, sir, I am really not familiar, excepting that when we used to receive cars over there, and request the companies to forward them over here, there would be delays, of anywhere from one to two days, and up to five days. And there is a time of year

which comes, with us especially, when the weather is changing, and sometimes a cold wave comes, and a car is out on us, and it would freeze, and we cannot assume the risk.

Q. You have not answered my question: are you familiar with the actual course of handling cars? A. No, sir, I am not familiar with the connections at all.

Q. If a car is brought into East St. Louis by the railroad company, it of course must do something with it? A. Yes, sir.

Q. Do you know whether, when it comes to East St. Louis it at once puts it on the track of the Terminal Association, or whether it is left, in the first instance, on the track belonging to that railroad company? A. That is something I cannot say.

Q. So you have no knowledge at all of the course pursued? A. No, sir; no knowledge of the connections.

Q. Have you any knowledge of the yard facilities of either the railroad companies, or the Terminal Company? A. In East St. Louis?

Q. Yes. A. The yard facilities in East St. Louis are always in good shape for us. We can always get a car in over there.

Q. Because there is more room over there than on this side? A. Yes, sir.

Q. On the other hand, there seems to be a want of yard-room on this side of the river? A. Yes, sir.

Q. That you have observed here? A. It seems to be that way.

Q. Here most of the railroad tracks are in what is known as the Mill Creek Valley, aren't they? A. We are up toward North St. Louis, and we do most of our business in what they call the North St. Louis district, anywhere from North Market to Carr Street.

Q. And that district is all built up? A. Yes, sir.

Q. Crossed and recrossed by streets and alleys, which are public places? A. Yes, sir.

Q. And you are impressed with the fact, aren't you, as a practical business man, and shipper, that the railroads have not sufficient room on this side of the river? A. Yes, sir.

Q. For doing the business of this great city? A. Yes, sir.

WALTER NICHOLS, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. Walter Nichols.

Q. What is your business? A. I am Assistant General Freight Agent of the Big Four Railroad Company of St. Louis.

Q. What is the corporate name of that road? A. The Cleveland, Cincinnati, Chicago & St. Louis Railway Company, I believe.

Q. How long have you been Assistant General Freight Agent? A. Since December, 1903.

Q. Located in St. Louis all that while? A. Yes, sir.

Q. Do you have any assistants under you? A. Yes, sir.

Q. How many? A. Do you mean clerks in the office?

Q. Any employees that are under you. A. I cannot answer your question definitely, unless I sit down and figure it up.

Q. Just approximately? A. We have about nine or ten in our office, with outside agencies reporting.

Q. Is there any fast freight dispatch line that is operated over the Big Four to the Altantic sea-coast? A. Fast freight line, did you say?

Q. Yes. A. Yes.

Q. What is the name of it? A. There is the White

Line; the West Shore Line; the Nickel-Plate Line; the Lake Shore, Lehigh Valley Route; the Jersey Central Lake Shore Dispatch; the Central States Dispatch; the Empire Line; the Erie Dispatch; the Lackawanna Line; and there may be others.

Q. They all operate into and out of St. Louis over the Big Four? A. Yes, sir.

Q. Have they all offices in St. Louis? A. They have representatives in St. Louis.

Q. Which of these lines, if any of them, is controlled by the New York Central?

Counsel for defendants object to the question.

A. I would say the White Line and the West Shore Line.

Q. At what point on the Big Four in the State of Illinois are there coal mines located? A. May I ask you a question? Do you mean mines which serve the St. Louis market?

Q. I do not confine my question to that. A. There are mines in what we know as the Saline County or Harrisburg district. There are mines on our road in the vicinity of Danville, Illinois. There are also mines on the main line in Illinois, at Pana, Witt, Courtkamp, Hillsboro, Gillespy and Livingston.

Q. Which of the mines that you have mentioned are on the branch lines, and where do the branch lines that they are on leave the main line? A. The mines in the Saline County district, and at Danville, are on what is known as our Cairo Division.

Q. And at what point does that leave your main line? A. At Paris, Illinois.

Q. How far is Paris from St. Louis, just approximately? A. Oh, it is in the neighborhood of a hundred and seventy miles; I don't carry those distances in my head.

Q. About a hundred and seventy miles? A. Yes, sir.

Q. How far out on your line is the first mine at which

coal is mined and shipped to the St. Louis district? A. Livingston.

Q. How far is that? A. Between forty and fifty miles.

Q. How many mines are located at Livingston? A. One.

Q. What person, company, or firm, operates that mine? A. The New Stock & Coal Company.

Q. Is that a corporation? A. I cannot answer that of my own knowledge, because I do not know.

Q. Have they an office in this city? A. Yes, sir.

Q. You do business with them? A. Yes, sir.

Q. Do you know who controls that corporation? A. No, sir, I do not.

Q. Who has charge of their office here? A. The Rutledge & Taylor Coal Company.

Q. Where is their place of business in this city? A. In the Lincoln Trust Building.

Q. At what point is the next mine, leaving St. Louis and traveling east on your road, located? A. Hillsboro.

Q. How far is that from St. Louis? A. It is between fifty and sixty miles.

Q. And how many mines are located there? A. One.

Q. Who controls that? A. It is known as the Hillsboro Coal Company.

Q. Where is their general office? A. As far as my knowledge goes, it is at Hillsboro.

Q. Have they an office in this city? A. Not that I know of.

Q. Have they a representative here? A. Not to my knowledge.

Q. Who handles their product here? A. I don't know.

Q. What is the next place at which a mine is located, on your line? A. Courtkamp Switch.

Q. How far out is that? A. A little over a mile east of Hillsboro.

Q. How many mines are there at that place? A. One, as far as I know.

Q. Who runs that? A. The Courtkamp Coal Company.

Q. That is a corporation also? A. That I cannot say.

Q. They have an office in this city? A. Not to my knowledge.

Q. Where is the next mine located, going east on your road? A. At Witt.

Q. How far is that? A. Six, eight or ten miles east of Courtkamp.

Q. How many mines are located there? A. As far as I know—one.

Q. What is the name of that company? A. It is operated by the Deering Coal Company, of Chicago.

Q. Is that a corporation? A. I do not know.

Q. Have they an office in this city? A. I do not know.

Q. Have they a representative here? A. I cannot say.

Q. What is the next mine on your line? A. At Pana.

Q. How many mines are there? A. That I cannot answer definitely, but there is one mine located on the tracks of the Big Four.

Q. There are other railroads at Pana, aren't there, that enter St. Louis? A. There are two lines.

Q. There is a line that goes north and south there, isn't there, the Illinois Central? A. The Illinois Central, and the B. & O. Southwestern.

Q. What is the next mine on your line? A. Those are all the mines on the main line.

Q. That send coal to St. Louis? A. Pana does not send coal to St. Louis.

Q. How far out is Pana? A. It is in the neighborhood of ninety-five miles.

Q. How far out on your line is coal mined and sent to the St. Louis market? A. I believe as far as Witt.

Q. And how far is that, in miles? A. I would have to

figure that. I have already said it was from eight to ten miles east of Hillsboro. I don't carry those distances in my head.

Q. You know about how far Hillsboro is, don't you? A. I said so, yes.

Q. What is it? A. Hillsboro, I think I said, was between fifty and sixty miles from St. Louis.

Q. And Witt is ten miles further east than that? A. Yes, sir.

Q. Which would make it about seventy miles? A. Yes, sir; about seventy miles.

Q. Do you know of such an organization as the St. Louis Coal Traffic Bureau? A. Yes, sir.

Q. How long have you represented your road in that association? A. Since the latter part of 1901.

Q. How frequently have you attended the meetings of that Coal Traffic Association? A. I have attended the meetings at stated times.

Q. Can you remember back to what time you first became acquainted with that association, as representing your road? What year? You said about 1900. A. I think it was in the latter part of 1901.

Q. Wasn't it in 1899? A. Not for me.

Q. Who preceded you, Mr. Holliday? A. Yes, sir.

Q. What time did Mr. Holliday leave here to go to Pittsburg? A. My recollection is it was in December, 1901, or possibly November.

Q. You have seen copies of the proceedings of that association that have been sent to you by the secretary, Mr. Fraser? A. Yes, sir.

Q. The copies of those proceedings contain the action of that association with reference to the coal rates from here into the Illinois coal fields? A. They contain a memorandum of the discussion.

Q. They contained any changes that were made in the

rates, didn't they, also, at various times? A. They naturally would, yes.

Q. And copies of these proceedings were regularly sent to each member for reference? A. I cannot answer for the other members.

Q. You can answer for yourself: You received them regularly? A. I have already answered that—Yes.

Q. And you filed them? A. We may have kept some of them.

Q. In the years 1901 and 1902, did you send over your line any coal into the St. Louis market at a less rate than the agreed rate, fixed by the St. Louis Coal Traffic Association? A. Not to my knowledge.

Q. Would you have knowledge of it, if that happened? A. Not necessarily.

Q. Who would? A. I cannot say.

Q. What official of your office here in St. Louis would have that knowledge?

Mr. McNulty: In behalf of Mr. Nichols, I would like to object, that that is not proper evidence to bring out, who would know. What he knows he can state.

Mr. Crow: Q. If you know, you know. A. No one.

Q. Where are the settlements made for freight, in the way of coal that comes over your line, from Illinois into St. Louis—where are those payments made, and where are the records of it kept?

Mr. Priest: That assumes a car did come over their line into St. Louis. The question is objected to on that ground.

Mr. Crow: Q. Coal is shipped over your road, during the time I have mentioned, 1901, 1902, 1903, 1904 and 1905, into St. Louis? A. Yes, sir, coal has been shipped in.

Q. Where are the records kept, that would show settlements for those freight bills? A. Coal delivered at East St. Louis is settled for over there; coal delivered in St. Louis is billed forward to the delivering line. We would have the

records of settlements in East St. Louis, and the delivering line would have the record of settlements in St. Louis.

Q. Who makes the settlements between the delivering line here and your line? A. That is handled in the local freight agent's accounts.

Q. The local freight agent of your road would handle your end of it? A. If the coal came over our road.

Q. That is what I say, if it came over your road? A. Yes, sir.

Q. And the local freight agent of the Terminal Company would handle it for the Terminal Railroad? A. His office would.

Q. That's what I mean. Who is your employee or representative (I speak of your road) at East St. Louis, who would have charge of these accounts? A. You mean the local freight agent?

Q. I don't know whether it is the local freight agent, or who it is. I am asking you. A. R. R. Harris, local freight agent of the Big Four.

Q. Did you ever have any contracts for coal traffic with the Hillsboro Coal Company, or the Consolidated Coal Company?

Objected to by counsel for defendants, on the ground that the question is totally immaterial, and totally irrelevant to any issue in this case; as the transactions of the Big Four with any of its patrons in Illinois are not a subject of inquiry properly in this case; and we think there should be some limitation to that line of inquiry. The witness cannot be interrogated with respect to the private affairs of his employer, which have no concern with the issues in this case.

The Commissioner: Answer the question, if you know. A. I cannot answer that question.

Mr. Crow: Q. Why? A. Because I am not in possession of the knowledge with which to answer it.

Q. Do you mean to say you don't know? Do you mean

to convey that idea to me? A. Yes, sir. I do not know.

Q. You are the General Freight Agent of the Big Four, you say? A. Yes, sir.

Q. Assistant General Freight Agent? A. Yes, sir.

Q. And a part of your duties is to make contracts for the shipment of freight, isn't it? A. It depends upon what you mean by "contracts." I represent the road, and solicit freight, and when we issue a bill of lading, we construe that as a contract.

Q. In this Coal Traffic Association you have heard matters discussed as to the protection of special contracts giving particular rates to some certain firms, for a certain length of time, haven't you? A. I think there has been some reference made to something of that kind.

Q. As Assistant General Freight Agent of the Big Four, have you had any contracts of that character to protect with the Consolidated Coal Company, or with the Hillsboro Coal Company, for the shipment of coal from their mines to St. Louis? A. No, sir.

Q. You have not? A. I have not.

Q. Do you know what official of your road would know if such a contract had been made? A. No, sir, I do not.

Q. Do you know whether or not coal has been shipped over the Big Four Road from the mines of the Consolidated Coal Company and the Hillsboro Coal Company, in the State of Illinois, destined to St. Louis, Mo., at less than the published tariff rate? A. No, sir; I do not.

Mr. Crow: That is all for the present, but I do not want you to understand that you are permanently excused. I wish to recall you later.

WILLIAM GRAY, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. William Gray.

Q. You occupy what position with the Burlington Railroad? A. I am the General Freight Agent of the Missouri district.

Q. What territory is covered by that? A. All the lines in Missouri, and some of the lines in southern Iowa.

Q. How long have you been connected with the Burlington road? A. Eighteen years.

Q. How long have you been located in St. Louis? A. Sixteen years.

Q. Did you have any knowledge of the purchase of the Alton Bridge by ten or eleven railroads? A. Nothing except as I have seen it in the papers.

Q. Your road has no interest in that, so far as you know? A. So far as I know, we have no interest in it.

Q. Occupying the position that you do with the Burlington road, would you have anything to do with any traffic arrangements that might have been made for the handling of freight in cars over the Alton bridge by your road? A. I have had nothing to do with it.

Q. At no time? A. At no time.

Q. What official of your road made whatever arrangements were made for that, in the past? A. I presume the General Manager, or the President. But I don't know.

Q. About two years ago, I believe it has been testified here, that bridge was sold; and prior to that time you people had done considerable business with the bridge; who was your General Manager or President, who would have had knowledge of those arrangements at that time? A. Mr. Harris, the President, would have knowledge of it.

Q. Where is he located? A. In Chicago.

Q. What are his initials? A. George B.

Q. Would you be familiar, in the position you occupy, with the tariff rates on your road for goods that come from Springfield, Ill.; routed over the Alton bridge to St. Louis, Missouri? A. There is no business handled that way.

Q. There has been in the past, hasn't there? A. I think never.

Q. Isn't there coal shipped from Springfield, Ill., district over the Alton bridge, into St. Louis, by way of your road—wasn't there three or four years ago? A. There might have been a very little during the coal strike.

Q. Wouldn't you know about that, or wouldn't the records in your office show that? A. I don't think they would.

Q. What department of your road would show whether or not you have made a tariff rate there? A. Our tariff department, in Chicago.

Q. Are there no records here that would show that? A. We do not publish tariffs here at all.

Q. There are no records here of your road that would show those facts? A. No, sir.

Q. What is the name of the official in Chicago who would be in charge of those records that would show that rate, if there was any such rate? A. W. B. Hamblin.

Q. What is his official position? A. General Freight Agent in Chicago. And he publishes all the tariffs.

Mr. Crow: You may be excused for the present, but I wish to recall you later.

J. E. STEWART, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. J. E. Stewart.

Q. What is your business? A. Wholesale produce, produce in car-load lots a specialty.

Q. Are you connected with any firm? A. With the J. E. Stewart Produce Company.

Q. What volume of business do you do a year? A. About eight hundred to one thousand cars a year.

Q. How long have you been in business in this city? A. I have been in business here a little over three years.

Q. You handle a general line of produce and commission goods? A. A general line of produce, but about seventy-five per cent is potatoes in car-load lots.

Q. Do you handle any of your goods across the river, inbound and outbound freight? A. Probably, I should say, seventy-five to eighty per cent of our business comes through St. Louis.

Q. What do you mean by that? You mean it does not come from the other side? A. It passes through St. Louis and East St. Louis.

Q. Have you experienced any difficulty in getting your goods, inbound and outbound, at St. Louis? A. We do have considable difficulty, considerable delay.

Q. Do you handle your goods by wagon? A. Well, our St. Louis business— We unload a large amount of potatoes in St. Louis, and those are unloaded, the larger part of them, by ourselves, in wagon-load lots. Sometimes we sell the cars on the track to the trade here, and they haul them themselves. Other times, we deliver them in loads.

Q. You do considerable business in St. Louis and points destined beyond? A. Yes, sir; but a large part of that is diverted while the goods are in transit, or after they arrive at St. Louis.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. You say you handle some of your business entirely through St. Louis; that is to say, buying it either north or south, east or west of St. Louis, and then it is destined beyond? A. In some cases it is destined beyond, from the original points of shipment. Other shipments are diverted after arrival here in St. Louis, or East St. Louis.

Q. And that is what you refer to as business "through St. Louis?" A. Yes, sir, I referred to that as through business.

Q. And that is delayed in getting through, sometimes? A. We have considerable delay—yes, sir.

Q. Are you familiar, taking a shipment of that kind now, a through car—are you familiar with the course of handling that car, the actual course which is pursued? A. Do you mean the handling of that particular shipment by the railroad company, or ourselves?

Q. By the railroad company. A. Yes, sir, I believe I am familiar with it.

Q. What is the direction of most of this through business, west to east, or east to west? A. The greater part of those shipments are shipments to Texas, throughout Arkansas, Louisiana, and the lower Mississippi Valley.

Q. And where do those shipments come from? A. They come from Wisconsin, and also from Minnesota.

Q. What would you say, from the best information you have now, would be the average time required for a car of the kind you have just spoken of, one coming from the north and destined to the south, to pass it through the City of St. Louis, taking the time when it first arrived in the City, and the time when its journey southward is resumed—the average time, nothing exceptional? A. I don't know that I just understand your question.

Q. Taking a car that is destined from the north to a point south of St. Louis; what is the average time required for passing that car through St. Louis, beginning with the time when it arrives at St. Louis, and the time it has resumed its journey, beyond St. Louis, to the point south; going through what we call St. Louis? A. Now, then, I will explain that to you in this way. On shipments that originate in the north, and are destined to points beyond, and that are obliged to pass through St. Louis, we have very little

trouble on account of delays, on the cars that we trace. As a general rule, the parties who buy from us in the South and Southwest are always looking for quick delivery. Now, wherever it is possible for us to do so, we have that stuff billed direct through, or diverted before it arrives at St. Louis, or East St. Louis. In that way we experience very little delay, on the shipments being delivered from the East St. Louis lines to the Southern lines.

Q. You have not yet answered my question, as to what in your judgment, would be the average time? A. On those shipments?

Q. Yes, on the through shipments, through the city? A. Cars arriving in East St. Louis, we will say— Well, the trains are all due anywhere from nine to eleven o'clock; a great many of those shipments destined south are delivered to connections by six or seven o'clock in the evening, so as to get them out on their night trains.

Q. So a great many are delivered in a day, would say? A. A great many of those shipments are delivered in a day.

Q. And they have to pass through the terminals? A. Those pass through the terminals.

Q. The terminals extend up as far as Granite City on the east side? A. Yes, sir, they do. You understand now some of those shipments come across the bridge, while others are taken by the Wiggins Ferry, and delivered to connections in that way.

Q. When you speak of shipments being diverted before they arrive here, I am not sure that I understand your meaning there. You mean by that that before they come to St. Louis they are diverted to some road that goes entirely around St. Louis? A. No, sir; I don't mean that.

Q. What you mean by that is that you have determined upon the fact that the shipment is to go beyond St. Louis, before it reaches here; and therefore, give your directions

for having it handled as a through shipment, before it actually reaches here? A. That is the point exactly.

Q. That is what I wished to have cleared up. The word "diverted" is susceptible to more than one meaning there.

Now, taking shipments that are not diverted before they arrive: that means that the carrier bringing them into the St. Louis belt or district, lands them on some one of their tracks, and then you determine, after the car has been so landed that it shall go on further? A. Yes, sir.

Q. And that takes a greater length of time, I take it, than where your orders are given before the car reaches here? A. Yes, sir.

Q. Because it might get on to a track and be blocked up? A. That I do not know.

Q. You are not familiar with that? A. No, sir.

Q. But it does take longer in those cases? A. Yes, sir, it does take longer.

Q. Some of your business is distinctly local, in the sense that St. Louis is the market for its disposal? A. Probably fifty per cent of it.

Q. And the rest of it, away from here? A. Yes, sir.

Q. You bring much of that local business into the city of St. Louis in car-load lots? A. A large amount of it.

Q. And where are those cars delivered for you? A. Some of those cars are delivered for us at Carr Street, and some of those cars are delivered at the L. & N. produce block—that is, between Dickson Street and Cass Avenue. We are located on the L. & N. produce block, on the Terminal tracks, and some of our cars are delivered there. A large amount of our cars come into the Wabash yards, at North Market Street.

Q. Does the L. & N. mean Louisville & Nashville Railroad? A. Yes, sir, the Louisville & Nashville produce block.

Q. Is that simply the name, or does it belong to the L. &

N. Road? A. It belongs to the L. & N. I think it was built with the intention of keeping it as strictly a produce block.

Q. Where do those shipments come from—what direction? A. From the North.

Q. Your shipments are principally from the North, and either to St. Louis or South of it? A. Yes, sir. From the North from the 1st of August until the 1st of June; and from the 1st of June until the 1st of August the shipments handled by us are from the Southwest.

Q. How long is the average time required, not taking exceptional cases, for getting a car from the northern line which comes into the City, to either one of the three places where you receive deliveries; I believe you mentioned three, the L. & N., the Wabash, and Carr Street? A. Our shipments that are routed—Well, now, let me see; a portion of our business comes directly from the loading stations; another portion of our business is diverted from Chicago. Of course, there is a difference in time of about twenty-four hours. In other words, a shipment from the North, it takes about twenty-four hours to get into Chicago, and then there would be about twenty-four hours longer on a shipment from the North than there would be out of Chicago proper. The average time on a shipment from Chicago is about the third day delivery in St. Louis.

Q. That is, the third day after it leaves Chicago? A. Yes, sir; the third day after it leaves Chicago.

Q. And it takes about a day to get down here? A. About the third morning delivery.

Q. You mean by that about sixty hours? A. Yes, sir, about sixty hours.

Q. You get it then, on your track, whichever one it may be? A. No, sir; there is a difference.

Q. I don't quite understand you. A. If that shipment should come to the Wabash, the third morning delivery is

about the usual time. If that shipment comes on the Illinois Central, or if it comes on the C. & A., that delivery in East St. Louis is a second and third morning delivery.

Q. Second and third in East St. Louis? A. Yes, sir; in East St. Louis. Now, then, our shipments that come Illinois Central and C. & A., we have given orders to the Illinois Central, and to the C. & A., on all of our shipments, to let them come over to the L. & N. produce block, unless we give them instructions to the contrary before the arrival of the car.

Q. That is, shipments that have to come over from the east side? A. Yes, sir.

Q. That have to come through East St. Louis, across the bridge, and get to the L. & N. produce block? A. Yes, sir.

Q. What is the average time for getting that car over here, after it has gotten to East St. Louis, and has been put on the Terminal track, if you know? A. Well, anywhere from two, to four or five days.

Q. Is that the regular time? A. That is about the time we receive our shipments that are ordered over from East St. Louis.

Q. Do you know what course it takes? A. Do I know the course that shipment takes?

Q. Yes. A. The shipment is supposed to be delivered by the East St. Louis line to the Terminal, and the Terminal to deliver it to us.

Q. Did you ever trace a car, to see how long it required after it got to the tracks of the Terminal Company? A. I have.

Q. What was the course pursued? A. In the tracing of that shipment?

Q. Yes. How did it go? How was the car moved? A. The course pursued by us?

Q. No, I mean by the railroad company. A. The course

pursued by the railroad company is to deliver the car to the Terminal Company.

Q. And then by the Terminal Company—what does it do? A. They are supposed to bring it over the river to us.

Q. On what bridge do they cross, do you know? A. The Merchants' Bridge.

Q. The Illinois Central comes in from the South? A. Oh, no.

Q. Where does it come? A. It comes in from the North on our business.

Q. Where is that delivered to the Terminal? At what point? Do you know? A. It is delivered somewhere in East St. Louis. I cannot tell you where. Each road, as I understand it, has special delivery tracks, and cars for the Terminal are set on those tracks, I suppose.

Q. What road makes the quickest delivery from Chicago? A. Well, they are all about the same.

Q. The Wabash, Chicago & Alton, and Illinois Central? A. Yes, sir. East St. Louis deliveries are all about the same.

Q. But those getting to you at the L. & N. Produce Station. A. Our Wabash cars we do not allow to come to the L. & N. Produce Station.

Q. How about those that come to the Wabash Station? A. None of our Wabash cars come to East St. Louis.

Q. They all come to the Wabash Station? A. No, sir; they all come to the North Market Street yards at North St. Louis.

Q. From the east side? A. Yes, from the east side.

Q. Where do they cross the river? A. That I do not know. I suppose the Merchants' Bridge, but I don't know where they cross. I have never investigated the matter. The Wabash trains that bring in our produce arrive in East St. Louis, or what they call their middle or outer yards,

just outside the Station. Now, as far as our cars are concerned, they are brought in on those trains, and then trains are made up to come across the river. Now, cars that get in that middle, outer yard, around about nine or ten o'clock in the morning, are generally over for us after dinner.

Q. Suppose they do not get in before nine or ten o'clock? A. Then they cannot deliver them.

Q. They wait until the next day? A. They have several pulls across the river, but I don't know just when they are.

Q. Several pulls each day? A. Yes, sir, several each day, as I suppose; they have pulls for their regular trains.

Q. Does that come over the Terminal track? A. The Wabash?

Q. Yes. A. I don't know. I suppose they have to cross the bridge on the Terminal tracks.

Q. They make up their trains for freight, and they pull them from the East side to the North Market Street yards.

Q. And they do their own handling over the Terminal tracks? A. I suppose so.

Q. Do you know whether the Illinois Central does its own handling when it delivers on this side? A. I don't think so.

Q. Do you know whether the Alton does its own handling? A. I don't think so; their goods are delivered to the Terminal.

Q. Do you know whether the Terminal has a number of pulls across the river each day? A. They must have—yes, sir.

Q. You have been in business in this city how long? A. I have been in business here a little over three years.

Q. You find that on this side, particularly, there is a lack of yard-room, isn't there? A. There is, yes, sir.

Q. It is very marked, isn't it? A. They have several small yards—they haven't any large ones.

Q. Wouldn't you say, from your observation, from hav-

ing occasion to use railroads, that there is a very distinct lack of yard room on the west side of the river? A. There is, yes, sir.

Q. And that necessarily results in congestion on the tracks on this side of the river, and inability to brings cars over here, because there would not be any place to put them —wouldn't that follow, necessarily? A. Yes, sir, that would follow.

Q. And in order to relieve the situation materially, upon this side of the river, it would be necessary to get more room, build more tracks, have more depots and warehouses, and more tracks for team deliveries? A. That would facilitate matters a great deal.

Q. A very great deal, don't you think so.

RE-DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. The Burlington, the Missouri Pacific, the Iron Mountain and the Frisco Roads, have quite extensive terminals on this side of the river, haven't they? A. They have.

JOHN FITZGERALD, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. What is your name? A. John Fitzgerald.

Q. What is your business? A. Superintendent of the terminals for the Louisville & Nashville Railroad Company.

Q. In this city? A. Yes, sir.

Q. How long have you occupied that position? A. About six years, or six and a half.

Q. Does your road own any terminal facilities on the east side of the river? A. Yes, sir.

Q. Of what do they consist? Just the switches connected with the main track, or have you a belt around East

St. Louis? A. It is our own tracks, and freight-house facilities.

Q. Did you formerly have? A. No, sir.

Q. You never did have? A. Not to my recollection.

Q. What, if anything, did you have to do with the handling of freight, in and out of St. Louis? A. I supervised it.

Q. Have you a General Freight Agent here? A. No, sir.

Q. You act as General Freight Agent, do you? A. No, sir.

Q. Who does, no one? A. No one.

Q. Have you a local Freight Agent? A. Yes, sir.

Q. Who is he? A. P. F. Button, of East St. Louis.

Q. You have no one other than yourself in St. Louis? A. Yes, sir; we have a local freight agent in St. Louis.

Q. What is his name? A. J. A. Lindsay.

Q. Where is his office? A. Dickson and Collins Street.

Q. Where is your office? A. No. 206 North Broadway.

Q. Have you ever attended any meetings of the St. Louis Coal Traffic Association? A. Yes, sir.

Q. As the representative of your road? A. Yes, sir.

Q. When did you first begin attending those meetings? A. In 1900.

Q. Who was secretary of that association at that time? A. I think R. M. Fraser.

Q. The same gentleman who is now secretary? A. Yes, sir.

Q. And have you represented your road at those meetings since that period? A. Yes, sir.

Q. Do you remember a cut in the coal rate, from the Illinois coal fields that supply the St. Louis market, in May, 1905? A. I don't remember the dates. There was a cut made by the various lines, in the coal rate, that year, I think.

Q. I will get you to state if you received a notification

of that, from Mr. Fraser, as Secretary of the Bureau, of the fact of the cut—in a circular? A. I do not recall.

Q. You don't remember. A. No sir, I do not.

Q. Did your road meet all the cuts that were made? A. Not all of them, no, sir.

Q. How low did the rate go, from the outer, inner and middle group, on any of the lines? A. I don't recall what they were on the other lines.

Q. How much reduction did you make on your line? A. I think the lowest rate we made was fifteen cents a ton.

Q. That is, from the outer group, or from any point on your line? A. That is what we estimate on our line, the Belleville district.

Q. How far out would that be? A. That district would reach forty miles.

Q. What had the rate been before the cut? A. It had varied.

Q. What had it been just prior to the cut, according to the Coal Traffic Association? A. Twenty-five cents a ton, according to our tariffs.

Q. That was the agreed rate by the Coal Traffic Association, wasn't it? A. No, sir; we have no agreed rates.

Q. That was the rate, however, that was published in the Information Circular by the St. Louis Coal Traffic Association? A. Possibly so. But the L. & N. publishes its own rates.

Q. You publish a tariff under the Interstate Commerce Law?

Mr. Watts: The rate to East St. Louis, you are asking him about?

Mr. Crow: Yes.

Q. What you publish is the rate under the Interstate Commerce Law, isn't it? A. No, sir.

Q. What is it you publish? A. It is a tariff from mines on our road in Illinois, to East St. Louis, Ill.

Q. That tariff you publish coincides with the tariffs fixed in the Information Circular issued by the St. Louis Coal Traffic Association, doesn't it? A. I never checked it.

Q. You never checked it? A. No, sir.

Q. You don't know that that is a fact? A. I don't know it is a fact, because I did not check it personally.

Q. Did you have it checked? A. I don't recall that I did. But if our rate was different, we wouldn't do any business.

Q. You had a meeting right after this cut, a meeting of the St. Louis Coal Traffic Association? A. There were several meetings. I don't remember whether they were immediately after the cut or not.

Q. Soon afterwards? A. I don't recall how soon.

Q. Do you know when the rate was restored? A. Sometime in this year.

Q. In this year? A. I think so.

Q. Wasn't it restored in June, 1905? A. Oh, from the fifteen-cent basis?

Q. Yes. A. Yes, sir, it was restored in last year.

Q. Along in June sometime, wasn't it? A. I don't recall that.

Q. Shortly after the cut was made, the rate was restored? A. Those exceedingly low rates did not last a great while.

Q. A few days? A. I think longer than a few days.

Q. Whatever period of time they did last, there was a meeting of the St. Louis Coal Traffic Association, at which that subject was considered? A. The rates were discussed, yes, sir.

Q. And you were there? A. Yes, sir.

Q. And the representatives of the coal-carrying roads into the St. Louis district were there? A. I don't recall that they were all there. There were a number of representatives there.

Q. And the matter of restoring those rates was discussed,

wasn't it? A. The matter of what each line's rates were, and if they were going to be changed, was discussed.

Q. And it was agreed that they would be changed, finally, wasn't it? A. No, sir.

Q. It was not? A. No, sir.

Q. Did each road individually agree that it would restore the rate? A. No, sir.

Q. Did each one of those roads announce at one of those meetings, subsequent to this, that it would restore the rate? A. Each road announced it about that time. I don't know when those rates were changed. They announced what their figures were going to be.

Q. And announced it at a meeting of this Association? A. Yes, sir.

Q. And subsequently published it, and the rate was made in the regular way by each of the roads? A. I notified our General Freight Agent what I had determined upon, and what I had announced for our Company, and he published the tariff accordingly.

Q. And you received copies of the proceedings of these meetings from Mr. Fraser? A. We received a memorandum of the discussions, yes, sir.

Q. And of any changes in the rates? A. If any line announced a change in its rates, we were apprised in that way.

Q. And if any complaint was made about a road, and a meeting asked for, you are apprised of that, and asked to come to the meeting by Mr. Fraser? A. We are told there will be a meeting on a certain day.

Q. And what subject will be considered? A. No, sir; I don't think we are told what subject will be considered.

Q. Isn't there usually, in the notification, a suggestion as to what complaint has been made, and what is the cause of the meeting? A. I don't think so.

Q. Have you copies of those notices? A. I don't know. I don't keep those records.

Q. Who keeps them? A. They are kept in the office.

Q. In your office? A. Yes, sir.

Q. Who has charge of them? A. The chief clerk.

Q. What is his name? A. H. D. Hughes, at the present time.

Q. Are those records under your supervision? A. Yes, sir.

Mr. Crow: That is all with this witness at the present time, but I wish to recall him later.

W. C. STITH, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. W. C. Stith.

Q. What is your business? A. Freight Traffic Manager of the Missouri Pacific, and St. Louis, Iron Mountain & Southern Railroad Companies.

Q. How long have you been Freight Traffic Manager? A. Since 1899.

Q. Does either the Missouri Pacific Railway Company, or the St. Louis, Iron Mountain & Southern operate a line known as a belt line, from St. Louis southward, over the Thebes Bridge? A. The Iron Mountain operates a line from East St. Louis—or rather from Bixby, Valley Junction, to Thebes.

Q. Where is Bixby, and where is Valley Junction? A. Across the river, in Illinois.

Q. What points? A. I should say approximately seven or eight miles south of East St. Louis.

Q. Bixby? A. Bixby and Valley Junction. One is one arm of the "Y," and the other is the other arm of the "Y."

Q. What tracks, or rails, does the road operated by the Iron Mountain Company, connect with at Bixby or Valley

Junction? A. With the Terminal Railroad Association, and, in that vicinity, with Illinois Central and the M. & O.

Q. What do you call that line? A. The Illinois division of the St. Louis, Iron Mountain & Southern Railway Company.

Q. What is the distance down to the Thebes Bridge, from the junction? A. Approximately a hundred and twenty-five, or a hundred and twenty-six miles.

Q. What is the distance over the Iron Mountain Road, on this side of the river, from St. Louis to the Thebes Bridge? A. I cannot tell you that without figuring it out; but quite a considerable distance greater. It is an indirect route on the west side.

Q. Does your road, on the east side, that is operated by the Iron Mountain Company, pass through some of the Illinois coal fields? A. They have a branch from Gorham, which is about sixty-two or sixty-three miles south of Bixby, that reaches out into the coal fields.

Q. What points does it reach? A. It serves the Murphysboro and Cartersville district.

Q. What mines are located at Cartersville, that ship over your road? A. I couldn't undertake to answer that with any degree of accuracy. There are several of them, but I would not undertake to give all the names.

Q. To be specific, did the Big Muddy Coal Company, in 1905, and does it now, ship over your road? A. I think it did.

Q. How was that freight routed, and how would it reach St. Louis, if it came over your line, from the Big Muddy Coal Company? A. It it came over the Illinois division, it might be routed either by Bixby and the Ivory Transfer, or by way of the Terminal Association, and then to St. Louis.

Q. You mean by way of the Terminal through East St. Louis? A. Yes, sir.

Q. Where is the Ivory transfer? A. Immediately south of the River des Peres, south of Carondelet.

Q. Outside the city limits? A. Yes, sir.

Q. It is a public transfer? A. It is operated by the railroad as a car ferry transfer.

Q. By your road? A. It is operated by the St. Louis, Iron Mountain and Southern.

Q. And is not open to the general public for car transfer service? A. The traffic that is interchanged with the Iron Mountain road at that point is the only traffic available to the use of that transfer, on account of its situation. It takes any business offered to the Iron Mountain road.

Q. If freight is routed, say from the Cartersville district say from the Big Muddy, over the Thebes Bridge, and then up over the Iron Mountain road to St. Louis, is the tariff on your road the same as if it came up over the Valley line to East St. Louis? A. We have no through tariff by way of the Thebes bridge.

Q. And never have had? A. Never have had to St. Louis from that district.

Q. I will ask you if you made a rate in 1905 to the Big Muddy Coal Company, from their mine in Cartersville to St. Louis? A. We had a published tariff, which was the rate made to them.

Q. Was there ever any different rate made to them, than the published rate? A. Not that I recall.

Q. Would you know it, if that had been done? A. I would be very apt to.

Q. Was that subject ever up, and investigated by you, as to whether or not less than the tariff rate had been given on coal shipped by the Big Muddy Company—in the spring of 1905, I believe it was? A. There has been so much agitation about the Illinois coal rate, that I would not trust my memory on that. It is a fluctuating proposition.

Q. Do you know Mr. W. E. Burr, a coal mine operator here in the city? A. I do not.

Q. You represent your road in the St. Louis Coal Traffic Association? A. Sometimes—almost invariably.

Q. Do you remember the subject of the rate to the Big Muddy Coal Company being up before that association? A. No, sir.

Q. Was it taken up with the members of the association, individually? A. It might have been discussed with the individual members of the association. I don't recall now that it was, but it may have been.

Q. As a matter of fact, did your road cut that rate for the Big Muddy Coal Company? A. We published a tariff when our line was opened for business, and we made that rate to Bixby.

Q. What rate do you mean? A. We made a rate to Bixby; I think it was thirty-five cents a ton.

Q. Was that less than the published tariff rates of the other roads? A. It was at that time.

Q. That was met by the Illinois Central, was it? A. I presume so, I don't know. It is a fair assumption that it was.

Q. Was that tariff published when you first opened your road? A. My recollection is, that it was.

Q. Your tariff sheets would show that? A. The tariff sheets, I think, would show that.

Q. Are they under your charge? A. Not directly, no, sir; but I have access to them.

Q. What official of your road has charge of them? A. The Assistant General Freight Agent in charge of the tariffs.

Q. Who is he? A. Mr. Stewart.

Q. What are his initials? A. A. T.

Q. Is he located here in the Missouri Pacific Building?

A. Yes, sir. If you want those tariffs, I will be glad to get them for you.

Q. I should like to look at them. A. Very well.

Q. The tariff you speak of was from Bixby to St. Louis by way of the Thebes Bridge? A. No, sir; we have no tariff via the Thebes Bridge, because that is not a practical route for business, from the coal fields on the Illinois division of the Iron Mountain road to East St. Louis.

Q. Coal has been shipped from those mines, in abundance, over that route, hasn't it? A. Not to St. Louis.

Q. To the suburbs of St. Louis? A. No, sir, not that I know of. Not within my knowledge. Now, there might have been an isolated case, where a car got in and went around that way; but that is not either the practical or the natural route for it.

Q. No, sir; but the shipments I refer to came in trainload lots, didn't they, that way, over the Thebes bridge? A. I don't know what shipments you refer to.

Q. I refer to the shipments of the Big Muddy Coal Company on which a thirty-eight cent rate were made. A. Absolutely not, not over the Thebes bridge.

Q. What way did they come? A. I presume over from Bixby, or perhaps up to the Ivory Transfer.

Q. How far is it from the Thebes Bridge to the Ivory Transfer? A. About a mile and a half.

Q. And your tracks of the Illinois division, connect there? A. They connect with the river incline track that is used by the Ivory Transfer.

Mr. Crow: That is all I wish to ask this witness for the present, but I wish to recall him later.

At this point, the further hearing of testimony in this case, is continued until Saturday, October 13th, 1906, at ten o'clock, a. m.

R. E. Rombauer,
Special Commissioner.

St. Louis, October 13th, 1906.

Met, pursuant to adjournment as above, on Saturday morning, October 13th, 1906, at ten o'clock, a. m., in the Federal Building, St. Louis, Mo.

Present: Hon. R. E. Rombauer, Special Commissioner; Messrs. E. C. Crow, Chester H. Krum, and Charles Nagel, appeared on behalf of the complainant; Messrs. M. F. Watts, H. S. Priest and F. W. Lehmann, appeared on behalf of the defendants.

The following proceedings were had:

JOHN T. LYNN, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your full name? A. John T. Lynn.

Q. What is your business? A. I am with the Manganese Steel Safe Company.

Q. How long have you been in the safe business? A. Ten years.

Q. Where is the place of business of your firm? A. 706 Washington Avenue.

Q. What character of safes do you handle—size, particularly? A. All the way from three hundred to ten thousand pounds.

Q. Nothing under three hundred pounds? A. Nothing under three hundred.

Q. How long have you been with your present firm? A. About two months.

Q. Who were you with before that? A. I was formerly manager for the G. V. Halliday Safe Company, then proprietors and agents of the St. Louis Safe and Desk Company, and agents for the Hall Safe Company of Cincinnati.

Q. Do any of the goods you handle have to cross the Mississippi River at St. Louis? A. The bulk of our goods is hauled by wagons from East St. Louis.

Q. Inbound stuff? A. Inbound stuff.

Q. What is the reason you do that? A. Well, our reason for doing so is that it is less expensive for us, in hauling over the river, than in handling it on this side.

Q. Any. other reason? A. Goods shipped to this side frequently fall into the hands of the Transfer Company, and we have difficulty in locating them, and having delivery made.

Q. When you speak of the Transfer Company, what company do you mean? A. The St. Louis Transfer Company.

Q. Do you remember any instance of that kind, where goods were delivered, and failed to reach you? A. I remember one especially; two safes coming from Buffalo, New York, that we had out something like sixty days, tracing them. We had been in the hands of the St. Louis Transfer Company, for at least thirty days or more.

Q. On this side of the river? A. Yes, sir, on this side. That was occasioned by failure in instructions, in shipping the safes to East St. Louis.

Q. Where were the goods shipped to, St. Louis? A. Yes, sir, shipped to St. Louis. We have to have our own wagons in handling our goods, or wagons that are equipped for handling our line of goods, as they must be brought and placed in the store. The Transfer Company delivers only to the pavement, and there is as much expense delivering those safes into the house, as to get them to the pavement.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. You have special wagons? A. Yes, sir, we have special wagons for safe moving.

Q. And the case you referred to was due to error to ship-

ping instructions? A. Yes, sir, error in shipping instructions.

Mr. Crow: Q. The error consisted in routing the goods to St. Louis? A. Yes, sir, in place of routing them to East St. Louis. That occurs frequently.

EDWIN H. CONRADES, a witness of lawful age, being duly produced, sworn and examined, testified on behalf of the complainant, as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. Edwin H. Conrades.

Q. What is your business? A. Railroad business.

Q. What road are you connected with? A. Superintendent of the Troy & Western Railroad Co.

Q. From where to where does that road run? A. It runs from at or near Troy, Illinois, to East St. Louis.

Q. And where is Troy, Ill.—how far from St. Louis? A. About twenty miles; nineteen and a fraction.

Q. Is your road steam or electric? A. Steam.

Q. Do you have any rolling stock? A. Yes, sir.

Q. How much? A. Some eight hundred odd cars.

Q. What kind of cars? A. All coal cars, gondolas, and dumps.

Q. How many locomotives have you? A. Four.

Q. Do you operate coal mines? A. Not this railroad. The coal mine is operated on the road. The railroad company does not operate any mine.

Q. Does your company own any mine? A. Not the railroad, no, sir.

Q. It is an independent organization? A. Yes, sir.

Q. Does anybody else beside the people who are interested in your railroad, operate coal mines on your line? A. I wish you would ask that question again.

Q. Does anybody, beside those interested in the railroad, mine coal on your road? A. No sir, they do not.

Q. How long have you been in that business? A. About five and a half or six years.

Q. You have an office in this city? A. Yes, sir.

Q. Who is president of the company? A. The railroad?

Q. Yes. A. Myself.

Q. Who is the treasurer? A. Mr. Bogue.

Q. What are his initials? A. George C.

Q. Has he an office in this city? A. Yes, sir.

Q. Who manages the road? A. I do, myself.

Q. You have no general manager? A. I am the acting general manager.

Q. You are the man actively in charge of the operation of the road? A. Yes, sir; there is no question about that.

Q. What tonnage in coal did you handle during the year 1905 over your road into East St. Louis? A. In the neighborhood of about one million tons.

Q. You are one of the heaviest coal carrying roads that comes into the city? A. Yes, sir.

Q. How far out did you say Troy was? A. About twenty miles; nineteen and a fraction.

Q. That is the outer point? A. Yes sir, the extreme point.

Q. How near to St. Louis do your coal mines on that line come? A. The closest mine is about thirteen and a fraction miles. That is, right inside the hills.

Q. Do you make a rate over your road to St. Louis, or East St. Louis? A. We make it to St. Louis. We publish an Interstate rate now.

Q. You file that with the Interstate Commerce Commission? A. Yes, sir.

Q. How long have you been doing that? A. About ninety days, I think it is; somewhere about that; ninety days or four months.

Q. Since the change in the bridge arbitrary—about that time? A. It was following directly after that.

Q. Formerly you made only a rate to East St. Louis, didn't you? A. Yes, sir.

Q. Do you know of an organization called the St. Louis Coal Traffic Bureau? A. Yes, sir.

Q. Is your road a member of that organization? A. I don't know that you would call it a member. We attend the meetings. I don't think there is any particular membership there.

Q. You consider yourself a member of the organization, don't you? A. Yes, sir.

Q. And you are considered a part of it? A. I don't know whether I am considered a part of it or not.

Q. You receive the circulars they send out? A. I believe so.

Q. And you get copies of the proceedings at the meetings in typewritten form? A. I would not be a bit surprised if I got them.

Q. You do, don't you? A. I don't pay much attention to it.

Q. You get them, don't you? A. I believe I do—yes.

Q. Do you remember of being appointed on a committee, with Mr. Clarence Parker, and another gentleman whose name I forget, to wait upon the Interstate Car & Transfer Company, relative to their cutting of the rates across the river? A. I don't know anything about that.

Q. You were not appointed on that committee? A. I certainly was not.

Q. And you never had any conference with those gentlemen? A. No, sir.

Q. Did you route any of your coal to St. Louis, in 1901 and 1902, over the Interstate Car & Transfer Company? A. In 1901 and 1902?

Q. Yes. A. They may have gotten some cars from us. You mean the old Kavanaugh Company?

Q. Yes. A. I suppose they got some cars from us .We shipped over both bridges, and the Interstate Car & Transfer Company.

Q. Who makes the agreement for the transfer of your cars across the river, you? A. Yes, sir.

Q. Did you make any arrangement with the Interstate Car & Transfer Company? A. I made no arrangement with them, whatever. I would not be positive they received any freight from us. I am not making the statement that they did. It is possible they did. Sometimes these cars are routed—practically taken out of our hands—as our customers will say they want them to go to certain companies, and we have to follow their instructions.

Q. At any time during the time you have been a member of this association, has it come to your knowledge that the Interstate Car & Transfer Company, or the Wiggins Ferry Company, were not maintaining the published rate for transferring coal across the river? A. Nothing but what I would know by hearsay. If I would know anything definitely about the rate, I would have taken advantage about it, and if I didn't take advantage of it, I couldn't have had anything very definite.

Q. Did you get your information from any official of either of the two companies I have mentioned? A. I don't know of my own knowledge that there was any cutting done at all.

Q. Do you remember the time the rate was reduced so materially, last May, a year ago? May, 1905. A. Yes, sir.

Q. Your road participated in that cut? A. I don't know what you mean by "participated." I tried to meet the situation. It went to nothing.

Q. You mean by that you reduced the rate yourself to meet that cut? A. I guess I did, to some extent.

Q. Didn't you issue a circular letter to that effect, and send a copy of it to Mr. Fraser? Think about it a moment before you answer? A. No, sir, I did not.

Q. Your road did not do that? A. I know I did not, and I don't think any one else would have authority to do it for my road.

Q. Did you attend the meeting at which that rate was restored, a year ago last May? A. I don't recollect that. Possibly, I may not have been here at the time. I have been away a good deal.

Q. If the records show that you were there, you were present? A. Sure.

Q. Nobody else attended those meetings for you? A. Nobody else would go there, unless I went myself.

Q. Do you have any recollection at all of what occurred at that meeting? A. A general discussion, I suppose, about the situation. I don't recollect that I was there.

Q. Do you remember the restoring of that rate? A. I remember putting my own rate back.

Q. And you put it back after this meeting was held, didn't you? A. No, sir, I believe I had my rate back before that.

Q. You are sure of that? A. I am pretty sure.

Q. How do you recollect that, if you don't remember the meeting? A. I have taken some very independent action with my little road at times.

Q. But you say you don't remember the meeting. A. I don't know what meeting you refer to.

Q. I refer to the meeting at which the rate was restored. A. I don't recollect that. I suppose they had various meetings, at that time, and the railroad men got together and discussed the situation.

Q. There was one meeting at which the rate was restored? A. I don't know. I attended various meetings.

Q. Is there anything more you know about the restora-

tion of that rate? A. I suppose I do. If you put it to me plain, I will try to answer you.

Q. Do you recollect what date the other roads restored the rate? A. I don't know.

Q. Wasn't it done at the same time by all the roads? A. I don't know that.

Q. Do you know what cut you made? A. I believe as low as I got it down was twenty-five cents a ton. I believe that is as low as I went. I believe some of them had the rate down to five and ten cents—or hauled it for nothing, and gave the boys a premium, I suppose.

Q. What is the regular rate now? A. Forty cents. Sixty cents to this side. Of course we absorb the transfer charge.

Q. Has your company had any special contracts for the delivery of coal in St. Louis at less than the published tariff rates, that you have been protecting? A. No, sir.

Q. You never have had? A. No, sir; not to my recollection.

Q. You keep an office here and sell coal yourself? A. No, sir, our railroad does not sell any coal.

Q. You have a coal company that sells it? A. Sure. We have a coal company that operates on it, Donk Brothers.

Q. Those are the same people that owns this road? A. No, sir.

Q. They do not? A. No, sir.

Q. Who does? A. Donk Brothers Coal & Coke Company does not own the railroad, and the railroad doesn't own Donk Brothers Coal & Coke Company.

Q. The same individuals that own one own the other? A. I suppose some are interested in it.

Q. They control it, don't they? Don't the Donk Brothers control this road, and own a majority of its stock? A. There is only one Donk—E. C. Donk.

Q. Well, whoever it is, he controls a majority of the

stock of this road, doesn't he? A. Between Mr. Donk and myself, we control it—if that is what you want to know.

Q. And you control this coal company, you and Mr. Donk? A. Yes, sir; but we do not control it in the way you are trying to get at it.

Q. What do you mean by that? A. We are stock-holders in the companies, but they are separately organized companies.

Q. But you two people control a majority of the stock in both corporations, don't you? A. Well, we own a good share of it.

Q. You have a majority of it, haven't you? A. It seems to me you are getting right down into my private business, very close. Do I have to answer that, Mr. Rombauer?

The Commissioner: Yes, certainly.

A. Well, between Mr. Donk and I, we control it.

Mr. Crow: Q. Has your coal company had any special contracts for the delivery of coal at a rate that would be less than what it would cost to mine that coal, plus the freight, at the point on your line from which it has been shipped to St. Louis? A. No, sir, I don't think we have.

Q. I want to know. You know whether you have or not. You make those contracts. A. No, sir, we don't.

ALFRED J. DAVIDSON, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. CROW:

Q. Please state your name? A. Alfred J. Davidson.

Q. What is your official position? A. President of the St. Louis & San Francisco Railroad Company.

Q. You are also President of the Illinois & Missouri Bridge and Belt Railroad Company? A. Whatever the

proper incorporated name is. I am president of the Illinois & Missouri Belt and Railroad Company.

Q. When did you become President of that organization? A. At the annual April meeting of this year, I believe.

Q. 1906? A. Yes, sir.

Q. Do you know when the ten or eleven railroad companies that own that bridge, and the piece of railroad there, bought it? A. I can only state from recollection that negotiations were closed in the year 1904.

Q. What time of the year, 1904? A. I cannot state definitely.

Q. About the time the World's Fair was going on, was it? A. Just about that time, I believe, the organization was completed.

Q. You say the negotiations were closed at that time: when were they begun? A. I have no information regarding that.

Q. Were you present when the negotiations were closed? A. No, sir—I beg pardon, I was present when they incorporated.

Q. You mean when the Articles of Incorporation were signed? A. Yes, sir, when they were signed, and the organization was completed.

Q. Who else was present at that time, do you know? A. Mr. Ramsay, Mr. Winchell, Mr. Jeffrey, Mr. Clark, George Gould, and others that I do not recall at this time.

Q. Where did that meeting occur? A. In Mr. Ramsay's office.

Q. In St. Louis? A. In St. Louis. He was at that time President of the Wabash Railroad Company.

Q. Was the meeting called, or did you gentlemen assemble there, for the purpose of organizing that company? A. Yes, sir; the meeting was called.

Q. To complete the organization? A. Yes, sir, to complete the organization.

Q. The bridge had theretofore been purchased, or a contract made for its purchase? A. Closed, as I understand it. I had no part whatever in the negotiation.

Q. At that time were the contracts that had been made with the old Bridge Company submitted to you gentlemen? A. No, sir.

Q. Were there any contracts made with the old Bridge & Belt Railway Company? A. I don't know.

Q. Whom did these gentlemen you have mentioned represent, themselves individually, or some railroads. A. They represented the railroads owning a proprietary interest in the bridge.

Q. Do you know how much each one of these eleven roads put up of the amount of that purchase money? A. I do not.

Q. Did you have any occasion to investigate that? A. I did not.

Q. Do you know what the property cost the eleven roads? A. Well, I know in a general way the financial structure of the Bridge Company.

Q. What do you mean by that statement? A. In acquiring the Bridge Company they issued a certain amount of bonds for the stock of the new Bridge Company.

Q. This new company? A. Yes, sir, this new company. And there was also an authorized issue, sufficient to take up the underlying bonds of the old bridge company.

Q. Was the new issue of bonds all made an equal lien or were the bonds issued for the underlying mortgage made a prior lien upon the property acquired? A. They were merely reserved to take up the underlying bonds.

Q. They were all on an equality? A. Yes, sir.

Q. And made a first lien upon the property, so far as this new corporation was concerned? A. I cannot answer that from a legal standpoint.

Q. There was but one series of bonds? A. Yes, sir, I presume so.

Q. They were taken up? A. The outstanding bonds?

Q. Yes. A. I don't know that they have been.

Q. Do you know who held them? A. I do not.

Q. Were they acquired by these railroad companies? A. I don't know.

Q. Is there in the hands of the corporation of which you are President, a sufficient amount to take up the underlying bonds? A. Yes, sir.

Q. Have the underlying bonds matured? A. I cannot say when they mature.

Q. What official of your company would have any information about the details of the business? You are the President, and you say you have not: would the Treasurer, or the Secretary? A. The Secretary of the company might have some information regarding the stock-holdings of the different proprietary lines. And I think possibly the Treasurer of the company could give a little more definite information regarding the bonds themselves.

Q. Do you know, Mr. Davidson, whether or not there was a sufficient amount of bonds authorized and issued by the new corporation of which you became a member, to pay the purchase price of the property that was bought? A. There was an issue of bonds, that is, in the authorized issue of new bonds there was a certain amount paid or given for the stock of the old bridge company, and a certain amount reserved to take up the underlying bonds. The balance would be used for additions and improvements to the property.

Q. The bonds and stocks represented all there was to the property, in the way of the purchase price? A. Yes, sir, as I understand it.

Q. As I understand you, the new issue of bonds was exchanged on a certain basis for stock of the company, and

enough of the issue of bonds was reserved to take up the underlying lien? A. Yes, sir.

Q. You happen to remember what amount of stock was taken up by the bonds? A. Stock of the old bridge company?

Q. Yes. A. One million dollars, I believe.

Q. Do you remember, in a general way, the amount of the underlying lien or bonds? A. I think eight hundred thousand dollars.

Q. That would be $1,800,000? A. Yes, sir.

Q. Do you know who controlled that bridge when it was bought? A. Personally, I do not.

Q. You have no information upon that subject? A. I understood that certain St. Louis parties controlled it, but I have no personal information as to who were the real parties controlling the property.

Q. Did they control by ownership or lease? A. I don't know.

Q. Who were the parties that you understood controlled it? A. Mr. Edwards Whittaker was one of them. That is the only gentleman I have in mind.

Q. The railroad made a connection with the lines at Alton, two or three of them, and then with the Burlington, on the west side of the river? A. The Bridge Company?

Q. That is what I say. The bridge and the railroad simply had those connections? A. Yes, sir; they have connections with the Burlington on the west bank of the river, and with two or three lines on the east side.

Q. And that is all the track the Bridge and Railroad Company had? A. Yes, sir.

Q. And that is all the connections they had? A. Yes, sir.

Q. Have those connections been extended any? A. They have not been extended since I have been connected

with the company. There may have been some slight changes made, but no extension.

Q. No connection made with any other road? A. No, sir, none that did not already exist. There may have been some connections that have been out of use for some time, that were replaced.

Q. On the other side of the river? A. On the east side, on the Illinois side of the river.

Q. What is the name of the treasurer of that company? A. F. H. Hamilton.

Q. Where is he located? A. In the Frisco Building.

Q. Is he an official of the Frisco Railroad? A. Yes, sir.

Q. Do you know what amount of stock was issued to each road in this new corporation? A. I don't recall the exact amount; no, sir.

Q. Were they all in on an equality? A. Yes, sir, and an equal issue of stock was made to the eleven lines.

Q. As a matter of fact, according to the statement you have made, as I understand you, the eleven railroads did not put up any money for this property? A. I cannot say whether they did or not. I have stated my understanding of the negotiation.

Q. You were the President of the Frisco Railroad at the time? A. Yes, sir.

Q. And represented your road in the transaction? A. Yes, sir.

Q. You would have known it, if your road had put up any money, wouldn't you? A. The negotiation had been carried on for a year or more, prior to the time I became President of the companies, and I don't recall that there was any amount, outside of a little working fund, necessary to carry on the negotiations, paid in cash.

Q. Since you have been President of the Bridge Company, the Superintendent up there has practically run the property? A. He has been in charge of the operation of the property.

Q. That is what I mean, the operation. A. Yes, sir.

Q. Have reports been made to you, as President? A. Yes, sir; and to the various directors of the company.

Q. What official of your company has charge of these records and reports, the Secretary? A. Our Superintendent, who is also the accounting officer of the company, would have charge of the records of the company.

Q. The tracks of the system that you are President of, the Frisco, do not touch at any point the tracks of this property that was acquired? A. We have no physical connection with it at all; no, sir.

Q. And on the west side of the river, I believe you stated, the only physical connection was with the Burlington tracks? A. Yes, sir.

Q. And through the operation of the Katy trains over the Burlington, they would, in that way, have connection with the M. K. & T.? A. Yes, sir, that would give the M. K. & T. a connection with the Alton bridge.

Q. Do you know any other gentlemen here in St. Louis who were interested, beside Mr. Whittaker? A. I do not. And I am merely stating his name from hearsay. I was not associated with any of the parties to the negotiations in securing the bridge, and have no personal information whatever regarding it.

Q. You do not know when this bridge was erected? A. No, sir; I do not.

G. L. BALL, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. G. L. Ball.

Q. What position do you occupy with this Illinois & Missouri Belt & Railroad Company? A. Secretary.

Q. When did you become Secretary? A. Last November, as I remember.

Q. Did you become Secretary prior to the time that Mr. Davidson became President? A. Yes, sir; a few months.

Q. Who was President of that corporation at the time you became Secretary? A. Mr. Davidson was the acting President and Vice-President.

Q. Did you hear Mr. Davidson testify concerning a meeting at which the organization of the new company occurred? A. I did not quite catch his testimony.

Q. Were you secretary of that corporation, prior to the time of the organization of the new company? A. No, sir.

Q. Were you present at the time Mr. Davidson, Mr. Ramsay, Mr. Gould, and these other gentlemen met in Mr. Ramsay's office here, and signed the papers and formerly organized the new company? A. I was not.

Q. You were not present? A. No, sir.

Q. Have you the records in your control that would show the transfer of that property from one corporation to the other, the stock, etc.? A. I have the minute book.

Q. Who has charge of the stock book? A. I have the stock certificate book.

Q. Do you know in what proportion these roads are interested in this property? A. There are eleven proprietary interests. As I recollect, 1870 shares of the stock have been issued.

Q. What is the par value? A. One hundred dollars.

Q. How many shares have been issued? A. 1870 shares have been issued.

Q. That would be divided by eleven, would it? A. 170 shares each.

Q. Each one has an equal amount? A. Yes, sir.

Q. Do you know the amount of bonded indebtedness on the property? A. I am not familiar with that.

Q. What official of your company would have record of that matter? A. The treasurer, Mr. Hamilton.

Q. With whom were the reports of the business filed, with you or with the treasurer—receipts, disbursements, etc.? A. With the treasurer.

Q. And that is Mr. Hamilton? A. Yes, sir.

Q. And he is in the Frisco Building? A. Yes, sir.

Q. Does your company hold any stock in that corporation? A. Yes, sir.

Q. The stock you speak of, stands in the name of these respective railway companies, or in the names of the officials of the companies, in trust for the railroads? A. Some of the stock is in the name of the railroad, and in other instances it stands in the name of the officials of the different lines.

Mr. Crow: I would like to have the minutes of that first meeting, when that company was organized.

Mr. Watts: He is your witness.

Q. Mr. Crow: Will you see Mr. Davidson, and ask if you can get that, or otherwise I will have to have a subpoena duces tecum issued? A. Yes, sir, I will do so.

S. M. LEDERER, a witness of lawful age, being duly produced, sworn and examined, testified, on behalf of the complainant, as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. S. M. Lederer.

Q. What is your business? A. I am President of the Pickel Stone Company.

Q. What business does that company carry on? A. Contracting business.

Q. Contracting in what line? A. Stone, masonry, granite.

Q. Do you do an extensive business? A. Quite so, yes.

Q. In what section of the country is your business carried on? A. Almost altogether in St. Louis and vicinity.

Q. Do you have any of your goods, inbound or outbound, that have to cross the river here at St. Louis? A. Pretty nearly all of it has to come across the river.

Q. From what quarry do you get your stone, principally? A. Bedford, Indiana, principally.

Q. On what railroad is that? A. On the Monon.

Q. Your product, then, comes from the East, nearly all of it? A. Granite and Bedford stone, nearly all from the East; not altogether, but largely.

Q. Have you experienced any difficulty in getting your goods across the river, after arrival at East St. Louis? A. Sometimes.

Q. What was the character of the difficulty? A. Well, we would be in a hurry for some cars, and they would not come in. We would try to find out where they were, locate them, and find out why they weren't delivered.

Q. And where would you find them? A. Take a map of the railroads, from our place over twenty miles east of St. Louis, and put a dot any place.

Q. Were those delays serious? That is, in point of time? A. Oh, sometimes, yes.

Q. Are you familiar with the handling of the coal product backward and forward across the river here, with reference to the time it takes? A. Yes, sir.

Q. Have you ever had nny trouble at your plant from that cause? A. Sometimes.

Q. What was the nature of that? A. We wouldn't get any coal, and sometimes had to shut down.

Q. Do you know why you couldn't get coal? A. They told us there was an embargo.

Q. What do you mean by that? A. They said there was an embargo. We are on the Missouri Pacific, and the Missouri Pacific wouldn't take the cars from the bridge, and

the bridge said there was an embargo on them, and they could not bring them over until the embargo was raised. The embargo was raised by the yards on the other side being crowded up, and when they brought the trains across the river, they couldn't take them, and they simply had to take them back on the other side.

Mr. Watts: Q. You mean the Missouri Pacific yards? A. Yes, sir.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. Your material is nearly all heavy material? A. Yes, sir.

Q. It is all heavy stuff? A. Yes, sir; altogether.

Q. And, of course, you want your deliveries made as conveniently as possible to the place where you want to use it? A. No, sir, all our deliveries are made on tracks at our own yards, our own tracks.

Q. Where are your yards? A. On the Missouri Pacific Railroad, on Kentucky Avenue.

Q. In this city? A. Yes, sir.

Q. You spoke of having difficulty sometimes in getting your stone, your granite from New Bedford, and you undertook to look that up, and you found the car was held sometimes on one track and sometimes on another? A. Yes, sometimes.

Q. It might be anywhere within twenty miles of the city? A. I have found them every place, Mr. Lehmann.

Q. Sometimes on the tracks of the Terminal, and sometimes on the tracks of the railroad that hauled them from New Bedford? A. Sometimes I have found them on the other side; found them on this side; found them on the bridge tracks, found them on the B. & O., on the other side; found them on the Frisco, and on the Missouri Pacific—and, as I have said, I don't know where I haven't found them.

Q. The embargo you spoke of, that meant that your coal

coming from the East Side Terminal Company would not handle the cars, because the Missouri Pacific, which would deliver to your yards, would not take them? A. That is what they told me. They said there was an embargo, and I wanted to find out what the embargo was. They told me they brought the trains over on this side for the Missouri Pacific, and the Missouri Pacific would not take them, and so they had to take them back to the other side.

Q. The Missouri Pacific would not take them because their yards were crowded? A. They wouldn't take them, that was all.

Q. From your observation, Mr. Lederer, as a man of experience in dealing with heavy shipments here, is there a lack of tracks in the city of St. Louis? A. Oh, unquestionably.

Q. Do you think that is plain and manifest? A. Yes, sir. I went to see Mr. Middleton of the Frisco about some shipments that were very important at the time, on account of work that was in a great hurry, and that were being held up. And I asked him, "What are we going to do? This sort of thing won't work here. We have stuff on the east side, and it takes longer to bring it from East St. Louis to our yard, than it does to bring it from Maine to Missouri." He said, "Build more bridges and more tracks."

Q. And we also want more room in the city of St. Louis? A. He said that was the reason. And I said to him, "In other words, you fellows are in the same fix as the fellow that tried to put a quart into a pint measure, that is all."

WM. J. BRACHVOGEL, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. William J. Brachvogel.

Q. What is your business? A. Manager of the James Cunningham, Son & Co. Carriages and Hearses.

Q. Here in this city? A. Our home office is in Rochester, N. Y., and St. Louis is our southwestern repository.

Q. How long have you been in that business here? A. Since July, 1899.

Q. With this same firm? A. Yes, sir; been here in St. Louis since the fall of 1893.

Q. Do you manufacture in this city, or are they all made in Rochester? A. They are all made in Rochester, N. Y.

Q. And shipped here? A. Shipped here in car-load lots.

Q. They come across the river at St. Louis? A. Yes, sir.

Q. Have you experienced any difficulty in getting your goods across the river after they arrive in East St. Louis? A. Sometimes we have a great deal of difficulty?

Q. What is the nature of it, delay? A. Delay. The cars get in on the other side, and sometimes they get lost. Sometimes a car will come through in four or five days, and sometimes it takes two weeks.

Q. You mean it gets lost on the other side? A. Yes, sir.

Q. Have you in mind any specific instance of that kind? A. I have one shipment just at the present time that left Rochester on October 3rd, and we got the bill of lading on October 5th; two hearses were in the car, and we were in a hurry for them. I called up the Big Four last Saturday morning, and gave them the number of the car, and told them this car ought to be in about Monday morning, and we would like to have it over here as soon as possible, as we had parties coming from Kansas to see those hearses, one in particular. On Wednesday morning we called them up. The car arrived in East St. Louis, on the 10th, at 9:30 p. m. On the 12th we called up the Bridge, and asked about this, and they said it was delivered to the Bridge on the 12th, at 4:20 a. m. We called them up yesterday, and asked in reference to this car, and they said, "Your car is lined up for

the bridge, but the Terminal couldn't take it." This morning I called them up, and the car is now in the Terminal yard on this side of the river, but we won't get it until Monday.

ARMEN TRAXEL, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name. A. Armen Traxel.

Q. What is your business? A. General hauling business, termed a transfer company.

Q. What is the name of your company? A. The Big Four Transfer Company.

Q. Where are you located? A. On 12th, between Carr and Biddle.

Q. How long have you been in that business? A. About four years.

Q. How many teams have you? A. We run from ten to fifteen.

Q. Do you have a stable out there on Twelfth and Carr? A. We have a stable and warehouse.

Q. What is the general character of the business you have been carrying on during the period of time you have been in business? A. Delivering merchandise from East St. Louis stations to merchants on this side.

Q. Do you haul anything the other way? A. We formerly hauled from St. Louis to East St. Louis until there was an order issued not to honor any charges for independent teamsters—that is, any one outside the St. Louis Transfer Company and the Columbia Transfer Company.

Q. Who issued the order? A. I don't know who issued the order, but it affected every road in East St. Louis. It certainly emanated from every one of the roads.

Q. On the east side railroads? A. Yes, sir.

Q. What was the effect of that on your business? A. The effect was a clean loss of about four thousand dollars a year.

Q. Why? A. We were deprived of that business by virtue of the fact that we could not get any compensation for it, and consequently do not handle it.

Q. You mean business from this side to the other? A. No, sir. We fee the St. Louis Transfer Company in a case of that kind, just to help them along a little bit.

Q. Has your business been affected from the other side of the river to St. Louis? A. About forty per cent.

Q. What is the cause of that? A. The cause is the discrimination of the railroads at East St. Louis, in giving the St. Louis Transfer Company and the Columbia Transfer Company a rebate of two cents, where we do not get it. Consequently, we either have to get out, or put ourselves in shape to handle a little of it and get out as soon as possible.

Q. What do you mean by giving two cents to the St. Louis Transfer Company, and the Columbia Transfer Company? You mean they pay the St. Louis Transfer Company and the Columbia Transfer Company two cents a hundred for goods they haul over here? A. Exactly, and they are enabled to go out and make a rate to merchants at two cents a hundred less than I can make it, and less than I can possibly handle it for.

Q. You mean the St. Louis and the Columbia companies? A. Yes, sir. It practically puts us out of business.

Q. Have you endeavored to get the railroad companies to offer you the same facilities? A. Indeed, I have. I have used every legitimate effort.

Q. Have they refused? A. They certainly have refused.

N. W. TAYLOR, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name. A. N. W. Taylor.

Q. What is your business? A. Railroading.

Q. What line? A. General Western Freight Agent of the Vandalia.

Q. That is the Pennsylvania system? A. Yes, sir.

Q. How long have you been in the railroad business in St. Louis? A. I have been with that road twenty-eight years.

Q. Here in St. Louis? A. Yes, sir; all that time.

Q. You were with the Vandalia here prior to the time the Pennsylvania acquired it? A. Yes, sir.

Q. You were in St. Louis, in the railroad business, in the same line you are in now, practically, before the Merchants Bridge was built, wasn't you? A. Yes, sir.

Q. And you were here in the same line of business, for the same road, when it was built and completed? A. Yes, sir.

Q. What has been your general line of duty as General Freight Agent in St. Louis for the Vandalia? A. When I was General Freight Agent, my duty was to look after the freight business of the road, from one point to another, coming from its connections, etc.

Q. Inbound and outbound, to and from St. Louis? A. Yes, sir.

Q. When did you cease to be General Freight Agent in St. Louis? A. A little over five years ago.

Q. Who succeeded you? A. W. H. Coleman.

Q. Is he still in that position? A. No sir, he is not in this country. He died two or three years ago.

Q. Who succeeded him? A. William Hodgden.

Q. Is he still in that position? A. Yes, sir.

Q. What are your duties as Western Agent? A. I look after business passing through here, more statistical, and things of that sort. I have nothing to do with rates, and have not had for the past five years.

Q. You were looking after the rates on the Vandalia when the Merchants' Bridge was erected? A. Yes, sir.

Q. When the Merchants' Bridge was erected, the Vandalia made arrangements to utilize that bridge to bring its trains in? A. To some extent. Not its trains, but certain cars it wanted to come to this side, when we had our freight house on this side of the river.

Q. When did you build that freight house? A. I could not give you the exact time.

Q. Just as near as you can recollect? A. Twelve or fourteen years ago, perhaps.

Q. After the completion of the Merchants' Bridge, wasn't it? A. Yes, sir.

Q. Where was that freight house built? A. At Second and Carr, some place up there.

Q. Do you know the size of that building? A. I can't tell you.

Q. It was a large building? A. Yes, sir; quite a large building. I think it extends through one block, north and south.

Q. And about how far east and west? A. Half, or perhaps not quite half a block.

Q. Did you have anything to do with the building of it? A. No, sir; I didn't have anything to do with it at all. That was before my time as General Freight Agent, the house was built.

Q. What position did you occupy then? A. Chief Clerk, and Assistant General Freight Agent.

Q. Who was General Freight Agent? A. Mr. Hebard.

Q. He is dead now? A. Yes, sir.

Q. Have you any idea of the approximate cost of that building? A. I haven't any idea.

Q. It was a costly building? A. Quite expensive.

Q. Did the Pennsylvania buy the ground, and erect that building? A. The Pennsylvania, I understand, bought the ground, and owned it, and erected the building.

Q. That building was subsequently closed? A. Yes, sir.

Q. And no more freight received for the Pennsylvania? A. Yes, sir. Immediately after the road went into the hands of a receiver.

Q. Immediately after, the Pennsylvania went into the hands of a receiver? A. The Vandalia went into the hands of a receiver.

Q. What time was that? A. I don't believe I can give you the exact date. Perhaps in 1895 or 1896, somewhere along there.

Q. And it was never opened afterwards by the Vandalia? A. No, sir.

Q. It is leased now by the Pennsylvania to what road? A. The Burlington.

Q. And they are using it? A. Yes, sir, in connection with the M. K. & T., they are using it, I think.

Q. The tracks of the Vandalia terminate at East St. Louis, don't they? A. Yes, sir.

Q. Were you in the employ of the road during the receivership? A. Yes, sir.

Q. You became General Freight Agent during that receivership? A. I was made General Freight Agent prior to the receivership.

Q. And you continued in your position through the receivership? A. Until 1902. The road went out of the hands of the receiver about two years ago.

Q. You went out three years before the receivership terminated? A. Yes, sir.

Q. While you were acting as General Freight Agent,

among other things you looked after was the coal traffic on your road into St. Louis, didn't you? A. Yes, sir.

Q. How far out are the coal mines on your road that send coal into St. Louis? A. They run from, perhaps, eleven and a half to fifty-two or fifty-three miles. The outside mine, however, has not done any business for some little time. They are all within twenty miles—no, not quite that—there is one mine open at Pocahontas, which is thirty miles. But the principal mines are within eighteen miles of St. Louis.

Q. Was there quite a tonnage from those mines? A. Yes, sir; quite a good deal.

Q. Have you any idea of that amount annually? A. No, sir, I haven't looked into that, or thought of it. It has been some little while since I have been out of the business.

Q. You went out in 1901? A. Yes, sir, in the fall of 1901.

Q. Prior to that time, did you attend the meetings of the St. Louis Coal Traffic Association, as the representative of your road? A. I attended the meetings of the Coal Traffic Association usually.

Q. When did you begin to attend those meetings, what year. A. I cannot say as to that.

Q. A good while back? A. Oh, yes.

Q. Eight or nine years? A. Well, not that long ago. I don't know that they had a traffic association, but the roads, of course, used to meet. There were three or four roads at that time, the B. & O. (Ohio & Mississippi, it was, at that time), the Vandalia, and the L. & N.

Q. When did you become General Freight Agent? A. In February, 1893.

Q. In 1897, 1898, and 1899, the Coal Traffic Association was going along? A. Yes, sir.

Q. And at that time, in 1898 and 1899, they met, and a memorandum of their proceedings was sent out to each

representative of each road that attended those meetings? A. Yes, sir—I don't know anything about the others, but I know we used to get them.

Q. When you did get them, they would contain a rate that had been agreed upon by those roads? A. No, sir, not agreed upon. I cannot say as to that. It might have been, with some little hold-back on the part of each and every road. But it was understood.

Q. That they were the rates? A. Yes, sir.

Q. And then those rates were published as the tariff rates of the roads individually; is that correct? A. I won't say as to that, whether it was or not. I believe it was, but am not positive as to whether the rates were published by each and every road.

Q. Isn't it true that in 1897, 1898, and 1899, whenever a sheet like the one I show you, which is headed "St. Louis Coal Traffic Bureau," was sent out, it had at the top "Agreed rates"? A. I wouldn't say as to that. I couldn't do it.

Q. You don't have any recollection of it? A. I don't have any recollection of that.

Q. It is not on the sheet I show you? A. It is not.

Q. You have no recollection of its being on the sheets you received at that time? A. I have no recollection of that.

Q. This sheet (indicating) was issued in 1906, and you have not been attending the meetings lately? A. Not for the last five years, at any rate, I have not been attending the meetings.

Q. What other traffic associations did you attend, as the representative of your road, while you were General Freight Agent? A. We had an association here called the East-bound Freight Association.

Q. And what other? A. I don't remember any other now. There may have been others.

Q. Was there a Louisville & Cincinnati Association? A. Yes, sir; that is a branch of the East-bound Freight Committee; Louisville, Cincinnati & St. Louis.

Q. And the East-bound Freight Committee is a branch of the Central Traffic Association? A. It is supposed to be.

Q. And wasn't there a St. Louis & Chicago Traffic Association, also, when you went to those meetings? A. No, sir, I don't think we were a member of that. I am not positive. We may have been for a short time. But we have been out of the Chicago business for a good many years. We did business sometimes with the Illinois Central, but no connection with them, and since that time have not been in the Chicago business, and consequently are not in that association.

Q. How many years did that depot stand idle on this side of the river? A. A very short time. I don't remember just exactly now. Perhaps a year, or maybe two years.

Q. Did your road do any business with the Wiggins Ferry Company, while you were connected with it? A. Nothing special. Perhaps an isolated shipment; but not through any special agreement, or anything of that kind.

Q. Your business all came over the two bridges? A. Yes, sir, and the ferry itself.

Q. Who ran that ferry? A. Mr. Grapevine, I believe, ran the ferry for the Iron Mountain Road.

Q. That is what is called the Ivory ferry? A. No, sir, that is another ferry. The Carondelet Ferry.

Q. The Carondelet Ferry? A. Yes, sir.

Q. Were they doing business with the Carondelet Ferry when you ceased to be General Freight Agent? A. To some extent; just about or prior to the time I ceased to be General Freight Agent, the road was taken in by the Terminal Association—that is, the road we did business over.

Q. Is that what was called the Conlogue Road? A. Yes, sir, the Conlogue Road.

Q. Prior to the time the Conlogue Road was absorbed by the Terminal Association, your road used to send freight that way a good deal? A. Quite a good deal of freight was sent that way to the South and Southwest.

Q. And for St. Louis, too? A. Only for Carondelet; very little for St. Louis proper.

Q. What was the character of that sent to Carondelet, coal traffic? A. Coal traffic.

Q. Going to those foundries down there? A. To some extent. But there was no especial routing on that. Whichever way we could get it through the most convenient to the consumers of the coal, we sent it.

Q. Why did you use the Conlogue Road, in preference to the bridges? A. We didn't use it in preference to the bridges, only as requested by the receivers of the freight.

Q. For through business you used it largely, didn't you? A. No, sir; I wouldn't say we used it largely. We did ship a good deal through that way.

Q. The shippers did not request that? A. We did that as a matter of convenience to ourselves. It was routed that way.

Q. If it was through business, your road routed it that way? A. Yes, sir; if there should happen to be a block here, or anything that looked like it, and we could get it through that way, we routed it that way.

Q. On the east side? A. Perhaps more on this side than the east side.

Q. Who owned the Conlogue Road? A. That was owned by the Pennsylvania Company.

Q. And at that time the Pennsylvania did not belong to the Terminal Association? A. No, sir.

Q. When the Conlogue Road was absorbed by the Terminal Association, that marked the period when the Pennsylvania entered the Terminal Association? A. That is my understanding.

Q. Do you remember what year that was? A. No, sir, I do not.

EDWARD HART, JR., a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name? A. Edward Hart, Jr.

Q. What is your business? A. Assistant General Freight Agent of the Baltimore & Ohio, Southwestern, in St. Louis.

Q. Representing that railroad, you attend the meetings of the East-bound Freight Committee, do you? A. Yes, sir.

Q. And also the St. Louis, Cincinnati & Louisville Committee? A. Yes, sir.

Q. And also the St. Louis Coal Traffic Bureau? A. Yes, sir.

Q. How long have you been attending those meetings, representing your company? A. Since January, 1902, I think it was, I came here.

Q. That is the time you first began to represent your road here? A. I was appointed General Freight Agent on the 1st of January, of that year.

Q. Your road is quite a heavy carrier of coal into this market? A. Yes, sir, we bring a good deal of coal in.

Q. Have you an idea of what the tonnage of coal into St. Louis, over your road, was last year—in a general way? A. It ranges from perhaps 35,000 tons to 75,000 or 80,000 tons a month. I should judge in the neighborhood of a half million tons in a year. Of course, I am speaking just generally. I can give you the exact figures, if you desire, but I haven't them with me.

Q. That is near enough. About what distance would

you say is the average the majority of that tonnage comes from on your road? A. From eighteen to forty miles, most of it. And some of it from a distance of sixty miles.

Q. The most of it is under forty miles? A. Yes, sir.

Q. What is the point out forty miles on your road which you would designate as the outer edge of the large product? A. It is a station called Breeze.

Q. Breeze, Illinois? A. Yes, sir.

Q. And from that into St. Louis the tonnage is heavier? A. Yes, sir. We have some coal coming in from Sandoval, Odin, and Salem. There are mines there, but they don't ship much.

Q. From Sandoval the output does not amount to much, does it? A. Unfortunately for us, no.

Q. Do you receive copies of the proceedings of the Coal Traffic Bureau of St. Louis? A. Yes, sir.

Q. And have been receiving them since you have been a member? A. Generally, I think so.

Q. Do you remember the cut in May, 1905, that was made by one of the roads on coal, from the Illinois coal fields into St. Louis? A. What do you call a cut?

Q. I mean a reduction in the rate? A. The rates were changed, I think, in 1905.

Q. What road made that change first? A. I don't remember.

Q. Wasn't it Mr. Degne, the General Freight Agent of the Southern? A. Who?

Q. Who is the General Freight Agent of the Southern road? A. The Southern has no General Freight Agent, but an Assistant Freight Agent.

Q. What is his name? A. Mr. Campbell.

Q. He is in St. Louis? A. Not that I know of.

Q. Has he an office in the Chemical Building? A. I believe so.

Q. You remember the rate was changed in May, 1905? A. The rate was changed several times.

Q. In May, 1905, it was changed down to as low as seven cents on some of the roads? A. I believe it got down to a dollar a car on some of the roads.

Q. That is less than I thought it was. You remember that period? A. Yes, sir.

Q. Did your road meet that cut? A. Not on the dollar proposition. I don't believe we got below twenty-five cents.

Q. Do you remember the time the rates were restored? A. I will have to ask you what you mean by restored?

Q. Put back to what they were before they were reduced. A. The rates have fluctuated, as I said before, on our road, from twenty-five to forty cents a ton. We have no standard rate. The maximum rate in Illinois is fixed by the Illinois State Warehouse Commission. We increase our rates from the market rates up to that of the Commission.

Q. To be specific, between the 22nd of May, 1905, and the 5th of June, 1905, was not the rate reduced on your road, and subsequently put back to what it was on the 22nd of May, 1905, by your road, and all the other coal-carrying roads? A. If I remember it, we continued to carry the twenty-five cent rate, which went into effect sometime that spring, April, or May, for the remainder of that year.

Q. Do I understand you to say that your road did not carry coal for less than twenty-five cents, from Breeze and other points? A. I think not.

Q. Did you issue any circulars in May or June, 1905? A. We issued a tariff.

Q. That is what I mean, a tariff circular? A. Yes, sir.

Q. And you sent copies of that to Mr. Frazer? A. Possibly. They were sent to everybody that was interested; all the coal operators and dealers that we were interested in doing business with, got copies, so that they would understand what our rates would be.

Q. Did I understand you to say that you got down lower than twenty-five cents? A. No, sir.

Q. I understood you to say you got lower than twenty-five cents, but not to the dollar a car? A. I said we got below forty cents, which had been our rate before that. Twenty-five cents was the lowest we went.

Q. When the rate was restored, after that reduction in May, what was it put back to, twenty-five, thirty, or thirty-five cents, on most of the roads? A. I don't know what the other roads did, except from their tariffs, but our rate remained twenty-five cents up to this year, when it was increased to forty cents.

Q. Did the other roads make a twenty-five cent rate, when the rate was restored? A. Some of their rates, I say, were as low as a dollar a car, during that early period, and then I think they all got a uniform rate of twenty-five cents, that being necessary to protect the various mines and operators on the different roads, who had to have equal rates.

Q. To refresh your memory, did you attend a meeting at Mr. Fraser's office, on May 29th, 1905, in the afternoon, at which this matter was taken up and discussed, and it was agreed that you would all restore the rates and maintain them? A. I have never attended a meeting of the Coal Traffic Association, where they agreed to any restoration of rates. We have discussed rates, and considered them, and after discussing them have decided individually what we wanted to do.

Q. And then, you would individually publish the rates announced at that meeting? A. Yes, sir, that the individuals had announced, and generally they were uniform, on account of the commercial interests that I have referred to.

Q. And that occurred at that meeting I have referred to? A. Probably, yes.

T. C. POWELL, a witness of lawful age, being duly produced, sworn and examined, on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Please state your name. A. T. C. Powell.

Q. What is your business? A. Fifth Vice-President of the Southern Railway Co.

Q. Who is the President of that road? A. Mr. Samuel Spencer.

Q. He lives in Washington, doesn't he? A. Yes, sir.

Q. How do you obtain access to East St. Louis, over the old tracks of the Louisville & Evansville line? A. You mean from the East?

Q. Yes. A. We now own the St. Louis, Evansville Consolidated.

Q. That was formerly the Air Line? A. That is the nick-name for it.

Q. What are your duties here, in connection with the Southern? A. I am in complete charge of it here.

Q. Both passenger and freight? A. Passenger, freight and operation.

Q. Representing your road, do you attend meetings of the East-bound Freight Committee? A. I don't think I have attended those meetings. We have an Assistant General Freight Agent, Mr. Campbell, who attends that particular association.

Q. Mr. R. A. Campbell? A. Yes, sir.

Q. He has an office in the Chemical Building? A. Yes, sir.

Q. When will he be back in the city? A. I don't know that. I have an appointment with him in New York for some time next week. I have not seen him for some time. He has been away, and I only got back yesterday.

Q. You office in the same building? A. Yes, sir.

Q. He is under you, is he? A. Yes, sir.

Q. You don't know where he is, now? A. No, sir.

Q. Have you any means of ascertaining when he will be back? A. He probably has gone out of the city to attend some meetings. He told me he was going to be very busy. I saw him in Washington when I was there this week.

Q. My question was, have you any means of ascertaining when he will be back? A. Oh, yes.

Q. Will you do that, and let me know? A. Yes, sir.

Q. Have you attended any of the meetings of the St. Louis Coal Traffic Association as the representative of your road? A. Quite a number.

Q. When did you begin that? A. I came to St. Louis, April 1st, 1905, and I attended quite a number after that date, but I don't remember just the first one.

Q. None prior to that date? A. None prior to that date.

Q. Do you remember the reduction in rates that was made by one of the coal-carrying roads, about that time? A. I remember reductions in rates were made about that time, but I don't remember the exact date.

Q. Did your road meet the reduction? A. I know we made some reductions. And we may have initiated some of them ourselves.

Q. Do you know what road it was that initiated that reduction? A. I don't recall at the moment.

Q. Do you remember the name of the freight agent who initiated it? A. If I knew the name of the freight agent I would know the name of the road.

Q. Wasn't it a man in the Fullerton Building, at that time? A. I don't know.

Q. What coal-carrying roads run to the Southeast here? A. The L. & N., the M. & O., the Southern, the B. & O., and the Big Four also handles some traffic to the Southeast;

and the St. Louis, Iron Mountain and Southern, and the Frisco.

Q. And the Chicago & Eastern Illinois? A. The Chicago and Eastern Illinois does not run from here to the Southeast.

Q. Has the Frisco a line from here to the Southeast? A. Yes.

Q. Into the coal fields? A. You didn't ask me that. You asked me what lines went from here to the Southeast.

Q. I mean Southeast into Illinois? A. No, sir, they have not.

Q. Were you present at a meeting of the Coal Traffic Bureau, when that rate, after it had been reduced last May, was restored? A. I will have to ask you the same question I heard the other witnesses ask, to find out what you mean by restoration. There is no fixed rate on coal.

Q. You say there is no fixed rate on coal; you mean any road can reduce its tariff if it desires? A. I mean there is no minimum or maximum rate on coal, except that fixed by the Illinois State Commission. When you speak of "restoration," you have in mind, I presume, a certain rate.

Q. When I speak of "restoration," I mean the rate that the various representatives of the various roads in the St. Louis Coal Traffic Bureau restored after reductions were made, beginning on the 22nd of May, 1905? A. For the last several years, the rates on coal from East St. Louis have varied. They have been up as high as sixty cents, if that is the maximum provided by the Illinois State Commission, and have been as low as a dollar a car on some of the roads. Subsequent to the reductions made in 1905, the Southern put in a rate of forty cents to East St. Louis, but that exact date I cannot recall.

Q. From what point? A. From mines in Illinois, Germantown, and West.

Q. You attended that meeting of the Coal Traffic Bureau

when that matter was discussed, on the 29th of May, 1905? A. I don't know the exact date, but I attended a great many meetings.

Q. When that identical question was up, at that time, you attended that meeting, didn't you? A. I expect I did.

Q. And the matter was discussed there, and the roads individually announced what rates they would put in force, and they did put into effect? A. I cannot say from memory that it was exactly on the 29th of May that was done, but that is the procedure usually at the meetings, to announce the rates.

Q. And publish the tariffs? A. Yes, sir.

Q. And that is what was done at that meeting, whether on the 29th or the 30th? A. That is what occurred, when the rate was announced, and the tariffs published. I forget the date.

Q. Wasn't it the Baltimore & Ohio Southwestern that cut that rate first? A. I couldn't tell you. Except when tariffs are provided it is difficult to tell which line first reduces the rate.

Q. Wasn't there a system in vogue in May, 1905, with this Coal Traffic Bureau, and Mr. Fraser, of his sending a notification of reduction in rates, that he received from the road reducing it, sending a copy to each member of the Assciation? A. Yes, sir.

Q. You got them, along with the others? A. Yes, sir.

Q. And you got the notification of that reduction, or otherwise you would not have known it? A. Otherwise I would have known it, but that was one way of my knowing it.

G. L. BALL, recalled, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Have you examined the records of the Illinois & Missouri River Bridge Company—whatever the name is—to

ascertain how many bonds were exchanged for stock, and how many have been reserved to pay the underlying indebtedness, and how many of the $2,500,000 bonds authorized yet remain in the possession of the Company? A. I have.

Q. Will you please give those figures? A. $790,000 of the bonds exchanged for the stock of the old company; and $800,000 reserved to take up the bonds of the old company; but there have been no exchanges made. That would leave of the $2,500,000, $910,000 in reserve, unissued.

Q. Have you anything in your possession that would disclose the fact, as to who carried on the negotiations, on the part of the old bridge company, that resulted in the sale of the property to the corporation of which you were Secretary? A. I judge not, unless the minutes would disclose it.

Q. Do you know whether or not they do? A. Off-hand, I do not. That was prior to my time as secretary of the company.

Q. Without regard to your minutes, have you any knowledge on that point, as to who conducted those negotiations for the old bridge company? A. No, sir; I have not.

Q. I believe Mr. Davidson said that Mr. Ramsay and some other gentlemen conducted it? A. For the Missouri & Illinois Bridge Company?

Q. That is the present corporation. But on the other side, I mean. A. I do not know.

Q. Will you examine and see, and let me know if they show anything—However, I do not suppose those minutes would show that fact. A. I will examine them, and let you know.

At this point, the further hearing of testimony in this case is adjourned until Monday morning, October 15th, 1906, at ten o'clock.

R. E. Rombauer,
Special Commissioner.

St. Louis, Oct. 15, 1906.

Met pursuant to adjournment as above, on Monday, October 15, 1906, at ten o'clock a. m., in the Federal Building, in the City of St. Louis, Missouri.

Present: Hon. R. E. Rombauer, Special Commissioner, Messrs. E. C. Crow, Chester Krum and Chas. Nagel, appeared in behalf of the complainant; and Messrs. M. F. Watts, F. W. Lehmann and H. S. Priest, appeared in behalf of the defendants.

The following proceedings were had:

E. E. RAND, a witness of lawful age, being duly produced, sworn and examined on behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. You are a member of the firm of Roberts, Johnson & Rand, wholesale dealers in boots and shoes, in this city? A. Yes, sir. But it is a corporation.

Q. What position do you hold in that Company? A. I am Secretary of the Company.

Q. Where does your corporation do business? In what parts of the country? A. The bulk of our business is done in the South, the Southeast and the Southwest, extending from the Atlantic to the Pacific coasts, in that particular section.

Q. What is the volume of your business a year? A. Our sales during the last fiscal year were a little over eight million dollars a year.

Q. Do you have occasion in your line of business to handle any of your products inbound and outbound across the Mississippi River at St. Louis? A. Yes, sir, a great deal of our product comes to us from the East.

Q. How are your goods handled, inbound and outbound,

across the river, by rail or wagon? A. Just at present the greater bulk of it is being handled by the Wabash Yard, on the St. Louis side. Formerly we handled by wagon absolutely, from East St. Louis. Now quite a good deal of it is coming by wagon, by Transfer Companies, across the bridge.

Q. How about the outbound shipments? A. Our outbound shipments are being delivered across the river.

Q. What is the reason for using wagons instead of the Terminal Association, or the Merchants' Bridge Railway tracks? A. We got into that on account of the delays we had had on our Terminal Railroad Association here. We have not for several years delivered any goods, to amount to anything, to the Terminal Railroad Association, in a great many instances sending our own teams and delivering our goods to the Transfer Companies, who would deliver them to the proper depots at East St. Louis.

Q. What effect, if any, did these delays have on your business in the Southeastern territory? A. It is a hard matter to answer, just to what the extent of the effect has been. We have had repeated complaints from our customers stating they could receive goods from Chicago quite a good deal earlier than they could from us, and for that reason we have been deprived of orders we might have gotten.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. Mr. Rand, how long has your Company been in existence? A. A little over eight years.

Q. It began entirely new, then, I believe? A. Yes, sir.

Q. Began, so to speak, with no trade at all? A. No, sir.

Q. And in that time, in the eight years, you have built up at the rate of about one million dollars a year? A. Yes, sir.

Q. So now you are doing a business, the gross of which is, substantially speaking, eight millions? A. Yes, sir.

Q. And that has been the development of the last eight years? A. Yes, sir.

Q. Do you deal mainly in carload or in broken lots? A. Our manufactured product is all in broken lots.

Q. You mean your out shipments? A. Yes, sir.

Q. Where do you deliver from, in making your out shipments? A. From Tenth and Washington Avenue.

Q. And your deliveries in the main have been from Tenth and Washington Avenue, to the various Railroad Companies on the East side of the river? A. Yes, sir.

Q. And where you delivered to the Companies on this side of the river, you delivered to the depots of those companies? A. To the Transfer Companies, their authorized agents, yes, sir.

Q. So far as the East side was concerned, you found it more convenient to make your deliveries to the companies on the east side? A. Yes, sir.

MARTHA S. ELLIOTT, a witness of lawful age, being duly produced, sworn and examined, in behalf of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Where are you employed now? A. The Willis Coal & Mining Company.

Q. In 1901 and 1902 you were with the Beck-Walker Coal Company? A. Yes, sir.

Q. What position did you occupy there? A. Car record clerk; stenographer, and the latter part of the time I was there I was bookkeeper.

Q. Did the company with whom you were working have any mines on what is known as the Big Four road? A. They operate the Paisley Mine at Paisley, Illinois.

Q. Is that on the Big Four road? A. Yes, sir, on the Big Four.

Q. I will get you to state whether or not in 1901 and 1902 that Company shipped coal into the City of St. Louis, at less than the published tariff rates, over the Big Four? A. They did.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. Do you know whether those shipments were by the Railroad Company to St. Louis or to East St. Louis? A. I cannot state just now, but the coal was mostly consumed by the Evens & Howard Fire Brick Company.

Q. Do you know where the rate was to? A. The rate was to East St. Louis, the Big Four road only.

W. T. LOUDON, recalled, testified as follows:

DIRECT EXAMINATION, BY MR. CROW:

Q. How far back have you the published tariffs for the so-called Alton Bridge? A. The freight tariff is for 1899.

Q. Will you turn to the article of bituminous coal there and say what the tariff was for transferring across the river for the year 1899? A. On the tariff dated September 25, 1899, the rate is five-tenths of a cent per hundred.

Q. How much would that be a ton? A. Ten cents a ton.

Q. What is the date of the next tariff that was published? A. The next one is dated October 1, 1899.

Q. What was the rate then? A. Four-tenths of a cent per hundred.

Q. How much per ton would that be? A. Eight cents.

Q. That was effective until the next tariff was published? A. Yes, sir.

Q. When was that? A. The next one was published June 26, 1905.

Q. Was that after the purchase of the bridge by the present Company? A. Yes, sir.

Q. What is the rate on bituminous coal in that tariff? A. It is one and one-half cents per hundred.

Q. How much is that a ton? A. Thirty cents per ton.

Q. What is the next tariff? A. The next tariff is an amendment of that one and is dated January 10, 1906.

Q. What is the rate there? A. Twenty cents per ton.

Q. Is there any other amendment there? A. No other amendment. There is a new tariff, but the rate is the same, twenty cents a ton.

Q. That same rate is still effective? A. Yes, sir.

Q. Transportation from what point to what point did those rates cover? A. From Alton to West Alton.

Q. Over the tracks only of what Company is that? A. The Missouri & Illinois Bridge & Belt Company.

Q. In other words, it was the transfer across the river? A. Yes, sir.

Q. The records you have there, and from which you have been reading, are the official records from your office, are they not? A. Yes, sir.

Q. Will you let me take those and examine them. I will be responsible for getting them back to you? A. Yes, sir.

Q. Do you know the time the bridge went into the hands of a Receiver? A. January 16, 1897.

Mr. Priest: That Receiver was appointed by this Court; and the same Receiver was appointed by the Illinois court, as an ancillary proceeding.

Mr. Crow: Q. When did the receivership terminate? A. June 15, 1901.

V. W. FISHER recalled, a witness of lawful age, being duly produced, sworn and examined, on the part of the complainant, testified as follows:

DIRECT EXAMINATION, BY MR. CROW:

Q. You are the General Passenger Agent of the Terminal Railroad Association of St. Louis? A. Yes, sir.

Q. I will ask you if your road sells tickets in connection with the Illinois Traction Company, to points in Illinois, Decatur, Springfield, and other points? A. No, sir.

Q. Are tickets sold by the Illinois Traction Company good over your road? A. I don't know which road the Illinois Traction Company is.

Q. It is the one that comes down by the Merchants' Bridge. A. You mean the Illinois Belt Line?

Q. It is an electric line. A. No, sir, we do not. That is the McKinley road.

Q. Here is the route it traverses (handing witness pamphlet). A. We do no business in connection with that line whatever.

Q. Trains that are operated in connection with that would be over the Merchants' Terminal, if any. Do you handle the business of the Merchants' Terminal? A. Yes, sir; I handle the business of the Merchants' Terminal, also. We do not run any trains in connection with the McKinley road.

Q. They do not sell any tickets over you road? A. No, sir, they do not. Passengers from their line get off at Granite City and take our trains; but they have to purchase tickets at Granite City.

Q. You have no tickets on sale that are good over that line to Decatur, Springfield, and those points? A. No, sir; we have not.

Q. And no arrangement with them by which they sell tickets over your line? A. No, sir, none whatever.

No other witnesses being present, by consent of counsel I adjourn the further taking of testimony herein until to-morrow, Tuesday, October 16, 1906, at ten o'clock in the forenoon.

R. E. Rombauer,
Special Commissioner.

St. Louis, October 16, 1906.

Met pursuant to adjournment as above, on Tuesday, October 16, 1906, at half-past two o'clock in the afternoon of that day, in the Federal Building, in the City of St. Louis, Missouri, when the following proceedings were had:

Present: Hon. R. E. Rombauer, Special Commissioner; Messrs. E. C. Crow, Chester Krum and Chas. Nagel, appearing in behalf of the complainant; and Messrs. M. F. Watts, F. Lehmann and H. S. Priest appearing in behalf of the defendant.

The following proceedings were had:

JOHN SCULLIN recalled, testified in behalf of the complainant, as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Mr. Scullin, referring to the sale of the Wiggins Ferry Company property, I will ask you to state if you remember who it was that you first opened the negotiations with, with reference to the sale of that property to the Rock Island Railroad Company? A. I think Mr. Leeds of the Rock Island Railroad Company was the first who spoke to me about it.

Q. And did he do that orally or in writing? A. Orally.

Q. Where was that? A. In the City of New York.

Q. What was the occasion of your visit to Mr. Leeds or his calling upon you in New York? A. I had been there negotiating the sale of the Colorado Road to them, and had sold them the Colorado Road.

Q. What road is that? A. It was known as the St. Louis, Kansas City & Colorado Road, from here to Kansas City, running out to Union.

Q. What is now known as the Rock Island Railroad from here to Kansas City? A. Yes, sir.

Q. Were the two objects considered at the same time? A. No, sir.

Q. Was the Colorado Road sold? A. Yes, sir, it was sold.

Q. To whom was it sold? A. Sold to the Rock Island people.

Q. How long was it after that, that this communication with reference to the Wiggins Ferry Company occurred? A. I think the first intimation was after Governor Francis and myself had agreed to sell them the Colorado road; Mr. Leeds took me to one side and asked me if I would make a price on the Wiggins Ferry Company stock; I said, "No, sir," I will not; I did not come here for that purpose; I came here to negotiate the sale of this road. I do not control the Wiggins Ferry Company stock. While this negotiation is on I do not care to discuss it." Nothing more was said about it until the negotiations were closed for the sale of the Colorado Road, and Governor Francis had left.

Q. Then did you take up the matter with him? A. Yes, sir.

Q. What was the result of that communication? A. The result was, that I agreed to sell them my holdings in the Wiggins Ferry Company for Five Hundred Dollars a share, and I agreed to recommend to all of the stockholders that they do likewise.

Q. And then you came here? A. Then I came home.

Q. And had you communicated with the Mercantile Trust Company about the matter? A. On Saturday, I think it was—or Thursday or Friday we closed up the sale of the Colorado Road—and they asked me to come back on Saturday, which I did; and while discussing it they wanted to know, or talked about how they would handle the deal, and asked me as to the responsibility of certain brokers in St. Louis, which I answered. They wanted somebody to handle the deal for them. I told them I would not have anything

more to do with it than to sell my stock. I went to my hotel, the Fifth Avenue, and I there received a telegram from Mr. Wade, asking me if I was likely to be in New York, that he was coming on to attend the Bankers' Convention, and wanted to know if I would be there on Monday or Tuesday. It occurred to me that Mr. Wade might answer their purpose. I called him up on the Long Distance telephone and asked him to be in New York on Monday morning. He came on Monday morning and asked me what I wanted. I told him I was not prepared to talk to him then, but there was a matter I wanted to talk to him about, but that if he would meet me at the American Trust Company at noon I might then be in a condition or position to talk to him. I did not get to the Trust Company at twelve o'clock, and when I did get there he was not there, so I came back again at one o'clock. In the meantime I said, "There is a man from St. Louis here, the President of a Trust Company there, and he is a responsible man." I told them his name. I said, "Maybe he would handle the deal for you." They did not answer; they said they would see about it, and they asked me to bring him around. I went to the Trust Company's about one o'clock and waited for Mr. Wade, and then I took him around there and introduced him to Mr. Lowe, their General Solicitor, and Mr. Mather—and I don't remember the names of all the people. They took him to one side, and I understood made an arrangement with him to carry on the deal for them.

A. C. HARRIS, a witness of lawful age, being duly produced, sworn and examined, in behalf of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Where do you live? A. Alton, Illinois.

Q. What is your business? A. Manager of the Illinois Coal Company.

Q. How long have you been in that business? A. Five and one-half years.

Q. Where do you get your coal from? A. It comes from Hillsboro, Illinois, on the Big Four Road, and from Staunton, Illinois, on the Litchfield & Madison; and from Edwardsville, on the Illinois Terminal Road.

Q. At what point, if any, did your coal that you handle and ship into the State of Missouri, come across the Mississippi River? A. Cross the Mississippi River?

Q. Yes. A. You say where did it cross?

Q. Yes. A. At Alton.

Q. What was the rate across there, when you handled coal there? A. At the time we started in business in 1901, the rate was eight cents per ton.

Q. How long did you continue to send your coal over there? A. We continued up until June, 1905, at which time the rate went to thirty cents per ton.

Q. And then you ceased? A. Then we had to cease.

Q. How far from Alton is the farthest point where you get your coal? A. Hillsboro, is the farthest point, it is about forty-five miles.

Q. From Alton? A. Yes, sir.

Q. And how far is Hillsboro from St. Louis? A. About sixty-five miles.

Q. On the Big Four? A. Yes, sir.

CROSS-EXAMINATION, BY MR. WATTS:

Q. What is the rate now, do you know? A. Twenty cents per ton.

Q. Are you shipping over that bridge now? A. Yes, sir.

RE-DIRECT EXAMINATION, BY MR. CROW:

Q. Shipping the same quantity? A. No, sir.

Q. Is it reduced? A. Very much.

L. C. HAYNES, a witness of lawful age, being duly produced, sworn and examined on the part of the complainant, testified as follows, to-wit:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Where do you live? A. East St. Louis.

Q. How long have you lived there? A. Nearly five years.

Q. What business are you in? A. Operating a street railway system.

Q. What lines of street railways do you operate? A. The St. Louis & Suburban.

Q. Anything else? A. Oh, I have official charge of other lines.

Q. What other lines? A. The Alton, Granite City & St. Louis Traction Company.

Q. Where does that run? A. That runs from Alton to East St. Louis, through Granite City, Madison and that territory.

Q. What other lines have you charge of? A. I have charge of the St. Louis & Belleville Electric.

Q. Where does that run? A. That runs to the city limits of Belleville, between there and East St. Louis.

Q. Do those cars run across the bridge? A. The Belleville Electric are turned over to the Belt road at East St. Louis.

Q. The cars come from Belleville over those tracks to St. Louis, don't they? A. Yes, sir.

Q. They come over the Eads Bridge? A. They come over both bridges, I guess.

Q. Tickets are sold, aren't they? A. That line you speak of is solely freight; there is no passenger business done at all.

Q. Passenger tickets are sold from St. Louis to Belle-

ville, aren't they, over the line you operate? A. We have a commutation ticket of that kind which is sold.

Q. And vice versa, from Belleville to St. Louis? A. Yes, sir.

Q. Do all of those lines carry freight? A. There is only one of them that carries freight.

Q. That is the St. Louis and Belleville? A. Yes, sir.

Q. One of those roads you operate carries coal? A. Yes, sir.

Q. Which one is it—anyone beside the St. Louis & Belleville? A. The St. Louis & Belleville Electric runs from the city limits of Belleville to East St. Louis.

Q. You connect with the coal road up towards Edwardsville? A. No, sir, we bring in coal on another line, from what is called the Lebanon Division; that brings coal in from the O'Fallon District into the Belt Railroad.

Q. You have a line that runs from Lebanon to East St. Louis? A. Yes, sir, it runs to East St. Louis. It is a division.

Q. What is the name of the points on your road where you connect with this track that runs to the coal fields? A. The coal cars run over the same tracks that the passenger cars do.

Q. At what point is it that you connect with the track that runs out to the coal fields? A. You mean of our own road?

Q. Yes. A. It is a continuous road from East St. Louis. We run cars without transfer.

Q. Where do you leave your line that goes out from East St. Louis, to go up to Lebanon? A. We don't leave it at all. We put on a car that runs straight to Lebanon, without any change whatever.

Q. But there is a Division somewhere? Lebanon is not in the same direction as Belleville, is it? A. It is parallel

with it on the north. It branches off at Edgemont; is that what you mean?

Q. Yes. Where is that? A. About six miles from the river.

Q. At the foot of the hills? A. Yes, sir.

Q. The lines you represent are members of the St. Louis Coal Traffic Association? A. I think the St. Louis & Belleville Electric is, but I am not sure. I think it is.

Q. Who represents the St. Louis & Belleville Electric in that Association? A. Our General Freight Agent, Mr. Darrow.

Q. Where does he live, East St. Louis? A. Yes, sir.

Q. Did anybody solicit you to become a member of that Association? A. I cannot say; they did not solicit me.

Q. You don't know whether they solicited as a member of your corporation? A. I cannot say what they may have done with some one else.

Q. Did you ever attend any of those meetings? A. Never.

Q. If any attendance was had, it was by your freight man? A. I suppose so.

Q. You have no knowledge of that business of that Association? A. None whatever, except to get the reports.

Q. The reports of the proceedings? A. No, sir, not of the proceedings; I never saw any reports of the proceedings. What I saw is the reports of tonnage. They keep us posted on the coal tonnage that comes in.

Q. Where do you get it? A. It comes to me through Mr. Darrow.

Q. You don't know whether he gets reports of the proceedings or not, do you? A. No, sir, I do not.

Q. Did you have any conference with the people who are in charge of that Association, or Company last May, when the rates were down on coal from the Illinois Coal

Mines to East St. Louis? A. I don't know that I ever talked to a single member of that Association.

Q. Do you remember the fact that those rates were cut by your Company last May? A. I don't recollect. The rates were changed at different times. I don't know just the dates and periods.

Q. Since you have been in business there, five years, they have never been down to the point they were last May, have they? A. We never did get down as low as the others. I think the lowest rate we got to was fifteen cents. I think that is the lowest we took any business for.

Q. What is the farthest point out on your road that coal is hauled? A. Where do you mean? From the Belt Railway where we deliver at?

Q. From East St. Louis? A. About six, eight or ten miles, or something like that.

Q. What is the rate? A. Forty cents now. The same rate they have had for some time.

CROSS-EXAMINATION, BY MR. LEHMANN:

Q. You referred to a line doing some passenger business: That is the line from Belleville to St. Louis, going over the bridge? A. The only line that does both passenger and freight business is the line known as the Lebanon Division. That handles it from Edgemont, or, rather, French Village, out, handling passengers and freight both. The Belleville Division proper does not handle any freight.

Q. You spoke of it doing a passenger business from Belleville to St. Louis? A. Not the road that carries coal.

Q. But some road? A. Yes, sir.

Q. What is that road? A. The East St. Louis & Suburban.

Q. And on that road commutation tickets are sold, from Belleville to St. Louis? A. Yes, sir, both ways.

Q. And from St. Louis to Belleville? A. Yes, sir.

Q. And that is an electric street car line, isn't it? A. Yes, sir.

Q. Built originally from the outskirts of East St. Louis to Belleville? A. Yes, sir originally.

Q. And then connected up with the East St. Louis street railway system? A. Yes, sir, it comes in over their tracks.

Q. And then they made some arrangement to come over the bridge? A. The Belleville cars do not run over the bridge; not a through car; you have to transfer. There is simply a through ticket arrangement.

Q. A through ticket arrangement between Belleville and St. Louis Company and the Company that operates the street cars over the top or wagon way of the bridge? A. Yes, sir.

At this point, the further taking of testimony is by consent of counsel adjourned to to-morrow, Wednesday, October 16, 1906, at ten o'clock a. m.

R. E. Rombauer,
Special Commissioner.

Wednesday, October 17, 1906.

On Wednesday, October 17, 1906, counsel for the complainant made application to the Hon. G. A. Finkelnburg, Judge of the District Court, for an extension of time within which to take testimony for the complainant.

An order was thereupon made, extending the time for the taking of testimony for the complainant thirty days, which order is in the words and figures following, to-wit:

In the Circuit Court of the United States for the Eastern Division of the Eastern Judicial District of Missouri.

The United States of America, *Complainant,*
vs.
Terminal Railroad Association of St. Louis, et al., *Defendants.*
No. 5250. In Equity.

Now at this day come the parties hereto by their respective solicitors, and on motion of said complainant, it is

Ordered that said complainant be and it is hereby granted thirty days from and after October 20th, 1906, in which to complete its *prima facie* proofs.

October 17th, 1906.

(Signed) G. A. Finkelnburg, *Judge.*

Counsel for the complainant then made application for a subpoena duces tecum, directed to Robert M. Fraser, which application is in words and figures following, to-wit:

In the Circuit Court of the United States, in and for the Eastern District of the Eastern District of Missouri.

The United States of America,
Complainant,
vs.
The Terminal Railroad Association of St. Louis, et al.,
Defendants.

To the Honorable Gustavus A. Finkelnburg, Judge of the said Court:

The complainant respectfully represents that it is informed and believes the fact to be that in the possession of Robert M. Fraser, a person resident within said Division of the said Judicial District, are the following books, papers, and records, to-wit:

Information circulars Nos. 1 to 8 inclusive, issued by the St. Louis Coal Traffic Association, which said circulars are respectively dated in the order of their issue.

All records of meetings of the St. Louis Coal Traffic Bureau and the St. Louis Coal Traffic Association, from the year 1897 up to and including the year 1905; and all circular letters issued to the members thereof relative to the proceedings and actions of said associations, between the dates January 1, 1897, and January 1, 1906.

All records of meetings of the Eastbound Freight Committee of St. Louis, held during the period from January 1, 1900, down to the month of October, 1905, inclusive.

All records of meetings held during said last named period by the St. Louis & Cincinnati Freight Committee of St. Louis.

Also all circular letters issued by said St. Louis & Cincinnati Freight Committee of St. Louis, or its officers or agents, from January 1st, 1900, to October, 1905, inclusive.

Also all records of meetings held during the said period last named, by the St. Louis & Belleville Freight Committee.

That the said books, papers and records, hereinbefore specified, are material, relevant and competent evidence in behalf of the complainant under the issues in said cause. And that it is necessary, under the issues, for the complainant to introduce the said evidence in its behalf.

The following named defendants are members of this Eastbound Freight Committee of St. Louis, the Coal Traffic Bureau, the St. Louis-Louisville-Cincinnati Freight Committee, St. Louis & Belleville Freight Committee:

The Baltimore, Ohio & Southwestern; Chicago & Alton; Chicago, Peoria & St. Louis Railway, of Illinois; Cleveland, Cincinnati, Chicago & St. Louis Railway; Illinois Central Railroad; Henderson & St. Louis Railway; Chicago & Eastern Illinois Railroad; The Vandalia Railroad; The Wabash Railroad; The Southern Railway (St. Louis-Louisville Line), and the Terminal Railroad Association of St. Louis.

Wherefore, the complainant prays that a subpœna may be ordered to be issued by Roderick E. Rombauer, Special Commissioner, to the said Robert M. Fraser, commanding him, at a date therein to be named, to appear before the said Special Commissioner, testimony to give in behalf of the complainant, and with him bring the said books, papers and records hereinbefore specified, to be produced for the purpose of being introduced in evidence by the complainant.

Solicitors for Complainant.

Counsel for the defendants objecting to the issuance of said subpoena, the Court made the following remarks:

Judge Finkelnburg: I think there is enough stated in this application to make it appear that the testimony may

be relevant or material. I do not think it is necessary that the Court should be satisfied beyond a doubt that it is material; but sufficient facts are stated to make it appear to the Court that it may be material; and I think for the purpose of issuing the writ in the first instance, that is sufficient.

The question of whether the evidence sought for is material may ultimately be tested in another way. But I don't think it is either customary or practical to have it heard on application, and have this Court decide if it is entirely relevant. That would require a hearing that would be protracted and impracticable. I do not recall any such case, where such a hearing was had, upon a writ.

The order may be entered.

Which order is in the words and figures following, to-wit:

In the Circuit Court of the United States for the Eastern Division of the Eastern Judicial District of Missouri.

The United States of America, *Complainant,* vs. Terminal Railroad Association of St. Louis, et al., *Defendants.*	No. 5250. In Equity.

Now at this day come the parties hereto by their respective solicitors, and said complainant files and presents to the Court its application, duly verified by affidavit, for a subpoena duces tecum directed to one Robert M. Fraser and to be issued by the Clerk, and returnable before Roderick E. Rombauer, Esq., Special Commissioner herein; upon due consideration whereof, the Court doth

Order that said subpoena issue returnable Friday, October 19th, 1906.

October 17th, 1906.

(Signed) G. A. Finkelnburg, *Judge.*

United States of America,
Eastern District of Missouri. } ss.

The President of the United States of America, To Robert M. Fraser—Greeting:

You are Hereby Commanded to be and appear, without excuse or delay, before Roderick E. Rombauer, Special Commissioner of the United States in and for the Eastern Division of the Eastern Judicial District of Missouri, on the 19th day of October, A. D., 1906, at 10 o'clock a. m., at Room 310, Custom House Building, St. Louis, Mo., then and there to testify and the truth to say in a certain matter of controversy in said Court depending, between The United States of America, complainant, and The Terminal Railroad Association of St. Louis, et al., defendants, on the part of the said complainant.

And you are further commanded, that at the same time and place, you bring with you, and then and there produce in evidence on behalf of said complainant the following described books, papers and records, to-wit:

Information Circulars Nos. 1 to 8 inclusive, issued by the St. Louis Coal Traffic Association, which said circulars are respectively dated in the order of their issue. All records of meetings of the St. Louis Coal Traffic Bureau and the St. Louis Coal Traffic Association, from the year 1897 up to and including the year 1905, and all circular letters issued to the members thereof relative to the proceedings and actions of said associations, between the dates January 1, 1897 and January 1, 1906.

All records of meetings of the Eastbound Freight Committee of St. Louis, held during the period from January 1, 1900, down to the month of October, 1905, inclusive.

All records of meetings held during said last named period by the St. Louis and Cincinnati Freight Committee of St. Louis.

Also all circular letters issued by said St. Louis and Cincinnati Freight Committee of St. Louis, or its officers or agents, from January 1st, 1900, to October, 1905, inclusive.

Also all records of meetings held during the said period last named, by the St. Louis and Belleville Freight Committee.

Hereof fail not.

Witness, the Honorable Melville W. Fuller, Chief Justice of the Supreme Court, of the United States, this 17th day of October A. D. 1906.

Issued at office, in the City of St. Louis, under the seal of said Circuit Court, the day and year last aforesaid.

(Seal) (Signed) James R. Gray, Clerk.

United States of America,
Eastern Division of the Eastern } ss.
Judicial District of Missouri.

I certify that I executed this writ at the City of St. Louis in the above named District on the 18th day of October, 1906, by reading the same to and in the presence and hearing of the within named Robert M. Fraser.

(Signed) Wm. L. Morsey,

Fee, .56. U. S. Marshal, Eastern District of Missouri.

Endorsed as follows:

No. 5250.

United States Circuit Court, Eastern District of Missouri.
United States of America, Plaintiff,

vs.

Terminal R. R. Association of St. Louis, et al., Defendants.

Supœna Duces Tecum. Issued Oct. 17, 1906.

Filed October 18, 1906. James R. Gray, Clerk.

On Wednesday, October 17, 1906, the foregoing proceedings occurring before Judge G. A. Finkelnburg, Counsel for the complainant, stated they did not desire to proceed further with the taking of testimony, until after the hearing on the return to the application for a subpoena duces tecum for Robert M. Fraser, by consent of counsel for complainant and defendant, I adjourn the further hearing of testimony herein until Friday, October 19, 1906, at ten o'clock, a. m.

R. E. Rombauer,
Special Commissioner.

St. Louis, October 19, 1906.

Met pursuant to adjournment as above, on Friday, October 19, 1906, at ten o'clock in the forenoon of that day, in the Court of Appeals Room in the Federal Building, in the City of St. Louis, Missouri.

Present: Hon. R. E. Rombauer, Special Commissioner; Messrs. E. C. Crow, Chester H. Krum and Chas. Nagel, appeared in behalf of the complainant; and Messrs. M. F. Watts, and H. S. Priest, appeared in behalf of the defendants.

The following proceedings were had:

ROBERT M. FRASER recalled, testified as follows:

DIRECT EXAMINATION, BY MR. E. C. CROW:

Q. Have you the records and documents called for in the subpoena duces tecum, which was served upon you on the 18th day of October, 1906, being

Information Circulars Nos. 1 to 8, inclusive, issued by the St. Louis Coal Traffic Bureau, which said circulars are respectively dated in the order of their issue.

All records of meetings of the St. Louis Coal Traffic Bureau and the St. Louis Coal Traffic Association, from the

year 1897 up to and including the year 1905; and all circular letters issued to the members thereof, relative to the proceedings and actions of said Associations, between the dates January 1, 1897, and January 1, 1906.

All records of meetings of the East-bound Freight Committee of St. Louis, held during the period from January 1, 1900, down to the month of October, 1905, inclusive.

All records of meetings held during said last named period, by the St. Louis and Cincinnati Freight Committee of St. Louis.

Also all circular letters issued by said St. Louis and Cincinati Freight Committee of St. Louis, or its officers or agents, from January 1, 1900, to October, 1905, inclusive.

Also all records of meetings held during the said period last named, by the St. Louis and Belleville Freight Committee. A. Yes, sir, I have, to the best of my knowledge and belief, all of the papers called for, with the exception of the circular letters of the St. Louis, Cincinnati and Louisville Freight Committee for the years 1900 and 1901, up to January 16, 1902; that is, the two years' papers. We are unable to find them.

Q. Have you any idea where they are? A. No, sir, I cannot account for them, except that they have been lost or destroyed, when we moved in 1904.

Q. Where did you move from? A. We moved from the Union Station.

Q. Up to the Wainwright Building? A. Yes, sir, to the Wainwright Building. We made a thorough search and worked there last night up to quite late with the clerks, but we were unable to locate the papers for that period.

Q. Neither the records nor the circular letters? A. We have the proceedings.

Q. But you have not the letters? A. We have not the circular letters for those two years.

Q. Those circular letters were sent to the members of

the Associations? A. Yes, sir, whatever circular letters there were.

Q. Do you know whether or not they are usually kept on file by the members, for reference? A. That I cannot answer, but presumably.

Q. Will you produce what papers you have?

Mr. Kramer: Before the witness answers that question, Mr. Commissioner—

Mr. Krum: We object to counsel for the witness interposing or making any answer in behalf of the witness. He has no place here.

Mr. Kramer: We ask the privilege of advising—

The Commissioner: As a matter of course, he may file objections.

Mr. Krum: This is not the time or place. He does not represent any party to this suit.

Mr. Crow: Let the witness answer the question, or if there is a refusal let the matter be certified to the Court. Your Honor cannot pass upon this.

The Commissioner: I cannot pass upon the objection, but it is immaterial whether the objections are filed here or in the Circuit Court.

Mr. Crow: We have a right not to have our proceedings here interfered with.

Mr. Kramer: There is no disposition at all to interfere; we simply desire to state here that we advise the witness not to answer the question, and to give our reasons therefor.

Mr. Crow: The reasons are entirely immaterial.

The Commissioner: It is entirely immaterial whether the papers are filed here or not. I do not know if it is the regular course to file them here and certify to the Circuit Judge, or file them directly before the Circuit Judge.

Mr. Crow: I ask the witness to answer the question I propounded to him. I ask the Commissioner to direct him to do so.

The Commissioner: I will do so, and then Mr. Kramer may file his objections.

The Commissioner to the Witness: You have answered that you have those papers: Will you produce them? A. Under instructions of counsel, no, sir.

Q. Answer in your own way. A. I say, under instructions of counsel I answer, no.

Mr. Kramer: On behalf of the witness we desire to give the following reasons for not furnishing the evidence here: First—

Mr. Krum: We object to the receipt of these objections or reasons, or to their being entered in this record, or being made any part of it. They have no place here, whatever. The witness has said he will not produce the papers. That is the end of it. It makes no difference whether he is advised to do it or not.

Mr. Kramer: I understand that the Commissioner would certify it.

The Commissioner: Certainly.

Mr. Kramer: We object, first, because the St. Louis Coal Traffic Association, the St. Louis Coal Traffic Bureau, the East Bound Freight Committee of St. Louis, the St. Louis and Cincinnati Freight Committee of St. Louis, and the St. Louis & Belleville Freight Committee, all mentioned in said subpoena duces tecum, are not parties to said suit, or to the suit of the United States of America vs. the Terminal Railroad Association of St. Louis and others, in which suit said evidence is asked. And various Transportation Companies who are members of said Committees and Coal Traffic Associations, and Bureaus, are not parties to said suit; and the court has not a right to require the production of circulars, books and papers of said Associations and Bureaus as evidence in said cause; and, therefore, said subpoena duces tecum is illegal and void.

Second: Because the evidence called for in said sub-

poena duces tecum is wholly irrelevant, incompetent and improper evidence to the issues in said cause.

Third: Because the books, papers and documentary evidence called for in said subpoena duces tecum are the private books, papers and files of said Freight Commitees and Bureaus; and to require the production of said books, papers and files, under said subpoena duces tecum, as evidence in said cause, is in violation of the provisions of the fourth amendment to the Constitution of the United States, in this: that it is an unreasonable search and seizure of the books, papers and files of said Committees and Bureaus.

Fourth: Because said subpoena duces tecum issued out of the Circuit Court without an opportunity for this witness, or of any of these Committees and Bureaus, or their representatives, to present reasons why said subpoena duces tecum should not issue; and because this witness, on behalf of himself and on behalf of said Committees and Bureaus, desires to present a motion to said Circuit Court to quash said subpoena for the reasons hereinbefore stated.

The Commissioner thereupon orders that the foregoing be certified to the Circuit Court for the Eastern Division of the Eastern Judicial District of Missouri, in order to enable the Court to determine whether the Commissioner should compel the witness to produce said papers and testify in regard thereto.

R. E. Rombauer,
Special Commissioner.

At this point an adjournment was taken until Monday morning, October 22nd, 1906, at ten o'clock.

St. Louis, October 22nd, 1906.

Met pursuant to adjournment as above, on Monday, October 22nd, 1906, at ten o'clock a. m., in the Federal Building, in the City of St. Louis, Missouri.

The plaintiff not being able to proceed, owing to the fact that certain proceedings against R. M. Fraser, a witness for Plaintiff, are set for hearing this day before the Circuit Court of the United States for the Eastern Division of the Eastern District of Missouri, the further hearing of this case is adjourned until to-morrow morning, at ten o'clock a. m.

R. E. Rombauer,
Special Commissioner.

St. Louis, October 22nd, 1906.

On Monday afternoon, October 22nd, 1906, motion to quash the subpoena duces tecum issued to Robert M. Fraser, ordering him to produce certain papers, was argued before the Honorable Gustavus A. Finkelnburg.

Present: Hon. D. P. Dyer, E. C. Crow, Chester H. Krum and Charles Nagel, in behalf of the Government.

Messrs. M. F. Watts, F. W. Lehmann, and H. S. Priest, on behalf of the defendants.

Messrs. E. C. Kramer and John F. Lee, representing the witness, R. M. Fraser.

After hearing all the argument presented, the Court took the matter under consideration, and on Thursday morning, October 25th, 1906, rendered the following decision:

In the Circuit Court of the United States for the Eastern Division of the Eastern Judicial District of Missouri.

The United States, vs. Terminal Railroad Association of St. Louis, et al.,	Memorandum of Decision in the matter of R. M. Fraser. No. 5250.

FINKELNBURG, District Judge.

The matters now submitted to the Court arise in a suit

brought by the Government of the United States against the Terminal Railroad Association of St. Louis, the St. Louis Bridge Company, the Merchants' Bridge Company, the Wiggins Ferry Company, the Merchants' Terminal Railway Company, and fourteen trunk line railroad companies engaged in inter-state commerce, to and from the city of St. Louis, besides some other parties defendant unnecessary to mention for the purpose of this inquiry.

The bill of complaint is lengthy; it is largely historical. It recites the history of the St. Louis Bridge (commonly known as the Eads Bridge), the Merchants' Bridge, and the Wiggins Ferry, the three instrumentalities for transporting freight and passengers across the river at St. Louis, Mo., and it also gives the history of the various terminal railway companies on both sides of the river. After a great deal of detail the bill of complaint, in substance, culminates in the charge that the defendants, intending unlawfully to monopolize trade and commerce, and intending to restrain and suppress competition in inter-state commerce at St. Louis, Mo., and East St. Louis, Ill., effected an unlawful combination or consolidation of said bridges and ferries, and of the terminal railways leading up to the same, in the hands of the Terminal Railroad Association of St. Louis, and that said Terminal Railroad Association of St. Louis is in fact owned and controlled by the fourteen railroad companies who are made defendants in this case.

The bill then in effect charges that by reason of the facts set forth the fourteen railroad companies aforesaid through said Terminal Railroad Association, control all the means for transporting freight and passengers across the Mississippi River at St. Louis, Mo.; that they arbitrarily fix and exact unreasonable charges and tolls to be paid for freight and passengers to be hauled and transferred in inter-state business between Illinois and Missouri, and that all competition has been stifled and destroyed to the detriment of the

public, and in violation of the Act of Congress of July 2d, 1890, to protect trade and commerce, commonly known as the "Sherman Anti-Trust Act."

The bill finally charges that the properties aforesaid are so operated by the defendants as to constitute a monopoly in their employment and conduct of inter-state commerce between the States of Illinois and Missouri, and the various States of the United States and foreign countries, and so as to exclude from participation therein all carriers other than those named as parties to the alleged unlawful combination and conspiracy.

The answer of the defendants is also lengthy. It also goes over the history of these bridges and ferries and of the terminal railways leading to and from the same, and sets forth in detail the various transfer and traffic arrangements by which they have come under the single management of the Terminal Railroad Association of St. Louis; but defendants deny that the various steps by which this was done were unlawful, or that it was intended thereby to restrain inter-state commerce or stifle competition, or establish a monopoly, or that a monopoly was in fact created thereby. Defendants deny all the charges of unlawful combination, conspiracy or contracts or agreements to restrain or monopolize in any manner or to any extent inter-state trade or commerce, and they deny that they have established or exacted unreasonable or exorbitant rates, tolls or charges.

On the contrary defendants aver that the bringing together of all the former disjointed and diverse interests under the single management of the Terminal Railroad Association resulted in the better handling of traffic both freight and passenger, and that instead of restraining trade or commerce it fostered and promoted the same by affording greater and more expeditious facilities at lower charges.

I have stated the issues made by the pleadings only in a very general way, without any attempt at great accuracy,

and only in so far as they seem to me to bear on the question now before the Court.

It appears from the pleadings then that this case is one of public interest, not only to the people of St. Louis, but indirectly to the people of the United States generally, and the bill of complaint states that it is brought by the United States Attorney for the Eastern District of Missouri, under the direction of the Attorney-General of the United States.

When the issues were made up an examiner was appointed to take the testimony under the 67th Rule governing proceedings in equity, and the taking of this testimony has been in progress for several months, and is now in progress before such Examiner.

A few days ago the attorneys for the Government came and by an application in writing, showed to the Court that certain record books and papers of certain "traffic associations" and "freight committees" in this city were needed by the Government as evidence before the Examiner in this case. They asked for a subpoena duces tecum against one R. M. Fraser in whose possession these records and papers were alleged to be. The application was in the usual form and was verified. A subpoena duces tecum was thereupon issued for the production of these books and papers before the Examiner.

The associations whose records are called for are the following: The St. Louis Coal Traffic Bureau and the St. Louis Coal Traffic Association, the East Bound Freight Committee of St. Louis, the St. Louis & Cincinnati Freight Committee of St. Louis, and the St. Louis & Belleville Freight Committee.

Mr. Fraser, the person against whom the subpoena was directed, appeared before the Examiner, stated his official connection with these Associations and admitted having the books and papers called for in his possession, but refused to produce them, and he has filed a motion to vacate the sub-

poena for certain reasons in his motion set out and which will be presently referred to.

The attorneys for the Government, upon the other hand, have moved for and obtained an order on Mr. Fraser to show cause why he should not be committed for contempt of court, to which counsel for Mr. Fraser have filed a return setting up substantially the same matters which are made the ground for the motion to quash the subpoena.

Both these applications have been heard and are submitted together.

The first reason stated in the motion to quash is that the traffic associations and freight committees whose books and papers are called for are not parties to this suit, and that therefore this Court has no right to require their production. This ground for the motion was not much relied on in the argument, and clearly it involves a misconception of the powers of this Court. It is well settled that a court of equity has power to compel the production of books and papers in virtue of its inherent and general jurisdiction, and this power is not confined to the parties to the suit, but extends to third persons (U. S. vs. Babcock, 3 Dillon, 569; 3 Greenleaf on Evidence, Par. 305; Hale vs. Henkel, 201 U. S. 43, 73).

The second ground in the motion to quash is that the evidence called for in the subpoena "is wholly immaterial, irrelevant, incompetent and improper evidence to the issues in said cause." This objection deals with the materiality of the proposed evidence *when the books and papers are produced,* and it might be sufficient to say that is no excuse for not producing them at all. In other words, it is not for the witness to say: "I will not produce these records and papers because I believe, or I am advised, that they would not be material if I did produce them;" that would leave the determination of the whole matter with the witness himself, and the Court would be powerless.

Nor, it seems to me, can this question be properly decided in advance by this Court upon an application to produce these books and papers, but must ultimately be passed on at the hearing when the trial court has all the evidence before it, and the actual situation of the case with all its issues and bearings is made apparent to the Court so that it may act intelligently, and so that a refusal to admit the testimony may be excepted to and made part of the record in case of an appeal. (Edison Co. vs. Electric Co., 44 Fed. 296; U. S. vs. Babcock, 3 Dillon 569).

I cannot bring myself to agree with the contention of respondent's counsel, that it devolves upon the Government to satisfy this Court beyond any reasonable doubt that the books and papers called for in this subpoena are relevant and material. I think that for the present all that is required is that there should be shown to be a reasonable ground to believe that they may be relevant and material—not palpably foreign to the subject of inquiry—and I think a sufficient showing has been made in that direction.

The Government attorneys state to the Court that the books and papers called for are relevant and material evidence on behalf of the Government, and that it is necessary for the Government to introduce them in evidence. In the case of U. S. vs. Babcock, 3 Dillon, 566, the Court, under similar circumstances, said: "When the district attorney asserts that they are material papers, we must assume, for the present, that he is fully informed and that they are material."

The names of these traffic associations and freight committees indicate that they deal with the subject of transportation and freight rates at St. Louis, Mo., the identical subjects involved in the issues in this case. The oral testimony given by Mr. Fraser before the Examiner fully confirms this; their records and circular letters would therefore naturally appear to bear upon the issues in this case. It

was suggested in the oral argument by counsel for respondent, that these traffic associations operated only upon transportation from East St. Louis eastwardly; but the interlacing of transportation and rates between railroads and terminal facilities on the east and west side of the river at St. Louis, is such that this Court would not be justified in assuming that they are absolutely distinct for the purpose of this inquiry. The testimony of Mr. Fraser also shows this. Furthermore, it is alleged and not denied, that eleven out of the fourteen railroad companies which are defendants in this case are also members of these traffic associations or freight committees. I think these things taken together, are sufficient to raise a reasonable presumption of relevancy and materiality for the purposes of this motion.

The Croker-Bullock case in the 134th Federal Reporter, relied upon by counsel for respondent, was a case of legal privilege, claimed by the witness, and the case was decided upon that point. The case of Southern Ry. vs. North Carolina, 104 Fed., p. 700, was also a case of privilege claimed on the part of the witness. Nothing of the kind is claimed in the case at bar. Here there is no claim of legal or personal privilege, nor is it shown that the witness or those whom he represents will be prejudiced in any way by the production of these books and papers, so that it resolves itself into a simple question of relevancy and materiality raised by the witness in this case.

The third and last ground mentioned in the motion to quash is that the things called for are the private books and papers of these freight committees and bureaus, and to require their production would be in violation of the provisions of the Fourth Amendment to the Constitution of the United States in this: That it would be "an unreasonable search and seizure of the books, papers and files of said committees and bureaus."

Conceding that a subpoena duces tecum may under certain circumstances, be equivalent to a search and seizure, I can see nothing unreasonable in the issuance of this subpoena in this case. Considering the nature of the issues, their breadth and importance, the character of these traffic associations, their relation to the defendants and to the subject of this inquiry, I think there is nothing unreasonable in the number of the books called for or the description of what is wanted. Mr. Fraser admits that he has these books in his possession, in fact, he has brought them into court on the hearing of this motion, but declines to produce them before the Examiner for the purpose of testimony, though ordered to do so by a court of competent jurisdiction. The Fourth Amendment is no protection to him.

The subject of transportation has of recent years, become one of great public concern. Much legislation tending to control or regulate it has been enacted by both State and Federal governments. To a great extent the subject has become res publicae. I think the books and papers of these traffic associations called for in this subpoena ought to be produced, and that the private interests and convenience of those associations, if any, ought in a matter of this kind, to give way to the exigencies growing out of this suit. The motion to quash will therefore be overruled.

St. Louis, October 23rd, 1906.

Met, pursuant to adjournment, as above, on Tuesday, October 23rd, 1906, at ten o'clock, a. m., in the Federal Building, in the City of St. Louis, Mo.

The plaintiff not being able to proceed, owing to the fact that the proceedings against R. M. Fraser, a witness for plaintiff, have not yet been passed upon by the Honorable Gustavus A. Finkelnburg, the further hearing of this case

is adjourned until Thursday morning, October 25th, 1906, at ten o'clock, A. M.

R. E. Rombauer,
Special Commissioner.

St. Louis, October 25th, 1906.

Met, pursuant to adjournment as above, on Thursday morning, October 25th, 1906, at ten o'clock, a. m.

Present: Hon. R. E. Rombauer, Special Commissioner. Messrs. E. C. Crow, Chester H. Krum and Charles Nagel, appeared in behalf of the Government.

Messrs. M. F. Watts, H. S. Priest and F. W. Lehmann, appeared in behalf of the defendant.

In answer to the subpoena duces tecum Robert M. Fraser appeared with the papers called for:

The following proceedings were had:

ROBERT M. FRASER,

DIRECT EXAMINATION CONTINUED, BY MR. E. C. CROW:

Q. Mr. Fraser, have you the books and papers called for by the subpoena duces tecum? A. Yes, sir, with the exception of the papers that could not be found.

Q. What papers did you fail to find? A. It was circular letters for the years 1900 and 1901, of the St. Louis, Cincinnati & Louisville Freight Committee.

Q. Will you produce those papers? A. Yes, sir; that is, with the exception I have mentioned.

(Witness here produces package of papers).

Q. Now, Mr. Fraser, will you please segregate the papers of the Coal Traffic Bureau from the others? A. There are the Coal Traffic Bureau papers in that bunch (producing package of papers).

Q. How is it indicated?

The Commissioner: As you go along, state what papers they are, and they can be marked.

The package of papers referred to is marked Complainant's Exhibit Papers Produced by R. M. Fraser in response to Subpoena Duces Tecum.

Mr. Priest: We desire to enter objection to the production of these papers.

Mr. Krum: They are not offered yet.

The Commissioner: Do you want to enter an objection to his producing them?

Mr. Priest: I don't see how they can be made a part of this record by marking, without being introduced in evidence.

Mr. Krum: Of course not.

The Commissioner: I just want to mark them to see what they are, before they are introduced in evidence.

Mr. Priest: I don't see how the Commissioner can mark anything that is not put in evidence.

Mr. Krum: That is done simply to show that the witness has complied with the writ.

Mr. Priest: This witness has complied with the writ by producing the papers.

The Commissioner: As a matter of course, but we want to know what the papers are.

Mr. Priest: That is shown in the subpoena.

The Commissioner: But that does not show that the papers here produced are the papers called for by the subpoena, unless there is an identification.

The Witness: (Producing package of papers). This contains the records of meetings from January 1st, 1900, to October, 1905, inclusive, of the Belleville & St. Louis Traffic Bureau.

The papers referred to are marked Complainant's Exhibit

Papers produced by R. M. Fraser, in response to Subpoena Duces Tecum.

The Witness: (Producing package of papers). This contains the records of meetings January 1st, 1900, to October 1st, 1905, inclusive; and circular letters January 17, 1902, to October, 1905, inclusive.

Q. What is that, Mr. Fraser? A. Of the St. Louis, Cincinnati & Louisville Freight Committee. That bears a memorandum here "Unable to find circular letters Jan. 1st, 1900, to January 16, 1902."

The papers referred to are marked "Complainant's Exhibit Papers Produced by R. M. Fraser in response to Subpoena Duces Tecum.

The Witness: (Producing package of papers). This contains the record of meetings January 1st, 1900, to October, 1905, inclusive, of the St. Louis East-bound Freight Committee.

Q. Are there any circulars in there also? A. The memorandum does not say, and whether it called for circulars or not, I don't know. I suppose that everything is in there that was called for. According to my memorandum it is the records of meetings of the East-bound Freight Committee, from January, 1900, to October, 1905, inclusive. And here are the papers.

The papers referred to are marked Complainant's Exhibit Papers Produced by R. M. Fraser in response to Subpoena Duces Tecum.

Q. Now that is all you have produced in compliance with the subpoena, and that complies with the subpoena, so far as you are able to do so? A. Yes, sir, as far as my understanding.

Q. Now, will you take the St. Louis Coal Traffic records there, and untie them, please. I want to make an offer of them.

(Witness does so).

Q. You only have eight of those circulars here? A. That is all, sir. All that was called for, and all that has been issued.

Q. Did not the subpoena call for Information Circulars from the year 1897? Look at your memorandum. A. (Reading from memorandum.) St. Louis Coal Traffic Bureau Information Circulars Nos. 1 to 8 inclusive.

Q. Yes, I know that. A. It is so specified. And records of meetings from 1897 to 1905, inclusive. And circular letters January 1st, 1897, to January 1st, 1906, inclusive.

Q. I hand you now a paper, and will ask you to state what it is. I will first hand it to Counsel for the Defendants for examination.

(Counsel for Defendants here examine the paper referred to).

At this point, by agreement of counsel, in order to facilitate the further hearing, and to give counsel on both sides time to examine the papers produced by Mr. R. M. Fraser, the further hearing of testimony in this case was adjourned until Tuesday morning, October 30th, 1906, at ten o'clock.

R. E. Rombauer,
Special Commissioner.

St. Louis, October 30th, 1906.

Met, pursuant to adjournment as above, on Tuesday morning, October 30th, 1906, at ten o'clock, a. m., in the Federal Building, in the City of St. Louis, Missouri.

Counsel desiring further time in which to examine the papers produced by R. M. Fraser, the further hearing of this case is adjourned, by consent, until Friday morning, November 2nd, 1906.

R. E. Rombauer,
Special Commissioner.

St. Louis, November 2nd, 1906.

Met pursuant to adjournment as above, on Friday morning, November 2nd, 1906, at ten o'clock, a. m., in the Federal Building, in the City of St. Louis, Mo.

Counsel desiring further time in which to examine the papers produced by R. M. Fraser, the further hearing of this case is adjourned, by consent, until Monday morning, November 5th, 1906, then to be resumed in the office of the Special Commissioner, in the Roe Building, St. Louis, Mo., at ten o'clock a. m.

R. E. Rombauer,
Special Commissioner.

St. Louis, November 5th, 1906.

Met, pursuant to adjournment as above, on Monday morning, November 5th, 1906, at ten o'clock, a. m., at the office of Special Commissioner, Hon. R. E. Rombauer, in the Roe Building, St. Louis, Mo.

Counsel desiring further time in which to examine the papers produced by R. M. Fraser, the further hearing of this case is adjourned, by consent, until Monday morning, November 12th, 1906, then to be resumed, at the same place, at ten o'clock, a. m.

R. E. Rombauer,
Special Commissioner.

St. Louis, November 12th, 1906.

Met, pursuant to ajournment as above, on Monday morning, November 12th, 1906, at ten o'clock, a. m., at the office of Special Commissioner, Hon. R. E. Rombauer, in the Roe Building, St. Louis, Mo.

Counsel desiring further time in which to examine the papers produced by R. M. Fraser, the further hearing of

this case is adjourned, by consent, until Monday morning, November 19th, 1906, then to be resumed, at the same place, at ten o'clock, a. m.

R. E. Rombauer,
Special Commissioner.

St. Louis, November 19th, 1906.

Met, pursuant to adjournment as above, on Monday morning, November 19th, 1906, at ten o'clock a. m., at the office of Special Commissioner, Hon. R. E. Rombauer, in the Roe Building, St. Louis, Mo.

Present: Hon. R. E. Rombauer, Special Commissioner.

Messrs. E. C. Crow and Chester H. Krum, appeared on behalf of the plaintiff.

Mr. M. F. Watts appeared on behalf of the defendants.

The following proceedings were had:

It was agreed by and between counsel that the time allowed to plaintiff for taking testimony be extended thirty days, by consent.

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Association, dated February 18, 1897, showing that there were present at said meeting: Wm. E. Guy, President St. L. P. & N. R. R.; W. D. Holliday, A. G. F. A., Big Four; P. W. Coyle, A. G. F. A., Wabash; Geo. F. Randolph, Traffic Manager, B. & O. S. W. R. R.; W. W. Peabody, Jr., Coal Traffic Manager, B. & O. S. W. R. R.; W. S. McChesney, Jr., Supt. Terminals L. & N. R. R.; C. D. Morris, Chief Clerk Freight Dep't, L. E. & St. L. Road; M. W. Taylor, G. F. A., Vandalia Line; C. F. Parker, General Agent, I. C.; Geo. E. Lery, A. G. F. A., I. C.; W. J. Scott, Chief Clerk, Freight Dep't, T. St. L. & K. C. R. R. There was also present, on invitation of Chairman, as shown by the record of this meeting, Messrs. Scullin, Sands and Bryan, of the Terminal companies.

The meeting was called to order by the Secretary, and Mr. Guy was elected Chairman, Mr. Ramsay regular Chairman being absent.

All lines were represented except the M. & O. Owing to the absence of Mr. Poe, of the M. & O., the question was raised as to whether a unanimous vote to change rates was required, and the Chairman suggested that the original agreement had better be examined, and the Secretary read the same, as follows:

"Third: It is a fundamental principle of this agreement that the rates on all coal transportation between the points covered by this contract should be at all times reasonable, and that the Association ought to make, from time to time, such changes therein as justice may require; and in order to prevent all unjust discrimination among shippers, and all unlawful deviations from schedule rates, it is hereby agreed that except as hereinafter provided, no action shall be taken by officers, agents, employees or representatives of any party or parties hereto, which will directly or indirectly reduce or affect the rates or revenues herein fixed for transportation of said coal, or which may directly or indirectly affect such rates or revenues as may hereafter be fixed upon said traffic by the unanimous action of the Association at any future meeting thereof. That is to say, unless the rates herein provided for shall be adjudged unreasonable, the same shall not be directly or indirectly reduced or changed by the officers, agents, employees or representatives of any party hereto, except by the unanimous consent of all parties to this agreement; but all other questions relating to the business of the Association shall be settled by majority vote of the parties."

Mr. Guy, Chairman, then stated he had a communication from the Bituminous Coal Company, which he desired read, and asked Mr. McChesney to take the chair. The letter was addressed to the Chairman and Members of the

St. Louis Coal Traffic Association. This communication was signed by A. J. Morshead and E. C. Donk, and represented that the coal operators who had contracted to pay the forty-five cent rate for coal being shipped to St. Louis are unable to meet the low rates made by the Bluff Line and the C. P. & St. L., of thirty-five cents per ton, and sometimes less; and stated that Springfield coal was offered as low as ninety cents at East St. Louis, and was being furnished on trial to South St. Louis Electrical Railway, based on that figure; thus forcing the complaining companies to sell nut coal for sixty-five cents per ton, for which eighty cents must be paid by guaranteeing companies; and also that within sixty days preceding the letter a new mine at Litchfield had been shipping to the St. Louis market over the C. P. & St. L. Line at less than 35 cents per ton; making a total of six mines sending their products here that had not furnished a single ton prior to raising the rates to forty-five cents. The letter closed by asking reduction to thirty-five cents.

Mr. Guy then stated that, although the C. & P. line was a member of the Association, said road had declined to maintain the rates, and that the operators shipping over the Bluff Line had come in over the Alton Bridge and Burlington road, with a rate of sixty-five cents, as against seventy-five cents which operators of eastern lines had been obliged to pay; and that coal had been sold all winter through the northern part of St. Louis at twelve and one-half cents lower than operators from associated lines could offer.

This situation also threatened danger to the business of the old transfer companies, and hence the representatives of the Bridge and Transfer Companies were requested to be present for conference.

Mr. Guy stated that it was proposed once before that the railroads should make some reduction, in which the coal companies and old transfer companies would join. He

stated that the Burlington road was making a rate from Alton over the Mississippi Bridge at that point, and over thirty-three miles of track into the city, of thirty-five cents, and this made the rate of thirty cents for bridge or ferry alone seem much too high. And while Mr. Guy felt friendly to both the Bridge and Ferry Company, and personally to their representatives, he himself thought that the rate for the bridge and ferry was higher in proportion to other things than it ought to be.

Mr. Guy stated that coal was one of the lowest priced commodities, and yet the cars which our company owns, and new cars of other companies, which come over the bridge, are thirty-ton cars, and are charged $9.00 per car. This is over twice the price per car of all other commodities; and there are very few commodities that are lower priced than coal.

That in addition to this appeal from the old and large coal operators, and the reduction which would probably be made on their part, and that of the railroad companies, Mr. Guy stated that there was a popular demand which, unreasonable as it may be to many things and in many ways, is not so unreasonable in regard to coal, for the reasons just stated. Mr. Guy said it should be recollected that the present rate of thirty cents per ton across the bridge and ferry was adopted years ago, when the maximum capacity of a car was placed at 24,000 lbs., or twelve tons; but comparatively few of these cars are left now, and the new cars are almost all thirty-ton cars. For instance, he said that out of 800 cars of his road—and his road, he said, was one of the largest shippers across the bridge—they had none under 50,000 or 25 tons, and only 200 of these—the balance, 600, being all 30 ton cars.

Mr. Guy stated it was easy for the bridge and ferry companies to say whether they would be willing to join with the coal companies and railroad companies in making some

reduction to meet this new objection, and also to meet the not unreasonable popular demand.

Mr. Guy further stated that he understood that recently one of the largest contracts out of the Bonne Terre territory had been placed with the Burlington Railroad. Mr. Bryan of the Terminal Company stated he understood that if the railroad rate was thirty-five cents the Springfield coal could not compete. The Secretary stated that the proportional rate to Alton for Missouri points from Springfield was thirty cents, and the Burlington made the rate from Alton thirty-five cents, thus making a sixty-five cent through rate. The Secretary stated that there had been about 250 cars of this coal come in since October; that would be a matter of three cars a day.

Mr. Bryan stated that he had recently seen a statement compiled by Mr. Ramsay showing that in one instance, at least, the Terminal Company took coal from the East Side and handled at thirteen miles, and he said to the coal-carrying roads that some of their coal mines are not more than that far from East St. Louis. Mr. Guy answered him and said that the bridge got all the business of the sixteen roads, and that the twenty cent rate over the bridge would mean more than the thirty-five cent rate for the haul of the coal to the railroads. Mr. Sands, for the Wiggins Ferry Company, stated that the St. Louis Transfer Company and the Wiggins Ferry Company together had put nearly $600,000 into seven miles of road; he stated that hey could take a little less rate, perhaps, and still make expenses, but they did not like to cut their revenue unless it was absolutely necessary.

Mr. Randolph was then asked as to why he wanted the meeting called to consider this question, and he said the roads were confronted with the proposition from certain people to build a railroad from St. Louis to O'Fallon, or rather to East St. Louis, and that the proposition came from the Consolidated Coal Company, as a coal company.

After discussion, the following resolution was offered: "Resolved: That the minimum rate of thirty-five cents per ton on coal East St. Louis be re-established as soon as necessary notice can be issued by the Secretary; rates from points taking higher than minimum rate to be reduced accordingly."

Meeting adjourned on February 24th.

Above exhibit, consisting of pages 1 to 26 inclusive, is marked "Plaintiff's Exhibit Fraser No. 1."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Association, held on April 16th, 1897.

The record show that the meeting was called at the request of Mr. W. W. Peabody, Coal Traffic Manager of the B. & O. S. W. Railway, who desired information as to intentions of lines with respect to balances.

The record of meeting showed that coal had been coming to St. Louis from off the line of the J. & St. L. Railway, and via the C. P. & St. L. Railway; and as the J. & St. L. Railway was not a member of the Association, the Wabash, who had agreed to have credited to it the C. P. & St. L. coal in adjustment of balances, refused to be responsible for coal coming by the J. & St. L., because the latter road was not a member of this Association; and the Joint Agent was instructed to report coal from off the line of the J. & St. L. transported to St. Louis via the C. P. & St. L. separate from coal mined on the line of the C. P. & St. L.; and no part of the coal off the line of the J. & St. L. should be charged to the proportion of the C. P. & St. L. in the adjustment of balances. The meeting then adjourned.

The above exhibit is marked "Plaintiff's Exhibit Fraser No. 2."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Association, held on May 25th, 1897.

Mr. Ramsay acted as Chairman, and stated that the meet-

ing had been called by the Executive Committee to consider the coal traffic situation in general, and if possible to arrive at some understanding and bring about a more satisfactory condition of affairs with respect to coal rates. The roads all stated that they were willing to agree to maintain the rates. Inquiry was then made as to whether any roads had contracts at less than the rate. The meeting, after discussing the coal situation, finally passed the following resolution:

"Resolved: That this meeting now adjourn until Tuesday, June 1st, at 10:30 a. m., and that the consideration of the pending resolution be postponed until that date, and each member be furnished a copy of the same, and that all lines here represented pledge themselves to maintain absolutely the present tariff rates of this Association, and make no contracts for the future delivery of coal at less than the said agreed tariff rates."

Meeting then adjourned.

Above exhibit, consisting of pages 1 to 5 inclusive, is marked "Plaintiff's Exhibit Fraser No. 3."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Association, held on June 2nd, 1897. The matter of percentages was discused, and, the question arising as to whether or not the agreement of July 21st, 1896, was still in force, the Chair said:

"It is the ruling of the Chair that the agreements of July 21st, 1896, are still in full force and effect, and are binding on all lines, and that no line is at liberty to act independent of either."

Finally the following resolution was passed: "Resolved: That the minimum rate on coal to East St. Louis be reduced to twenty-five cents per ton of 2,000 lbs.; and be it further resolved that the agreed differentials applying to distant territories, be reduced accordingly; except that the rate

from Sandoval, Odin and Salem may be made seven and one-half per cent higher than the minimum rate. Be it further resolved that this rate applies on all coal, railroad coal as well as commercial coal. Be it further resolved, that these rates become effective as soon as Association tariff can be issued by the Joint Agent."

The resolution was unanimously adopted, and the twenty-five cent rate became the Association rate, hereafter.

Above exhibit, is marked "Plaintiff's Exhibit Fraser No. 4."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Association, held July 16th, 1897, being record of quarterly meeting.

The question being considered as to whether or not tonnage agreement for division of coal business was binding after the 31st of July, 1897, the Chairman ruled it was not, but said that the other agreement, providing for maintenance of Coal Traffic Association and for uniform rates was still in effect and binding upon all the members.

The question of contracts was then taken up, and after full discussion the following resolution was adopted:

"Resolved: That no contract should be protected at the twenty-five cent rate for a longer period of time than one year from August 1st, 1897; that is to say, all contracts which are to be protected at a twenty-five cent rate must not extend beyond August 1, 1898. No line should, without consent of the Association, undertake the protection of any contract for a longer period of time than one year, for a less rate than thirty-five cents per ton. This ruling is not intended to abridge the right of any line to protect contracts at the twenty-five cent rate; it is intended only to prevent their protection after August 1st, 1898, at that rate."

Meeting then adjourned.

Above exhibit, being pages 1 to 3 inclusive, is marked "Plaintiff's Exhibit Fraser No. 5."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Association, held August 25th, 1897, showing that the meeting had been called at the request of the Illinois Central Railway, with the view to restore the thirty-five cent rate on coal to East St. Louis; and that the representative of the I. C. had requested a vote by letter or wire on the proposition to restore said rate; and having failed of unanimous consent—the Big Four and Wabash declining to vote, and the B. & O. S. W. having voted in the negative—the I. C. thought necessary to consider the question at a meeting of the Association.

The following letter from Mr. Parker was read:

"St. Louis, Aug. 17, 1897.

Mr. E. M. Ward, Joint Agent.

Dear Sir: Upon receipt of this communication, will you please take up by wire with the various companies, members of this Association, and ask if it is agreeable that the minimum rate should be advanced to thirty-five cents, to take effect upon Thursday, the 19th, with corresponding advances in the various differentials. I am advised that the M. & O. have taken independent action, and will advance their rates to the figures above, beginning to-morrow, Wednesday, the 18th. I think it advisable, therefore, if it can be done, to get hold of the Association on this question, and have an advance on all the lines. I presume you can get a wire vote. Answer as soon as you can do so, and oblige,

C. F. Parker, G. F. A."

The meeting finally decided that it was desirable to have an advance to thirty-five cents, but so long as there were open contracts held by some of the coal producers on Association lines, at twenty-five cents and less, that the rate could not be advanced until those contracts had expired.

The Illinois Central then made application to have time

for expiration of contracts extended, and this was refused by vote of the Association.

Meeting then adjourned.

Above exhibit, consisting of pages 1 to 4 inclusive, is marked "Plaintiff's Exhibit Fraser No. 6."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Association, held September 29th, 1897.

The record shows the Joint Agent stated that this was a quarterly meeting, but was called two weeks earlier to give the lines an opportunity to restore rate, if they thought advisable to do so, on October 1st; as the coal strike was over and the coal market short 200,000 tons of coal on account of this strike, which shortage will be restored in about two months; and about 1,000,000 tons of uncontracted coal would move, and it would be a good time to restore the rate on free or uncontracted coal during the fall and winter months.

The Chairman, Mr. Ramsay, stated that he did not see how the rate could be restored, on account of the large number of contracts which had been taken on a twenty-five cent rate, extending to the following year; and that as all bona fide contracts must be protected, restoration would not restore.

The lines finally decided that the rates could not be restored at the present time. Then each line was asked if it had departed in any manner from the rule limiting contracts on the twenty-five cent basis to August 1st, 1898, and they all answered that they had not.

After further discussion, the following resolution was adopted: "Resolved: That on and after August 1st, 1898, the minimum rate on all coal shall be thirty-five cents per ton, with the agreed differentials applying from distant territories; and further resolved that no contracts shall be taken at the twenty-five cent basis of rates to extend beyond

August 1st, 1898; and for the balance of the contract year no contract shall be protected at less than 35 cent basis of rates; and further resolved that no contract shall be taken covering a period of more than one year."

On motion, the meeting then adjourned. Record signed by Joseph Ramsay, Chairman, and E. M. Ward, Joint Agent.

Above exhibit, consisting of pages 1 to 3 inclusive, is marked "Plaintiff's Exhibit Fraser No. 7."

Plaintiff offers in evidence record of regular quarterly meeting of the St. Louis Coal Traffic Association, held April 8th, 1898, at which the following roads were represented: L. E. & St. L. R. R.; B. & O. S. W. R. R.; Wabash R. R.; L. & N. R. R.; Big Four R. R.; Vandalia R. R.; Illinois Central R. R.; M. & O. R. R.; T., St. L. & K. C. R. R.;St. L. P. & N. R. R.; C. P. & St. L. Ry.; Mr. Ramsay, Chairman. The following subjects were submitted for consideration: Is it possible to give the lines an equitable portion of the traffic, and are the lines all willing to accept an equitable proportion of the tonnage?

The record shows that indications were that an increase in tonnage of fifteen per cent over the highest year would be had in the ensuing twelve months; and this tonnage, at thirty-five cents per ton, minimum, produces a revenue of $1,300,000. The same tonnage at twenty cents per ton produces a revenue of $720,000. If the rate drops to twenty cents a ton, there will be a sacrifice in revenue of at least $600,000 a year; and in demanding big percents the lines should consider whether 8 per cent of $1,300,000 is not better than 11 per cent of $720,000.

The roads then considered the question as to whether or not they had lived up to the resolutions of July 16th, and September 29th, concerning protection of contracts for

twenty-five cent rate up to August 1st, which was as follows:

"Resolved: That on and after August 1st, 1898, the minimum rate on all coal shall be thirty-five cents per ton, with the agreed differentials applying from distant territories; and further

Resolved: That no contracts shall be taken on the twenty-five cent rate basis of rates to extend beyond August 1st, 1898, and for the balance of the contract year no contracts shall be protected at less than the thirty-five cent basis of rates; and further

Resolved: That no contracts shall be taken covering a period of more than one year."

After the roads had reported their position as to the resolution, the question was submitted, on motion of Mr. Guy, seconded by Mr. McChesney, as to whether or not the roads would join in the restoration and maintenance of rates. After discussion, there were two negative votes against this resolution; and after consideration the following resolution was introduced by Mr. Ramsay, seconded by Mr. McChesney, and unanimously adopted:

"Whereas, all the lines present, except one, have voted to continue the association, but some of the members are of the opinion that certain changes are desirable in the agreement; and

Whereas, It will take time to carefully revise the old agreement; be it

Resolved: That a Committee of five, consisting of the three members of the Executive Committee, with two more added thereto, be appointed to revise said agreement and to make report thereon, at the earliest possible date; and that the Joint Agent submit such report to the members of the Association for their vote by letter, and that upon its approval by all of the lines, the revised agreement be signed by

the executive or other proper officer of each of the companies, members of the association, and that, pending the adoption by the association of such revised or amended agreement, all lines be bound by the rules and carry out all the obligations of the present agreement."

The names of the Special Committee are as follows: C. F. Parker, Chairman; Henry Gays, N. W. Taylor, W. S. McChesney and W. D. Holliday; Messrs. Taylor, McChesney and Holliday being the Executive Committee, and Messrs. Gays and Parker being the two other members.

The following resolution was offered by Mr. McChesney, seconded by Mr. Parker, and unanimously adopted:

"Resolved: That the resolution of July 16th, and September 29th, be re-affirmed, and that the minimum rate, with the usual differentials, be restored to thirty-five cents per ton on and after August 1st, 1898."

The following is the resolution of September 29th, referred to:

"Resolved: That on and after August 1st, 1898, the minimum rate on all coal shall be thirty-five cents per ton, with the agreed differentials applying from distant territories; and further

Resolved: That no contract shall be taken on the twenty-five cent basis of rates to extend beyond August 1st, 1898, and for the balance of the contract year no contracts shall be protected at less than the thirty-five cent basis of rates; and further

Resolved: That no contracts shall be taken covering a period of more than one year."

On motion, the meeting then adjourned.

There is also added a page showing letters and telegrams from roads not represented and not prepared to vote when

the final proposition was put, and the resolution to appoint a committee of five, and to be bound by an agreement to maintain rates, was submitted; which letters and telegrams indicate that the other roads agreed to it.

Above exhibit, consisting of eight pages, is marked "Plaintiff's Exhibit Fraser No. 8."

Plaintiff offers in evidence record of special meeting of the St. Louis Coal Traffic Bureau, held May 19th, 1898. The Joint Agent stated that a meeting had been called to consider the new agreement submitted by the Special Committee, which committee was appointed at the meeting of April 8th. The Chairman asked the Committee if it was ready to report. Mr. Parker, Chairman of the Special Committee, stated that the agreement had been adopted by the Committee unanimously and had been submitted to the lines by the Joint Agent. This was the only report the Committee had to make.

The Joint Agent stated that seven lines had replied to his letter of April 14th, submitting the agreement as reported by the Committee; six of these were favorable, and one non-committal; and the Big Four, B. & O. S. W., Vandalia, C. P. & St. L., and St. L. C. & St. P. Rys. were yet to be heard from.

The following letter was read:

"April 29th, 1898.

Mr. E. M. Ward, Joint Agent, City.

Dear Sir: Referring to yours of April 14th and 26th: I understand from another communication received from you that a meeting of coal lines will be held early in May to discuss the proposed coal agreement. I do not care to express an opinion until the matter can be discussed.

J. T. Poe, G. F. A."

The Joint Agent stated that while the contract was agreeable to the Clover Leaf, that company was unable to sign any agreement, and the position of the Clover Leaf was outlined by Mr. Weed, Freight Traffic Manager, in the following letter:

"April 22nd, 1898.

Mr. E. M. Ward, Joint Agent,
City.

Dear Sir: Referring to your letter of April 14th to all coal carrying lines, enclosing copy of agreement as proposed: I have presented the document to the Receiver, and am advised by him that he is not prepared to sign an agreement of this nature with any association, but is prepared to co-operate and work in harmony with whatever lines of organization may be adopted by the coal-carrying roads at St. Louis. His policy is identical in the present as in the past, being under instruction of the United States Court to sign no document of this character. I believe it should not prevent the other lines going ahead with the agreement; we to line up with the methods agreed upon.

W. S. Weed, F. T. M."

The Chairman then stated that the association had the Committee's report before it in the shape of a proposed agreement, and asked if there was any clause in the agreement which should be discussed or modified before proceeding to call the roll on the adoption of the agreement. Mr. Parker stated it was well known by all lines that a few contracts had been entered into prior to April 1st, 1896, which extended beyond August 1st, 1898, when rates are to be restored, and that these contracts had been filed and are of record with the Bureau. It will be noted that this agreement does not provide for any protection of contracts after August 1st, 1898, but such contracts as were filed prior to

April 1st, 1896, and which have not yet expired, must be protected under the proposed agreement.

After discussion the following was offered by Mr. Peabody, and seconded by Mr. Campbell, as an amendment to the agreement regarding railroad coal:

"Resolved: That Clause B, Section 3, of the proposed agreement be amended to read as follows: "All coal received as above provided, and consigned to and for use in the operating departments of railroads, terminal, bridge or ferry companies, shall be known as railroad coal, and will be reported to the Joint Agent of this Bureau accordingly. The transportation charge for railroad coal shall be as follows: When the minimum rate is thirty-five cents per ton, 10% less; when 40 cents per ton, 15% less, and when 45 cents per ton, 20% less. This basis is to apply from all territories within the jurisdiction of the bureau; provided, however, that railroad coal shall be billed and charged for at the rates effective on commercial coal, and that the difference between the established tariff rate on commercial coal and the reduced rate on railroad coal as above authorized, shall be allowed only upon statements filed monthly with the Joint Agent of this Bureau over the signature of the proper officer of the railroad company, certifying that such coal has been actually received by the road for its own use; such statement to contain all information necessary to enable the Joint Agent to properly approve the allowance of the railroad rate."

The following amendment was offered by Mr. Knott, and accepted by Mr. Peabody: "It being understood that when the railroad company, for which the coal is intended as fuel supply, furnishes its own cars for such transportation, the mileage both ways between East St. Louis and the mines shall be waived."

After the vote was taken, the Chair declared the resolution adopted, and that the agreement must be amended accordingly.

The following resolution was introduced by Mr. McLaughlin, seconded by Mr. Knott, and unanimously adopted:

"Resolved: That the name of the St. Louis Coal Traffic Association be changed to the St. Louis Coal Traffic Bureau."

Vote was then taken upon the question of adopting the agreement, as amended, as a whole; and the roads all voting in the affirmative, the Chair declared the agreement adopted.

Mr. Ramsay was then unanimously elected Chairman; the present Executive Committee was also continued, and the Illinois Central and C. P. & St. L. Rys. were added to the Executive Committee. The Executive Committee as then constituted was composed of the following lines: Big Four; L. & N.; Vandalia; Illinois Central; and C. P. & St. L.

Proposition was submitted by Mr. Ramsay to appoint a Joint Agent who should be Joint Agent of the Eastbound Traffic Association and the St. Louis Coal Traffic Association. After some discussion, the question was left to the Executive Committee, with power to act.

The roads then filed a line of rates they desired to become effective on August 1st, 1898, from the mines in Illinois to East St. Louis. The lines were unwilling to extend the minimum rate to Springfield district, and on motion of Mr. Peabody, seconded Mr. Campbell, the question of the differential rate applying from that district via the C. P. & St. L. and the St. L. C. & St. P. Rys. was referred to the Executive Committee for investigation and report.

Above exhibit, consisting of six pages, is marked "Plaintiff's Exhibit Fraser No. 9."

Plaintiff offers in evidence record of meeting of the Executive Committee of the St. Louis Coal Traffic Bureau, held June 28th, 1898, in the office of the Chairman, Mr. Ramsay.

Present: R. A. Campbell, G. F. A., L. E. & St. L. Ry.; W. S. McChesney, Supt. Terminals, L. & N. R. R.; H. W. Gays, Gen. Mgr., C. P. & St. L. Ry.; C. F. Parker, G. A., Ill. Cent. Ry.; N. W. Taylor, G. F. A., Vandalia Line; W. D. Holliday, A. G. F. A., Big Four; Joseph Ramsay, V. P. & G. M., Wabash R. R.

Meeting was called for the purpose of considering the present situation regarding coal contracts for the future. After full consideration of the correspondence on the subject, Messrs. Parker, Taylor, Campbell and the Secretary were appointed a committee to confer with Mr. Guy, President of the St. L. P. & N. Ry., and with any other parties that might be necessary, to investigate complaints that have been made regarding certain coal contracts. The Secretary was instructed to endeavor to arrange for this conference on Friday, July 1st, at two o'clock, p. m., or as soon thereafter as possible.

Meeting then considered the matter of apportioning expenses of the office force, clerical hire, office rent, etc., between the Belleville and St. Louis Traffic Bureau and the St. Louis Coal Traffic Bureau; and finally the Secretary was authorized to apportion the expenses of the Bureau between the interested parties according to their respective percentages for the previous month. On motion, the meeting then adjourned.

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 10."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held July 22nd, 1898, Mr. Fraser being Secretary, and Mr. Ramsey Chairman.

The Meeting was called to hear the report of the Executive Committee on the subject of differential rate applying from Springfield district by the C. P. & St. L. and the St. L. C. & St. P. roads, referred by meeting of May 19th, 1898, to the Executive Committee for investigation and report.

The Executive Committee reported as follows:

"Resolved, That the question of the minimum rate applying on coal from mines in the Springfield territory on the C. P. & St. L. and St. L. C. & P. roads be referred to the Coal Traffic Bureau without any recommendation whatever, the Committee, on account of the absence of Mr. Gays, not being able to arrive at any definite understanding or agreement on the question."

After a consideration of the above and other subjects, the following resolutions were adopted unanimously:

"Resolved, That the C. P. & St. L. and St. L. C. & St. P. roads be permitted to extend the rate of thirty-five cents per ton to include their Springfield district."

"Resolved, That the roll be called, with a view of getting a statement from the roads represented, whether or not, agreement effective August 1st, is being absolutely maintained."

The roll being called, the representatives of each road present, voted that the agreement effective August 1st is being maintained absolutely.

"Resolved, That the Secretary be directed to get a vote, from the absent members, on this resolution."

"Resolved, That W. S. McChesney, Jr., N. W. Taylor and R. A. Campbell, with the Secretary, be appointed a Committee to meet Mr. Gays, G. M., C. P. & St. L. and St. L. C. & St. P., with a view of securing from him an explanation of certain contracts made by operators on his roads, at figures that indicate less than thirty-five cents per

ton after August 1st, and to also take up with Mr. Gays other matters of interest to the Bureau."

"Resolved, That none of the lines, members of this Bureau, shall absorb the trackage charge at the National Stock Yards of $1.00 per car."

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 11."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held on March 28th, 1899, with Mr. Fraser, Secretary, and Mr. Parker, Chairman.

The Secretary stated that the meeting was called for the purpose of considering matters in connection with the transportation of coal by the M. & O. R. R. Co., consigned to the Mississippi River and Bonne Terre Ry. Co. The subject was discussed and Mr. Miller, G. F. A., M. & O. R. R., stated that he was not prepared to discuss the question; and the following resolution was adopted:

"Whereas, The declination of the M. & O. R. R. to allow the Secretary to inspect the movement of coal from that company to the Mississippi River & Bonne Terre R. R., according to the Bureau agreement, threatens to disrupt the Bureau, Therefore, be it

Resolved, That this meeting be adjourned, and the Secretary arrange for another meeting Tuesday, April 4th, so that Mr. Carroll of the M. & O., and a representation of the L. E. & St. L. Ry. can be present at that time."

A request was then made that the roll be called to ascertain if the agreed tariff rates were being maintained, result of which was that all roads present answered in the affirmative. Mr. Miller, for the M. & O., stated that he voted in the affirmative without a knowledge of the Bonne Terre business. The meeting then adjourned.

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 12."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held April 8th, 1899, which was an adjourned meeting from March 28th, called to consider charges made that the Mobile & Ohio R. R. was violating the agreement, through a contract made with the Mississippi River & Bonne Terre Ry., under which the M. & O. was taking chatts from the Bonne Terre road and paying for the same in the transportation of coal at less than the agreed rates.

Secretary stated that he had been refused permission by the M. & O. officials to examine their coal records at East St. Louis, with a view to checking up the movement of this coal. The Secretary read Article 6, Section B of the Agreement in which permission is granted the Secretary to examine the records of the various lines, members of this Bureau.

After a full discussion, the following resolution was adopted:

"Whereas, The contract existing between the M. & O. Railroad Co., and the Mississippi River & Bonne Terre Ry. Co. under which chatts shipped to the former by the latter company, to be paid for in transportation of coal to East St. Louis, threatened to disrupt this Bureau, and

Whereas, V. P. and G. M., R. Carroll, of the M. & O. R. R. Co., stated that there is in existence a contract between his company and the Mississippi River & Bonne Terre Ry., under which the latter company is to deliver his line 300,000 cubic yards of chatts at 40 cents per cubic yard, and the M. & O. R. R. Co. to furnish transportation on a sufficient amount of coal, on the basis of twenty-five cents from mines at Eden and north thereof, and thirty-five cents from mines south of Eden, to East St. Louis, in sufficient quantities to pay for the 300,000 cubic yards of chatts, of which approximately 110,000 cubic yards of chatts have

been delivered, leaving approximately 190,000 cubic yards of chatts to be delivered under said contract, to be paid for in coal freights on basis above mentioned. It is the present understanding that Mr. Carroll agrees to limit the amount of coal delivered to the Mississippi River & Bonne Terre Ry. Co., to an amount to cover payment of the 190,000 cubic yards of chatts yet to be delivered. And further agrees that the contract is not to be extended or renewed on present basis without conference with this Bureau."

"Resolved, That the lines here represented agree to maintain the rates on file now with the Secretary of this Bureau as the tariff rates of the various lines."

The representatives of the B. & O. S. W. made the statement that operators on his line were complaining that they have been unable to compete for certain contracts in the St. Louis and East St. Louis market recently, owing to the low prices being offered from mines situated on other roads. Upon call, the lines gave assurance that they were maintaining the agreed rate.

At this meeting Mr. Joseph Ramsay, Jr., was again elected Chairman of the Executive Committee and of the Bureau, and R. M. Fraser, Secretary.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 13."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held July 6th, 1899, being a special meeting. The Chairman stated that the members of the Bureau had been requested to attend a meeting at this time for the purpose of considering the condition of affairs that have been very unsatisfactory to some of the lines, and reviewed the situation generally; and it was suggested that it would be desirable to hear from the M. & O. R. R. in reference to the present status of their contract with the M. R.

& B. T. Ry., which was under consideration at the meeting of April 8th.

The representative of the M. & O. stated that everything would be done on the part of the M. & O., that is possible to preserve and maintain the coal rates from Illinois Points to East St. Louis; that he would try and arrange, if possible, to confine the shipments of coal at the reduced rates to coal for the use of the Bonne Terre Ry., and not for commercial purposes.

It was then resolved that the explanation of Mr. Poe of the M. & O. R. R. be accepted by the Bureau, and that the Bureau await the report of the Executive Committee after their conference with President Russell and Mr. Poe on that subject.

Different contracts were reported as having been made at figures that would hardly justify payment of the tariff rates for transportation. The coal to fill these contracts was reported as coming from several different roads, and the representatives of said roads in each instance denied that any reduction had been or would be made from their tariff rates.

It was therefore resolved that the roll be called by roads, asking each representative whether he is maintaining the schedule of rates as filed with the Bureau, whether any contracts on his road are in existence at less than the agreed rates, when such contract was made, and the date of expiration.

In submitting the resolution the Chairman stated that the representative of each road is called upon to state First, whether it is now or has been maintaining the rates over its line as filed with this Bureau; Second, whether it has any contracts or agreements for the shipment of coal over its line at any rate in conflict therewith; Third, if so, how much tonnage remains to be shipped under such arrangement or agreement, and at what rates.

The record of this meeting shows that at the meeting on the 5th of coal operators having mines on the roads, members of this Bureau, a Committee was appointed to have a conference with the representatives of the roads at this meeting.

It is ordered that a detailed report of the discussion and the papers submitted by the Operators' Committee, be referred to the Executive Committee for consideration.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 14."

Plaintiff offers in evidence record of Special Meeting, held on January 4th, 1900, of the St. Louis Coal Traffic Bureau, operating under the agreement effective April 1st, 1898; which meeting adjourned sine die.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 15."

Plaintiff offers in evidence record of the organization of a new association, to be known as the St. Louis Coal Traffic Bureau on January 4th, 1900, of which Mr. Ramsay was elected Chairman and Mr. Fraser, Secretary. The subject of rates being considered, each individual road's representative delivered to the Secretary a list of rates in effect on the road he represented. The Secretary was instructed to have printed in pamphlet form an information circular showing the rates charged by the several roads, for the transportation of coal to East St. Louis, as per memorandum furnished.

The subject of protecting operators' time contracts being considered, as was also the subject of rates on railroad coal, the representatives of the roads, members of the Bureau, individually advised that it is the intention of their company to advance the rates on coal, effective March 1st, 1900.

The salary of the Secretary was fixed at one hundred dollars per month. The meeting then adjourned.

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 16."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held on January 23rd, 1900. It being stated that this was adjourned meeting, and unfinished business should first be disposed of.

After consideration of the subject of protecting contracts, it was the individual understanding of all parties that after March 1st, they will not protect a less rate than an advance of five cents per ton above the present tariff rates.

The subject of publishing Information Circular No. 1 being considered, it was resolved that the Secretary withhold the publication of Information Circular No. 1 until after the expiration of ten days from this date (Jan. 23rd), and in the event of not receiving notice from any of the lines members of the Bureau, that the advanced rates cannot become effective, he issue the Information Circular showing the rates to become effective March 1st, 1900.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 17."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held April 19th, 1900.

The Secretary said that call for this meeting has been issued by request of one of the members, to consider matters of great importance to the members. The Chairman said that this meeting had been called to consider the question of rates as filed with the Secretary by the various lines; also as to the rates that are actually in effect by the various lines. He suggested that a meeting had not been held for some time, and the principal source of trouble seemed to be the contracts between the M. & O., B. & O. S. W., and possibly other roads, and the M. R. & B. T. Ry. Co. for a supply of chatts. After a general discussion of the subject, a reso-

lution was adopted that the matter be referred to the Executive Committee, and the lines who have contracts with the M. R. & B. T. Ry. be requested to come before the committee to consider the coal rate situation as affected by the contracts with the M. R. & B. T. R. R. Co.

The question was raised as to whether the rates named by the several roads and published in Information No. 1, January 4th, 1900, included the entire cost of switching and trackage necessary to reach the industries at Granite City, and after a general consideration of the subject, it was resolved that the matter be allowed to stand as at present, it being optional with the roads as to whether or not they absorb the switching.

The question was brought up as to the rate on railroad coal, it having been stated by the individual members at meeting January 23rd, that it was their intention to make, effective March 1st, the same rate on coal for use of railroads, ferry companies, etc., as charged on commercial coal.

At the suggestion of one of the members a vote was taken to ascertain whether any of the roads were making a refund on railroad coal. All representatives voted in the negative, except the T. H. & I., who stated that he had sent the Secretary a letter a few days after the January meeting, giving notice that they would make a refund on railroad coal. The letter not having been received by the Secretary, a copy was requested.

After a vote was taken, it was decided that it was optional with the roads whether or not they made a refund on railroad coal.

The following is a copy of the notice referred to which was also issued by circular letter, as instructed:

"St. Louis, April 19, 1900.

Rates on Railroad Coal Illinois Mines to East St. Louis.
File T-2167.

Mr. R. M. Fraser,
Secretary, City.

Dear Sir: Referring to our conversation to-day, relative to rates on railroad coal from Illinois points to East St. Louis, I find upon returning to the office that we did not formally notify you at the time this matter was under consideration. By some oversight the papers were filed and the matter was overlooked. I would say, however, that in confirmation of my statement to-day, we reserve the right to continue the old practice of making rate on coal actually used by railroads and ferry companies, etc., 10 per cent less than the authorized commercial rate.

Yours truly,
(Signed) N. W. Taylor, G. F. A."

A resolution was adopted by the Bureau, making a request, or rather extending an invitation to the St. Louis, Troy & Eastern Railroad to become a member of the Bureau.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 18."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held November 13th, 1900, which was a special meeting.

The Secretary presented a report showing the result of check at East St. Louis stations for months of July, August, and September, and the following resolution was adopted:

"Resolved, That the Secretary of the Bureau make check of the local freight stations monthly, as to coal received by the various lines, and should such check develop any errors they are to be entered on the last Daily Report of the month following, sent out by the Bureau, with explanatory note."

The Secretary informed the Committee that Mr. F. H. Conrades, President of the St. Louis, Troy and Eastern Railroad, signed the Articles of Agreement of the St. Louis Coal Traffic Bureau on November 15th; they had, however, been making daily reports to this office from October 1st, and had paid a proportion of expenses of the Bureau for the month of October.

Attention was called to the manner in which the St. Louis, Troy & Eastern Railroad report their coal (as from Donk Bro. Coal & Coke Co. mines), and after due consideration it was resolved that the Secretary be instructed to call the attention of the officers of said railroad to Article 9 of the Agreement of the Bureau, relating to the report of coal by the lines, members of the Bureau, and that he request the St. Louis, Troy & Eastern Railroad to report coal from mines on that line in accordance with said Article 9.

The Secretary submitted correspondence with General Coal Agent of the Chicago & Alton Ry., regarding membership in the Bureau. A resolution was adopted that the Secretary present the correspondence to the Chairman, Mr. Ramsay, with the request that Mr. Ramsay take the matter up with Mr. Felton of the Chicago & Alton road and endeavor to secure their membership.

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 19."

Plaintiff offers in evidence record of special meeting of the St. Louis Coal Traffic Bureau, March 7th, 1901. Meeting of the Executive officers called at the request of one of the members, as shown in Circular Letter 26th, as follows:

"The situation with respect to rates on coal from Illinois mines to East St. Louis is in a very unsatisfactory condition. I think it is essential that a meeting of the Executive Officers of the lines interested in the transportation of coal to St. Louis should be held at an early date to consider the matter.

I shall be glad if you will issue a call for a meeting to be held in St. Louis the first week in March."

After a general discussion as to the condition of affairs in connection with the coal traffic, the roll was called to ascertain whether there were any contracts by the railroads or coal operators, extending beyond March 31st, 1901. The roads were then asked as to whether or not they had any contracts, and they reported on that question. A paper in the form of a resolution was handed to the Chairman in which a plan was proposed for the handling of the coal traffic; the roll was called, and after a vote on the matter, the roads stated—most of them—that they would consider the proposition. And it was resolved that a copy of the proposition read, together with a copy of the Articles of Agreement at present in effect, and a copy of the statistics prepared by this Bureau for the period named in the proposition referred to above, be sent to the representative of each road, member of this Bureau, and that a meeting be called by the Secretary at an early date to further consider the subject.

The General Coal Agent of the Illinois Central stated that he would make the Illinois Central rate from thirty-five cents points fifteen cents per ton, and the higher rate points the same differential on the basis of fifteen cents per ton as now in effect on the thirty-five cent rate. These reductions to become effective at once.

The record of this meeting shows that a copy of the proposed plan, and a copy of the Articles of Agreement, effective January 4, 1900, and a copy of the report issued by the office for the year 1898 and December, 1900, showing the tonnage carried by each road during the years 1895-6-7-8-9 and 1900, sent to each member.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 20."

Plaintiff offers in evidence record of special meeting of the Executive Officers of roads interested in the transportation of coal in Illinois, held in St. Louis, March 16th, 1901, in accordance with request by one of the officials, as follows:

"Referring to soft coal situation at East St. Louis, in order to prevent continuation of present demoralization in rates, I suggest executive officers members of the St. Louis Coal Traffic Bureau meet at St. Louis, Saturday, March 16th, for consideration of this situation, with view of straightening matter out, and for discussion of resolution looking to proper regulation of coal traffic adopted at meeting held March 7th.

After a general discussion as to condition of affairs in connection with the coal traffic, the following resolution was adopted:

"Resolved, That the roll be called, to ascertain whether there are any contracts in effect, or rates guaranteed, at less than thirty cents per ton, that will extend beyond March 31st."

The representative of each road answered in the negative.

The following resolution was adopted:

"Resolved that on and after March 20th, 1901, the minimum rate on commercial and railroad coal will be thirty cents per ton to East St. Louis, until changed legally by open tariff by any of the lines represented here, and that no contracts shall be made between now and March 20th, extending beyond that time, at less than the tariff rate, thirty cents.

And be it further resolved that five cents per net ton of two thousand lbs. be the maximum reduction from outside districts."

The question of making time contracts on basis of thirty cents per ton was brought up by one of the members, and after discussion the following resolution was offered by one of the members, and adopted:

"Resolved, That no contracts for the transportation of coal be made for any longer period than one year."

It being stated that reports of various irregularities in rates were occasionally brought about by the Transfer Ferry or Terminal companies not maintaining the same charge to all parties for similar service, it was resolved that the Chairman appoint a committee of three to take this question up with the transfer, ferry or terminal companies. The Chairman appointed as the committee, Messrs. Parker, Spencer and Conrades, with Mr. Parker as Chairman.

The question of the Chicago & Alton and the T. St. L. & W. roads becoming members of the Bureau was brought up and it was resolved that said roads be requested to become members of the Bureau.

The Secretary asked instructions as to re-issuing Information Circular No. 1, and it was resolved that Information Circular No. 1 be reprinted as Information Circular No. 2, naming changes as suggested, and that each line now give notice to the Secretary that they propose to change their tariff, effective March 20th, and that each road furnish the Secretary a list of the rates that will be charged from their several mines.

There being no further business, the meeting adjourned.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 21."

Plaintiff offers in evidence record of meeting of the executive and traffic officers of roads interested in the St. Louis Coal Traffic Bureau, held May 17th, 1901, in accordance with a call issued 13th inst., as follows:

"At a meeting of the Executive Committee to-day, I was instructed to call a meeting of the Bureau at this office on Friday, May 17th, 1901, at 10:00 a. m., sharp, to consider several matters of importance to the members.

7 3 7

Will you therefore please be present or authoritatively represented, without further notice."

At this meeting Mr. Ramsay was elected Chairman and Mr. Fraser Secretary.

It was suggested at this meeting that it was very important that the C. & A. and T. St. L. & W. Railroad companies become members of the Bureau, and Mr. Ramsay, Chairman, and Mr. Harrihan of the Illinois Central, were appointed a Committee to take this matter up with the Presidents of the C. & A. and T. St. L. & W. roads, and see if they cannot be induced to become members of this Bureau.

It having been suggested by one of the members that it would be desirable to establish a coal contract year, the same to be incorporated as a part of the new agreement, after a careful consideration of the subject, it was

"Resolved, That no contracts shall be guaranteed for a longer period than one year; the coal year of this Bureau shall be understood to be from April 1st of one year to March 31st of each succeeding year, and each road, party to this agreement, agrees not to guarantee or protect tariff rates beyond the period so established."

This resolution was carried.

At the request of a member the roll was called to ascertain whether any member has made contracts for the transportation of coal for a longer period than March 31st, 1902, and each member answered in the negative.

Mr. Hurlbut called attention to the decreased tonnage carried by the Illinois Central, as compared with the same period last year, stating that the condition of affairs was not satisfactory to the Illinois Central, and he did not believe the roads were adhering to the tariff rates filed with the Secretary. No definite action was taken.

It was suggested that as there was really no Bureau in existence at the time when the rates in Information Circular No. 2 were filed, that the following resolution be adopted:

"Resolved, That pending the signing of the revised agreement, each road, party to the agreement, pledge themselves to absolutely maintain their rates as published in Information Circular No. 2, effective March 20th, 1901."

The roll was called on the above resolution, and all members voted in the affirmative.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 22."

Plaintiff offers in evidence record of special meeting of the St. Louis Coal Traffic Bureau, held on April 16th, 1902, the meeting being called by a Circular Letter, April 14th, File 201, as follows:

"You are hereby urgently requested to attend a meeting of the Bureau at this office on Wednesday, April 16th, 10:30 a. m., in accordance with the following letter:

'It has been suggested that a meeting of the Coal Traffic Bureau be called as soon as possible for the purpose of considering matters of rates on coal from Illinois mines to East St. Louis for the coal season upon which we are just entering.

I would therefore be obliged if you will issue a call for such a meeting to be held at your office on Wednesday, April 16th. In issuing this call, kindly urge that full representation is desired.

It is thought advisable to call a meeting of the St. Louis Coal Traffic Bureau to consider important matters; therefore please call meeting of the chief traffic officials for Wednesday, April 16th, at 10:30 a. m.'"

After much discussion, the following resolution was adopted:

"Resolved, That the roll be called and the representative of each line answer as to whether or not his line is maintaining the rates filed by his company with the Bureau as set forth in Information Circular No. 2L."

The roll was called in accordance with the resolution and each member individually stated that his line was maintaining rates as published in Information Circular No. 2.

It was resolved that the roll be called and the representative of each line answer as to whether or not his line is applying freight charges on coal in exchange for chatts. The roll was called and the representatives present, excepting the Southern and the M. & O., stated that they had no such arrangement in effect on their line. The representatives of the Southern and the M. & O. answered as follows:

The Southern: We have a contract for the exchange of coal freight for chatts, but it is inoperative at the present time on account that there is a large amount of chatts due us on coal that has already been delivered, to the extent of probably $25,000, and we will not be able to resume the contract before next fall or winter.

The M. & O.—I am not prepared to answer, but will look into the matter and give the Secretary reply by letter.

It was resolved that the St. Louis & Illinois Suburban Railroad be invited to become a member of the Bureau, and the Secretary was instructed to confer with the proper official of that company.

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 23."

Plaintiff offers in evidence record of special meeting of the St. Louis Coal Traffic Bureau, held March 18th, 1903.

At this meeting, each road there represented individually announced that they would continue the rates shown in Information Circular No. 4, on bituminous coal, until notice of their desire to change is filed with the Coal Traffic Bureau.

The Secretary was instructed to take up with the C. & A., the T. St. L. & W., and the electric lines, the subject of rates on coal, with the view of ascertaining what rates they

propose to maintain on bituminous coal from Illinois mines to East St. Louis and vicinity. Members to be advised of the replies received.

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 24."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held on April 14th, 1903, convened in accordance with resolution adopted March 18th.

The Secretary reported having written to representatives of the C. & A. Ry., the T. St. L. & W. R. R. and the Belleville Electric line, as instructed at meeting of March 18th, and replies received were satisfactory from the C. & A. and the T. St. L. & W.; the General Superintendent of the East St. Louis & Suburban not having replied, the Secretary was instructed to write to him again.

After a general discussion between the members as to the condition of affairs regarding coal traffic, on motion, duly seconded and carried, the Chairman asked the road represented to declare themselves individually as to their position on the following propositions:

First: Maintenance of rates as per St. Louis Coal Traffic Bureau Information Circular No. 4, from Jan. 10th, to March 31st, 1903, as against contracts at less.

The roads were not prepared to express themselves, but would endeavor to do so at meeting May 21st.

Second: Maintenance of rates as per St. Louis Coal Traffic Bureau Information Circular No. 4, April 1st, 1903, to March 31st, 1904.

The roads members of the Bureau individually advised that they will continue rates as per Information Circular No. 4 until notice is given to the contrary to the Secretary of the Bureau.

Third: Action contemplating refusal to protect rates annually or for a term, after March 31st, 1904.

Notwithstanding that Article 7 of the agreement, effective January 4th, 1901, provides for a coal year, which has been construed not to prohibit entering into contracts with operators and others at current rates for the period therein specified, the roads, members of this Bureau individually advised that, effective April 1st, 1904, they will not guarantee or protect rates for any period longer than that required to change tariffs.

The Secretary was requested to notify both the C. & A. and the T. St. L. and W., regarding action in reference to time contracts.

Above exhibit, consisting of the two pages, is marked "Plaintiff's Exhibit Fraser No. 25."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held May 21st, 1903.

The Secretary reported having written again to the representative of the Belleville Electric Line, for information as to rates they propose to maintain, as instructed at meeting April 14th, and read reply received, and no further action was required.

As instructed, the Secretary notified both the C. & A. and the T. St. L. & W., regarding action on the third proposition (Proceedings April 14th). Replies were received concurring in the action of the Bureau.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 26."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held August 20th, 1903, in accordance with action of meeting of May 21st.

After a general discussion regarding coal traffic matters, the lines individually announced that they would not pay any claims for the protection of rates published in St. Louis Coal Traffic Bureau Information Circular No. 3, on ship-

ments forwarded subsequent to the date of rates announced in Information Circular No. 4, on non-contract coal, without conference at special meeting of this Bureau, to be called in usual way.

The Secretary was instructed to address all members of the Bureau, requesting them to advise whether or not they have paid claims for refund on contract coal, shipped after date of Information Circular No. 4, and up to and including March 31st, 1903.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 27."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held on March 16th, 1904, at which the action taken at the meeting of April 14th, 1903, regarding time contracts for the transportation of coal on hand after April 1st, 1904, was individually affirmed.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 28."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held June 16th, 1904. The Secretary was instructed to write the representatives of the St. Louis & Belleville Electric Ry., and East St. Louis & Suburban Ry., also the representative of the St. Louis & O'Fallon Ry., requesting them to become members of the Bureau.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 29."

Plaintiff offers in evidence record of special meeting of the St. Louis Coal Traffic Bureau, held January 26th, 1905.

At meeting of St. Louis Coal Traffic Bureau held this day lines individually announced that they will charge from this date until April 1st, 1906, the rates shown in Informa-

tion Circular No. 4 and Amendment No. 3, effective this date, and thereafter until formal notice.

The Secretary read the correspondence with the Freight Traffic Manager of the Missouri Pacific, regarding membership in the Bureau and was instructed to confer with Mr. Stith with the view of having the St. L. I. M. & So., Illinois Division, become a member of the Bureau, or to at least endeavor to arrange for Daily Report of the coal tonnage received at their East St. Louis or East side station.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 30."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held April 29th, 1905.

Meeting convened in accordance with call issued April 27th, on request of a member, as follows:

"I have had several informal conversations with various members of the Coal Traffic Bureau, and find that conditions are very unsatisfactory, and for this reason I respectfully request that you call a meeting of the Coal Traffic Bureau Saturday morning at 10:00 a. m."

After a general discussion as to the unsatisfactory conditions that prevail, the representatives of lines interested individually announced the minimum charges that they will make for the transportation of coal from Illinois mines to East St. Louis, etc., May 1st, 1905, to March 31st, 1906, inclusive, unless formal notice of change. It being understood that no contract would be made or protected extending the rates named beyond March 31st, 1906.

The rates effective May 1st, 1905, to be furnished by letter to the Secretary and by him published in Information Circular No. 5, in accordance with resolution as follows:

"Resolved, That the individual rates, effective May 1st, by the interested roads be furnished the Secretary by letter,

without delay, to be promulgated by him in Information Circular No. 5, as effective May 1st, 1905."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 31."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held May 29th, 1905.

Meeting convened to-day subject to adjournment May 24th, in consequence of all members not being present on that day.

After a general discussion, the representatives of lines interested individually announced the minimum charges that they will make on the transportation of coal from Illinois mines to East St. Louis, etc., effective June 5th, 1905. It being understood that no contract would be made or protected extending the rates named beyond March 31st, 1906.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 32."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held June 28th, 1905, in accordance with call issued, on request of a member as follows:

"Please call a meeting of the St. Louis Coal Traffic Bureau, Wednesday morning, June 28th, at 10:00 o'clock, to discuss the matter of rates on coal from outer group to East St. Louis, particularly rate of thirty-five cents per ton, recently published by the Illinois Central, and oblige."

The Secretary read the correspondence with officials of the C. & E. I. Railroad regarding membership in the Bureau, and was instructed to continue his efforts to secure the membership of the C. & E. I. R. R. in this Bureau, and failing in this, that he endeavor to get a daily statement from them showing the coal tonnage that they handle into St. Louis, whether for railroad or other use.

After a discussion of the situation generally and particularly of the subject for which the call was issued, the meeting adjourned.

Amendment No. 1 to Information Circular No. 6 will be issued at once, showing the changes in rates announced by the Illinois Central Railroad from mines on the Illinois Central Railroad, effective June 19th.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 33."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, November 6th, 1905, which meeting was held in accordance with call issued November 3rd, on request of a member, as follows:

"Will you kindly call a meeting of the Coal Traffic Bureau, Monday, the 6th inst., 10:00 a. m., to consider an advance in the rates on coal for the remainder of the coal year?

We believe that this would be an opportune time to take action in that direction."

The matter was left to be acted upon, after a general discussion, finally, at the meeting of November 23rd, 1905.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 34."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held November 23rd, 1905. On account of members not all being present, meeting adjourned until December 4th, 1905.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 35."

Plaintiff offers in evidence record of meeting of the St. Louis Coal Traffic Bureau, held December 11th, 1905, which meeting convened in accordance with adjournment of December 4th, and call issued December 8th.

The Special Committee appointed at meeting of the 4th inst. requested further time to report, which was granted.

The representatives of road individually announced that they would not quote or guarantee rates on coal applicable after March 31st, 1906, until the Special Committee have submitted their report and same has been considered by the Bureau.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 36."

Plaintiff offers in evidence Circular Letter dated Nov. 28th, 1905, addressed to the members of the St. Louis Coal Traffic Bureau, and signed by "R. M. Fraser, Secretary," asking to be advised as to their views as to rate adjustment and rates on coal to St. Louis, Mo., and as to whether or not switching will be absorbed.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 37."

Plaintiff offers in evidence Circular Letter dated June 20th, 1905, enclosing copy of letter, dated Chicago, June 19th, from the Coal Traffic Manager of the Illinois Central Railroad, as follows:

"Effective at once, we will establish a rate of thirty-five cents per ton on coal, car-loads, from our Carterville-Herrin District, including Murphysboro, to East St. Louis.

This is made necessary by reason of a rate of thirty-five cents per ton being carried by the Missouri Pacific from the same district to Bixby. The rate charged by the Missouri Pacific from Bixby to St. Louis is thirty cents per ton, which is the same as in effect via the Terminal Association from East St. Louis to St. Louis. The Bixby combination makes a rate to St. Louis of sixty-five cents per ton, and under the present adjustment via East St. Louis our rate is 70 cents per ton. In order to meet this competition we are

forced to reduce the rate to East St. Louis to thirty-five cents per ton."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 38."

Plaintiff offers in evidence Circular Letter of the St. Louis Coal Traffic Bureau, giving copy of telegram dated May 22nd, from the General Freight Agent of the B. & O. S. W.

"Cut.—In view of reductions in rates on coal by M. & O., Vandalia, etc., this is to notify you that we will publish, effective to-day, rate fifteen (15) cents per ton from our Illinois mines, Salem and West, to East St. Louis."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 39."

Plaintiff offers in evidence Circular Letter of the St. Louis Coal Traffic Bureau, marked "Important," dated May 25, 1905, to members of the Bureau, as follows:

"Gentlemen: I give below copy of telegram received at 3:15 p. m., dated Chicago, May 25th, from Coal Traffic Manager Illinois Central R. R. Co.

'Effective to-day our rate on soft coal from mines on our line shown in your Information Circular No. 5, as taking rate of thirty cents per ton into East St. Louis, will be two dollars ($2.00) per car of 60,000 lbs. or over; one dollar ($1.00) per car of less than 60,000 lbs.; subject to our regular minimum weights.'"

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 40."

Plaintiff offers in evidence Circular Letter of date May 24th, 1905, marked "Important," of the St. Louis Coal Traffic Bureau, to the members of the Bureau, as follows:

"Gentlemen: I give below copy of letter, dated May

24th, from President of the St. Louis & O'Fallon Ry. Co.:

'I beg to announce that, effective May the 25th, the St. Louis & O'Fallon Railway Company will name a switching rate on coal of $2.00 per car of 100,000 lbs. capacity, and $1.00 per car for cars of 60,000 lbs. capacity, between their mines No. 1 and No. 2, to the Terminal Belts at East St. Louis, Illinois.'"

Attached to this is another circular letter marked "Important, dated May 24, 1905, and addressed to the members of the Bureau, as follows:

"Gentlemen: I give below copy of letter, dated May 24th, from G. F. A. Litchfield & Madison Ry.:

'Beg to advise that this company has established a rate of ten cents per ton on coal from Staunton, Worder and Edwardsville to East St. Louis, effective to-day, and subject to cancellation on five days' notice.'"

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 41."

Plaintiff offers in evidence Circular Letter, dated March 8th, 1901, addressed by the Secretary of the St. Louis Coal Traffic Bureau to the members, stating that at the request of several of the members, who attended meeting of March 7th, he submits copy of remarks and resolution offered by Traffic Manager Graham, as follows:

"I believe I appreciate the object Mr. Hurlbut has in view, but I am inclined to doubt whether it will bring about the desired result. Now I would submit a resolution as follows:

Resolved, That the executive officers of each of the lines, members of the St. Louis Coal Traffic Bureau, file with the Secretary, within ten days, over his autograph official signature, a declaration that the company he represents will absolutely maintain the individual rates, or rather, the rates of the individual lines, as published by the Secretary of the

St. Louis Coal Traffic Bureau, in Information Circular No. 1, effective January 4th, 1900, and that no contracts guaranteeing a rate in the future, shall be made by any railroad company, member of this Bureau, until another meeting has been called to consider the question of apportionment."

Said resolution failing to receive a unanimous vote was declared lost.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 42."

Plaintiff offers in evidence Circular Letter, dated February 3rd, 1900, addressed by the Secretary of the St. Louis Coal Traffic Bureau to the members of said Bureau, which is as follows:

"At meeting 23rd inst., the subject of advancing rates on commercial coal was further considered, and each road's representative stated that it is the intention of his company to advance the rate on coal five cents per ton, effective March 1st, and it was

'Resolved, That if the representative of either road finds that he cannot advance the rate, effective March 1st, that he notify the Secretary to that effect, within ten days from this date (January 23rd), and that the Secretary advise the members accordingly.'

I am in receipt of letters from members as follows:

'After careful consideration of the action taken at the meeting on January 23rd, in which this company gave notice that the tariff rates on coal to East St. Louis would be advanced on March 1st, five cents per ton, we think it an inopportune time to make the advance in the rate, as per our notice of January 23rd, and we desire to give further notice that the present tariff minimum rate of thirty-five cents with existing differentials, will continue until further notice.'

'In regard to advancing rates on commercial coal, beg to

say that after full consideration of this matter I do not feel that it would be a good thing to make the proposed advance in rates.'

Information Circular will be issued at once, naming the individual rates, at present in effect by the several roads, between the points named."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 43."

Plaintiff offers in evidence Information Circular No. 1 of the St. Louis Coal Traffic Bureau, in effect January 4th, 1900, signed "R. M. Fraser, Secretary;" which Information Circular is in words and figures as follows:

ST. LOUIS COAL TRAFFIC BUREAU.

Baltimore & Ohio Southwestern Railroad; Cleveland, Cincinnati, Chicago & St. Louis Railway; Chicago, Peoria & St. Louis Railway Co. of Illinois; Illinois Central Railroad; Louisville & Nashville Railroad; Louisville, Evansville & St. Louis Consolidated Railroad (Geo. T. Jarvis, Receiver); Mobile & Ohio Railroad; St. Louis, Belleville & Southern Railway; The Wabash Railroad; Terre Haute & Indianapolis Railroad (V. T. Malott, Receiver); Toledo St. Louis & Kansas City Railroad (Samuel Hunt, Receiver).

Information Circular No. 1.

(Cancelling Coal Tariff No. 6, August 1, 1898).

Containing copies of the Individual Rates charged by the several roads, between the points named herein, on Bituminous Coal from mines in the State of Illinois to East St. Louis, etc., Illinois, in effect January 4, 1900.

R. M. Fraser, Secretary.

Above exhibit, consisting of seven (7) printed pages, is marked "Plaintiff's Exhibit Fraser No. 46."

Plaintiff offers in evidence Information Circular No. 4 of the St. Louis Coal Traffic Bureau, in effect January 10th, 1903, signed "R. M. Fraser, Secretary;" which Information Circular is in words and figures as follows:

ST. LOUIS COAL TRAFFIC BUREAU.

Baltimore & Ohio Southwestern Railroad; Southern Railway (St. Louis-Louisville Lines); Cleveland, Cincinnati, Chicago & St. Louis Railway; St. Louis, Belleville & Southern Railway; Chicago, Peoria & St. Louis Railway Co. of Illinois; The St. Louis, Troy & Eastern Railroad Co.; Illinois Central Railroad; The Wabash Railroad; Louisville & Nashville Railroad; Terre Haute & Indianapolis Railroad Co., (V. T. Malott, Receiver); Mobile & Ohio Railroad.

Information Circular No. 4.

(Cancelling Information Circular No. 3, December 22, 1902).

Containing copies of the individual rates charged by the several roads between the points named herein, on bituminous coal, carloads, minimum weight as per individual issue of each road, from mines in the State of Illinois, to East St. Louis, etc., Illinois. In effect January 10, 1903.

R. M. Fraser, Secretary,
Rooms 404-406 Union Station,
St. Louis, Mo.

Above exhibit, consisting of eight printed pages, is marked "Plaintiff's Exhibit Fraser No. 51."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, Ky., January 24th, 1900.

Chairman called attention to C. F. A. Information No. 1927, authorizing rates on plaster, etc., C. L., on basis 83.33% of sixth class rates, stating that he had written Secretary Fulton to ascertain if the C. & O. R. Committee would advance their rates in accordance with Information No. 1932, and received reply to the effect that they had decided not to advance rates to basis named, and it was

"Resolved, That the roads members of this Committee individually advise that no change will be made in the rates on this traffic, named in this Committee's Tariff I. C. C. No. B-18."

Chairman stated that on receipt of Information Circular No. 1932 C. F. A., he had written the Secretary of the Chicago & Ohio River Committee to ascertain if that Committee's Through Freight Rates No. 41 would be amended in line with the above-named Information, and received reply that articles taking packing-house products rates would be amended in accordance with Information No. 1932, except as to bulk meats, which would continue at minimum weight of 28,000 lbs., and in view of same it was

"Resolved, That the roads, members of this Committee, individually advise that, effective on legal notice, Joint Freight Tariff I. C. C. No. B-18 be amended so that list of articles taking packing-house product rates will be the same as authorized by C. F. A. Information No. 1932 and Amendment No. 1954, also including bulk meats at minimum 28,000 lbs., and further that Joint Proportional Tariff I. C. C. No. B-17 be amended authorizing minimum weight on bulk meats, C. L., 28,000 lbs.; and it is further,

Resolved, That, as the following articles, viz.: Oils, corn, lard, red and tanners, are not now included in C. F. A. Information No. 1932, they be also eliminated from Note 3, page 4, under Articles taking packing-house products rates, and be included in the tariff, under separate heading, rate 12 cents per 100 lbs., C. L., minimum weight 30,000 lbs., in line with rates on same traffic between Chicago, Cincinnati, Louisville, etc."

Record shows resolution fixing minimum weights on oil, except petroleum, and Joint Freight Tariff I. C. C. No. B-18 amended to conform to the change in minimum weights, except on petroleum.

Record shows the following telegram from Mr. Connelly was submitted: "Your I. C. C. B seventeen shows proportional rate eight cents flour East St. Louis to Madison, Ind. Please cancel this rate, as we do not understand

it is proper to carry this rate in your tariff." The Chairman stated that he was unable to locate authority for rate to Madison, Ind., being carried in tariff, other than it was checked in at general check September 9th, 1897, when the first Joint Freight Tariff of this Committee was issued; and it was, therefore,

"Resolved, That the roads, members of this Committee, individually instruct that, effective on legal notice, rate of 8 cents per 100 lbs. on flour, C. L., named in Joint Proportional Tariff I. C. C. No. B-17, East St. Louis, to Madison, Ind., be cancelled, and Tariff amended accordingly.

A resolution was adopted declaring that the roads, members of this Committee, instruct that Tariffs I. C. C. B-17 and 18 be amended, effective on legal notice, so as to provide that the long and short haul clause shall be made inoperative, so far as it affects rates to and from I. C. R. R. stations south of the Ohio River."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 52."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in Cincinnati, Ohio, February 28th, 1900.

The Chairman called attention to conference meeting with the C. & O. R. Committee, Indianapolis, February 21st, at which the roads, members of this Committee, were represented as follows:

B. & O. S. W. R. R., A. Fries and T. J. Cook; C. C. C. & St. L., W. D. Holliday, H. F. Frost, R. P. Buchanan, and H. C. Bell; C. H. & D. Ry., A. H. McLeod, E. J. Hutchinson; I. D. & W. Ry., J. S. Lazarus; L. H. & St. L. Ry., L. J. Irwin, P. C. C. & St. L. Ry., G. W. Davis and M. S. Connelly; T. H. & I. R. R., G. L. Stevens.

The object of the conference was the revision of commodity rates in effect by either or both committees. The action taken is shown on page 4 of this exhibit.

The following resolution was adopted: "Resolved, That it is impracticable to make any change, at this time, in the rate on whiskey, Louisville and Cincinnati to East St. Louis, and that Chairman Tucker be advised accordingly."

Meeting considered application for change of rate to 15 cents per 100 lbs. on glycerine, C. L., and it was decided to make no change.

Record shows that at conference meeting at Indianapolis, February 21st, action was taken to eliminate starch from list of articles taking Grain Products rates, and insert in tariff "Starch, C. L., 12 cents per 100 lbs." At conference meeting at Indianapolis, on the 21st, tallow was included in tariff under "Soap stock," rate 10 cents per 100 lbs., and also inserted as "Tallow;" and eliminated from the list of Packing-house products.

Meeting considered rate on jute bagging C. L., Louisville to East St. Louis. On the 24th Chairman had been requested to ascertain the rate on jute bagging, in rolls, C. L., from Peru, Ind., to East St. Louis, and in reply thereto stated that rate on this traffic, Peru to East St. Louis, is 8 cents per 100 lbs., C. L., minimum 30,000 lbs., and it was

"Resolved, That the roads, members of this Committee, individually authorize a rate of 8 cents per 100 lbs. on jute bagging, in rolls, C. L., minimum 30,000 lbs., from Louisville to East St. Louis, same to be included in re-issue of Joint Tariff, effective March 15th, 1900, unless the Chairman can secure immediate advice of cancellation and advance in rate from Peru, Ind.; in that event, to publish the advanced rate from Louisville."

Meeting also considered rates on horses and mules, C. L., and it was "Resolved, That rate be made 25 cents per 100

lbs., C. L,. between East St. Louis, Cincinnati, Louisville, etc., and Tariff I. C. C. No. L-20 be corrected accordingly."

Above exhibit, consisting of five pages, is marked "Plaintiff's Exhibit Fraser No. 53."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in St. Louis, March 28th, 1900.

Meeting considered individual tariffs issued by the different roads members of this Committee, and Chairman called attention to a number of individual tariffs issued by different roads, members of this Committee; and, after general discussion, the following action was taken:

"Whereas, There are now in existence certain rates between East St. Louis, Cincinnati and Louisville, covered by individual tariffs which show rates less than those authorized by this Committee; and,

Whereas, There are certain rates published by this Committee between the same points, which are the result of individual tariffs issued, showing rates less than were authorized; therefore, be it

Resolved, That a special meeting of this Committee be held in this office on April 5th, to consider the above conditions, with the view to ascertaining if rates referred to cannot be restored to the authorized basis."

Record also shows resolution adopted fixing rates on railroad equipment, new, from Jeffersonville, Ind., to East St. Louis, as follows:

"Resolved, That the roads, members of this Committee, individually advise that, effective on legal notice, the following rates per car will be authorized on new railway equipment, viz. Private, parlor, dining and sleeping cars, $22.38; passenger cars. $18.65; baggage, mail and express

cars, $14.92; box, caboose flat, gondola, platform and tank cars, $10.41; from Jeffersonville, Ind., to East St. Louis, Ill."

The following resolution was also adopted:

"Whereas, The Chicago & Ohio River Committee have published a commodity rate on jeans and yarn, cotton, any quantity, from Cincinnati and Louisville to Chicago, therefore be it

Resolved, That the individual roads, members of this Committee, authorize the publication of rate 25 cents per 100 lbs., on jeans and yarn, cotton, any quantity, between East St. Louis, Cincinnati, Louisville, etc., effective on legal notice."

The following resolution was also adopted:

"Resolved, That the individual roads authorize the publication of the rate of 10 cents per 100 lbs., on grain and grain products, C. L., minimum weight, as per official classification, from East St. Louis to Cincinnati, Louisville, etc., effective April 17, 1900."

The following resolution was also adopted:

"Resolved, That the individual roads authorze the publication of proportional rate, $1.60 per gross ton, C. L., minimum weight 18 gross ton, on bituminous rock, from East St. Louis, Ill., to Cincinnati, Louisville, etc., effective on legal notice."

The question of eliminating Notes A and C, page 4, from Joint Freight Tariff No. I. C. C. B-21, providing for rates via Upper Mississippi River crossings, was considered, and the following resolution adopted:

"Resolved, That effective on legal notice, the Chairman eliminate from this Committee's tariffs, covering rates be-

tween East St. Louis, Cincinnati, Louisville, etc., notes "A" and "C", which refer to application of rates to Upper Mississippi River Crossings, and that the Chairman of the Cincinnati and Louisville Committees be advised of this elimination."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 54."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in Louisville, Ky., April 25th, 1900.

Record shows meeting considered individual tariffs issued by roads members of the Committee; and that at meeting of March 28th the above subject was referred to a special meeting called for April 5th, which meeting was postponed as the representative of one of the directly interested roads could not be present; and it was therefore arranged that the subject should be considered and disposed of at this meeting, but was again postponed on account of an interested member being unavoidably absent. The subject, however, was carefully considered, and the following resolution unanimously adopted:

"Whereas, It has come to the notice of this Committee that certain roads, members of this organization, have from time to time in the past issued individual tariffs of their own on various commodities, which issues are in direct conflict with the agreements and understandings of this Committee; therefore, be it

Resolved, That, commencing at once and continuing until the next regular meeting of this Committee, all members hereby obligate themselves not to issue any individual tariffs, and that no tariffs of any kind shall be promulgated except through the Chairman of this Committee."

A note in the record of this meeting shows that the absent

members, the T. H. & I., and the T. St. L. & C. K., have since voted in the affirmative.

The record shows the following resolution adopted:

"Whereas, The present authorized rate on fire works, C. L., minimum 20,000 lbs., is 47 cents per 100 lbs., between Chicago and East St. Louis, as per Chicago & St. Louis Traffic Association Tariff No. 24; therefore, be it

Resolved, That the individual roads, members of this Committee, authorize a rate of 47 cents per 100 lbs., on fire works (including fire crackers), C. L., minimum 20,000 lbs., between East St. Louis, Cincinnati, Louisville, etc., effective May 7th, and Joint Tariff I. C. C. No. B-22 be corrected accordingly."

The following resolution was also adopted:

"Resolved, That the individual roads, members of this Committee, authorize a rate of 88 cents per 100 lbs., on cotton sheeting, duck and drilling, any quantity, between East St. Louis, Cincinnati, Louisville, etc., effective on May 7th, and that Joint Tariff I. C. C. No. B-22 be amended accordingly."

Also the following resolution:

"Whereas, C. F. A. Information No. 2205, effective May 7th, 1900, authorizes that cotton-seed cake, cotton-seed hulls, and cotton-seed meal, C. L., be included in list of articles taking grain products rates; therefore, be it

Resolved, That the individual roads, members of this Committee, authorize that on and after May 7th, cotton seed cake, cotton seed meal, and cotton seed hulls be included in list of articles upon which the grain products rates apply, and that Joint Tariff No. B-22 be amended accordingly."

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 55."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, May 23rd, 1900.

The record contains the following resolution:

"Whereas, Unauthorized tariffs are in effect on spent tan bark, C. L., from Louisville to East St. Louis, it is

Resolved, That the individual roads, members of this Committee, authorize rate of 6 cents per 100 lbs. on spent tan bark, C. L., minimum weight 40,000 lbs., from Cincinnati, Louisville, etc., to East St. Louis, effective on legal notice, and Joint Tariff No. B-22 be amended accordingly."

Also the following: "Resolved, That the individual roads, members of this Committee, hereby give notice that the present rate of $22.00 per car on empty barrels, from East St. Louis to Louisville, will expire effective on legal notice, and that on and after that date the rates on this traffic will be as authorized in the Official Class'n., Joint Tariff No. B-22 to be amended accordingly."

The Chairman stated that the recommendation of the Louisville Freight Committee to establish same rate on tobacco siftings as at present in effect on unmanufactured tobacco, Louisville to East St. Louis, viz. 10 cents per 100 lbs., was submitted by Circular Letter May 7th, 1900, and resulted in an affirmative vote. The issue of an amendment to Tariff was delayed pending further consideration, and it was

"Resolved, That the individual roads, members of this Committee, authorize rate of 10 cents per 100 lbs., on tobacco siftings, in hhds., any quantity, between East St. Louis, Cincinnati, Louisville, etc., effective on legal notice, and Joint Freight Tariff No. B-22 be amended accordingly."

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 56."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in St. Louis, June 27th, 1900.

The record of this meeting shows that this Committee refused to accept less than local rates on traffic from the Southwest destined to points in the territory of this Committee.

Record also shows that meeting considered through rate and divisions on whiskey, Cincinnati, via East St. Louis, to Helena, Ark., and correspondence on the above subject was submitted. After a general discussion it was stated that the rates to Helena are a different proposition, as compared with rates to other Arkansas points, on account of Helena being a competitive point via water route, and it was

"Resolved, That there having been in effect for a number of years, divisions from Cincinnati and Cincinnati points, Louisville and Louisville points, to Helena, Ark., via East St. Louis, allowing the lines up to East St. Louis 40% of the through rate, that this Committee reaffirm the divisions, as a matter of record."

The question of routing of freight by the War Department U. S. A., via various routes to be settled for on short line distance, was considered, and, after general discussion, it was

"Resolved, That the Chairman advise J. B. Bellinger, Major and Quartermaster, U. S. V., that the proper representatives of the individual roads, members of this Committee, request me to advise that so far as transportation over their lines is concerned, bills of lading should be issued only on basis of their established tariffs, which are on file with the Interstate Commerce Commission at Washington, or individual quotations of representatives of the St. Louis-Cincinnati-Louisville Freight Committee roads, and that

individual bids will only apply via the routes which are named in connection with such quotations."

The following resolution was also adopted:

"Resolved, That the individual roads, members of this Committee, authorize that the present rates in effect from East St. Louis to Cincinnati, Louisville, etc., on cotton and cotton linters, compressed and uncompressed, C. L. & L. C. L., be made applicable on like traffic west-bound, effective on legal notice, and Joint Freight Tariff No. B-22 be amended accordingly."

The following resolution was also adopted:

"Resolved, That the individual roads, members of this Committee, authorize a proportional rate of 12 cents per 100 lbs., on hay, C. L., minimum 30,000 lbs., originating west of the Mississippi River, from East St. Louis to Cincinnati, Louisville, etc., effective on legal notice, and Joint Proportional Tariff No. B-22 be amended accordingly."

Letter from member was read on the subject of rate on boxes, empty, second-hand, returned, East St. Louis to Cincinnati and Louisville, in which it was stated that there can be forwarded from East St. Louis to Louisville a number of car-loads of empty boxes that came west filled with samples of leaf tobacco, if commodity rate could be established, as present rate of $30.00 per car is too high; and it was

"Resolved, That the individual roads, members of this Committee, authorize rate of 10 cents per 100 lbs., on boxes, empty, second-hand, returned, C. L., minimum weight 20,000 lbs., from East St. Louis to Louisville, effective on legal notice, and Joint Freight Tariff No. B-22 be amended accordingly."

Record also refers to C. F. A. Information Nos. 2325 and 2326, making Trans-Continental divisions on traffic

from interior points in California, Arizona, Washington and Oregon. The Chairman stated that Section C of the agreement provides that Pacific Coast traffic from and to Cincinnati, Louisville, etc., via East St. Louis, on which roads of this Committee get their regular division of through rates, as authorized by C. F. A., be included in the monthly statements, effective June 25th, 1900. C. F. A. issued Information Nos. 2325 and 2326, making Trans-Continental division of rates apply on a number of interior points, named in Trans-Continental Circular 24-A, effective June 25th, 1900, pages 16 to 23, both inclusive. The Chairman further stated that he brought this matter before the Committee to ascertain if traffic to and from these points in which this Committee's roads get their authorized Trans-Continental divisions, be included in the monthly tonnage statements; and it was

Resolved, That all traffic to and from Cincinnati, Louisville, etc., via East St. Louis, to points named in Trans-Continental Freight Bureau's Circular No. 24-A, effective June 25th, 1900, pages 16 to 23, both inclusive, on which roads of this Committee get their authorized Trans-Continental divisions, be included in the monthly tonnage and revenue statements issued by the Chairman, same as traffic from Pacific Coast points."

Attention was called by one of the members to the reported diversion of packing-house traffic from East St. Louis and via this gateway from Missouri River points, in consequence of the tariff rates not being maintained via other routes, etc., and the Chairman was instructed to investigate. It was decided that no change should be made in the rates from or via East St. Louis without further consideration, or due notice to all parties interested.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 57."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, September 26th, 1900.

The following resolution was passed, with reference to divisions of rates on cotton piece goods, from Dallas, Texas, via East St. Louis, to Louisville, and like traffic from Galveston, and other Texas points:

"Resolved, That the through rate 43 cents, and division authorized on this traffic from Dallas, Texas, via East St. Louis, to Louisville, viz.: 26.7 cents Dallas to East St. Louis, 16.3 cents per 100 East St. Louis to Louisville, be made to apply from all Texas points taking same rate as Dallas, via East St. Louis, to Louisville, Cincinnati, etc., effective at once."

The following resolution was also adopted:

"Resolved, That the Chairman issue amendment to Joint Freight Tariff I. C. C. B-22, correcting rate of 15 cents per 100 lbs. on glycerine, so as to make same read, "Glycerine, crude, C. L., minimum weight, 30,000 lbs., 15 cents per 100 lbs., from East St. Louis to Cincinnati, Louisville, etc.' effective on legal notice."

Also the following, with reference to establishing through rate of 22 cents per 100 lbs., on cement plaster, C. L., Acme, Texas, via East St. Louis, to Cincinnati, Louisville, etc., and it was

"Resolved, That the Chairman be authorized to personally confer with Mr. A. T. Drew, G. F. A., M. K. & T., and say to him that this Committee is willing to consider a proposition for the making of a through rate on cement plaster, from Acme, Texas, to Louisville and Cincinnati, minimum weight 60,000 lbs., per car, the present through rate being 26 cents, based on a combination of locals, 18 cents to East St. Louis, and 8 cents East St. Louis to Cincinnati and Louisville, the difference between the through

rate, 26 cents, and the rate wanted being 4 cents, we are willing to divide this difference on a pro-rate, rate per rate, this would figure 69.23% for the M. K. & T. and 30.77% for the lines east from East St. Louis. The 22 cent rate on this basis, therefore, would divide M. K. & T. 15.2 cents, lines east from East St. Louis to Cincinnati and Louisville, 6.8 cents per 100 lbs. If this proposition is satisfactory to the M. K. & T. R. R., that road is then to issue through tariff-making rate of 22 cents from Acme, Texas, to Cincinnati, Louisville, etc., and the Chairman is to issue division sheet showing divisions as above explained. Copy of this division sheet to be furnished each member of this Committee. This is not to affect the rate from East St. Louis to Cincinnati and Louisville, and the special divisions authorized will not be included in the tariffs of this Committee."

The following resolution was also adopted:

"Resolved, That the individual roads, members of this Committee, advise that, effective on legal notice, 6th class rates will apply on earth paint, iron or ochre, dry in sacks, barrels, bags or bulk, C. L., minimum weight as per official class'n., between East St. Louis, Cincinnati, Louisville, etc., and the Chairman amend Joint Freight Tariff I. C. C. No. B-22 accordingly."

Meeting considered unauthorized tariffs issued by individual roads, members of this Committee, and the subject was laid over until the next meeting, with the understanding that in the meantime the direct lines are to meet and endeavor to reach a satisfactory understanding.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 58."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, October 24th, 1900.

Meeting considered the matter of drayage on whiskey at Louisville, destined to St. Louis and points beyond; and the record shows that the subject was considered at meeting of September 26th, and referred to the Louisville Freight Committee for their consideration, and the Chairman stated that he had not received any information as to action taken by that Committee, and it was resolved that it was the opinion of the individual members of this Committee that the subject was a local question and one that should be handled by the Louisville Committee.

The record shows the meeting considered the question of unauthorized rates on plug tobacco, barbed wire, etc., issued by individual roads, members of this Committee; and that at meeting of September 26th, the subject of rates on above commodities, between Louisville and East St. Louis, was considered and was referred to the direct Louisville lines, and at meeting of representatives of said lines it was found impracticable to make any change in the present rates on tobacco, until January 1st, 1901, and in view of the same, it was

"Resolved, That the subject of unauthorized rates on tobacco, and other unauthorized rates issued in individual tariffs of the roads, members of this Committee, be laid over until the November meeting, at which time it is thought definite action can be taken with a view to the restoration to the tariff on all unauthorized rates, effective January 1st, 1901, and that the Chairman call the special attention of the representatives of the direct lines to this resolution."

The record shows meeting considered application for reduced rates on broken safes, forwarded from East St. Louis to Cincinnati, for repairs, and the application was declined.

Record also shows that Committee considered unauthorized rate published by Mr. Cale, Chairman Southwestern Freight Committee, in Division Sheet No. 14, published September 10th, 1900, and Chairman Fraser was instructed to continue efforts to have Southwestern Committee correct their issue to proper basis.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 59."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in St. Louis, November 28th, 1900.

The subject of unauthorized rates on plug tobacco, barbed wire, etc., issued by individual roads, members of this Committee, was considered, and after a general discussion it was

Resolved, That all roads, members of this Committee, having in effect tariffs naming unauthorized rates on various commodities, between points under the jurisdiction of this Committee, withdraw same, effective January 1st, 1901."

The following resolution was also adopted:

"Resolved, That rate of 10 cents per 100 lbs, be authorized on bar iron, beams and steel plates, C. L., minimum weight 30,000 lbs., from Louisville to East St. Louis, effective January 1st, 1901, and Joint Freight Tariff I. C. C. No. B-22 be amended accordingly."

Also the following resolution:

"Resolved, That the Chairman be instructed to reply to A. G. F. A. Mo. Pac. Ry., that the roads, members of this Committee, will accept on shipments of cotton seed products, C. L., forwarded from all points in Arkansas, except Texarkana, via East St. Louis, to Cincinnati and Cincinnati

points, Louisville and Louisville points, (under the jurisdiction of this Committee) 40 per cent of the published through rates, east of East St. Louis, allowing 60 per cent to lines west."

Also the following resolution,

"Resolved, That the Chairman notify G. F. A., M. K. & T. Ry., that the lines, members of this Committee, will join the M. K. & T. Ry. and its connections in a through rate of 22 cents per 100 lbs. on cement plaster, C. L., minimum weight, capacity of car, from Acme, Texas, to Louisville and Louisville points, Cincinnati and Cincinnati points (under the jurisdiction of this Committee), and will accept as their proportion east of East St. Louis, 6 cents per 100 lbs. to the points referred to; and that G. F. A., M. K. & T. Ry. be requested, in addition to issuing through tariff, to issue a separate division sheet covering it, as this Committee does not deem it advisable to publish in its tariffs the proportional rate of 6 cents agreed to above. The Chairman to advise if above proposition is accepted by the M. K. & T. Ry., and date effective."

Correspondence from Chairman C. F. A. was read, relative to having proportional rate of 4 cents per 100 lbs. on grain, C. L., East St. Louis to Louisville, etc., withdrawn, on account of the combination of locals via Louisville to Virginia cities, etc., making less than the authorized through rate from East St. Louis to said points, and suggesting a conference of all lines interested, etc., and it was

"Resolved, That Chairman Tucker be notified that we favor his suggestion for a joint conference of all parties interested, to confer regarding rates on grain to Louisville, etc., and request him to arrange for said meeting in St. Louis as early as practicable and this Committee will be present; and it is further

Resolved, That we consider it very necessary that Mr.

Tucker be the Chairman of said meeting, so that he may have full information on the situation."

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 60."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, Ky., December 19th, 1900.

The subject of withdrawal of tariffs and unauthorized rates between points under jurisdiction of this Committee, was considered, and all roads advised that all unauthorized tariffs or rates had been cancelled or would expire, effective January 1st, 1901.

The following resolution relating to rate on starch between East St. Louis, Louisville, etc., was passed,

"Resolved, That rate of 10 cents per 100 lbs. be authorized on starch, C. L., minimum weight as per official classification, between East St. Louis, Cincinnati and Cincinnati points, Louisville and Louisville points (under the jurisdiction of this Committee), effective January 1st, 1901; this in line with rate published by C. & O. R. Committee."

"Note: Starch is not to be included in list of articles taking grain products rate."

The following refers to proportional rate on hay:

"Resolved, That the proportional rate of 12 cents per 100 lbs. on hay carried in proportional tariff I. C. C. B-23, be withdrawn, effective January 3rd, 1901."

The Chairman directed attention to C. F. A. Advice Letters No. F-718 and 768, submitting proposition to establish 6th class rates on cotton seed mill and cotton factory sweepings from Ohio River Crossings and East St. Louis to all points in C. F. A. territory, and the following resolution was adopted:

"Resolved, That individual roads, members of this Committee, advise that 6th class rates be established on shipments of cotton seed mill and cotton factory sweepings, used as paper stock, in bales, machine compressed, carload minimum weight in cars 30 feet and under in length, 30,000 lbs. in cars over 30 feet in length, 38,000 lbs., between all points under the jurisdiction of this committee, effective January 1st, 1901, and Joint Freight Tariff I. C. C. No. B-22, be amended accordingly."

"Note: It being understood that the above resolution will not become effective unless the proposition contained in C. F. A. Advice Letters F-718 and 768 are authorized by the C. F. A."

A letter from A. G. F. A., Mo. Pac. Ry., was read, asking lowest rate lines East of East St. Louis would accept on low grade molasses, East St. Louis to Cincinnati, Louisville, etc., when from Sugarland, Texas, and the following resolution was adopted:

"Resolved, That it is the individual opinion of the roads, members of this Committee, that they cannot consistently accept any lower rating on this traffic than basis provided therefor in the Official Class'n., viz. 5th class carloads, and A. G. F. A. Peabody be advised accordingly."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 61."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, January 23rd, 1901.

Meeting considered through rates and divisions on traffic from Cincinnati, Louisville, etc., to Arkansas and Louisiana points, via East St. Louis, and the following resolution was adopted:

"Resolved, That the roads, members of this Committee, will accept 30 per cent of the published rates from Cincinnati and Cincinnati points, Louisville and Louisville points, (Under the jurisdiction of this Committee, to Little Rock, with local as maximum, as division of through rates to all points on the St. L. & S. F. R. R. in Arkansas, St. L. I M & S. Ry. in Arkansas, and points in Louisiana on the St. L. I M. & S., Camden Branch, south of Eldorado, Ark., and all points on the St. Louis Southwestern Ry. in Louisiana and Arkansas, except Shreveport and Texarkana. Also excepting other points in Louisiana to which agreed per cents are now authorized.

If it is found necessary to establish commodity rate less than class "E", we will accept 30 per cent of the published Class "E" rate as minimum."

Meeting also considered percentage divisions of through rates from Louisville, via East St. Louis, to Texas points named in Southwestern Division Sheet No. 14, Item 96, page 20, and the following resolution was adopted:

"Resolved, That the Chairman reply to Mr. Cale to the effect that the divisions he refers to are in accordance with Southwestern Freight Committee's Division Sheet No. 14, item 96, and that the divisions as published are in accordance with the understanding of the agreement made by the members of this Committee, and that the Chairman call Mr. Cale's attention to the fact that cement does not originate at New Albany, but originates at local stations in Indiana on the Pan Handle, and that Texas percentages are not applicable from local stations on Louisville Divisions of the Pan-Handle, and that this Committee has no jurisdiction."

The proposition was considered to have rates between Cincinnati, Louisville and Evansville under the jurisdiction of this Committee, and the following resolution was adopted:

"Resolved, That rates applying on traffic between Evansville, Louisville and Louisville points, Cincinnati and Cincinnati points, be handled under the jurisdiction of the St. Louis-Cincinnati-Louisville Freight Committee.

The Louisville & Evansville Mail Line having expressed their willingness to become a member of this Committee for the handling of the traffic mentioned, the Evansville and Terre Haute R. R. be also invited to become a member, effective February 1st, 1901. And it is further

"Resolved, That the Chairman call a meeting at Louisville, at an early date, of Rate Clerks, to check in rates between Cincinnati and Evansville, and Louisville and Evansville."

Meeting also considered rates on pig iron, billets, brooms, etc., between East St. Louis, Cincinnati, Louisville, etc.; and the Chairman stated that at meeting at Indianapolis on the 17th inst. it was agreed to reaffirm rates now in effect from East St. Louis and Ohio River crossings to C. F. A. points.

The following named gentlemen were elected to serve on the Executive Committee for the year 1901: R. A. Campbell, N. W. Taylor, and W. D. Holliday.

The Chairman called attention to C. F. A. Information No. 2617, authorizing rates on articles of iron and steel manufacture, and the following resolution was adopted:

"Resolved, That the individual roads, members of this Committee, advise that they will establish rate on articles of iron and steel manufacture, as per rates and conditions authorized in C. F. A. Information No's. 2617 and 2630, corrected, between East St. Louis, Cincinnati and Cincinnati points, Louisville and Louisville points, effective Feb. 1st, and that Joint Freight Tariff I. C. C. No. B-22 be amended accordingly."

Chairman submitted letter from member requesting reduction in rate on drums, casks, or tubes, iron, empty, second-hand, returned, C. L., minimum weight 24,000 lbs., between East St. Louis, Cincinnati and Cincinnati points, Louisville and Louisville points, effective Feb. 1st, and that Joint Freight Tariff I. C. C. No. B-22 be amended accordingly."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 62."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, Ky., January 30th, 1901, the meeting being called in accordance with action taken at meeting of Jan. 23rd.

After general discussion of the subject, it was not deemed practicable to dispose of the subject at this meeting, and it was

"Resolved, That each line, member of the St. Louis-Cincinnati-Louisville Freight Committee furnish the Chairman of that Committee with copies of their tariffs and rates now in effect, applying between Evansville, on the one hand, and Louisville, East St. Louis and Cincinnati, on the other, and that the Chairman prepare a comparative statement as between the different tariffs and the different points, and submit the same by mail, it being understood that the whole matter will be considered at the next regular meeting of the Committee, which will be held in St. Louis, on the fourth Wednesday of February.

It is further understood that the boat lines will operate the following differentials under whatever rates are established by the rail lines, between Evansville on the one hand, and Louisville and Cincinnati on the other, which water differentials are as follows:

1	2	3	4	5	6
5	4	3	2	2	2

Pending the meeting at which this matter is to be further considered, it is understood that no changes can be made by any member of the St. Louis-Cincinnati-Louisville Freight Committee in the rates now in effect between Evansville on the one hand, and Louisville and Cincinnati on the other, except under the rules of this Committee."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 63."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held by the rate clerks, in the office of the Chairman, February 26th, 1901, the object of the meeting being to check in rates between Evansville, Louisville and Cincinnati, in accordance with resolution adopted at meeting of January 23rd, 1901.

After a general discussion, the individual lines gave notice that the class rates via rail lines between Evansville and Cincinnati would be as follows:

1	2	3	4	5	6
40	34	25	17	15	12

The class rates via the boat line to be the following differentials less than the class rates established via rail routes:

1	2	3	4	5	6
5	4	3	2	2	2

It being further understood that when a commodity rate is established which is the same as a standard class rate, the boat line rate will be the differential for that class, less than via rail, and where a commodity rate is established that is

not a class rate the boat line rate will be the differential less than the next nearest class rate via rail.

A note in the record reads as follows:

"Note:—The rates on live stock, C. L., between Evansville and Cincinnati were referred to the Freight Committee to be considered at their meeting on the 27th inst. It being understood that the rates decided upon by the Freight Committee are to be named in the tariff when issued."

The rates between Evansville and Louisville were then taken up, and the individual lines gave notice that the rates via rail lines would be the following differentials less than the rates between Evansville and Cincinnati, viz.:

1	2	3	4	5	6
12	10	5	3	3	2

which establishes the following rail rates between Evansville and Louisville:

1	2	3	4	5	6
28	24	20	14	12	10

The class rates via the boat line to be the following differentials less than the class rates established via rail routes, viz.:

1	2	3	4	5	6
5	4	3	2	2	2

The rule regarding establishing commodity rates via the boat line between Evansville and Louisville are to be the same as govern between Evansville and Cincinnati, and which are noted above.

"Note: The rate on plows, Louisville to Evansville, was referred to the Freight Committee, to be considered at their

meeting, 27th inst. It being understood that the rates decided upon by the Freight Committee are to be named in the tariff when issued."

Meeting considered the question of the manner of issuing the tariffs, and it was

"Resolved, That the Chairman submit to the Freight Committee proposition to issue separate tariffs, one to name rates between Evansville and Cincinnati, and the other to name rates between Evansville and Louisville; the tariffs to be of different colors and a proof copy of same to be sent to each member for their check and approval before final issue."

And it was further

"Resolved, That the question of cancelling the tariffs of the individual lines which are at present in effect between Evansville and Cincinnati, and Evansville and Louisville, be referred to the Freight Committee at their meeting to be held 27th inst., for their consideration and action."

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 64."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, February 27th, 1901.

Meeting considered through rates and divisions on traffic from Cincinnati, Louisville, etc., to Arkansas and Louisiana points, via East St. Louis, which subject had previously been considered at meeting of January 23rd, 1901. The Chairman stated that, as instructed, he had submitted the proposition to the Southwestern lines, and received joint letter from Messrs. Davis and Peabody accepting the proposition named in resolution adopted at meeting of this Committee on January 23rd; and after due consideration, it was

"Resolved, That the subject be left in the hands of the

Chairman, he to get a further reply from the Southwestern roads as regards the St. L. & S. F. R. R., and to report result to the members of this Committee by circular letter, or bring the subject up at the next meeting, as circumstances warrant."

Meeting considered through rates and divisions on cotton seed products, C. L., Arkansas points, via East St. Louis to Cincinnati, Louisville, etc., and the following resolution was adopted:

"Resolved, That the Chairman be instructed to reply to A. G. F. A. Mo. Pac. Ry. that the roads, members of this Committee, will accept on shipments of cotton seed products, C. L., forwarded from all points in Arkansas, except Texarkana, via East St. Louis to Cincinnati points, Louisville and Louisville points (under the jurisdiction of this Committee), 40 per cent of the established through rates from the original point of shipment, with a minimum of 8 cents per 100 lbs., for the lines east of East St. Louis."

Meeting also considered rates between Evansville and Cincinnati, and Evansville and Louisville, and the Chairman stated that the rate clerks, at meeting of the 26th inst. checked in rates between points named above in line with resolution adopted at meeting 23rd ult., except the rates on live stock between Evansville and Cincinnati, and on plows between Louisville and Evansville, which were referred to the Committee for their consideration; and the following resolution was adopted:

"Resolved, That the rates on live stock, C. L., between Evansville and Cincinnati, will be as follows:

Horses and mules, C. L., Rail 25 cents, Boat line, 23 cents.

Cattle, calves, sheep and hogs, C. L., Rail 15 cents, Boat line 13 cents; subject to rules and minimum weights of the

Official Class'n.; and on plows, C. L., between Evansville and Louisville, via rail 10 cents per 100 lbs., minimum weights as per Official Class'n.

Note: Mr. Williams requested that the river rate on plows be left blank, stating, however, that he would not, under any circumstances, make a less rate via boat than the agreed differential of two cents per 100 lbs."

The Chairman requested information regarding the issue of tariffs on the traffic between Evansville and Cincinnati, and Evansville and Louisville; and it was

"Resolved, That the Chairman be instructed to issue separate tariffs, one naming rates between Evansville and Cincinnati, and the other naming rates between Evansville and Louisville; and it is further

Resolved, That the individual roads, carrying rates between Evansville and Cincinnati and Evansville and Louisville, cancel their individual tariffs, effective on same date that the tariffs of this Committee which are authorized at this meeting become effective; and it is further

Resolved, That the Chairman write to G. F. A. E. & T. H. R. R., requesting that their tariffs, covering rates from Evansville to Louisville and Cincinnati, be put in line with the tariffs issued by this Committee. The Chairman to send the G. F. A., E. & T. H. R. R., copies of tariffs issued, covering this traffic."

The Chairman also asked for information as to the duties required of this office in connection with this matter—meaning rates between Evansville and Cincinnati, and Evansville and Louisville—and was informed that only the publication of tariffs would be required, he to have nothing to do with copies of billing, compiling statistics, etc.; and after a further discussion regarding expenses incurred in issuing said tariffs, the following resolution was adopted:

"Resolved, That the Louisville and Evansville Mail Co., be charged with one per cent of the total monthly expense of the St. Louis-Cincinnati-Louisville Freight Committee, the balance to be divided between the other lines, members of the Committee, as provided for in Article IX of the Articles of Organization."

Chairman submitted application to establish rate of ten cents per 100 lbs. on fertilizer, C. L., East St. Louis to Cincinnati, Louisville, etc., and the following action was taken:

"Whereas, The present rate on soap stock, tallow, grease, C. L., between Chicago and East St. Louis and Cincinnati, Louisville, etc., is 10 cents, and on fertilizer 12 cents per 100 lbs., it was

Resolved, That the Chairman correspond with the Secretary of the C. & O. R. Committee, with a view to having the rates on soap stock, tallow, grease, etc., advanced to the same rate as fertilizer (12 cents per 100 lbs.), if possible; If, however, it is found impracticable to advance the rates on soap stock, etc., it is recommended that the rates on fertilizer(C. L., be established at 10 cents per 100 lbs., minimum 30,000 lbs. The date of advance or reduction to be named later. The result of the correspondence to be submitted to all members by circular letter."

The Chairman submitted letter from the B. & O. S. W. R. R., regarding C. F. A. Information No. 2650, which establishes grain rates on kaffir corn and corn-meal, and asked if under this ruling the tariff of the Committee should be corrected so as to eliminate kaffir corn from the grain products list, and include it under list of articles taking grain rates, and it was

"Resolved, That the Chairman, in next issue of the Committee's tariffs eliminate kaffir corn from list of articles taking grain products rates, and include same in the list entitled to the grain rates."

The Chairman read correspondence with the G. F. A. B. & O. S. W. R. R., regarding foot-notes on page 2 of I. C. C. Tariff No. B-23, proportional rates on grain, C. L., to and from the different territories via the several lines, and it was

"Resolved, That the Chairman correct (with pen and ink) copies of the tariff in line with B. & O. S. W. R. R.'s. suggestion, and submit same to the members of the Committee for their vote as to whether tariff shall be reissued as suggested. The result to be sent to the members by circular letter.

Meeting considered minimum weights on light and bulky freight. The Chairman called attention to the practice of the L. H. & St. L. Ry. transporting part lots of C. L. shipments at C. L. rate, on which Rule 5-C of the official classification does not apply. In line with statement made by G. F. A. L. H. & St. L. Ry., at meeting December 19th, 1900 (See Proceedings, page 3), he stated again to-day that if the authorized minimum weight of any traffic was in excess of the weight that could be loaded in their own equipment, and they could not, at the time, get any equipment larger than their own, he would not agree to maintain the minimum. The A. G. F. A. Southern Ry. stated that if that was to be the practice of L. H. & St. L. Ry., the Southern Ry. would handle traffic in like manner. After general discussion, no action was taken.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 65."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, Ky., April 24th, 1901.

On the question of through rates and divisions on cotton seed products, C. L., Arkansas points, via East St. Louis, to

Cincinnati, Louisville, etc., letter was read from A. G. F. A. Mo. Pac. Ry., as follows:

"We have concluded to accept the proposition submitted in your letter of Feb. 28th, regarding divisions on cotton seed products via East St. Louis to Cincinnati, Ohio, and Louisville, Ky., and will issue division sheet on this basis, understanding that the local rate is to apply as maximum east of East St. Louis."

Letter was read from a member calling attention to the great risk assumed by railroad companies in the transportation of race horses and attendants, and the following recommendation was made:

"Recommended, That rate be authorized between East St. Louis, Cincinnati, Louisville, etc., on race horses (including one attendant in charge of each horse) $110.00 per car. The Uniform Live Stock contract to be executed, limiting the liability of the carriers to not exceeding $100.00 for each animal, and not exceeding $1,200.00 upon any carload. Tariff to be effective on legal notice."

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 66."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, June 26th, 1901.

Meeting considered through rates and divisions on traffic from Cincinnati, Louisville, etc., to Arkansas and Louisiana points, via East St. Louis. The subject was considered at meeting of April 24th, and in absence of information from the Southwestern roads, the subject was left to Chairman to advise later by circular. The delayed correspondence was transmitted to members by circular letter on May 6th, stating that the arrangement became effective May 20th.

Subsequently, the St. L. & S. F. R. R. gave notice that they could not carry out the previous agreement, and their letters were communicated to members by circular letter on June 7th.

The question having been raised as to whether exceptions to the classification on agricultural implements, vehicles, etc., Arkansas Freight Committee Exceptions No. 1-A, Jan. 5th, 1901, Rule 5—G. W. Cale, Chairman, were considered in making the percentage division arrangement on Arkansas and Louisiana traffic, and circular letter, May 21st, was issued, asking vote on proposition. The vote was not unanimous, as stated in circular letter May 29th.

The Committee are now requested to take action on St. L. & S. F. R. R. revised proposition (See circular letter June 7th), and regarding exceptions to classifications (See circular letters May 21st and 29th). After consideration of the subjects, it was

"Resolved, That the resolution adopted at meeting Jan. 23rd, and transmitted to the Southwestern roads by letter Jan. 24th, naming a basis for divisions on traffic from Cincinnati, Louisville, etc., via East St. Louis, to Arkansas and Louisiana points, which was accepted by the St. L. S. W., Mo. Pacific, and St. L. & S. F. Railroads, and became effective May 20th, is hereby cancelled, so far as it applies to the St. L. S. F. R. R., G. F. A. Russell having advised by letters June 4th and 6th that he could not comply with the proposition. (See Circular Letters May 6th and June 7th, file B-119). The Chairman to notify the G. F. A., St. L. & S. F. R. R. of this action, in answer to his letters June 4th and 6th.

The meeting also considered the matter of rates on lard tanks, galvanized iron, empty, returned, Louisville to East St. Louis, and the following was adopted:

"Whereas, The present authorized rate on second-hand

iron drums, empty, returned, is 17 cents per 100 lbs., from Louisville to East St. Louis; therefore, be it

Resolved, That a rate of 17 cents per 100 lbs. be authorized on lard tanks, galvanized iron, empty, returned, L.C.L., Louisville to East St. Louis, the Chairman to amend tariff, effective on legal notice."

Application was considered for proportional commodity rate on sulphuric acid in tank cars, East St. Louis to Louisville, Ky. Correspondence with a member was read, urging reduction in rate from East St. Louis on traffic from the west, in competition with rate from LaSalle, Ill., and it was

"Resolved, That this matter be referred to the Chairman for a conference with the Mo. Pacific and other western roads interested. This with the idea that they should establish a through tariff from Kansas City to Louisville at a figure which will be in line with the rates from other similar districts on the same article; any difference in the through rates as now established on the basis of the two locals, to be divided on basis of pro-rate, rate per rate, as between the western roads and the roads leading east from East St. Louis to Louisville."

The matter of through rates to Springfield, Mo., from Louisville, Ky., as against through rates to Springfield from Chicago, was considered, and after discussion, it was

"Resolved, That a Special Committee, consisting of Chairman Fraser and Mr. R. A. Camubell of St. Louis, be appointed to have a conference with the Frisco line, for the purpose of ascertaining whether they will accept on shipments from Cincinnati and Louisville the same proportion as they receive on traffic from Chicago; and if so, then the Chairman of this Committee be authorized to issue a through tariff from Cincinnati and Louisville to Springfield,

Mo., on the same basis of through rates as govern from Chicago. Division sheet to be issued by Chairman Fraser allowing the lines west of East St. Louis the same proportion as they receive on Chicago traffic. The roads from Cincinnati and Louisville to accept the difference as their proportion to East St. Louis."

Meeting considered rates on sand, and letters from Sec'y C. & O. R. Committee submitted, requesting advance in rate on sand, C. L., from Klondike, Mo., and from East St. Louis, in line with rates from points in Illinois, via Chicago, to Cincinnati, Louisville, etc., and it was

"Resolved, That the rate on glass house sand be made at $1.50 per net ton, C. L., minimum marked capacity of car, East St. Louis to Cincinnati, Louisville, etc., the Chairman to amend tariff, effective on legal notice."

The question of application of Official Classification rules on commodity rates was discussed, and after consideration the following was adopted:

"Resolved, That unless provided for in the tariff, the Official Classification rules should in all cases apply, except where the Chicago & Ohio River Committee publish rates and minimums in conflict therewith, in which case the Chicago and Ohio River Committee action will be the rule governing for this committee."

The above exhibit, consisting of five pages, is marked "Plaintiff's Exhibit Fraser No. 67."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, September 25th, 1901.

The matter of divisions on traffic from Arkansas, via East St. Louis, to Cincinnati, Louisville, etc., was brought up by correspondence received from several members, requesting information as to authority for rates and divisions named

in proof sheet of Mo. Pacific Ry. division sheet No. 1, dated April 24th, 1901, to Arkansas Freight Tariff No. 3 (corrected), dated April 9th, 1901.

The divisions named not having been authorized by this Committee, a conference with Committee of Arkansas lines was arranged for. After a general discussion, and suggestions being made by both parties, which were not acceptable to all, a resolution was unanimously adopted by the St. Louis-Cincinnati-Louisville Freight Committee, as follows:

"Resolved: That percentage divisions between Little Rock and Pine Bluff and Louisville and Cincinnati, via East St. Louis, be established on the basis of short line distances, east and west of the river, and that Mississippi and Ohio River bridge tolls be deducted before pro-rating. The basis of divisions to apply also to points in Cincinnati and Louisville territories (under the jurisdiction of the St. Louis-Cincimati-Louisville Freight Committee), and to points in Arkansas taking the Little Rock and Pine Bluff rates."

The Arkansas Committee being called upon for their vote, replied that they could not vote favorably on the resolution as they were only a Committee appointed by the Arkansas Freight Committee, but would have the proposition considered by the Freight Committee as a whole.

The meeting considered application for same commodity rate on lead dross and lead skimmings as in effect on lead ashes, and the following resolution was adopted:

"Resolved, That the individual roads, members of this Committee, authorize rate on lead dross and lead skimmings, carloads, on same basis as in effect on lead ashes, per gross ton, between East St. Louis-Cincinnati-Louisville, etc., effective on legal notice, and that Joint Freight Tariff I. C. C. No. B-25 be amended accordingly."

Above exhibit, consisting of five pages, is marked "Plaintiff's Exhibit Fraser No. 68."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, Ky., October 23rd, 1901.

Meeting considered application for reduced rate on glass sand, East St. Louis to New Albany, Ind., and by resolution the subject was laid over until the next meeting, to be held November 20th; and in the meantime, the Chairman to correspond with Chairman C. F. A., with the view of securing a conference of roads interested in the transportation of glass sand, for the purpose of establishing equitable rates on this traffic from all glass sand producing points.

At the request of a member, the following resolution was adopted:

"Resolved, That the tariff be amended making rate of 15 cents per 100 lbs. on iron bath tubs, C. L., minimum 20,000 lbs., apply from Cincinnati, Louisville, etc., to East St. Louis, effective on legal notice."

The following resolution was also adopted:

"Resolved, That tariff be amended making rate of 12 cents per 100 lbs. on glass bottles and fruit jars, C. L., minimum 26,000 lbs., apply from Cincinnati, Louisville, etc., to East St. Louis, effective on legal notice."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 69."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, Ky., January 22nd, 1902.

The following resolution was adopted:

"Resolved, That Joint Freight Tariff I. C. C. No. B-25 be amended, effective on legal notice, making rate on man-

tels, wood (crated or boxed) L. C. L., 40 cents per 100 lbs., between East St. Louis, Cincinnati, Louisville, etc."

Also the following:

"Resolved, That Joint Proportional Tariff I. C. C. No. B-24 be amended, effective on legal notice, making rate on phosphate rock, crude, C. L., minimum 18 gross ton, $1.40 per ton, between East St. Louis, Cincinnati, Louisville, etc., same as now in effect west-bound."

Also the following resolution:

"Resolved, That Joint Freight Tariff I. C. C. No. B-25 be amended, effective on legal notice, making rate on phosphate rock (lump or ground), in bulk, C. L., minimum 15 gross ton, $2.00 per ton, between East St. Louis, Cincinnati, Louisville, etc., same as in effect westbound."

Also the following resolution was adopted:

"Resolved, That the Joint Freight Tariff I. C. C. No. B-25 be amended, effective on legal notice, making tobacco stems, C. L., minimum weight 24,000 lbs., 10 cents per 100 lbs., East St. Louis to Louisville."

The following resolution was also adopted:

"Resolved, That Joint Rate Tariff I. C. C. No. B-25 be amended, effective on legal notice, making rate on brass ashes, C. L., minimum 15 gross ton, same rate as on iron and steel billets, C. L."

Also the following:

"Resolved, That Joint Freight Tariff I. C. C. No. B-25 be amended, effective on legal notice, making rates, East St. Louis to Louisville, on cider and vinegar kegs, 4th class, C. L., minimum weight 10,000 lbs., in cars not exceeding 36 feet in length. (Subject to Rule 27—Rule 5-C not to apply)."

Meeting considered application for reduced rate on glass sand, East St. Louis to New Albany, Ind. This subject was last considered at meeting on October 23rd, and laid over pending action by the C. F. A. naming rates from and to sundry points. Meeting was called by C. F. A. Advice Letter G-506½ for November 21st, postponed by Advice Letter G 523½ to regular meeting in December, and called again by Advice Letter G-590½ for January 10th. At the meeting of January 10th it was

"Recommended, That the Chairman obtain from roads into Chicago, Peoria, East St. Louis and Kankakee, memorandum of rates from pits to those points, and arrange for another meeting.

Resolved, That check of sand glass rates be made from all producing points west of the Indiana-Illinois State line, and that the basis be made with the idea of obtaining remunerative rates that any change in rates that may be deemed advisable be not effective until after July 1st, 1902."

Meeting also considered rates on whiskey in wood, any quantity, and adopted the following resolution:

"Resolved, That the Official Classification basis be adopted on carloads and less carloads of whiskey and other liquors, in wood, conditioned on same basis being adopted by the Chicago and Ohio River Committee."

The following were elected on the Executive Committee for the year 1902: Messrs. R. A. Campbell, N. W. Taylor, and Walter Nichols.

Meeting considered the matter of rating and minimum carload weights on vehicles, and C. F. A. Information No. 3141 was presented to the Committee, and the following resolution adopted:

"Resolved, That the St. Louis-Cincinnati-Louisville Freight Committee adopt the rating and minimum carload

weights on vehicles, as per C. F. A. Information No. 3141, effective January 27th, expiring July 1st, 1902."

Above exhibit, consisting of five pages, is marked "Plaintiff's Exhibit Fraser No. 70."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in St. Louis, February 18th, 1902.

The following resolution was adopted:

"Resolved, That amendment to I. C. C. No. B-27 be issued, making rate on tobacco stems, C. L., minimum weight 24,000 lbs., from East St. Louis to Louisville, Ky., 10 cents per 100 lbs."

The following resolution was also adopted:

"Resolved, That amendment be issued to I. C. C. No. B-27 naming rate of 10 cents per tie from Louisville and Cincinnati to East St. Louis on ties, hewed, Railroad, not exceeding 7 in. by 8 in., 8½ feet long, C. L., minimum 200 ties."

The following resolution was adopted:

"Resolved, That I. C. C. No. B-27 be amended, making rate on wood mantels, C. L., minimum weight 16,000 lbs., from Cincinnati, Louisville, etc., to East St. Louis, 25 cents per 100 lbs."

It was also

"Resolved, That I. C. C. No. B-27 be amended in line with C. F. A. Information No. 3150."

The following resolution was also adopted:

"Whereas, The present published rate on farm wagons, L. C. L., knocked down, from Owensboro, Ky., to Louis-

ville, Ky., when for points beyond, is 15 cents per 100 lbs.; therefore, be it

Resolved, That the rate on farm wagons, L. C. L., knocked down, from Evansville, Ind., to Louisville, Ky., when for points beyond, be made 15 cents per 100 lbs., and tariff be amended accordingly."

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 71".

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in St. Louis, February 18th, 1902, which meeting convened pursuant to call dated February 10th, File B-419. Mr. M. S. Connelly was elected President pro-tem, owing to Chairman Fraser's absence on account of illness; and the following resolution was unanimously adopted:

"Resolved, That a permanent committee of five, with the Chairman of the St. Louis-Cincinnati-Louisville Freight Committee as member ex-officio, be appointed to consider all questions of violation of tariff rates and the measures to be adopted in correcting difficulties as to the removal of disturbing rate conditions.

This Committee shall fairly and equitably represent the St. Louis-Cincinnati-Louisville Freight Committee, as a whole, and shall meet upon call of the Chairman in the office of the St. Louis-Cincinnati-Louisville Freight Committee to consider complaints.

That the findings and resolutions of this committee shall be promptly communicated by the Chairman of the St. Louis-Cincinnati-Louisville Freight Committee to all parties interested.

Further:

1st. That, effective at once, tariff rates published by the

St. Louis-Cincinnati-Louisville Freight Committee shall be maintained, and each road individually pledges that it will not make effective any rates except by open tariff to be published by the St. Louis-Cincinnati-Louisville Freight Committee, and any individual rates in conflict with tariff rates published by the St. Louis-Cincinnati-Louisville Freight Committee shall be withdrawn, it being understood that any unauthorized individual rates which may now be in effect and cannot be withdrawn, shall be presented to the Committee of five for its consideration and action at its first meeting.

2nd. In the event of deviations from tariffs published by the St. Louis-Cincinnati-Louisville Freight Committee, same shall be reported at once to the respective local committees at St. Louis (it being understood that the St. Louis Committee is represented by R. M. Fraser, Chairman), Cincinnati, Louisville or Evansville, and if substantiated, shall be submitted to the Committee of five for consideration.

3rd. That each road member of the St. Louis-Cincinnati-Louisville Freight Committee will, if it has not already done so, individually send to its different agents notice of the foregoing in the following form:

'At a special meeting of the chief traffic officials of roads, members of the St. Louis-Cincinnati-Louisville Freight Committee, held February 18th, 1902, it was individually stated that all tariff rates as published by the St. Louis-Cincinnati-Louisville Freight Committee would be maintained.

'If you find any contracts at variance with tariff that cannot be withdrawn on legal notice, you will report same frankly to the Chairman of your respective local Committee, the object being to publish tariffs at any net rate quoted secretly.

'Your instructions are imperative as to the maintenance of published tariff rates.

'This company will notify each and every connection that we will not, under any circumstances, participate, by voucher or otherwise, in any unauthorized reductions from tariff rates and classification.

'Should you be satisfied at any time that your competitors are making less rates than those duly authorized by the St. Louis-Cincinnati-Louisville Freight Committee, you will report same at once to the Chairman of your local committee for consideration.

'The object of this is to prevent demoraiization of rates.

4th. That each road will, if it has not already done so, individually send to its connections notice, which shall be dated and sent Wednesday, February 19th, 1902, as follows:

'This is to advise that, effective at once, this company will not be a party to any deviation from duly authorized rates, evasions of classification, or manipulation of rates in any manner whatsoever.'

It is understood and decided that the members of the Committee of five cannot delegate their authority to any one except an individual already on the Committee."

The Chairman Pro-tem, in accordance with the above, appointed as the Special Committee, Messrs. Irwin, Hart, Taylor, Nichols, and Mr. Campbell as Chairman. And it was also further

"Resolved, That the Chairman submit a copy of these proceedings to the Chairmen of the Committees at St. Louis, Cincinnati, Louisville and Evansville, with the request that they convene their committees, with the view to developing any contracts or unauthorized rates in effect, which should be reported to the Special Committee referred to, and be it further

Resolved, That the Special Committee meet on Thursday, February 27th, to consider any matters that may come be-

fore it from the Committee at St. Louis, Cincinnati, Louisville or Evansville."

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 72".

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in St. Louis, February 27th, 1902.

The permanent Committee of five, appointed at meeting on the 18th inst., met at this office to-day, and after due consideration disposed of the subjects presented, as follows:

"Rate on Cast Iron Pipe: It is the understanding that effective March 10th, the rate of $1.30 per ton on cast iron pipe, Louisville to East St. Louis, will be withdrawn.

Articles of Iron and Steel Manufacture: Resolved, That it is the sense of this committee that the rate of 8 cents per 100 lbs. on articles of iron and steel manufacture, between Louisville and East St. Louis, is too low, and not warranted by the conditions which exist, shipments from Louisville to East St. Louis coming in competition principally with irons manufactured in the Pittsburg and Valley territory, and the rate, therefore, should be withdrawn and restored to the Official Class'n. basis. (Adopted.)"

The call for the next meeting will be issued on receipt of written request, giving particulars on the subjects needing consideration.

Above exhibit, consisting of one page, is marked "Plaintiff's Exhibit Fraser No. 73".

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, March 26th, 1902.

The following resolution was adopted:

"Resolved, That I. C. C. B-27 be amended naming rate on chatts ballast, from East St. Louis to Jeffersonville, New Albany and Louisville, $1.50 per net ton, minimum 20 tons per car. (See circular letter March 17th, File B423.)"

It was also "Resolved, That I. C. C. B-27 be amended naming rate on fruit jars and glass bottles, C. L., minimum weight, 26,000 lbs., from East St. Louis to Cincinnati and Louisville, 12 cents per 100 lbs."

Meeting considered the matter of rate on whiskey in wood, and the following resolution was adopted:

"Resolved, That a letter be written to Chairman C. F. A., as follows:

'For several weeks various Committees at St. Louis, Chicago, Cincinnati and Louisville have considered the question of rates on whiskey, in wood, between points the rates between which are governed by the Official Class'n., and the unanimous opinion of all interested is that the present rating results in the consolidating of small lots of whiskey into carloads; that between several prominent points it has been necessary to establish the carload rates on less than carload shipments, all of which materially reduced the revenue of the various transportation lines. In an effort to better these conditions, it was recommended that the rating of whiskey, in wood, any quantity, be made third class. It then developed that rate on whiskey, in wood, carloads, from points in C. F. A. territory to Eastern cities, on basis of 30 cents per 100 lbs. Chicago to New York had been authorized to continue in force until December 31st, 1902, and on this account it is not practical to advance the carload rating to Eastern cities.

Therefore, be it Resolved, That we recommend to the C. F. A. that it refer the matter to the Official Class'n. Committee, calling attention to the exisiting conditions, and request that the rating of whiskey, in wood, any quantity, in

Official Class'n., taking effect January 1st, 1903, be made third class'."

The following resolution was adopted:

"Resolved, That Tariff I. C. C. B-27 be corrected on plaster, etc., in line with C. F. A. Information No.'s 3203, 4 and 11, and that the rates on lime be advanced from $1.95 to $2.00 per ton."

It was also "Resolved, That I. C. C. B-27 be amended naming rate on lumber, bolts and other material used in blocking rails, structural iron, etc., vehicle parts and vehicles, in line with C. F. A. Information No. 3214."

Also the following:

"Resolved, That the minimum carload weight on grain products, as named in I. C. C. B-27, be amended in line with C. F. A. Informations Nos. 3215 and 3237."

The following resolution was also adopted:

"Resolved, That amendment be issued to I. C. C. B-27, naming rate on asphalt, C. L., minimum weight as per official classification, from East St. Louis to Cincinnati, Louisville, etc., 11 cents per 100 lbs., in line with C. F. A. Information No. 3226."

Also the following resolution:

"Resolved, That I. C. C. B-27 be amended naming rate on black residue, C. L., minimum weight as per official class'n., from Cincinnati, Ohio, to East St. Louis, 10 cents per 100 lbs. in line with C. F. A. Information No. 3229."

The Sub-Committee appointed to define the territory under the jurisdiction of the St. Louis-Cincinnati-Louisville Freight Committee presented the following report:

"Section A: All traffic handled between Cincinnati and Cincinnati points and East St. Louis and East St. Louis

points, proper, and Louisville and Louisville points and East St. Louis and East St. Louis points, proper.

"Section B: All traffic between Cincinnati and Cincinnati points, Louisville and Louisville points, and East St. Louis, East Carondelet, National Stock Yards, Madison, Venice and Granite City, Ill., whether destined to these points proper or to points beyond, on which the roads, members of this Committee, get their full published individual tariff rates; further, on through traffic via Alton and Wann, Ill., but not on traffic to and from these points proper.

"Section C. Pacific Coast traffic handled through East St. Louis, the through rates and divisions of which are a matter of agreement between the Central Freight Association and Trans-Continental Committee.

"Section D: Traffic between Cincinnati and Cincinnati points, Louisville and Louisville points, and points in Arkansas, Texas, Oklahoma, Indian Territory, Arizona, New Mexico and Republic of Mexico, when passing through East St. Louis and Alton.

(The question of including points in Louisiana in this clause will be decided upon at later meeting.)

"Section E: It is understood that the following points will be included on the same basis as Cincinnati, viz: Addyston, Sedamsville, North Bend, Delhi, Brighton Station, Fairmount, Stock Yards, Cumminsville, Winton Place, Winton Junction and Ivorydale, and any other stations within the switching limits at Cincinnati.

It is also understood that New Albany and Jeffersonville will be included as Louisville points.

"Section F: Coal and coke between the above points shall be excluded from the accounts and statistics of this Committee.

"Addenda: With reference to traffic between interior

points in Kentucky, Tennessee or the Southwest and East St. Louis or St. Louis points, or traffic beyond through these points, where through rates are not based on combination of locals through Louisville or Cincinnati, but are established by Southern lines having their own rails to the Mississippi River, who are not subject to the jurisdiction of this Committee, it is decided that the St. Louis-Cincinnati-Louisville Committee shall have no jurisdiction, but that lines operating through Cincinnati or Louisville may be handled this traffic on such divisions as may be agreed upon between the lines in interest."

A note in the record states that the Sub-Committee is to be continued until they report on the Louisiana proposition, referred to in connection with Section D.

The following resolution was adopted:

"Resolved, That the Louisville representatives of this Committee be appointed as a Special Committee to confer with G. F. A. Goodwyn and G. F. A. Irwin, in regard to restoring rates on iron articles from Cincinnati and Newport, and from New Albany, Louisville and Jeffersonville to East St. Louis, with the assurance that full published tariff rates will carry with all other lines, if the L. & N. and L. H. & St. L. will take such action; the Committee to report to Chairman Fraser at earliest date, and he to report to members of the St. Louis-Cincinnati-Louisville Freight Committee."

It was also "Resolved, That I. C. C. B-27 be amended changing the minimum weights on packing-house products and dressed meats as provided for in Rules 10-A, 10-B-1, 10-B-2, 10-C, 10-D, and 10-E of Official Class'n. No. 22 and Supplements, in line with C. F. A. Information No. 3254."

Meeting also considered rate on wagons, buggies, etc.,

Evansville to Louisville, and resolution was adopted naming schedule of rates thereon, from Evansville to Louisville, when for points beyond.

The following resolution was also adopted:

"Resolved, That the rate on sash, doors and blinds, L. C. L. and C. L., Louisville to Evansville, be made the same as agreed to from East St. Louis to Evansville, tariff to be corrected accordingly."

Above exhibit, consisting of seven pages, is marked "Plaintiff's Exhibit Fraser No. 74".

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in St. Louis, April 17th, 1902, which meeting convened in accordance with call dated April 11th, File B-304, for the purpose of considering and acting upon proposed changes in Articles of Organization, dated December 28th, 1898.

The proposed Articles of Organization were read, and adopted by sections and as a whole, to become effective May 1st, 1902.

The Chairman was instructed to have the revised Articles of Organization printed, and send two copies to each member present, one copy to be signed by the proper officer of his company and returned to the Chairman.

The subject of the Special Committee was brought up by a member, and it was

"Recommended, That the Special Committee of five be discharged and that all matters to be considered under the rules governing the Special Committee of five, as shown in Proceedings Feb. 18th, 1902, be handled by the Committee as a whole." (Adopted.)

The subject of rate on cement plaster, Marlow, I. T., to

Cincinnati, Louisville, etc., was brought up by a letter from G. F. A. M. K. & T. Ry., and, after considerable discussion, the following was adopted:

"Roads interested individually advise that they will join the M. K. & T. Ry. and its connections in a through rate of 24 cents per 100 lbs., on cement plaster, C. L., minimum weight, capacity of car, from Marlow, I. T., to Louisville and Louisville points, Cincinnati and Cincinnati points (under the jurisdiction of this Committee) and will accept as their proportion east of East St. Louis 6 cents per 100 lbs. to the points referred to.

The Chairman to request G. F. A. M. K. & T. Ry., in addition to issuing through tariff, to issue a separate division sheet covering it, as it is not deemed advisable to publish the proportional rate of 6 cents, from East St. Louis. The Chairman to advise if above proposition is accepted by the M. K. & T. Ry. and date effective."

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 75".

("Exhibit No. 76" is found to be a duplicate of No. 75, above, and is, therefore, omitted.)

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinati-Louisville Freight Committee, held at St. Louis, Mo., May 28th, 1902.

The following resolution was adopted:

"Resolved, That it is the understanding that jurisdiction of the St. Louis-Cincinnati-Louisville Freight Committee does not extend to or cover traffic between Cincinnati, Louisville, etc., via East St. Louis, to and from points in Louisiana."

It was "Recommended, That rate of $1.50 per net ton

on crushed granite or stone, from East St. Louis to Cincinnati, Louisville, etc., be adopted, minimum weight 40,000 lbs."

The following resolution was also adopted:

"Resolved, That amendment be issued to I. C. C. B-28, adding asphalt paving blocks to list of articles taking brick rates, C. L., minimum weight 40,000 lbs."

On request of one of the members the roll was called for the purpose of ascertaining whether any line is making rate less than 10 cents per 100 lbs. on flour, East St. Louis to Cincinnati and Louisville, and all lines stated that they were maintaining the rate of 10 cents per 100 lbs.

The following was adopted: "Recommended, That the local rates on grain, East St. Louis to Cincinnati, Louisville, etc., be made 9 cents per 100 lbs., and I. C. C. B-28 be amended accordingly."

The following resolution was adopted:

"Resolved, That when letter vote is taken and the result negatives the proposition, and the Committee is so advised, the matter be not docketed for consideration at any Committee meeting, except on request of one or more members."

The matter of rate on asphaltum and tar paving cement was brought up by a member stating that he had information that some of the roads were carrying asphaltum and tar paving cement, Jeffersonville to East St. Louis, at rate of 7 cents per 100 lbs., and suggesting that the roll be called to ascertain if any of the Louisville-Jeffersonville lines are applying less rate than 11 cents per 100 lbs. on asphaltum or tar paving cement, and all lines stated that they were demanding 11 cents per 100 lbs. on the commodities in question. It was then suggested that the rate may be applied via some of the lines without the knowledge of the General

Freight Agent, and in view of this, it was recommended that the Chairman be instructed to make an investigation and report at next meeting.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 77".

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, Ky., June 25th, 1902.

As instructed at meeting of May 28th, circular letter B-XXI, dated May 31st, was issued, asking members whether asphaltum and tar paving cement had been transported in car-loads at less than the tariff rate; and at meeting to-day the Chairman advised that all members answered that tariff rate was being charged and papers were ordered filed.

It was "Recommended, That amendment be issued to I. C. C. B-28, naming rate on syrup in glass or earthenware, packed in barrels or boxes, 15 cents per 100 lbs., C. L., minimum weight 30,000 lbs., between East St. Louis, Cincinnati, Louisville, etc."

The following resolution was adopted:

"Moved, That lines, members of the St. Louis-Cincinnati-Louisville Freight Committee will not concur in the divisions of rates between Cincinnati and Louisville and Texas common points, via East St. Louis, promulgated by the Southwestern Tariff Committee, unless they shall have been previously submitted to the Committee.

This action shall not be construed to affect divisions now in effect."

It was also "Recommended, That amendment be issued to I. C. C. B-28, naming rate on cement, asphalt paving 7 cents per 100 lbs., C. L., minimum weight 40,000 lbs., from

Cincinnati, Louisville, etc., to East St. Louis." This was done in connection with attention being called to rate published by Chicago & St. Louis Traffic Association in Amendment No. 33 to Tariff No. 24, June 25th, 1902, naming rate of 7 cents per 100 lbs. between Chicago and East St. Louis.

Change was proposed in Article V, Section A and B, also Article VI, Section E, of Articles of Organization, as submitted to members by circular letter No. B-23, June 4th; and at this meeting the changes were considered and adopted. The Chairman was instructed to have the revised Articles of Organization printed, effective May 1st, 1902, and send two copies to the General Freight Agent of each road, member of the Committee, for approval, one copy to be signed and returned to the Chairman.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 78."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, September 24th, 1902.

The following resolution was adopted:

"Resolved, That it is the sense of this Committee that all switching, except on grain, within the switching limits of East St. Louis, Madison, Venice, Granite City and Brooklyn, Ill., may be absorbed by all lines, effective October 1st, 1902."

Also the following resolution:

"Resolved, That Joint Proportional Tariff I. C. C. B-50 be amended naming rate of 25 cents per 100 lbs. on broom corn, C. L., minimum weight 15,000 lbs., East St. Louis to Louisville."

The following resolution was also adopted:

"Resolved, That I. C. C. No. B-30 be amended naming proportional rate on "vehicles of all kinds" not otherwise specified in Official Class'n., in C. L., destined to points governed by the Western Class'n. (except to destinations subject to the jurisdiction of the Southwestern Tariff Committee), 17 cents per 100 lbs. from Cincinnati and Louisville to East St. Louis, minimum carload weight, as follows:

Cars not exceeding 36 feet in length	14,000 lbs.
Cars over 36 and not over 38 ft. long	16,800 lbs.
Cars over 38 and not over 42 ft. long	18,200 lbs.
Cars over 42 and not over 46 ft. long	19,600 lbs.
Cars over 46 and not over 50 ft. long	21,000 lbs.
Cars over 50 and not over 54 ft. long	22,400 lbs.
Cars over 54 and not over 58 ft. long	23,800 lbs.
Cars over 58 ft. in length	25,200 lbs.

Note: Rule 5-C of Official Class'n. will not apply in connection with the above."

The following resolution was also adopted:

"Resolved: That amendment be issued to Joint Proportional Tariff I. C. C. No. B-30, eliminating rate of 26 cents per 100 lbs. on wool, as published therein."

It was also "Resolved, That the chairman appoint a special committe of three to consider the abrogation, not later than December 31st, 1902, of all unauthorized rates and the revision of low authorized rates, the Committee to report at the meeting in St. Louis on October 22nd, 1902."

The Chairman thereupon appointed as this Special Committee, Messrs S. T. McLaughlin (Chairman), L. J. Irwin, and R. A. Campbell.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 79."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, October 22nd, 1902.

The subject of unauthorized or individual rates was referred to Sub-committee on September 24th, and at meeting today the Chairman of the Sub-committee submitted the following report:

"Your Committee recommends that effective Jan. 1st, 1903, the rate on shipment of unmanufactured tobacco, in hhds., any quantity, between East St. Louis, Cincinnati, Louisville, Jeffersonville, and New Albany, be advanced to 12 cents per 100 lbs.

"Your Committee recommends that, effective November 6th, the rate on mules, C. L. minimum weight 20,000 lbs., be fixed at 17½ cents per 100 lbs., East St. Louis to Cincinnati, Louisville, Jeffersonville, New Albany, etc., and not in the reverse direction.

"Your Committee recommends that rates as follows be adopted, effective November 6th, between East St. Louis, Cincinnati, Louisville, Jeffersonville and New Albany, etc., viz.:

Asphalt, carloads, 11 cents per 100 lbs., minimum weight as per official classification.

Asphalt Rock and Bituminous Rock, $1.40 per ton of 2,240 lbs., carload minimum weight to be capacity of car, but in no case to be less than 18 gross tons.

"As regards the several unauthorized tariffs which are now in effect, your Committee would request further time, and that action be postponed on this until the next meeting of the St. Louis-Cincinnati-Louisville Freight Committee.

"Your Committee would request further time on the subject of cotton seed oil, Louisville and Cincinnati to East St. Louis, as this matter is to be the subject of conference

between the Cincinnati and Louisville roads at a meeting to be held in Cincinnati on the 28th inst.

"Your Committee would request further time on the subject of rates on iron and steel articles between Louisville, New Albany, Jeffersonville and East St. Louis; a full report to be made at the next meeting."

The above report was read and accepted, and further time granted to complete the work. The report was then read in sections, and the recommendation in each case approved. In view of the action taken on asphalt, asphalt rock and bituminous rock, as shown above, it was

"Moved, That Joint Proportional Tariff I. C. C. B-30 be amended, eliminating therefrom the rates named on asphalt rock and bituminous rock."

The Chairman read letters from Chief Inspector asking information as to the application of Rule 5-C on shipments of wool as first published in Joint Tariff Amendment No. 3 to I. C. C. B-12, effective July 6th, 1898, Wool C. L., minimum weight 20,000 lbs., 29 cents per 100 lbs., and continued in effect until the issue of Amendment No. 1 to I. C. C. No. B-31, effective October 2nd, 1902.

The Chairman was instructed to advise the Chief Inspector that rate of 29 cents, put in effect by this Committee was based on J. C. Freight Circular No. 634, Feb. 5th, 1897, St. Louis Eastbound Traffic Ass'n. Special Notice No. 583 Feb. 6th, 1897, which named rate of 29 cents per 100 lbs. to Charleston, W. Va., etc (Louisville and Cincinnati being intermediate), it being understood that the rules which governed on traffic to the Western Termini points would govern on traffic handled to points under the jurisdiction of this Committee.

The following resolution was adopted:

"Moved, That the subject of form to be used in prepara-

tion of Proceedings, Circular Letters, etc., be referred to Mr. Geo. W. Becker, as a Committee of one, to draw up a form to be used by members in making application for rates; also manner in which the Circular Letters, Proceedings, etc., shall be issued by the Chairman; the matter to be further considered at next meeting."

The subject of rate on whiskey, in wood, any quantity, was brought up by a member stating he would like to see rate restored to Official Classification basis; and after general discussion, the following resolution was adopted:

"Moved, That the subject of rates on alcohol, high-wines, whiskey, etc., in wood, in effect from Cincinnati, Louisville, etc., be referred to Chairman Tucker, with a statement to the effect that it is the sense of this Committee that rates are entirely too low, and that some means should be adopted to having them advanced or restored to the Official Class'n. basis, and request that he take the subject up through the C. F. A., also the C. & O. R. Committee, in line with the above, and advise the Chairman of this Committee at the earliest possible date as to what was accomplished."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 80."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in the C. F. A. Rooms, Chicago, November 25th, 1902.

The Committee appointed at meeting of October 22nd, with reference to unauthorized or individual tariffs, etc., reported, and recommended that, effective January 1st, 1903, Joint Freight Tariff be amended, naming rates as below:

"Tobacco, unmanufactured, and tobacco stems and sift-

ings, in hhds., any quantity, 12 cents per 100 lbs., between East St. Louis, Cincinnati, Louisville, etc.

"Tobacco, stems pressed in bales, C. L., minimum 24,000 lbs., 10 cents per 100 lbs., between East St. Louis, Cincinnati, Louisville, etc.

"Tobacco, leaf, samples in boxes, any quantity, to be eliminated from the tariff.

"Iron and steel articles (as per list on page 7, Joint Tariff I. C. C. B-31, except pipe, cast, plain) between East St. Louis, New Albany, Jeffersonville and Louisville, C. L., minimum Official Class'n., unless otherwise provided for in tariff, 10 cents per 100 lbs.

"Note: The B. & O. S. W. stated that they reserved the right to make same rate apply on iron and steel articles between East St. Louis and Cincinnati, on notice to that effect.

"Your Committee unable to report any further change in grain rates East St. Louis to Louisville than shown in amentment No. 3 to Joint Proportional Tariff I. C. C. No. B-30, effective December 1st.

"Further time requested to report on subject of rates on cotton seed oil, Cincinnati and Louisville to East St. Louis."

The above recommendations of the Sub-Committee were individually accepted and approved.

A letter on the subject of whiskey from points in defined territory to Arkansas points, was submitted at meeting Oct. 22nd, and referred to Sub-Committee. Copy of correspondence, etc., from Chairman Arkansas Freight Committee was sent all members by circular letter Oct. 23rd, No. B-52. The following report, dated Nov. 24th, from the Sub-Committee was submitted and read:

"In the matter of rates on whiskey from points in defined territory to Arkansas,

We recommend, That the Chairman be instructed to reply to Chairman Cale of the Arkansas Freight Committee that, if the lines members of his committee persist in the position outlined in his communication of October 16th, File D-383, to Mr. Fraser, it will necessitate the cancellation of all divisions on all traffic from Cincinnati and Louisville to Arkansas common points, as it is not considered fair to operate divisions that are now in effect on some commodities to the exclusion of others."

The report was accepted, the Committee discharged, and the Chairman instructed to address a letter to the Chairman of the Arkansas Freight Committee as recommended, the reply received thereto to be communicated by circular letter to the members.

The following resolution was adopted:

"Resolved, That effective December 15th, 1902, the rates on whiskey, high wines, etc. ,in wood, between Cincinnati, Louisville, New Albany, Jeffersonville and East St. Louis, will be restored to Official Class'n. basis, it being the understanding that carload rates on this class of traffic will only be applied when the railroads receive shipments direct from the bona fide owner. If forwarding agents or parties other than the absolute owners deliver carload shipments to the railroads, the transportation companies in interest will charge the L. C. L. rates. Further, that the respective local Committees at Cincinnati and Louisville be convened at the earliest possible date to arrange for such machinery as may be necessary to see that this action is strictly carried out."

The following resolution was also adopted:

"Recommended, That a joint meeting be called at Chicago, Dec. 10th, 1902, of the St. Louis-Cincinnati-Louisville Freight Committee, Chicago & Ohio River Committee, and the Peoria Eastbound Lines, for the purpose of revis-

ing rates between the various points under the jurisdiction of those committees. Said meeting to be held at C. F. A. Committee rooms, at ten A. M."

The above was communicated to the Sec'y. of the C. & O. R. Committee by letter the 25th inst., requesting him to arrange for meeting of the C. & O. R. and Peoria lines.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraiser No. 81."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, January 28th, 1903.

Meeting considered the subject of traffic, Louisville to Oklahoma and Indian Territories, and adopted the following resolution:

"Recommended, That divisions be established with the Indian & Oklahoma Territory lines on basis of twenty and eighty per cent, respectively, east and west of East St. Louis, on traffic from Louisville, New Albany, and Jeffersonville; provided that the Indian and Oklahoma Territory lines will, not later than April 1st, 1903, establish the same rates from Louisville, Jeffersonville and New Albany as are in effect from Moline and Rock Island.

The Chairman to communicate to the Western Lines the above action, advising members by circular letter the replies received thereto."

The subject of whiskey from points in defined territory to Arkansas points was considered, and the following resolution adopted:

"Moved, That the subject be referred to a Committee of three (3) to confer with the Arkansas lines, with the understanding that if the Committee reports, the Chairman will submit their report to the members by circular letter, the subject to be further considered at next meeting."

The Chairman appointed on above committee Messrs. Campbell (Chairman), Hart and Irwin.

The meeting also considered the matter of division of rate on cotton seed products, Arkansas and Louisiana, via Cairo, vs. East St. Louis, the subject being brought up by letter suggesting that the Cairo lines increase their proportion of the through rate on this business, as they are now accepting 8½ cents, this being only ½ cent in excess of the proportion demanded from East St. Louis; whereas the proper differential should be two cents above the East St. Louis rate. After discussion, it was

"Moved, That the Chairman take the subject up, with the representatives of the two roads at Cairo, with the view to having them hold the rate from Cairo at least two cents higher than from East St. Louis."

The following resolution was adopted:

"Moved, That checking rates between St. Louis-Cincinnati and Louisville, Evansville and Cincinnati, and Evansville and Louisville, be referred to a Special Meeting of Rate Clerks, to be called at Louisville Hotel, Louisville, Ky., on Tuesday, Feb. 3rd, at 10:00 A. M."

The following were elected on the Executive Committee for the year 1903: Messrs. R. A. Campbell, W. H. Coleman, and Walter Nichols.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 82."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, March 25th, 1903.

Meeting considered the matter of division of rates on cotton seed products, C. L., from Arkansas, via Cairo, etc., vs. East St. Louis. As instructed at meeting of Jan. 28th,

Proceedings No. 19, the above subject was taken up with the traffic officer of the Big Four Railroad, the Iillinois Central, and the C. & E. I. R. R., and each party stated his intention to hold rate on above traffic two cents per 100 lbs. higher from Cairo, Gale, Thebs and East Cape Girardeau, than in effect from East St. Louis to Louisville and Cincinnati.

The rate of 10 cents per 100 lbs. from Cario, etc., to become effective April 6th, 1903.

The rate on grain products vs. grain was also considered, and the replies received in answer to Circular Letter No. B-62 were read and information requested by the Chairman as to what reply to make to Mr. E. S. Tompkins, Commissioner St. Louis Traffic Bureau, and was instructed to inform Mr. Tompkins that it is the opinion of the individual roads, members of this Committee, that the rate on grain products to Louisville and Cincinnati cannot be reduced.

The following was also adopted:

"Moved, That the rates on brick and articles taking same rates from Cincinnati and Louisville to East St. Louis, be made $1.90 per ton. Joint Freight Tariff I. C. C. B-34 to be amended, effective on legal notice."

The subject of filing division sheet with I. C. C. was brought up by letter from a member, and it was

"Moved, That we change back from "Division Sheet" to a "Joint Proportional Tariff," and that copies of said Joint Proportional Tariffs be gven an I. C. C. number and filed with the Interstate Commerce Commission.

Note: The first Joint Proportional Tariff issued to contain same rates etc. as shown in Division Sheet No. B-2 and amendment."

The subject of rates and divisions on canned goods,

Pacific Coast points via East St. Louis, to Lexington, Ky., was brought up by letter from Chairman C. F. A., which was submitted to members by Circular Letter No. B-64, Feb. 23rd. Replies were received from all parties to the effect that proposed figures, 10.7 cents, East St. Louis to Cincinnati, would be accepted.

In view of the fact that divisions in effect via the Southern Ry., East St. Louis to Lexington, Ky., would have the effect of preventing the lines east of East St. Louis from securing an increased division, the Chairman was instructed to take the matter up further with A. G. F. A. Southern Ry., with the view of his making a demand upon the western lines for a change in the divisions, i. e., to allow an arbitrary of six cents per 100 lbs., Louisville to Lexington, and divide the balance on agreed percentages.

The question of proportional rates from Upper Mississippi River crossings vs. East St. Louis was brought up by letter from a member, and the Chairman took the subject up with Mr. P. P. Rainer, Secretary Joint Rate Committee, and correspondence between this office, Secretary Rainer and Chairman Tucker was read for the information of the members of the Committee, and it was

"Resolved, That the Chairman urge upon Secretary Rainer the importance of having the proper proportional rates maintained from Upper Mississippi River, in accordance with Joint Rate Committee Division Sheet No. 20, or subsequent issues."

Chairman called attention to C. F. A. Information No. 4136 and 4138, March 14th-4142 March 16th-4145 March 17th-4160 and 4165 March 20th, making various changes in rates, weights, etc., and requested instructions as to whether an amendment shall be issued to tariffs of this Committee when each and every change is made in rates, etc., by

issuance of C. F. A. Information, etc., and after discussion, it was

"Moved, That the Chairman shall issue tariff or amendment on the 1st, 7th, 14th and 21st of each month, if occasion requires, the idea being to keep the Committee tariffs fully up to date. It being understood that the Chairman shall use his discretion to promulgate important changes or to change the date within a reasonable range, if it is found advisable by him to do so."

Chairman read telegram of March 24th from the Chairman of the Louisville Freight Committee, recommending rate of $1.65 per ton on gas-house coke, Louisville, New Albany and Jeffersonville, to East St. Louis, and calling attention to Section F of Articles of Organization, specifying that coal and coke shall be excluded from accounts and statistics of the Committee; and in view of the above it was decided that no action was necessary by this Committee.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 83."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, May 27th, 1903.

The question of division of rates on cotton-seed products from Arkansas, via Cairo vs. East St. Louis, was considered, and resolution was offered and Chairman instructed to submit same by circular letter to all members, as follows:

"I move you, That the rate from East St. Louis to Cincinnati and Cincinnati, points, Louisville and Louisville points (under the jurisdiction of this Committee) on cotton-seed oil, C. L., originating in territory west of the Mississippi River, be made 8 cents per 100 lbs., it being understood that the rate from East Cape Girardeau, Gale, Thebes and Cairo will be 10 cents on the same traffic.

The meeting considered proportional rates from Upper Mississippi River crossings vs. East St. Louis, and Chairman read letter of May 14th, File A-1623C, from Secretary Joint Rate Committee, calling attention to action taken at conference between eastern and western lines, May 7th, and it was

"Moved, That the action taken at Chicago meeting, May 7th, be approved, and the recommendation adopted be incorporated in the proceedings of this Committee."

The recommendation is as follows:

"Recommended, That on Trans-Mississippi River traffic, subject to the Mississippi River rate basis as proportions of through rates, the class and commodity rates from East St. Louis, Ill., to all points east of the Indiana-Illinois State line may be applied as minimum proportional rates from east bank Mississippi River points north of East St. Louis to East Dubuque, inclusive, and in the application of the foregoing the western roads should not observe from eastbank Mississippi River points as maximums to intermediate points the rates from East St. Louis to destinations beyond, but, on the contrary, the western roads will hold from east bank Mississippi River points to such intermediate destinations the rates actually current thereto from East St. Louis."

The subject of stopping in transit at Louisville and Cincinnati, glass bottles, lamp chimneys, etc., from C. F. A. territory to the Southwest, was submitted in circular letter No. B-75, April 23rd. In reply thereto all members advised that they would discontinue the stop-over privileges, etc. The Chairman Southwestern Tariff Committee was advised of the action taken, and requested to have tariff amended accordingly. (See circular letter No. B-79).

At meeting today correspondence was read and Chairman instructed to acknowledge receipt of Chairman Cale's letter May 13th, advising him that members of this Com-

mittee cannot be parties to the practice referred to (Letter written 28th inst.) It was also

"Moved, That the Chairman correspond with Chairman Washburn representing the lines south of the Ohio River, and advise him of the action taken by the roads, members of this Committee, and request that lines south of the Ohio River take similar action (Letter written 28th)."

The following resolution was adopted, in regard to rate on asphalt, East St. Louis to Louisville and Cincinnati, when from Texas:

"Moved, That Missouri Pacific be advised that if they will establish a through rate of 26½ cents and issue through tariff and division sheet, we will accept 7½ cents minimum weight 40,000 lbs., East St. Louis to Cincinnati and Louisville."

The question of rate on wall plaster, East St. Louis to Louisville, when from the West, same as cement plaster, was taken up, and it was moved, "That wall plaster be included with cement plaster in proportional tariff and at same rate."

The record shows that the roads declined to make a reduction in rate on tobacco stems, East St. Louis to Louisville.

The question of rates and divisions on bones and horns from Mexico was brought up, and as the subject had been submitted by circular letter No. B-73, of date April 20th, and all members answered that they were adhering to rule as shown in Proceedings No. 16, page 2, Sept. 24th, 1900, the subject was tabled.

Also the following resolution was adopted, with reference to rate on railway equipment, new:

"Moved, That the rates applicable on railway equipment, new, from Jeffersonville to Chicago, as per C. & O. R.

Through Freight Rates No. 46 be made to apply from Jeffersonville to East St. Louis."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 84."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnait-Louisville Freight Committee, held at Louisville, Ky., July 22nd, 1903.

The meeting considered the matter of proportional rates from Upper Mississippi River crossings vs. East St. Louis. This subject was last considered May 27th (See Proceedings No. B-21). On June 27th Chairman received letter from a member calling attention to Santa Fe Amendment No. 36 to Tariff No. 31-A, establishing proportional rate of 5 cents. Chairman stated that he had taken subject up with Mr. P. P. Rainer, Sec'y. Joint Rate Committee, and received telegram dated July 22nd, that he had been advised by G. F. A. Santa Fe that he had arranged for the cancellation of rate of 5 cents from East Fort Madison to Ohio River crossings.

No further action being necessary on the part of this Committee, it was

"Moved, That the subject be tabled."

The following resolution was adopted:

"Resolved, That the Chairman correspond with Chairman C. F. A., and have him withdraw rates on stone-dust to Evansville and East St. Louis, as per C. F. A. Info. 4461, with the further advice that this Committee has full jurisdiction over the publication of rates between Louisville, Evansville and East St. Louis."

The Chairman was instructed not to publish the rates unless instructed later by the Committee to do so.

The subject of rate on cement, East St. Louis to Louisville, Cincinnati, etc., was considered, being brought up by letter from a member, which the Chairman read, and after consideration the following was adopted:

"Roads interested individually advise that effective on legal notice the rates on cement, common or natural, Hydraulic and Portland, will be 10 cents per 100 lbs., from East St. Louis to Cincinnati, Louisville and points under the jurisdiction of this Committee, C. L., minimum weight 38,000 lbs."

The following resolution was also adopted:

"Moved, That one-half rates be made applicable on broken and defective parts of farm wagons, returned to manufacturer (original consignors), this action being necessary on account of same rule being in effect through other gateways. This to apply between points under the jurisdiction of this Committee."

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 85."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, September 23rd, 1903.

Meeting considered proportional rates on cotton-seed oil from East St. Louis to Cincinnati, Louisville, etc. This subject was last considered at meeting May 27th, 1903, Proceedings No. B-21, and was submitted to members by circular letter B-82, May 28th; and to C. & E. I., C. C. C. & St. L., and I. C., Cairo, etc., roads by joint letter, May 28th, File B-383. Result, the adoption of proportional rate from East St. Louis, 8 cents, and from Cairo, etc., 10 cents, promulgated by circular letter No. B-86, June 15th, 1903.

At meeting to-day the subject was brought up again by

letter from a member which was read, and after discussion the following announcement was made:

"Lines interested individually advise their intention to cancel present proportional rate of 8 cents per 100 lbs., and make effective rate of 12 cents per 100 lbs., on cotton-seed oil, in C. L., minimum in wood, 30,000 lbs., in tanks, capacity of tank, from East St. Louis to Louisville and Louisville points, and Cincinnati and Cincinnati points, under the jurisdiction of this Committee, on oil coming from west of the Mississippi River, provided similar advance in proportional rates on cotton-seed oil may be obtained from Cairo, Thebes, East Cape Girardeau and Gale, Ill."

"Note: The Chairman to submit the proposition to the Cairo, etc., lines in a Joint Letter, and to advise result to members of the Committee, by circular letter."

The Chairman stated that the proposition of making a change in rates on chatts, phosphate rock, sand, gravel, and glass sand, was submitted by circular letter No. B-91, August 1st, 1903, but answers received were not such as to warrant him in disposing of the subject; and after consideration to-day, it was "Moved, That the tariff remain as at present printed."

The following was also adopted:

"Moved, That the Chairman call the attention of the Inspection Bureau to the fact that shipments of chatts are being handled as sand, at the sand rate."

The following resolution was adopted:

"Moved, That the tariff be corrected, making the rate on tan bark, spent, from Cincinnati, Louisville, etc., to East St. Louis, 6½ cents per 100 lbs., C. L., minimum 50,000 lbs."

Also, the following was adopted, with reference to rate

on gas-house coke, Cincinnati and Louisville to East St. Louis, Ill.:

"Moved, That the tariff be corrected, making the rate from Cincinnati, Louisville, etc., to East St. Louis, $1.40 per ton, and from Cincinnati to Evansville, $1.40 per ton, C. L., minimum weight as per Official Class'n."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 86."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, Mo., November 25th, 1903.

The question of rate on Portland cement, East St. Louis to Louisville, Ky., was considered, being brought up by letter from member making application for rate of 7 cents per 100 lbs., East St. Louis to Louisville, and submitted to members by circular letter No. B-102, also circular letter No. B-106, giving result. After consideration at meeting to-day, it was

"Resolved, That the question of rates on cement in general, between East St. Louis, Louisville, Cincinnati, etc., be referred to a Committee of four (4), to make recommendation to this Committee at next meeting."

The Chairman appointed as the Committee, Messrs. M. S. Connelly, Chairman, R. A. Campbell, Edw. Hart, Jr., and L. J. Irwin.

The Committee was instructed to also consider at the same time the subject of through rates and divisions on cement plaster to Cincinnati, Louisville, etc., from Acme, Texas. (See Proceedings, Dec. 19th, 1900); from Marlow, I. T., etc., via M. K. & T. R. R. (See Proceedings No. 13, April 17th, 1902); also Marlow, I. T., via Frisco

Route (See circular letter B-98, Sept. 14th, 1903, Cement should be Cement Plaster.

Through rates and divisions from Marlow, I. T., only authorized by letter to G. F. A., Frisco, Sept. 21st.

Meeting also considered the subject of cotton-seed oil, etc., proportional rates from East St. Louis, Cairo, etc., on shipments originating west of the Mississippi River, and Chairman read correspondence since last meeting; and after careful consideration, action was taken as follows:

"Interested lines individually advise that effective Dec. 31st, 1903, the proportional rates in Joint Freight Tariff I. C. C. B-37, on cotton-seed oil, from East St. Louis to Cincinnati and Louisville, etc., be cancelled.

Effective January 1st, 1904, rate from East St. Louis to Cincinnati and Cincinnati points, Louisville and Louisville points (under the jurisdiction of this Committee) on cotton-seed oil, foots, settlings, residuum, tank bottoms and soap stock, originating at points west of Mississippi River (except as provided below) will be 10 cents per 100 lbs., with the understanding that Cairo, Gale, Thebes, and East Cape Girardeau lines shall hold a differential yielding a proportion from Cairo, Gale, Thebes and East Cape Girardeau, on such traffic, of not less than 2 cents per 100 lbs. over East St. Louis.

The understanding being that where through rates are published from Arkansas common or pro-rating points to Cincinnati and Cincinnati points, Louisville and Louisville points (under the jurisdiction of this Committee), established per cents of 60 per cent for Arkansas lines and 40 per cent for Committee lines, via East St. Louis, shall prevail for the division of such rates, said division to be subject to a minimum of 8 cents per 100 lbs., East St. Louis to Cincinnati, Louisville, etc., with the understanding that Cairo, Gale, Thebes and East Cape Girardeau lines shall not accept less than a differential of 2 cents per 100 lbs.,

over East St. Louis, with a minimum of 10 cents per 100 lbs.

On cotton-seed oil, foots and settlings, residuum, tank bottoms and soap stock from non-pro-rating points in Arkansas, as well as other points west of the Mississippi River, rate of not less than 10 cents per 100 lbs. shall be accepted from East St. Louis and from Cairo, Gale, Thebes, and East Cape Girardeau, 12 cents per 100 lbs."

The Chairman called attention to Arkansas Freight Committee Tariff No. 4-B, Mo. Pacific No. 4570, and Division Sheets, stating that he had taken the position that the Committee legislation at meeting May 27th, 1903, cancelled the action of meeting February 27th, 1902, Proceedings No. 4, etc., making the Tariff rates from East St. Louis apply on this traffic.

Correspondence on the subject was read, and after discussion the following action was taken:

"Lines, members of this Committee, individually advise that, effective January 1st, 1904, in the division of through rates on cotton-seed products, C. L., minimum weight as per Official Class'n. (except cotton-seed oil, foots, settlings, residuum, tank bottoms and soap stock) forwarded from all points in Arkansas (except Texarkana), via East St. Louis, to Cincinnati and Cincinnati points, Louisville and Louisville points, under the jurisdiction of this Committee, they will accept 40 per cent of the established through rates from the original point of shipment.

Note: G. F. A. Mo. Pacific, and Chairman Arkansas Freight Committee will be advised of this action."

The Chairman called attention to the fact that a member of the Committee was applying pig lead rate on antimonial pig lead, and after discussion the following was adopted:

"Resolved, That the Chairman be instructed to correspond with the representative of the line who is now hand-

ling antimonial pig lead at the pig lead rate, and request him to honor correction on any shipments that are so billed and report result by advice letter to the members of the Committee."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 87."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Louisville, Ky., February 3rd, 1904.

Meeting considered matter of rates, etc., on all kinds of cement and plaster. This subject was last considered at meeting November 25th (See Proceedings B-24), and referred to a Special Committee, consisting of Messrs. Connelly, Hart, Campbell and Irwin, for consideration and report to the General Committee. At meeting to-day the Chairman read report of Special Committee, and after careful consideration and adoption of report by sections, it was individually announced by members of the Committee that the report of the Special Committee be adopted as a whole, and that tariffs be amended in accordance therewith.

The subject of rate on mixed carload dressed meats and packing-house products, East St. Louis to Louisville, was brought up by the Inspection Department issuing corrections on shipments of packing-house products to 5th class, etc., which are declined by member forwarding shipment.

At meeting to-day the Chairman read correspondence on the subject, and general discussion followed. Attention was called to Official Class'n rating on packing-house products to Joint Freight Tariff I. C. C. B-36 naming commodity rate 12 cents, also to Rule 3, page 4, of Joint Freight Tariff, the contention being that the rules seem to conflict, and it was

"Moved, That the matter be left to the Chairman for in-

vestigation, and if found that instructions conflict, or are not clear, to suggest a remedy."

Meeting considered the question of basis for division of rates on Government freight to points west of the Mississippi River, the subject being brought up by letter Dec. 23rd, from a member, submitted to members by circular letter No. B-109, Dec. 26th, File B-446. At meeting today the Chairman read replies received, some of which were that subject be docketed for consideration at meeting. After discussion, the following was adopted:

"Whereas, The question having arisen as to the proper basis for dividing net land grant rates on Government Traffic forwarded from Jeffersonville, Ind., to points west of the Mississippi River, to which the through rates on commercial traffic are based on Mississippi River combination, and,

Whereas, The discussion develops that some lines are of the opinion that the lines east of East St. Louis, on traffic moving via that gateway should require full tariff rates, while others are of the opinion that the lines to East St. Louis should shrink their revenue to the extent of the net rate available to Upper Mississippi River crossings, by reason of the land grant haul of the Illinois Central R. R. between Kankakee and Chicago, and,

Whereas, It is understood that this land grant deduction through Kankakee and Chicago is equivalent to 7½ per cent of the current proportional rate from Jeffersonville to Upper Mississippi River crossings, it is

Recommended, That the lines, members of this Committee, announce to their western connections that in the equalization of net land grant rates on this particular traffic, the lines from Jeffersonville to East St. Louis will not accept less than 99½ per cent of the full tariff rate current from Jeffersonville to East St. Louis, the notice to this effect

to be filed with the western roads interested, by the Chairman of the Committee for account of individual lines."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 88."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, May 25th, 1904.

The following resolution was adopted, with reference to rate on fire brick:

"Moved, That the rate on fire brick, C. L., minimum 40,000 lbs., from Louisville only, to East St. Louis, be made $1.75 per ton."

The subject of commodity rating on car wheels and axles was brought up by correspondence from the Inspection Department, and the following resolution adopted:

"Moved, That the commodity rating on wheels, car, new, and axles, applies on wheels, car, separate or attached to axles, C. L., minimum weight 40,000 lbs."

Meeting considered question of rate on leaf tobacco samples, in boxes, and the following resolution was adopted:

"It is the understanding of the St. Louis-Cincinnati-Louisville Freight Committee that when shipments of tobacco samples accompany shipments of unmanufactured tobacco in hogsheads, the weight of the tobacco contained in the cases of samples is included in the weight marked on the hogsheads, therefore, if the entire shipment is billed at the total gross weight, as marked on the hogsheads, such weight will cover the entire shipments and no extra charge should be made for the weight of the samples. If tobacco samples in cases be shipped not accompanied by hogsheads, then Official Class'n rate should apply."

The question of basis for division of rates on Government freight to points west of the Mississippi River was considered, and the Chairman called attention to Circular Letter No. B-119, giving present status of this matter, and after discussion, the following was adopted:

"Moved, That lines, members of this Committee re-affirm their previous individual announcement (Proceedings B-25, Feb. 3rd, 1904), and as shown in joint letter to Western Roads, issued by the Chairman, Feb. 8th, File B-448, and all pledge themselves to stand by this position."

The term for which the Executive Committee was elected in January, 1903, having expired, Messrs. R. A. Campbell, Wm. Hodgdon and Walter Nichols were elected as Executive Committee for the year 1904.

Meeting considered the subject of rules governing shipments of packing-house products, fresh meats, etc., which was brought up by a letter from a member. The Chairman stated that the rules published in Joint Committee Tariff I. C. C. B-38 are a copy of rules published in C. & O. R. Committee Circular Letter No. 353, April 5th, 1904, as instructed by members of the Committee in reply to Circular Letter No. B-126.

After consideration, the following was adopted:

"Whereas, The wording of the present Rule No. 3 in Amendment No. 3 to I. C. C. B-38, governing shipments of packing-house products, etc., results in misunderstanding of the desire of lines members of the Committee, particularly with the inspectors and local agents. Lines interested individually announce that Rule No. 3 governing shipments of packing-house products, etc., be amended to read as follows:

Rule 3: When any of the articles specified in Note 1 or articles taking 5th class rates in carloads as per current Official Class'n are loaded into a car containing 3,000

pounds or less of dressed beef, sheep or hogs, said dressed beef, sheep or hogs shall be charged for at the carload dressed beef rate at 3,000 pounds. All other articles specified in Note 1 at the carload packing-house product rate, actual weight, and those not specified in Note 1, taking 5th class in carloads, as per current Official Class'n, at the actual weight, and at their carload class rate, but the weight of the latter shall not be used to make up the deficiency where the weight of the dressed beef, sheep or hogs is less than 3,000 lbs. Should the car contain a greater quantity than 3,000 pounds of dressed beef, sheep or hogs, the actual weight of the dresed beef, sheep or hogs shall be charged for. Other articles than those enumerated in Note 1 and articles taking 5th class in carloads, as per current Official Class'n, may be loaded in the same car, but such other articles will be charged for at the less carload rate applying thereon. In no case, however, will the minimum charge on the entire shipment be less than 20,000 lbs. at the dressed beef rate."

Members read correspondence on the subject of restoring whiskey in wood, any quantity, to Official Class'n rating, and the following was adopted:

"Lines members of this Committee, carrying a 17-cent rate, any quantity, on whiskey, in wood, from Louisville and Cincinnati to East St. Louis, individually advise that effective June 15th, rates will be restored to the Official Class'n basis, and the Chairman is requested to correspond with the Chairman of the Louisville and Cincinnati Freight Committees, with the view to having same basis announced from Cincinnati and Louisville to Upper Mississippi River crossings."

The subject of rate on scrap iron was brought up by letter from a member making application for a reduction in rate. The subject was submitted to members by Circular Letter

No. B-125, April 22nd, and was disposed of as shown in Circular Letter No. B-127, May 2nd. At meeting to-day the member making the application stated his reasons, and after some discussion, the following was adopted:

"Lines interested individually advise that, effective on legal notice, they will make rate on scrap iron, from East St. Louis to Louisville and Louisville points, Cincinnati and Cincinnati points, $1.70 per gross ton, 2240 lbs., C. L. minimum weight 15 gross tons."

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 89."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, Mo., June 22nd, 1904.

The following resolution was adopted, with reference to rate on talc, carloads:

"Moved, That a rate of 10 cents per 100 lbs. be established on talc, C. L., minimum weight 40,000 lbs., between East St. Louis, Cincinnati and Louisville."

Meeting considered the matter of application via Upper Mississippi River crossings of rates on commodities in this Committee's tariffs, and the Chairman stated that this subject was brought up by letter from the Audtor of the U. S. Treasury Department, requesting information as to whether the commodity rates published by this Committee in their tariff were applicable on traffic via Upper Mississippi River crossing, etc. Correspondence was read, and as the subject was satisfactorily disposed of by the Chairman, it was moved that the subject be stricken from the docket.

Meeting also considered the subject of minimum car-load weight on potatoes from Texas, via East St. Louis to Cincinnati and Louisville. This subject was submitted to mem-

bers by Circular Letter No. B-131, June 18th, 1904, and after consideration at meeting to-day, it was

"Moved, That there be no change in the present minimum C. L. weight of 30,000 lbs. on potatoes from East St. Louis, when coming from beyond, and the Chairman be instructed to call attention of the western lines to the fact that the minimum required by lines east of East St. Louis is 30,000 lbs., with the request that such lines as have tariffs at variance with this minimum, correct their tariffs accordingly."

The following resolution was also adopted:

"Moved, That the Chairman is hereby instructed to investigate, and if it is found that the through rate on melons in carloads, from Southeastern Missouri and Arkansas points to Louisville and Cincinnati, are made on combination to and from Cairo, and are less than the combination via East St. Louis initial lines be authorized to publish the same through rates via East St. Louis as are applicable via Cairo, such through rates to allow western lines the same proportion to East St. Louis as accrues to them on like shipments to C. F. A. points (as per C. F. A. Info. 5244), provided said through rates do not in any case allow lines east of East St. Louis less than 18 cents per 100 lbs. to Louisville and Cincinnati. In other words, the Chairman, after investigation, is to furnish western lines with the rate per 100 lbs. that will be accepted by lines east of East St. Louis to Louisville and Cincinnati."

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 90."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, Mo., September 28th, 1904.

Meeting took up the matter of rate on leaf tobacco samples in boxes, which subject was last considered at meeting

June 22nd, and referred to Cincinnati and Louisville Freight Committee for consideration and recommendation. At meeting to-day Chairman read the reports of the Cincinnati and Louisville Committees, which was to the effect that the weight of the hogshead includes the weight of the samples, and the samples should, therefore, be carried free, when shipped with the hogshead.

In view of the recommendation of the Louisville and Cincinnati Committees, it was,

"Moved, That we re-affirm action taken at meeting May 25th, proceedings No. B-26, as follows:

'It is the understanding of the St. Louis-Cincinnati-Louisville Freight Committee that when shipments of tobacco samples accompany shipments of unmanufactured tobacco in hogsheads, the weight of the tobacco contained in the cases of samples is included in the weight marked on the hogsheads, therefore if the entire shipment is billed at the total gross weight, as marked on the hogsheads, such weight will cover the entire shipment, and no extra charge should be made for the weight of the samples.

If tobacco samples in cases be shipped not accompanied by hogsheads, then Official Class'n. rate should apply.'

Chairman called attention to rates published in C. F. A. Info. 5443 on cast iron pipe, C. L., and requested information as to whether rates named therein from Cincinnati, Ohio, Louisville, Ky., Jeffersonville and New Albany, Ind., to East St. Louis, be published in this Committee's tariffs.

Attention was also called to C. & O. River Committee proportional rates No. 2, publishing rate on pipe and fittings, cast iron; and after discussion, it was

"Moved, That the Chairman be instructed to publish rates shown in C. F. A. Info. 5443 in this Committee's tariffs on pipe and fittings, cast iron; the rate to apply westbound only."

The subject of proportional rate on grain, East St. Louis to New Albany, Ind., was brought up by letter from a member requesting that rate of 4 cents per 100 lbs. on grain to Louisville be shown in the proportional tariff as also applying to New Albany, Ind., via the Southern Ry., and it was

"Moved, That the Chairman be instructed to amend Joint Proportional Tariff I. C. C. B-41, making rate of 4 cents per 100 lbs, on grain to Louisville also apply to New Albany, Ind., via the Southern Ry."

Meeting considered rate on bolts, handle, in the rough C. L., the subject being brought up by correspondence from a member, which was read. It was stated that the commodity in question was simply rough timber and entitled to the lumber rate, and after due consideration the following was individually adopted by roads interested:

"Moved, That rate of 9 cents per 100 lbs. be established on bolts, handle, in the rough, sawed or split, C. L., minimum weight 30,000 lbs., from East St. Louis to Louisville and Louisville points."

The following resolution was adopted:

"Moved, That the proportional rate now in effect on broom corn to Louisville be authorized to apply to Cincinnati also."

The subject of rate on glass bottles, C. L., Evansville to Louisville, was brought up by a member making application for rate of 10 cents per 100 lbs., Evansville to Louisville, account of river competition, and similar rates being in effect from the Gas Belt. After discussion, the following, was individually adopted:

"Moved, That rate of 10 cents per 100 lbs. be established on glass bottles, C. L. minimum weight 26,000 lbs., from Evansville to Louisville. The rate via boat to be made the

usual differential under the all rail rate, via. 2 cents, making rate via boat 8 cents."

The following resolution was also adopted:

"Moved, That rate of 6 cents per 100 lbs. be established on wrapping paper, C. L., minimum weight 40,000 lbs., all rail, Evansville to Louisville, the rate via boat to be 1 cent less, viz.: 5 cents per cwt."

Above exhibit, consisting of five pages, is marked "Plaintiff's Exhibit Fraser No. 91."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, Mo., November 23rd, 1904 .

Meeting considered rates on glass bottles, and glassware, the above subjects having been submitted by circular letter Nos. B-151 and B-148 and 149 respectively. It was stated by a member that a meeting had been called in Chicago, Nov. 29th, by Chairman C. F. A., to consider rates on glassware, etc., generally, and it was "Resolved, That the above subjects be laid over until action of meeting called for Nov. 29th, is ascertained." It was also

"Resolved, That in the event action is taken in Chicago looking toward the restoration of rates, that the Chairman will immediately call a meeting of this Committee to consider the subject."

Meeting also considered proper rating to apply on hams, loose, C. L., in refrigerator cars. The Chairman called attention to the fact that in the Joint Freight Tariff I. C. C. B-40 there is an item in the commodity list "Meats, Bulk, C. L., Minimum 28,000 lbs." which has caused controversy as to its proper application, and it was

"Resolved, That the item, "Meats, Bulk, C. L., minimum weight 28,000 lbs." be eliminated from tariff."

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 92."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, January 25th, 1905.

Meeting considered rate on glass bottles, carloads, which subject was last considered at meeting Nov. 23rd, proceedings No. B-29. At meeting today, it was

"Resolved: That in view of C. F. A. legislation placing glass bottles on basis of 6th class, with minimum 30,000 lbs., it is the sense of this Committee that all rates on this commodity between points subject to the jurisdiction of this Committee be made to conform thereto. (See C. F. A. Info. 5569, effective Dec. 8th, 1904, to expire June 30th, 1905)."

The subject of rate on sand from Missouri pits was submitted to members by circular letter Nos. B-153, B-156 and B-159, and brought up again at meeting today by letter Jan. 16th, file 10077-R from Chairman C. F. A., which was read, and action taken as follows:

"Whereas, It is the sense of this Committee that in order to protect the present rate adjustment as between Missouri and Illinois pits it is necessary for western roads to publish through tariffs and for eastern roads to cancel their proportional rates from East St. Louis to Louisville, Cincinnati, etc.

Resolved, That the Chairman so advise western roads, requesting them to publish through rates, and take the question up with roads members of the St. Louis Eastbound Freight Committee, with a view of having them take like action to Gas Belt and other points."

A note in the record states that this subject will be presented to the St. Louis Eastbound Freight Committee at their next meeting.

The subject of rates on scrap iron from Cincinnati and Louisville to East St. Louis was submitted by circular letter

No. B-160, Jan. 19th. Answers not having been received from all members, the subject of rate in both directions was considered at meeting today, and it was individually announced that the rate on scrap iron, C. L., minimum 15 gross tons, would be $1.80 per gross ton, between East St. Louis-Cincinnati and Louisville, effective on legal notice, and it was

"Resolved, That the Chairman be instructed to amend Tariff I. C. C. No. B-42 in accordance with the announcements."

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 93."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in C. F. A. Rooms, Chicago, Ill., May 11th, 1905.

Meeting considered rates on burlap and gunny bags, East St. Louis vs. New Orleans and Memphis, to Cincinnati, Louisville, etc. This subject was brought up by letter from a member, submitting letter from the St. Louis Traffic Bureau. After consideration, it was

"Moved, That the Chairman correspond with Mr. M. P. Washburn, Chairman, Southeastern Mississippi Valley Ass'n., regarding rate in effect to Cincinnati, Ohio, Covington and Newport, Ky., New Albany and Jeffersonville, Ind., from New Orleans, Memphis, etc., with the view of ascertaining whether an advance can be made to the points named, as well as to Central Freight Association territory."

The subject of rate on scrap iron, C. L., Evansville to Cincinnati, was brought up by member calling attention to individual issues from Evansville and East St. Louis. After consideration, it was

"Moved, That the matter be deferred until the meeting on the 19th inst., the Chairman to advise G. F. A. Ill. Cent.

R. R. that the question of an advance from both Evansville and East St. Louis is being under consideration."

Meeting considered the matter of application for rate and divisions on mahogany logs or timber, East St. Louis to Cincinnati, when from Mexican Gulf ports via Galveston and Texas City, and after consideration of the proposition the following was adopted:

"Moved, That the roads, members of this Committee, be authorized to accept from East St. Louis to Cincinnati and Louisville respectively 32.6 per cent of the gross inland rates, with a minimum of 8 cents per 100 lbs. Initial lines to publish through tariff and division sheet."

The following resolution was adopted:

"Recommended, That the Chairman appoint Special Committees to check the commodity list and rates now published in Tariff I. C. C. No. B-42 and Amendment No. 3, in effect between East St. Louis-Louisville and Louisville points, and East St. Louis, Cincinnati and Cincinnati points, for the purpose of making recommendation as to any change in list of commodities or rates that can be made, and report to the Chairman at the earliest possible date in order that he may transmit the Special Committee's recommendation by circular letter to the general Committee prior to meeting to be called at the new Seelbach Hotel, Louisville, Ky., May 19th, at 10:00 a. m.

Said Committees to consist of six (6) westbound roads, three (3) at Cincinnati, three (3) at Louisville, and four (4) eastbound roads, representing Cincinnati, Louisville, etc., from St. Louis.

The Committees above referred to and other members to meet on the 19th inst. for joint consideration and final action on the Special Committees' reports; and it was further

Recommended, That where individual tariffs are in effect

which have not been sanctioned by this Committee, that all roads publishing the same furnish said Special Committees with copies thereof."

The representatives of roads named below were appointed to act on said Special Committees:

At Cincinnati: B. & O. S. W. R. R.; C. C. C. & St. L. Ry.; P. C. C. & St. L. Ry.; S. T. McLaughlin, Chairman.

At Louisville: L. H. & St. L. Ry.; Southern Ry.; B. & O. S. W. R. R.; L. J. Irwin, Chairman.

At East St. Louis: Southern Ry.; L. H. & St. L. Ry.; B. & O. S. W. R. R.; Vandalia R. R.; R. A. Campbell, Chairman."

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 94."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Cincinnati, Ohio, May 19th, 1905.

Meeting considered the subject of division of rates between Cincinnati and Louisville and Arkansas points, via East St. Louis. This subject was brought up by letter from B. & O. S. W. R. R., calling attention to action taken at meetings Jan. 23rd (Proceedings No. 1), and June 26th (Proceedings No. 6), and raising the question as to what basis of divisions should govern in dividing through rates to Fort Smith, Ark., if shipments move via M. K. & T. R. R., etc.

After discussion the lines represented individually announced that they will demand their full locals to East St. Louis on Fort Smith traffic, except in connection with the St. Louis Southwestern and St. Louis, Iron Mountain & Southern Roads, via which routes the percentage division of 30 per cent of the Little Rock rate will be accepted by lines east of East St. Louis.

The Chairman was also instructed to take the subject up with F. T. M., St. L. & S. F. R. R., referring to previous correspondence, and ask him if he is not now willing to authorize the application of differential rates on business from Cincinnati and Louisville to all his local points, in which event we will be willing to accept 30 per cent of the Little Rock rates uniformly to common as well as local points."

Meeting also considered division of rates from Louisville, etc., to Indian and Oklahoma Territory. This subject was considered at joint conference with Indian and Oklahoma Territory Committee on May 17th, at which time no understanding was arrived at. After discussion at meeting today, lines represented individually announced that, effective June 1st, they will not accept less than their full local rates from Cincinnati, Cincinnati points, Louisville and Louisville points (under the jurisdiction of this Committee), to East St. Louis, on traffic destined to Indian and Oklahoma Territory, and that the Chairman be instructed to so notify southwestern lines, through Mr. Geo. W. Cale, Chairman.

Members of this Committee to be furnished with a copy of the notice by circular letter.

As provided for at meeting of the 11th (Proceedings No. B-31), the Sub-committees appointed to consider and recommend changes in list of commodities, etc., published in Joint Freight Tariff, made their reports; and after due consideration of the subjects, it was deemed advisable to have conference with the Chicago and Ohio River Committee, and the Chairman was instructed to correspond with Secretary of the C. & O. R. Committee, with the view of arranging for a conference at the earliest possible date, and notify the members by circular letter.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 95."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held in the Chicago & Ohio River Committee rooms, Chicago, Ill., June 2nd, 1905.

Meeting considered rules governing shipments of packing-house products and dressed meats. This subject was last considered at meeting May 25th, 1904; and was also taken up with Chairman C. F. A., and Secretary C. & O. R. Committee, with the view of having same list and rules made applicable by the C. F. A., C. & O. R. Committee, and St. L.-C.-L. Frt. Committee: On March 22nd, 1905, the proposition was referred to a Special Committee, Messrs. Rainer, Fulton and Fraser, under the following resolution:

"Resolved, That this subject be referred to a Committee, consisting of Messrs. Paul P. Rainer, R. M. Fraser and C. E. Fulton, for the purpose of drafting uniform rules to govern the handling of shipments of the traffic in question, said rules to be in harmony with the rules of the Central Freight Association."

Attention being called to report of the Special Committee, also to C. & O. R. Committee Circular Letter No. 383, May 29th, 1905, which were given consideration, it was individually announced by lines represented that, effective June 19th, their rules governing shipments of packing-house products and fresh meats, between East St. Louis, Cincinnati, Louisville, etc., would be as per Chicago & Ohio River Committee Circular Letter No. 383, and Chairman was instructed to print same in the Committee tariffs.

At the meeting in Cincinnati, May 19th, it was suggested that when the Committee tariffs are re-issued, the rates be shown in four (4) columns; i. e., two eastbound, and two westbound. After consideration to-day, the Chairman was instructed to make the change suggested.

Meeting considered rates and divisions on cotton-seed products, Arkansas points to Cincinnati and Louisville, via East St. Louis. Attention was called to Mo. Pacific Tariff No. I. S. 12593 and Division Sheet No. 21 in connection therewith, showing divisions allowed lines east of East St. Louis, contrary to action taken at meeting of the Committee November 25th, proceedings No. B-24, 1903, etc., and after discussion the subject was referred to a meeting of the initial lines at St. Louis, with Mr. Fraser as Chairman, to take this matter up and adjust it finally.

Above exhibit, consisting of three pages, is marked "Plaintiff's Exhibit Fraser No. 96."

Plaintiff offers in evidence record of special meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at St. Louis, June 8th, 1905.

After discussion and full consideration, the following was adopted:

"Recommended, That each line notify the Missouri Pacific and St. Louis Southwestern Railroads that they will demand east of East St. Louis on cotton-seed products, from Arkansas points (except Texarkana) to Louisville, Ky., Cincinnati and Ivorydale, Ohio, 40 per cent of the current through rate from point of shipment, subject to minimum of 8 cents per 100 lbs., on oil, residuum, foots, settlings, tank bottoms and soap stock, and request the cancellation of any division sheet issued on any other basis.

It is understood that lines east of East St. Louis will not accept, on this traffic, a sub-division of the proportion accruing to lines north of Cairo, based on 40 per cent of the through rates, plus an arbitrary of 2 cents.

Each line will also notify the Missorui Pacific of intention to demand on cotton-seed products, all kinds, from points in Indian and Oklahoma territory and in Louisiana,

to Cincinnati, Ivorydale and Louisville, their full local or proportional rates east of East St. Louis.

Note: Advices as above to be transmitted through Mr. Fraser."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 97."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at French Lick Springs, Ind., July 7th, 1905.

Meeting considered rate on scrap iron, carloads; the subject having been last considered by this Committee, as shown in Proceedings No. B-30, Jan. 25th, 1905.

At joint conference with the C. & O. R. Committee, Chicago, June 2nd, 1905, it was decided that matter be made subject of joint conference meeting between East St. Louis Committee, C. & O. R. Committee and C. F. A. lines, for general check in lining up all rates.

In line with above, Chairman C. F. A. issued call No. 269, dated June 30th, for joint conference to be held at French Lick Springs, July 7th. Mr. C. E. Fulton was elected Chairman of the joint conference on the subject of scrap iron rates generally, and will issue report showing the action taken.

The subject of rate on lumber between New Albany, Jeffersonville and Evansville was brought up by letter from the Evansville Traffic Bureau, stating that a rate of 8 cents per 100 lbs. was in effect on lumber, C. L., New Albany to Evansville, whereas this Committee's tariff names rate of 7 cents. The Chairman stated he had taken subject up with lines mentioned, who requested that tariff be amended showing that the rate of 7 cents between Evansville and New Albany and Jeffersonville, Ind., is not applicable via the

Southern Ry., and the Chairman was instructed to correct the tariff as requested.

Above exhibit, consisting of four pages, is marked "Plaintiff's Exhibit Fraser No. 98."

Plaintiff offers in evidence record of meeting of the St. Louis-Cincinnati-Louisville Freight Committee, held at Chicago, Ill., September 29th, 1905.

Meeting considered proportional rates on grain and grain products, East St. Louis to Cincinnati, Louisville, etc., the subject being brought up by the Chairman calling attention to action taken at meeting Sept. 5th of the Eastbound Freight Committee on above subject, at which time rates to Mitchell and North Vernon, Ind., were made 8 cents, same as in effect to Louisville and Cincinnati, etc.

It was stated by a member that there would be a meeting of the Louisville-St. Louis lines next week to consider the rate question, and it was suggested that nothing could be done with the subject until after that meeting, and the subject was therefore laid over until the next meeting.

The subject of rates on burlap and gunny bags, East St. Louis vs. New Orleans and Memphis to Cincinnati, Louisville, etc., was also considered. This subject was last considered at meeting July 7th, proceedings No. B-35, and continued on the docket. At meeting today Chairman read subsequent correspondence with Chairman Washburn of the Southeastern Mississippi Valley Ass'n., and was instructed to continue the subject on the docket until the next meeting.

There is a page marked "Erratum," attached to the record of this meeting, dated Oct. 5th, 1905, which reads as follows:

"Please correct proceedings No. B-36, dated Chicago, Sept. 29th, Subject No. 55, to read as follows:

Rate on Stoves, carloads: This subject submitted to

members by Circular Letter No. B-211, and at suggestion of a member held in abeyance pending meeting of interested lines through Toledo, Detroit, etc.

At meeting today it was stated that at meeting of interested lines when this subject was considered, it was decided that all special rates on stoves, C. L., from and to all points in C. F. A. territory, be restored to Official Class'n. basis, effective Oct. 16th, 1905, the current rate from Detroit to Chicago, and from Toledo to East St. Louis via the T. St. L. & W. and Wabash Railroads to be ignored by all other companies.

As the rate from Cincinnati to East St. Louis is now on Official Class'n. basis, 15 cents per 100 lbs., no change is necessary to put Cincinnati shippers in line with those at Toledo and Detroit, and the subject was tabled.

The term for which the Executive Committee was elected in May, 1904, having expired, it was

"Moved, That Messrs. R. A. Campbell, Walter Nichols and Wm. Hodgdon be and are hereby elected an Executive Committee for the ensuing year, who shall hold office until their successors are elected, as provided for in the Articles of Organization."

Meeting considered proportional rates on lumber and shingles from East St. Louis, when originating at North Pacific coast points. The above proposition was submitted to members by Circular Letters B-206 and B-212. At meeting today replies received to the circular letters were read, and after discussion the lines represented individually instructed the Chairman to publish proportional rates on lumber and shingles, when originating at North Pacific Coast points, 8½ cents, East St. Louis to Louisville, and 7½ cents to Cincinnati, to equalize the combination via Chicago.

The question of traffic under the jurisdiction of this Committee was brought up by a member, and after discussion a

motion was adopted to the effect that Article B, Section One (1) of the Articles of Organization be amended to include Louisiana, west of the Mississippi River.

As to division of rates on traffic from Louisiana west of the Mississippi River, the Chairman to issue Circular Letter to the members calling their attention thereto, and call a meeting in St. Louis to make a check of the divisions of rates, etc. Chairman to arrange with the St. Louis resident members for the date of meeting.

In connection with the above, a Committee composed of Messrs. A. Fries, C. J. Brister and S. C. Matthews was appointed to prepare and submit a proposition as to division of rates to be agreed upon on traffic from Southern, Southwestern and Pacific Coast, etc., which is to be submitted by the Chairman to all members for their views."

Above exhibit, consisting of five pages, is marked "Plaintiff's Exhibit Fraser No. 99."

Plaintiff offers in evidence Circular Letter No. B-219, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., October 28th, 1905; File B-378; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee; as follows:

"In accordanc with action at meeting, Chicago, Sept. 29th, Proceedings No. B-36, Item No. 60, representatives of B. & O. S. W., C. C. C. & St. L., Ill. Cent., L. H. & St. L., Southern, and Vandalia railroads, met in this office yesterday to confer regarding divisions on traffic from Louisiana, west of the Mississippi River, and their report and recommendation is as follows:

Whereas, The basis of divisions on traffic from points in Louisiana, west of the Mississippi River, to Louisville and Cincinnati, suggested by southwestern roads, i. e., to allow lines east of East St. Louis only their percentage pro-

portion of the New Orleans rates, is not remunerative and and does not comprehend a reasonable division of the through rate;

Recommended; That the following minimum specific proportions of through rates will be required, viz.:

		Louisville.	Cincinnati.
Sugar	(C. L.)	6½	7½
	(L. C. L.)	11	12
Molasses	(C. L.)	7½	8½
	(L. C. L.)	15	16
Rice	(C. L.)	7	8
	(L. C. L.)	12	13
Canned goods, Oysters and Shrimp	(C. L.)	6½	7½
Jambalaya Relish	(C. L.)	22.6	28.2
	(L. C. L.)	23.3	28.2
Peppers in brine	(C. L.)	10	11
	(L. C. L.)	15	16

Specific proportions east of East St. Louis on other commodities are to be fixed from time to time as the necessity therefore develops The adoption of the above is predicated on the adoption and maintenance on the part of the Cairo, Gale or Thebes lines of specifics from Cairo, Gale or Thebes, not less than 2 cents per 100 lbs. above the specifics from East St. Louis. The specifics thus established from Cairo, Gale or Thebes are not to be prorated via East St. Louis.

Note: It is understood that the Southwestern Lines are to re-issue or amend their tariffs and division sheets accordingly, and the specifics are not to be published as proportional rates from either East St. Louis, Cairo, Gale or Thebes.

Please favor me your approval or specific objections to the report of the Sub-committee.

Result will be communicated, and further action arranged."

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 100."

Plaintiff offers in evidence Circular Letter No. B-218, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.; October 27th, 1905; File B-378; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee; marked "Important;" asking members to be present or authoritatively represented at meeting at St. Louis, October 27th, 1905, with necessary tariffs and percents to make check in accordance with action taken at meeting in Chicago, Sept. 29th, Proceedings No. B-36, as follows:

"Above question brought up by a member, and after discussion a motion to the effect that Article B, Section 1, of Articles of Organization, be amended to include Louisiana west of the Mississippi River, was adopted.

As to division of rates on traffic from Louisiana, west of the Mississippi River, the Chairman to issue a circular letter to the members, calling their attention thereto, and call a meeting in St. Louis to make a check of the divisions of rates, etc."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 101."

Plaintiff offers in evidence Circular Letter No. B-217, signed "R. M. Fraser, Chairman;" dated St. Louis, October 23rd, 1905; File B-308; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee; marked "Important;" as follows:

"Referring to Circular Letters No. B-214, B-216, and other correspondence regarding proportional rates on grain, East St. Louis to Cincinnati, Louisville, etc., as now pub-

lished in Amendment No. 6 to Joint Proportional Tariff I. C. C. No. B-45.

I am in receipt of letter from G. F. A., L. H. & St. L. Ry., as follows:

'Dear Sir:—Referring to amendment No. 6 to your Joint Proportional Tariff I. C. C. No. B-45, naming rate of 6 cents on grain originating beyond St. Louis. My understanding of the 6 cent rate is that it is to apply on grain originating beyond St. Louis and reshipped at St. Louis, and that your tariff should so read. It is not my understanding that the 6 cent rate is to affect the rates from points say in Illinois, where through rates and divisions are established. The rate from Peoria to New Albany and Jeffersonville is 7 cents and to Louisville 7½ cents. The local rate from Peoria to E. St. Louis is 3 cents. I do not understand that the line from E. St. Louis to Louisville on a direct shipment from Peoria would require 6 cents, but would require 4½ cents. There are a great many points in Illinois where through rates and divisions are in effect to Louisville, and on direct shipments from these points to Louisville the present through rates and divisions will continue in effect.

Will you please take up with interested lines the question of amending your tariff accordingly?'

Please favor me with your instructions on proposition to re-issue amendment No. 6 to Joint Proportional Tariff I. C. C. No. B-45, making the item "Grain (originating beyond) C. L. (see Note 2)—6-6,' read as follows:

'Grain, originating beyond St. Louis and reshipped at St. Louis, C. L. (See Note 2)—6—6.'

An immediate reply is requested."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 102."

Plaintiff offers in evidence Circular Letter No. B-216, signed "R. M. Fraser, Chairman;" dated St. Louis, October 11th, 1905; File B-308; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee; as follows:

"I give below copy of telegram received at noon to-day from G. F. A., L. H. & St. L. Ry.:

'Referring to Circular Letter B-214, Oct. 4th, giving notice of advance in grain rates, Oct. 23rd. On account position taken by Southern Ry. at conference here yesterday no change will be made in present rate on grain until otherwise advised.'

In view of the notice quoted above, I shall defer making any change in the rate of 8 cents per 100 lbs. on grain, now published in Amendment No. 4, effective Sept. 12th, to Joint Freight Tariff I. C. C. No. B-44.

As announced in Circular Letter No. B-214, on authority of three roads interested, Amendment No. 4 to Proportional Tariff I. C. C. B-45 has been issued cancelling the grain rate, 4 cents per 100 lbs., effective Oct. 23rd."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 103."

Plaintiff offers in evidence Circular Letter No. B-215, signed "R. M. Fraser, Chairman;" dated St. Louis, October, 9th, 1905; File B-378; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee, notifying members of the postponement of meeting.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 104."

Plaintiff offers in evidence Circular Letter No. B-214, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., October 4th, 1905; File B-308; addressed to members of

the St. Louis-Cincinnati-Louisville Freight Committee, marked "Important;" as follows:

"Announcement has been received that effective October 23rd, the rate on grain, in carloads, from East St. Louis proper, or from beyond, via the L. H. & St. L. Ry. and Illinois Central Railroad, to Louisville and via the Southern Ry., to Louisville, Jeffersonville and New Albany, will be 6 cents per 100 lbs.

Please advise immediately what rates you desire published, effective October 23rd, for account of your company, from East St. Louis to Louisville, Ky., Jeffersonville and New Albany, Ind., also to Cincinnati, Ohio, Newport and Covington, Ky.,

In the absence of instructions from you to the contrary, the rate of 8 cents per 100 lbs. now published in Amendment No. 4 to I. C. C. No. B-44, will remain in effect except via the roads authorizing otherwise.

In view of the above announcement, Joint Proportional Tariff, I. C. C. No. B-45 will be amended effective October 23rd, cancelling proportional rate of 4 cents per 100 lbs. on grain, East St. Louis to Louisville and New Albany.

Please favor me with specific instructions, and oblige."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 105."

Plaintiff offers in evidence Circular Letter No. B-213, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., October 3rd, 1905; File B-378; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee; relative to traffic under the jurisdiction of this Committee; asking members to be present or authoritatively represented at a meeting on Wednesday, October 11th, at 2:00 o'clock p. m., with necessary tariffs, and per cents to make check in accordance with action shown in Proceedings No. B-36 of meeting in Chicago, Sept. 29th, as follows:

"Above question brought up by a member and after discussion a motion to the effect that Article B, Section One (1) of Articles of Organization be amended to include Louisiana, west of the Mississippi River, was adopted.

As to division of rates on traffic from Louisiana west of the Mississippi River, the Chairman to issue Circular Letter to the members, calling their attention thereto, and call a meeting in St. Louis to make a check of the divisions of rates, etc."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 106."

Plaintiff offers in evidence Circular Letter No. B-212, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., September 18th, 1905; File B-491; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee; in reference to proportional rate on lumber and shingles, C. L., from Pacific Coast points, East St. Louis to Cincinnati and Louisville, as follows:

"Referring to Circular Letters B-206 and B-210 on same subject, I am in receipt of letter 16th inst. from a member as follows:

'Referring to your Circular Letter B-206 of Aug. 21st, proposal for the establishment of rate on lumber and shingles, carloads, E. St. Louis to Cincinnati, Jeffersonville, New Albany and Louisville, on business originating at Pacific Coast points, to equalize the existing combinations via Chicago.

Although the roads interested individually decided not to make effective the proposition referred to above, we are still of the opinion that rate necessary to equalize the combination via Chicago should be provided for in the Committee issue.

Since this proposition was originally submitted, the rate

from Chicago to Cincinnati, Jeffersonville and New Albany has been reduced from 11 to 10 cents per 100 lbs., making necessary a rate from E. St. Louis to the destinations enumerated above of 7½ cents which would of necessity have to be applied to Louisville, Ky.

Will ask that you again place this matter before the members of the St. Louis-Cincinnati-Louisville Freight Committee, calling their attention to the fact that while C. F. A. Info. 2265 authorizing equalization via E. St. Louis, Peoria or Chicago of through rate based on any one of these gateways is correct in principle it is not in reality authority for equalizing the through rate made on Chicago via E. St. Louis to the destinations before mentioned, as the St. Louis-Cincinnati-Louisville Freight Committee traffic is not under the jurisdiction of the Central Freight Association.

In this connection I should also like to call your attention to the fact that a combination cannot be legally protected via any gateway other than that upon which the through rate is based without tariff is published to cover, and this phase of the subject should be given consideration in reviewing the proposition before us."

Please favor me with your views on proposition to amend Joint Proportional Tariff I. C. C. B-45, naming rate 7½ cents per 100 lbs. on lumber and shingles, C. L., originating at Pacific Coast points, minimum weight as per Official Class'n, from East St. Louis to Jeffersonville, New Albany, Louisville and Cincinnati.

Prompt reply requested."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 107."

Plaintiff offers in evidence Circular Letter No. B-211, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., September 11th, 1905; File B-395; addressed to members

of the St. Louis-Cincinnati-Louisville Freight Committee; in reference to rate on stoves, C. L., minimum weight 24,000, lbs., to East St. Louis, as follows:

. "I am in receipt of letter Sept. 9th from Chairman Cincinnati Freight Committee as follows:

'At a meeting of this Committe, held Sept. 8th, the above outlined subject was considered, and in view of information from Chairman Tucker to the effect that it is impossible to get the reduced rates on stoves from Detroit to Chicago cancelled at this time, the following recommendation was adopted individually by the lines interested:

Recommended, That the Chairman be instructed to advise Chairman Fraser, of the St. Louis-Cincinnati-Louisville Freight Committee, that the lines, members of this Committee, are in favor of establishing a rate of 14 cents per 100 lbs. on stoves, carloads, minimum weight 24,000 lbs., from Cincinnati to East St. Louis, Ill.'

Please favor me with your views on proposition to amend Joint Freight Tariff I. C. C. No. B-44, naming rate of 14 cents per 100 lbs. on stoves, carloads, minimum weight 24,000 lbs., Cincinnati, Louisville, etc., to East St. Louis.

Prompt reply requested."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 108."

Plaintiff offers in evidence Circular Letter No. B-210, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., September 1st, 1905; File B-491; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee; as follows:

"Referring to Circular Letter No. B-206, dated August 21st, regarding proportional rate on lumber and shingles, carloads, from Pacific Coast points, East St. Louis to Cincinnati and Louisville.

After further investigation roads interested individually advise that it has been decided not to make effective the proposition in Circular Letter above referred to."

Plaintiff offers in evidence Circular Letter No. B-198, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., July 13, 1905; File A-118; addressed to members of the St. L. C. L. Freight Committee, concerning rate on glass bottles, Evansville to Louisville and Cincinnati.

Above exhibit is marked "Plaintiff's Exhibt Fraser No. 121."

Plaintiff offers in evidence Circular Letter No. B-197, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., July 11, 1905; File B-465; addressed to members of the

St. L. C. L. Freight Committee, giving memorandum of letters delivered at General Freight Office Missouri Pacific, Iron Mountain & Southern, and St. Louis Southwestern Railroads, on the subject of commodities named, relative to division of rates.

Above exhibit is marked "Plaintiff's Exhibt Fraser No. 122."

Plaintiff offers in evidence Circular Letter No. B-196, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., July 11, 1905; File B-394; addressed to members of the St. L. C. L. Freight Committee, in reference to rates on melons; notifying members of proper rates to apply by Cairo, Gale, Thebes, on divisional business and through business.

Above exhibit is marked "Plaintiff's Exhibt Fraser No. 123."

Plaintiff offers in evidence Circular Letter No. B-195, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 23, 1905; File B-304; addressed to members of the St. L. C. L. Freight Committee.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 124."

Plaintiff offers in evidence Circular Letter No. B-194, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 21, 1905; File B-304; addressed to members of the St. L. C. L. Freight Committee.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 125."

Plaintiff offers in evidence Circular Letter No. B-193, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 20, 1905; File B-308; addressed to members of the

St. L. C. L. Freight Committee, advising that the roads have decided not to make effective proposition establishing a proportional rate of 5½ cents per 100 lbs. on grain, C. L., East St. Louis to Cincinnati, Ohio.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 126."

Plaintiff offers in evidence Circular Letter No. B-192, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 14th, 1905; File B-308; addressed to members of the St. L. C. L. Freight Committee, relative to proportional rates on grain from East St. Louis to Cincinnati; containing proposition to establish proportional rate of 5½ cents per 100 lbs.; East St. Louis to Cincinnati, to apply on grain of all kinds coming from points beyond, and asking for vote of members to amend I. C. C. Tariff in accordance therewith.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 127."

Plaintiff offers in evidence Circular Letter No. B-191, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 10th, 1905; File B-322; addressed to members of the St. Louis C. L. Freight Committee, relative to rates on unmanufactured tobacco, from Cincinnati and Louisville to East St. Louis; quoting letter from G. F. A. Southern Ry., stating he will not make advance Louisville to East St. Louis on tobacco in hogsheads; and asking for views by wire on proposition to amend Joint Freight Tariff I. C. C. B.44, naming rate of 12 cents per 100 lbs. on unmanufactured tobacco from Louisville and Louisville points, to East St. Louis.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 128."

Plaintiff offers in evidence Circular Letter No. B-190, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 9, 1905; File B-308; addressed to members of the St. L. C. L. Freight Committee, relative to rate on grain and grain products, C. L., East St. Louis to Cincinnati and Louisville; quoting letter from member calling attention to rate of 8 cents per 100 lbs. on grain and grain products authorized by the Chicago & Ohio River Committee, from Chicago to Cincinnati and other Ohio River crossings, and asking same rate from East St. Louis to Cincinnati and Cincinnati points, and requesting Mr. Fraser to present the matter to other interested lines for their views, and published rate in joint tariffs, if other lines approve.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 129."

Plaintiff offers in evidence Circular Letter No. B-189, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 9th, 1905; File B-413; addressed to members of the St. L. C. L. Freight Committee, relative to rate on mantels, wood, crated or boxed, L. C. L., Cincinnati and Louisville to East St. Louis.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 130."

Plaintiff offers in evidence Circular Letter No. B-188, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 6th, 1905; File B-486 and A-114; addressed to members of the St. L. C. L. Freight Committee, relative to establishing rate of 12 cents per 100 lbs., C. L., on canned goods, Louisville, Ky., to East St. Louis, Ill.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 131."

Plaintiff offers in evidence Circular Letter No. B-187, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

May 31st, 1905; File B-389; addressed to members of the St. L. C. L. Freight Committee, relative to division of rates between Cincinnati and Louisville and Arkansas points via East St. Louis.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 132."

Plaintiffs offers in evidence Circular Letter No. B--186, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 29th, 1905; File A-114; addressed to members of the St. L. C. L. Freight Committee; quoting letter from member relative to rate adjustment on whiskey in wood, less carloads, between Louisville and Evansville; relative to Amendment No. 11 to G. F. O. 662; stating that L. & N. publish rate of 11 cents per 100 lbs. on whiskey in wood, less carloads, between Louisville and Henderson, Ky.; asking for views of members on proposition to amend the tariff on above commodity.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 133."

Plaintiff offers in evidence Circular Letter No. B-185, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 26th, 1905; File B-485; addressed to members of the St. L. C. L. Freight Committee; advising members of conference meeting with Chicago & Ohio River Committee, June 2nd; asking members to meet in Chicago & Ohio River Committee rooms, Monadnock Bldg., Chicago, June 2nd, 1905.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 134."

Plaintiff offers in evidence Circular Letter No. B-184, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 23rd, 1905; File B-310; addressed to members of the

St. L. C. L. Freight Committee, relative to traffic to Indian and Oklahoma Territory.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 135."

Plaintiff offers in evidence Circular Letter No. B-183, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 23rd, 1905; File B-485; addressed to members of the St. L. C. L. Freight Committee, notifying members of conference with Chicago & Ohio River Committee on June 2nd, 1905.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 136."

Plaintiff offers in evidence Circular Letter No. B-182, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 20th, 1905; File B-486; addressed to members of the St. L. C. L. Freight Committee; relative to canned goods, C. L., Louisville to East St. Louis; quoting letter from member complaining of cut in rate by Illinois Central.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 137."

Plaintiff offers in evidence Circular Letter No. B-181, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 20th, 1905; File B-308; addressed to members of the St. L. C. L. Freight Committee, concerning grain and grain products; calling attention to error in naming rates from East St. Louis, Ill., in circular theretofore issued.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 138."

Plaintiff offers in evidence Circular Letter No. B-180, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 12th, 1905; File B-419; addressed to members of the

St. L. C. L. Freight Committee; calling attention to the appointment of Special Committees to check commodity list and rates now published in Tariff I. C. C. No. B-42, in effect between East St. Louis and Louisville points; and calling on roads having individual tariffs not sanctioned by this Committee to furnish the same to the Committee immediately.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 139."

Plaintiff offers in evidence Circular Letter No. B-179, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 1st, 1905; File B-310; addressed to members of the St. L. C. L. Freight Committee; asking members to attend conference with the Indian and Oklahoma Conference Committee, Fullerton Bldg., May 17th.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 140."

Plaintiff offers in evidence Circular Letter No. B-178, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., April 22nd, 1905; File B-482; addressed to members of the St. L. C. L. Freight Committee, advising members of decision not to make effective rate of 13 cents per 100 lbs., C. L., on farm wagons, from Louisville to East St. Louis.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 141."

Plaintiff offers in evidence Circular Letter No. B-177, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., April 22nd, 1905; File B-310; addressed to members of the St. L. C. L. Freight Committee, relative to division of rates from Louisville to Indian and Oklahoma Territory.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 142."

Plaintiff offers in evidence Circular Letter No. B-176, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., April 17th, 1905; File B-482; addressed to members of the St. L. C. L. Freight Committee, concerning rate on farm wagons, Louisville to East St. Louis.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 143."

Plaintiff offers in evidence Circular Letter No. B-175, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., April 13th, 1905; File A-120; addressed to members of the St. L. C. L. Freight Committee, concerning rate on burlap bags, C. L. and L. C. L., between Evansville and Louisville, New Albany and Jeffersonville.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 144."

Plaintiff offers in evidence Circular Letter No. B-174, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., April 12th, 1905; File B-429; addressed to members of the St. L. C. L. Freight Committee, regarding rates on white and red lead and litharge.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 145."

Plaintiff offers in evidence Circular Letter No. B-173, signed "R. M. Fraser, Chairman;" dated April 6, 1905; File A-118; addressed to members of the St. L. C. L. Freight Committee, regarding rate on fire brick from Louisville, Ky., to Evansville, Ind.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 146."

Plaintiff offers in evidence Circular Letter No. B-172, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

April 5th, 1905; and File B-310; addressed to members of the St. L. C. L. Freight Committee, relative to percentages From Louisville to Indian and Oklahoma Territories."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 147."

Plaintiff offers in evidence Circular Letter No. B-171, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., March 29th, 1905; File A-118; addressed to members of the St. L. C. L. Freight Committee, concerning rates on fire brick, Louisville to Evansville, and asking for change of rate so as to meet competition.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 148."

Plaintiff offers in evidence Circular Letter No. B-170, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., March 13th, 1905; File B-376; addressed to members of the St. L. C. L. Freight Committee, in reference to establishing rate of $1.50 per net ton, C. L., on sand from Missouri pits to New Albany, Ind.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 149."

Plaintiff offers in evidence Circular Letter No. B-169, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., March 4th, 1905; File B-300; addressed to members of the St. L. C. L. Freight Committee.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 150."

Plaintiff offers in evidence Circular Letter No. B-168, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., Feb. 25th, 1905; File B-376; addressed to members of the St. L. C. L. Freight Committee, stating present authorized

rates from Missouri pits to Cincinnati, New Albany, and other points; and asking for views as to change in rate.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 151."

Plaintiff offers in evidence Circular Letter No. B-167, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., February 15th, 1905; File B-376; addressed to members of the St. L. C. L. Freight Committee, relative to through rates and division sheets to be published by Western roads on sand from Missouri pits.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 152."

Plaintiff offers in evidence Circular Letter No. B-166, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., Feb. 13th, 1905; File B-313; addressed to members of the St. L. C. L. Freight Committee; advising that it has been decided not to change the rate on pig lead and spelter, C. L., East St. Louis to Cincinnati.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 153."

Plaintiff offers in evidence Circular Letter No. B-165, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., February 6th, 1905; File B-429; addressed to members of St. L. C. L. Freight Committee; referring to C. F. A. Information No. 5675 naming rate on zinc oxide, C. L., from East St. Louis to all points in C. F. A. territory; and asking for views on proposition to change the rate.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 154."

Plaintiff offers in evidence Circular Letter No. B-164, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

February 6th, 1905; File B-300; addressed to members of St. L. C. L. Freight Committee, relative to change of eastbound rates.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 155."

Plaintiff offers in evidence Circular Letter No. B-163, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., February 2nd, 1905; File B-376; addressed to members of the St. L. C. L. Freight Committee, concerning through tariffs and division sheets to be published by Western roads on sand from Missouri pits.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 156."

Plaintiff offers in evidence Circular Letter No. B-162, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., February 1st, 1905; File B-323; addressed to members of the St. L. C. L. Freight Committee, relative to rate on coke, and change therein, East St. Louis to Louisville, Evansville and other eastern points.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 157."

Plaintiff offers in evidence Circular Letter No. B-161, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., Jan. 27th, 1905; File B-313; addressed to members of the St. L. C. L. Freight Committee, relative to reducing present rate of 10 cents per 100 lbs. on pig lead and spelter, East St. Louis to Louisville and Cincinnati.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 158."

Plaintiff offers in evidence Circular Letter No. B-160, Signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

January 19th, 1905; File B-313; addressed to members of the St. L. C. L. Freight Committee, relative to change in rate on scrap iron.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 159."

Plaintiff offers in evidence Circular Letter No. B-159, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., January 7th, 1905; File B-376; addressed to members of the St. L. C. L. Freight Committee, concerning rate on sand from Missouri pits.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 160."

Plaintiff offers in evidence Circular Letter No. B-158, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., January 7th, 1905; File B-437; addressed to members of the St. L. C. L. Freight Committee; being application for membership in the Committee by the C. & A. Railroad.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 161."

Plaintiff offers in evidence Circular Letter No. B-157, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., December 27th, 1904; File B-313; addressed to members of the St. L. C. L. Freight Committee, referring to refusal of roads to restore rate on scrap iron, East St. Louis to Louisville and Cincinnati.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 162."

Plaintiff offers in evidence Circular Letter No. B-156, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., December 19th, 1904; File B-376; addressed to members of the St. L. C. L. Freight Committee; advising members

that Western Roads decline to publish rates on sand from Missouri points to C. F. A. territory.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 163."

Plaintiff offers in evidence Circular Letter No. B-155, signed "R. M. Fraser, Chairman;" dated St. Louis, December 17th, 1904; File B-313; addressed to members of the St. L. C. L. Freight Committee; relative to reduction of rates on scrap iron, East St. Louis to Terre Haute. Subject submitted to members as to whether they will restore rate of $1.70 per ton on above commodity from East St. Louis to Louisville and Cincinnati.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 164."

Plaintiff offers in evidence Circular Letter No. B-154, and No. 272, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., December 5th, 1904; Files B-478 and 4313; addressed to members of the St. L. C. L. Freight Committee; relative to Rule 27, Official Classification No. 25; quoting letter addressed by Chairman Fraser to C. E. Gill, Chairman Classification Committee, in New York City, calling attention to the fact that the minimum for cars provided under Rule 27 cannot be enforced under law when a short car is ordered and a longer car furnished; and containing also reply of Mr. C. I. Gill, dated New York, Nov. 2nd, 1904, addressed to Mr. Fraser, St. Louis Mo., and requesting that Rule 27 of the Central Classification Committee be strictly observed.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 165."

Plaintiff offers in evidence Circular Letter No. B-153, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

December 2nd, 1904; File B-376; addressed to members of the St. L. C. L. Freight Committee; quoting letter from member relative to changing rate on sand from Missouri pits to C. F. A. points.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 166."

Plaintiff offers in evidence Circular Letter No. B-152, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., November 30th, 1904; File B-437; addressed to members of the St. L. C. L. Freight Committee; being application for membership in the Committee by the C. P. & St. L. Ry.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 167."

Plaintiff offers in evidence Circular Letter No. B-151, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., November 10th, 1904; File B-392 and A-118; addressed to members of the St. L. C. L. Freight Committee, concerning rates on glass bottles, in carloads; calling attention to 12 cent rate established by the Illinois Terminal Railway, in connection with the T. St. L. & W., from Louisville and Cincinnati; and asking whether members will favor changing the tariff to make reduced rate from East St. Louis and Evansville only.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 168."

Plaintiff offers in evidence Circular Letter No. B-150, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., November 1st, 1904; File B-322, addressed to members of the St. L. C. L. Freight Committee; calling attention to rate on unmanufactured tobacco, Louisville to St. Louis; and notifying members that rate must be changed to meet the Cincinnati competition through that gateway.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 169."

Plaintiff offers in evidence Circular Letter No. B-149, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., October 29th, 1904; File A-118; addressed to members of the St. L. C. L. Freight Committee, referring to change of rate on certain commodities made by the Southern Railway.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 170."

Plaintiff offers in evidence Circular Letter No. B-148, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., October 20th, 1904; File A-118; addressed to members of the St. L. C. L. Freight Committee; concerning rate on glassware; notifying the members that there is in contemplation the establishment of a 15-cent rate, carload lots, on above commodity, Evansville to Louisville, on account of river competition, and asking members as to their views on the proposition.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 171."

Plaintiff offers in evidence Circular Letter No. B-147, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., September 9th, 1904; File B-368; addressed to members of the St. L. C. L. Freight Committee; relative to carrying a higher rate on bar iron in carloads than on cast iron pipe.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 172."

Plaintiff offers in evidence Circular Letter No. B-146, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., September 3rd, 1904; File B-368; addressed to members of the St. L. C. L. Freight Committee, quoting letter from A. G. F. A. Southern Railway, relative to rates from Cincinnati; and being for the information of the members.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 173."

Plaintiff offers in evidence Circular Letter No. B-145, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 30th, 1904; File, B-313; addressed to members of the St. L. C. L. Freight Committee; in reference to establishing rate of $1.40 per gross ton on scrap iron East St. Louis to Louisville; and notifying members that one of the roads, members of the Committee, has published a rate effective August 20th, of $1.40 per gross ton; also notifying members of receipt by Chairman of letter from B. & O. S. W. R. R., that said road would establish the same rate from East St. Louis to Cincinnati on September 3rd, 1904.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 174."

Plaintiff offers in evidence Circular Letter No. B-144, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 29th, 1904; and File B-308; addressed to members of the St. L. C. L. Freight Committee; in reference to proposed rate of 7 cents per 100 lbs. on wheat.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 175."

Plaintiff offers in evidence Circular Letter No. B-143, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 25th, 1904; File B-308; addressed to members of the St. L. C. L. Freight Committee; quoting telegram from member, saying: "Please obtain wire vote of interested lines on proposition to establish proportional rate of 7 cents per 100 lbs., Cincinnati to East St. Louis, on wheat from off connections at Cincinnati. This is the same proportional rate as formerly in effect eastbound," and asking members' views.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 176."

Plaintiff offers in evidence Circular Letter No. B-142, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 24th, 1904; File B-368; addressed to members of the St. L. C. L. Freight Committee; in reference to establishing rate of $1.60 per net ton on cast iron pipe, C. L., Louisville to East St. Louis; and notifying members interested roads advise that they have decided not to make effective proposition in Circular Letter referred to.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 177."

Plaintiff offers in evidence Circular Letter No. B-142, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 24th, 1904; File B-368; addressed to members of the St. L. C. L. Freight Committee; in reference to establishing rate of $1.60 per net ton on cast iron pipe, Louisville to East St. Louis.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 178."

Plaintiff offers in evidence Circular Letter No. B-141, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 22nd, 1904; File B-445; addressed to members of the St. L. C. L. Freight Committee; notifying members that Chairman is in receipt of letter from member, which follows, and quotes from same, in reference to broom-corn, C. L., East St. Louis to Louisville, and asking Chairman to embody proposition for proportional tariff changing existing rate, which proposition was submitted by the above described letter.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 179."

Plaintiff offers in evidence Circular Letter No. E-140, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

August 17th, 1904; File B-313; addressed to members of the St. L. C. L. Freight Committee; in reference to establishing rate of $1.40 per gross ton on scrap iron, East St. Louis to Louisville; quoting letter from A. G. F. A., Southern Ry., dated Aug. 15th, stating that the Southern Road had decided proper to make rate of $1.40 per gross ton on scrap iron, East St. Louis to Louisville.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 180."

Plaintiff offers in evidence Circular Letter No. B-139, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 15th, 1904; File B-368; addressed to members of the St. L. C. L. Freight Committee; notifying members of receipt by Chairman of letter relative to rate adjustment on pipe from Louisville to East St. Louis, and that the member writing would make effective a rate of $1.60 per ton from Louisville to East St. Louis, and asking to have views of other members of the Committee.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 181."

Plaintiff offers in evidence Circular Letter No. B-138, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 9th, 1904; File B-313; addressed to members of the St. L. C. L. Freight Committee; advising them that after investigation the roads interested advise that it has been decided not to make effective the proposition in Circular No. B-136, dated August 4th, 1904, regarding rate of $1.40 per gross ton on scrap iron, C. L. lots.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 182."

Plaintiff offers in evidence Circular Letter No. B-137, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.;

August 4th, 1904; File A-117; addressed to members of the St. L. C. L. Freight Committee; referring to Circular No. B-134, dated July 26th, 1904, in reference to establishing rate on wrapping paper, C. L., from Evansville to Louisville; and advising that interested roads have decided not to make effective proposition to change the rate.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 183".

Plaintiff offers in evidence Circular Letter No. B-136, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., August 4th, 1904; File B-313; addressed to the members of the St. L. C. L. Freight Committee; notifying members of receipt of letter from a member relative to rate on scrap iron, East St. Louis to Louisville, and stating that it is necessary to make effective a rate from East St. Louis not higher than the rate to Chicago, which is $1.40 per ton; and asking Mr. Fraser to submit the question for views of members, which Mr. Fraser accordingly does in this letter.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 184".

Plaintiff offers in evidence Circular Letter No. B-135, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., July 28th, 1904; File B-476; addressed to members of the St. Louis-Cincinnati-Louisville Freight Committee; referring to Circular Letter B-133, dated July 13th, relative to establishing rate of 17 cents per 100 lbs., on kitchen safes, C. L., from Louisville to East St. Louis; notifying members roads interested decided not to make proposition effective.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 185".

Plaintiff offers in evidence Circular Letter No. B-134, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

July 26th, 1904; File A-117; addressed to members of the St. L. C. L. Freight Committee; notifying that Fraser is in receipt of letter from the Southern Railway, stating that this road had under consideration adoption via its line of the following rate: Wrapping paper, C. L., minimum weight, 40,000 lbs., from Evansville, Ind., to Louisville, Ky., 6 cents per 100 lbs.; and requesting Fraser to get the views of other lines interested.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 186".

Plaintiff offers in evidence Circular Letter No. B-133, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.; July 13th, 1904; File B-476; addressed to members of the St. L. C. L. Freight Committee; notifying them that Fraser is in receipt of letter from member relative to rate adjustment on kitchen safes, Louisville to East St. Louis; and asking for views of members as to whether Joint Freight Tariff on the articles named should be changed.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 187".

Plaintiff offers in evidence Circular Letter No. B-132, signed "R. M. Fraser, Chairman"; dated St. Louis, Mo., July 15th, 1904; File B-442; addressed to members of the St. L. C. L. Freight Committee; notifying them that Fraser is in receipt of letter from member stating that present classification rate on wool and grease, East St. Louis to Louisville, 34 cents per 100 lbs., and scoured wool, 40 cents per 100 lbs.; and that the commodity rate in effect from East St. Louis to western Termini points is 33½ cents per 100 lbs., or ½ cent lower than the rate to Louisville. This great difference in the rate tends to throw the wool from Louisville. And member asks for reinstatement of former rate of 25 cents per 100 lbs. from Louisville on wool in grease;

and requests Fraser to submit the question to members for their views. Which Fraser accordingly does.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 188".

Plaintiff offers in evidence Circular Letter No. B-131, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., June 18th, 1904; File B-474; addressed to members of the St. L. C. L. Freight Committee, notifying them that Fraser is in receipt of letter from a member, saying, "My attention has been called to question of minimum weight on potatoes, from Texas points to Cincinnati and Louisville. A claim is made that when the traffic moves via Memphis the minimum weight of 20,000 lbs. is protected through. As you are aware, the minimum north of Cairo and east of East St. Louis is 30,000 lbs. The maintenance of this minimum weight via this gateway will naturally force the traffic via Memphis, inasmuch as the traffic will not load to the required weight of 30,000 lbs." Also requesting that Fraser place the matter before the Committee, relative to advisability of participating in through rates from Texas points to Cincinnati and Louisville, based on minimum of 20,000 lbs.; which Fraser did accordingly.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 189".

Plaintiff offers in evidence Circular Letter No. B-130, signed "R. M. Fraser, Chairman"; dated St. Louis, Mo., June 6th, 1904; File B-473; addressed to members of the St. L. C. L. Freight Committee; in regard to rate on talc, C. L., between East St. Louis and Cincinnati and Louisville, quoting letter from a member relative to changing rate on above commodity.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 190".

Plaintiff offers in evidence Circular Letter signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 28th, 1904; File B-345; addressed to members of the St. L. C. L. Freight Committee, notifying them that members of the Committee are opposed to changing rate on enameled brick from commodity rate.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 191".

Plaintiff offers in evidence Circular Letter No. B-129, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 20th, 1904; File B-461; addressed to members of the St. L. C. L. Freight Committee, quoting telegram from G. F. A. B. & O. S. W. R. R. regarding return transportation for attendants in charge of live stock.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 192".

Plaintiff offers in evidence Circular Letter No. B-128, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 10th, 1904; File B-304; addressed to members of the St. L. C. L. Freight Committee, relative to next place of holding meeting.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 193"

Plaintiff offers in evidence Circular Letter No. B-127, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 2nd, 1904; File B-313; addressed to members of the St. L. C. L. Freight Committee relative to rate on scrap iron; notifying members that roads interested have decided not to make effective proposition in Circular Letter No. B-125, dated April 22nd, 1904.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 194".

Plaintiff offers in evidence Circular Letter No. B-126, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., May 2nd, 1904; File B-462; addresed to members of the St. L. C. L. Freight Committee; relative to rate on dressed meats and packing-house products; notifying members that Fraser is in receipt of letter from member of Committee, saying it was ruled by the C. F. A. that on packing-house products, in cars with dressed meats, the packing-house products to make up the minimum would be charged for as actual weight; and asking that similar arrangement be immediately made effective between East St. Louis and Cincinnati and Louisville, etc.; which proposition was submitted by Fraser to the members.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 195".

Plaintiff offers in evidence Circular Letter No. B-125, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., April 22nd, 1904; File B-313; addressed to members of the St. L. C. L. Freight Committee; relative to rate on scrap iron, C. L.; quoting letter from member, and asking for change of rates; proposition submitted.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 196".

Plaintiff offers in evidence Circular Letter No. B-124, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.; April 18th, 1904; File B-345; addressed to members of the St. L. C. L. Freight Committee; relative to proposition to except enameled brick from commodity rating.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 197".

Plaintiff offers in evidence Circular Letter No. B-123, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

April 14th, 1904; File B-467; addressed to members of the St. L. C. L. Freight Committee; relative to Portland cement, East St. Louis to Cincinnati and Louisville; quoting copy of letter from member to Mr. Fraser, saying member desires to establish 8½-cent rate on Portland cement, C. L., minimum 40,000 lbs., East St. Louis to Cincinnati and Louisville, the present rate being 12 cents; and asking that the proposed change be submitted to members of the Committee, and that he be advised of their views; which Fraser accordingly did.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 198".

Plaintiff offers in evidence Circular Letter No. B-122, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., March 21st, 1904; File B-471; addressed to members of the St. L. C. L. Freight Committee; relative to rate on artesian well water, De Soto, Mo., to Louisville, Ky.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 199".

Plaintiff offers in evidence Circular Letter No. B-121, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo. March 16th, 1904; File B-304; addressed to members of the St. L. C. L. Freight Committee, notifying them of the time and place of next meeting.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 200".

At this point recess was taken until 2:30 P. M.

After recess on Monday, November 19th, the following proceedings were had:

Plaintiff offers in evidence Circular Letter No. B-120, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo.,

March 16th, 1904; File B-420; addressed to members of the St. L. C. L. Freight Committee; regarding rates on railroad ties between points in C. F. A. territory; containing copy of letter from member relative to tariff on above-named commodities as being published without restrictions from Cincinnati and Louisville, etc., naturally forcing the application of a ten-cent rate from directly intermediate points in Indiana to East St. Louis, and asking that same rate be made by St. L. C. L. Frt. Committee; submitted to members.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 201".

Plaintiff offers in evidence Circular Letter No. B-119, signed "R. M. Fraser, Chairman;" dated St. Louis, March 16th, 1904; File B-446; addressed to members of the St. L. C. L. Freight Committee; concerning basis for division of rates on government freight to points west of the Mississippi River. It refers to instructions given at meeting of February 3rd, 1904, and transmitted by letter of Feb. 8th to traffic representatives of the named roads; and quotes letter from said representatives, dated Feb. 25th, 1904; all for the information of the members.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 202".

Plaintiff offers in evidence Circular Letter No. B-118, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., March 10th, 1904; File B-471; addressed to members of the St. L. C. L. Freight Committee; referring to circular letter No. B-116, dated Feb. 26th, as to establishing rate of 5 cents per 100 lbs. on artesian well water, East St. Louis to Louisville, Ky.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 203".

Plaintiff offers in evidence Circular Letter No. B-117, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., March 2nd, 1904; File B-461; addressed to members of the St. L. C. L. Freight Committee; relative to return transportation for attendants in charge of live stock.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 204".

Plaintiff offers in evidence Circular Letter No. B-116, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., February 26th, 1904; File B-471; addressed to members of the St. L. C. L. Freight Committee, relative to rate on artesian well water, De Soto, Mo., to Louisville, Ky.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 205".

Plaintiff offers in evidence Circular Letter No. B-115, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., February 17th, 1904; File B-462; addressed to members of the St. L. C. L. Freight Committee; concerning rates on mixed carloads dressed meats and packing-house products, East St. Louis to Louisville; notifying members that Fraser had written to Chief Inspector for information, and received reply saying that all lines from Chicago and other points are observing the terms of the C. F. A. issues on shipments of packing-house products and dressed meats; and that the contention that the St. L. C. L. Frt. Committee's freight tariff No. I. C. C. B-36 justifies the use of the 12-cent rate is untenable. Also notifying the members that this information was communicated, Feb. 10th, to A. G. F. A. Southern Ry., and reply received stating that he had changed his instructions to agent at East St. Louis, directing him to charge on packing-house products actual weight, C. L. rate of 15 cents per 100 lbs., when destination is Louisville, and points beyond.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 206".

Plaintiff offers in evidence Circular Letter No. B-114, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., February 15th, 1904; File B-461; addressed to members of the St. L. C. L. Freight Committee; relative to transportation for attendants in charge of live stock shipments from Illinois territory to Cincinnati, Indianapolis and Louisville.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 207".

Plaintiff offers in evidence Circular Letter No. B-113, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., February 10th, 1904; addresed to members of the St. L. C. L. Freight Committee; File B-447; in regard to division of rates from Louisville to Indian and Oklahoma Territory points, via East St. Louis.

Above Exhibit is marked "Plaintiff's Exhibit Fraser No. 208".

Plaintiff offers in evidence Circular Letter No. B-112, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., January 30th, 1904; File B-445; addresed to members of the St. L. C. L. Freight Committee; referring to Circular Letter No. B-103, Oct. 12th, and Proceedings No. B-24, Nov. 25th, 1903, regarding rate on broom corn, C. L., Indian and Oklahoma Territories, via East St. Louis to Louisville. Also acknowledges receipt of Mo. Pacific Joint Freight Tariff in connection with Kansas City, Mexico & Orient Ry., dated Jan. 27th, effective Feb. 2nd, 1904, applying on same commodity, C. L., naming through rates of 72½ and 73½ cents per 100 lbs., from points on the K. C. M. & O. Ry. via East St. Louis to Louisville, Ky. All of which is for the information of the members.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 209".

Plaintiff offers in evidence Circular Letter No. B-111, marked "Important"; signed "R. M. Fraser, Chairman"; dated St. Louis, Mo., January 25th, 1904; File B-304; addressed to members of the St. L. C. L. Freight Committee; referring to Circular Letter No. B-110, January 22nd; and notifying members that, two-thirds of the Committee having given their consent, the meeting for the 27th is postponed, and notifying members that the meeting will be held at the Louisville Hotel, Louisville, Ky., Wednesday, Feb. 3rd.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 210".

Plaintiff offers in evidence Circular Letter No. B-110, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., January 22nd, 1904; File B-304; addressed to members of the St. L. C. L. Freight Committee; giving copy of letter from G. F. A. Henderson Route, stating with reference to announcement of the next regular meeting, that it would be impossible to attend, and asking for a postponement.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 211".

Plaintiff offers in evidence Circular Letter No. B-109, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., December 26th, 1903; File B-446; addressed to members of the St. L. C. L. Freight Committee; giving copy of letter from G. F. A. B. & O. S. W. R. R., dated Cincinnati, Ohio, December 23, 1903—Subject, Basis for division of rates on government freight to points west of the Mississippi River; and notifying the members, through the letter, that Notice, dated St. Louis, Nov. 25th, has just reached the B. & O. S. W., bearing signatures of W. Gray, for the Burlington Route; J. C. Lincoln, for the Mo. Pacific; W. B. Groseclose, for the M. K. & T.; and F. A. Wann, for the C.

& A.; saying that in view of notice to various western lines that effective on August 1st, 1903, on shipments of government freight from Jeffersonville to points west of the Mississippi River, on which the lowest through land grant rate is figured by use of the duly authorized and published rates from Jeffersonville to Upper Mississippi River crossings, applicable to Trans-Mississippi River traffic, would require in final settlement 92½ per cent of the full local rate to East St. Louis; and this letter is to advise for account of our respective lines that said divisions through East St. Louis for land grant rates figured via Chicago and East Hannibal should, in all fairness, be made by applying a pro-rate per rate to the net through rate, using as factors tariff rates from Jeffersonville to East St. Louis, and from East St. Louis to point of destination. And after January 1st, the B. & O. S. W. will require said divisions on shipments handled over other lines in connection with said road to point of destination. Quoting this letter, and asking views of members as to whether or not the business for trans-Mississippi points be accepted under these conditions.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 212."

Plaintiff offers in evidence Circular Letter No. B-108, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., December 21st, 1903; File B-330; addressed to members of the St. L. C. L. Freight Committee; stating that Fraser is in receipt of letter from member of Committee, calling attention to the fact that C. & O. R. tariff naming rate on soap-stock, etc., provides for a minimum of 35,000 lbs., whereas the St. L. C. L. Frt. Committee carries minimum of 40,000 lbs., thus throwing the St. Louis gateway out of line on soap-stock coming from the West, as compared with Chicago; as asking that matter be taken up with the members of the Committee, with a view to having the minimum

via East St. Louis put in line with Chicago. Also informing the members of Supplement No. 13 to C. & O. R. Through Freight Tariff No. 46, in reference to capacity of car; and also calling attention to Proceedings No. B-24, Nov. 25th, 1903, page 2, and Circular Letter No. B-10, Dec. 16th, which authorizes on cotton-seed products minimum carload weight, in wood 30,000 lbs., in tanks capacity of tank, as shown in Amendment No. 4 to Joint Proportional Tariff I. C. C. No. B-37, effective January 1st, 1904. And asking for views of members as to whether amendment should issue to above-named I. C. C. tariff rate.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 213".

Plaintiff offers in evidence Circular Letter, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., Dec. 24th, 1903; Files 4261 and B-461; addressed to members of the St. L. C. L. Freight Committee; being notice to all East-side lines of result of action taken at meeting in the Commercial Building, December 22nd, 1903, regarding transportation for attendants in charge of live stock, etc.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 214."

Plaintiff offers in evidence Circular Letter No. B-107½, signed "R. M. Fraser, Chairman;" dated St. Louis, December 16th, 1903; File B-465; addressed to members of the St. L. C. L. Freight Committee; concerning cotton seed products, proportional rates from East St. Louis, Cairo, Gale, East Cape Girardeau and Thebes, on shipments originating west of the Mississippi River; and advising members that action of meeting of November 25th on above subject was communicated to the C. & E. I., Big Four, and Ill. Central by letter Nov. 27th, and that Fraser is in receipt of replies to the effect that the proper differentials over East

St. Louis, as outlined in the proceedings, will be maintained from Cairo, etc., from this time on. Also advising members that copies of these proceedings will be sent at once to G. F. A. Mo. Pacific, Iron Mountain Ry., Chairman Arkansas Frt. Committee, and Chairman Southwestern Tariff Committee, giving them notice of the rates or divisions effective on the traffic above named.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 215".

Plaintiff offers in evidence Circular Letter No. B-107, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., December 8th, 1903; File B-464; addressed to members of the St. L. C. L. Freight Committee; referring to proceedings No. B-24, Nov. 25th, regarding application of pig lead rates on antimonial pig lead; and advising that the road referred to is not disposed to honor the correction, for the reason that a road, not a member of this Committee, has advised that their tariffs are all amended authorizing the application of pig lead rates on antimonial pig lead to points in C. F. A. territory, not excepting Cincinnati, Louisville, etc.; and asking members, in view of the above, to advise whether or not they would consent to amendment to above tariff.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 216".

Plaintiff offers in evidence Circular Letter No. B-106, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., October 21st, 1903; File B-351; addressed to members of the St. L. C. L. Freight Committee; referring to Circular Letter No. 102, dated Oct. 7th, regarding rate on Portland cement, C. L., East St. Louis to Louisville, Ky.; and notifying the members that roads interested have investigated the matter, and advise that they will not make effective the

proposition in Circular Letter above referred to, to change the rate; and that to reduce rate on Portland cement from East St. Louis would force reduction from other points covered by C. F. A. Information No. 3845, and Amendment No. 2 (Information Circular No. 3998). Members notified that this subject will be on the docket for consideration at next meeting.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 217."

Plaintiff offers in evidence Circular Letter No. B-105, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., October 19th, 1903; File B-450; addressed to members of the St. L. C. L. Freight Committee; concerning rate on whiskey from points in defined territory to Arkansas points; refers to Proceedings No. B-23, Sept, 23rd, 1903, page 4. Also gives copy of letter from Chairman Arkansas Freight Committee referring to question of rates on whiskey from interstate points to Arkansas points, advising that by this mail Fraser would receive copy of Rate Notice establishing lowest combination of locals via all crossings, same to be equalized via any other crossing on whiskey, Interstate points to Arkansas common points, effective 22nd inst. And also containing copy of Notice giving rate on whiskey, being Rate Notice No. I. C. C. B-763, signed "Geo. W. Cale, Chairman Arkansas Frt. Committee."

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 218".

Plaintiff offers in evidence Circular Letter No. B-104, signed "R. M. Fraser, Chairman;" dated St. Louis, October 13th, 1903; File B-461; addressed to members of the St. L. C. L. Freight Committee; cancelling Circular Letter No. B-100; containing rules to govern shipments of live

stock from East St. Louis to Louisville and Cincinnati, and return transportation for some classes of travel.

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 219."

Plaintiff offers in evidence Circular Letter No. B-103, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., Oct. 12th, 1903; File B-445; addressed to members of the St. L. C. L. Freight Committee; notifying members that Fraser is in receipt of letter from member, referring to action of the St. L. C. L. Frt. Committee at meeting on Sept. 23rd, as outlined in Proceedings No. B-23, when it was decided to make no change in current rates on broom corn, East St. Louis to Louisville; and saying that all Memphis lines are accepting rate of 25 cents per 100 lbs. on broom corn, out of through rates published by the Choctaw, Oklahoma & Gulf Ry. from all points on that road; and that same rates are carried from Indiana and Oklahoma Territory points to East St. Louis, and this gateway is, therefore, out of line on that traffic to the extent of the difference between Memphis and East St. Louis rates to Louisville, namely 9 cents per 100 lbs.; and asking for change of rates, and submission of this question to members of the St. L. C. L. Frt. Committee for their approval or rejection. The present rate is 34 cents per 100 lbs., Official Classification basis. Letter calls for vote.

Above exhibit is marked "Plainiff's Exhibit Fraser No. 220."

Plaintiff offers in evidence Circular Letter No. B-102, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., October 7th, 1903; File B-351; addresed to members of the St. L. C. L. Freight Committee; notifying them of letter of Oct. 6th, File C-30, from A. G. F. A. Southern Ry., saying the Southern Ry. has under consideration adoption

of the following rates: 7 cents per cwt. on Portland cement, C. L., minimum 40,000 lbs., from East St. Louis to Louisville, New Albany and Jeffersonville, same rate being in effect in the opposite direction; and asking that views of other lines be obtained. Matter submitted by this letter to members for their approval or rejection.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 221".

Plaintiff offers in evidence Circular Letter No. B-101, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., Oct. 5th, 1903; File B-314; addressed to members of the St. L. C. L. Freight Committee; notifying members that on receipt of C. F. A. Information No. 4655, Sept. 30th, naming rate on whiskey, Amendments to St. L. C. L. Frt. Committee Tariffs were printed and ready to mail, effective October 15th; and notice having been received from several members that the proposed change would not take effect on the date named, the tariffs would not be issued until further notice.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 222".

Plaintiff offers in evidence Circular Letter No. B-100, signed "R. M. Fraser, Chaiman;" dated October 1st, 1903, St. Louis, Mo.; File B-461; addressed to members of the St. L. C. L. Freight Committee; notifying them that as provided for and adopted at meeting of September 23rd (See Proceedings No. B-23), Fraser gives with this letter copy of rules governing transportation of live stock shippers or attendants.

Above exhibit, consisting of two pages, is marked "Plaintiff's Exhibit Fraser No. 223".

Plaintiff offers in evidence Circular Letter No. B-99, marked "Important;" signed "R. M. Fraser, Chairman";

dated St. Louis, Mo., September 18th, 1903; File B-304; addressed to members of the St. L. C. L. Freight Committee, referring to telegram of the 17th from Mr. C. [illegible]rister, A. G. F. A. Big Four Ry., requesting meeting called for Cincinnati, Sept. 23rd, be postponed.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 224".

Plaintiff offers in evidence Circular Letter No. B-98, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., September 14th, 1903; File B-351; addressed to members of the St. L. C. L. Freight Committee; notifying members that Fraser is in receipt of letter from member of Committee, saying that said member had application from the St. Louis and San Francisco R. R. for publication of 17½ cents per 100 lbs. on cement, C. L., minimum 40,000 lbs., from Marlow, Ind. Ty., to Cincinnati, Louisville and New Albany; the rate to divide 11½ cents per 100 lbs. to East St. Louis, and 6 cents East St. Louis to Cincinnati, Louisville and New Albany; and that said road would publish through tariff and division sheet same as now done from Texas points to same points named above; allowing the same proportion to East St. Louis as now carried on Texas traffic; and asking that this be submitted to Committee by letter vote, and asking for letter of authority. The letter also submits the proposition as requested to members for their vote.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 225."

Plaintiff offers in evidence Circular Letter N. B-97, signed "R. M. Fraser, Chairman;" dated St. Louis, Mo., September 3rd, 1903; File B-377; addressed to members of the St. L. C. L. Freight Committee; giving rate on asphalt, East St. Louis to Cincinnati and Louisville, when

from Texas; and referring to proceedings theretofore had.

Above exhibit is marked "Plaintiff's Exhibit Fraser No. 226".
